

# HERITAGE<sup>®</sup>

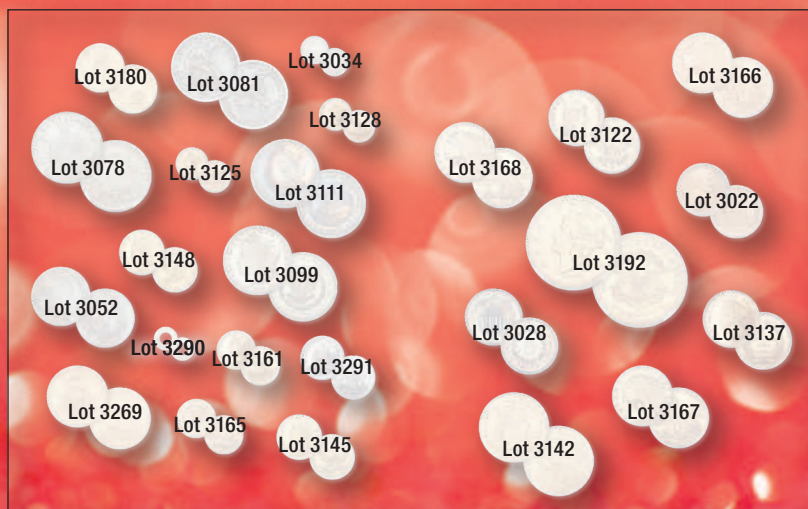

U.S. COIN AUCTION  
MARCH 29-31, 2018 | DALLAS

Lot 3192

## Heritage Signature® Auction #1273

# U.S. Coins

Featuring: The Glacier Park Collection • The Loma Linda Collection, Part III • The Property of a Lady, Part II • The jwb1040 Collection, Part II

March 29-31, 2018 | Dallas

### Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room  
3500 Maple Avenue • Dallas, TX 75219

#### Session 1 PREMIER

Thursday, March 29 • 6:00 PM CT • Lots 3001–3291

#### Session 2

Friday, March 30 • 1:00 PM CT • Lots 3292–3879

#### Session 3

Friday, March 30 • 6:00 PM CT • Lots 3880–4385

### Signature® Internet Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

#### Session 4

Saturday, March 31 • 3:00 PM CT • Lots 7001–8119

### LOT SETTLEMENT AND PICK-UP

Friday, March 30 • 10:00 AM – 1:00 PM CT

Monday, April 2 • 10:00 AM – 1:00 PM CT

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

#### Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

TX Auctioneer Licenses: Teia Baber 16624; Edward Beardsley 16632; Sarah Davies 17505; Sophie Duncan 17901; Christopher Dykstra; 16601; Fiona Elias 17126; Francesca Felgar 17902; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Gregory Holman 17653; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Paul Minshull 16591; Rochelle Mortenson 17898; Brian Nalley 17134; Scott Peterson 13256; Michael Provenzale 17157; Catherine Rigdon 17897; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Jacob Walker 16413; Brian Wiedman 17894; Adam Williams 17893; Phillip Wooten 17656.

### PRELIMINARY LOT VIEWING

By appointment only. Contact Roy Porras at 214-409-1295 or [RoyP@HA.com](mailto:RoyP@HA.com) (All times subject to change).

Heritage Auctions, Dallas • 17th Floor  
3500 Maple Avenue • Dallas, TX 75219

Monday, March 12 – Wednesday, March 28  
9:00 AM – 6:00 PM CT (Excluding Weekends)

### LOT VIEWING

Heritage Auctions, Dallas • 17th Floor  
3500 Maple Avenue • Dallas, TX 75219

Thursday, March 29 – Friday, March 30  
9:00 AM – 6:00 PM CT

### BIDDING METHODS

#### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

#### Live Floor Bidding

Bid in person during the floor sessions.

#### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

#### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. [HA.com/1273](http://HA.com/1273)

#### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Direct Client Service Line: 866-835-3243

Dear Bidder,

Multiple records were set at Heritage's recently completed official Long Beach Expo U.S. Coins auction, which realized more than \$20 million. We believe more strong results are in store – not just at the current Dallas event, but also for the upcoming Central States auction, which is shaping up as a top event with many large and important collections already in the fold.

Special lots in our Dallas auction are numerous. The star is an 1854-O double eagle, certified XF45 NGC, a newly discovered example that is a new addition to the roster of known 1854-O twenties. Other notable lots include:

- A resplendent 1907 High Relief Wire Rim Saint-Gaudens double eagle graded MS66 NGC.
- A 1922 No D Lincoln cent, FS-401, Die Pair 2 (Strong Reverse), MS63 PCGS Red – exceedingly rare in Full Red.
- A 1929 Indian half eagle certified MS64+ PCGS with CAC endorsement, the elusive key to the Indian Head five series.
- A stunning 1866 With Motto Seated dollar certified PR65 Deep Cameo, nearly brilliant with a showcase strike and intense contrast.

Featured Collections provide an important foundation for any auction, and the four Featured Collections in this catalog deserve mention here:

### **The Glacier Park Collection**

Coins from this consignment make up nearly 10% of the Premier Session, focused on high-grade U.S. type in both circulation strike and proof formats. A stunning 1881 three dollar gold piece certified PR66 Cameo PCGS with CAC endorsement leads the way, along with an amazing 1882 quarter eagle certified MS67 PCGS in its first-known auction appearance, tied at the top of the Condition Census with one other coin.

### **The Loma Linda Collection, Part III**

Ever since its memorable first appearance in January's FUN auction, The Loma Linda Collection has delighted bidders with its range of rare varieties representing early copper and silver series, including half cents, large cents, quarters, and half dollars. Large cents make up the entirety of this current installment, including the fifth-finest of eight known NC-7 large cents.

### **The Property of a Lady, Part II**

The Property of a Lady helped headline our record-setting Long Beach event, with a wide-ranging collection of silver type that was assembled in the 1960s, then not seen again at auction in the past 50 years. We are pleased to present additional selections from The Property of a Lady here in Dallas, including a run of 18 memorable Seated and Barber half dollar proofs.

### **The jwb1040 Collection, Part II**

More outstanding Washington quarters come from The jwb1040 Collection. The collection made an auspicious debut at Long Beach, and it is sure to attract legions of Washington quarter collectors to these additional lots from John W. Borst, who assembled the PCGS all-time finest Registry Set of Washington Quarters with Major Varieties.

It promises to be a great time in Dallas. Join your friends, clients, and dealer associates for a great event and an all-around good time. The auction venue is Heritage's World Headquarters (3500 Maple Avenue), where we stand ready to serve any of your numismatic or bidding questions, as well as discuss future consignments. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGELive!®.

We look forward to seeing you here!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

## SESSION ONE

## COLONIAL

1783 Chalmers Shilling, VF25  
Long Worm, W-1790

- 3001** 1783 Chalmers Shilling, Long Worm VF25 PCGS. Breen-1012, W-1790, R.4. Most design detail remains clear on this Chalmers shilling. The strike is uneven between 3 and 5 o'clock on the obverse and the corresponding area on the reverse, blending the motifs somewhat. Still, about 85% to 90% of the legends and denticles are present. Smooth silver-gray patina with specks of gunmetal patina. Listed on page 53 of the 2018 *Guide Book*. NGC ID# 2AUT, PCGS# 595

## HALF CENTS

1796 C-2, B-2 Half Cent, Good Details  
With Pole Obverse

- 3002** 1796 With Pole, C-2, B-2, High R.4 — Environmental Damage — PCGS Secure Genuine. Good Details. The 1796 half cent is easily the rarest circulation strike issue of the denomination that was issued from 1793 through 1857. Two die varieties are identified by the presence or lack of a pole to the Liberty Cap on the obverse. About two dozen examples of the No Pole variety exist, and possibly as many as 100 survive of the With Pole variant. The typical surviving example is apt to be in low grade, usually with moderate to heavy porosity. While the present piece is a typical low-grade example, the olive and steel-brown surfaces are much more pleasing than usual. Numerous old scratches are blended with the surrounding surface and they are only visible with a glass. A pleasing representative that will allow the new owner to mark off another example from his or her want list. Our EAC grade Good 4.

1797 1 Above 1 Half Cent, XF45  
Late Die State C-1, B-1

- 3003** 1797 1 Above 1, C-1, B-1, R.2, XF45 NGC. The misplaced 1 is positioned above the final 1 in the date and is diagnostic for the C-1, B-1 die pair. Manley Die State 5.0. The RTY in LIBERTY and the ICA in AMERICA are missing as a result of the severe die failure that is evident at the upper-right obverse and lower-right reverse on this late die state example. Rich mahogany-brown surfaces are smooth and attractive. Our EAC grade VF25. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

PROOF HALF CENT

1852 B-2 Half Cent, PR64 Brown  
Proof-Only Issue

- 3004** 1852 Restrike, Small Berries, B-2, R.5, PR64 Brown PCGS. The small berries and doubled T in CENT are diagnostic for the Breen-2 variety. The 1852 is the sole proof-only issue from 1850 to 1857, and since original proof strikings are extremely rare, the small berries restrikes are the only readily obtainable examples of the date. Well struck except for the upper dentils on each side, this attractive near-Gem possesses rich olive-yellow and golden-brown patina. The reverse is beautifully preserved, while only the closest inspection of the obverse field reveals faint hairlines. Our EAC grade PR60. Population: 13 in 64 Brown, 5 finer (2/18).  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 5103; Palm Beach Signature (Heritage, 11/2004), lot 5077.*  
**From The Glacier Park Collection.** NGC ID# 262T, PCGS# 1317 Base PCGS# 35402

LARGE CENTS

1793 S-3, B-4 Chain Cent, Good 4  
Virtually Flawless Surfaces

- 3005** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Good 4 PCGS. This well-worn Chain AMERICA cent is from the dies of Sheldon-3, the most plentiful variety of the design. The light brown surfaces of this splendid cent exhibit faint hairlines on each side, along with trivial handling marks, none that are of any consequence. Our EAC grade AG3. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-6, B-7 Wreath Cent, VF30  
The Sprung Die

- 3006** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3, VF30 NGC. EX: Carlyle Luer Collection. A horizontal die bulge in the left obverse field gives this variety its name. In his first reference, *Early American Cents*, published in 1949, Dr. Sheldon referred to the 1793 cents by their Crosby numbers, in this case 7-F:

“There is always a bulge or convexity on the obverse, running from back of the hair to the rim, and this is so prominent a hallmark of the 7-F that the variety can be recognized at a glance. It is supposed that the die was a little ‘sprung,’ or ‘caved,’ and the 7-F has long been known as the Sprung Die variety.”

A few trivial surface anomalies are evident on this highly pleasing olive and steel-brown cent. Those marks appear as laminations from the time this piece was struck. A glass reveals faint granularity on each side of this nicely centered and attractive cent. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

1793 S-10, B-10 Wreath Cent, VF35  
Vine and Bars Edge

- 3007** 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4, VF35 PCGS. A delightful example of the Sheldon-10 die marriage, this cent exhibits pleasing olive and light brown surfaces with trivial handling marks evident on each side that are consistent with the grade. A few inconsequential dents and minor planchet laminations are noted. This variety is scarce with a rather low Condition Census. Our EAC grade Fine 15. NGC ID# 223H, PCGS# 35462 Base PCGS# 1347

1793 S-13, B-20 Cent, VG Details  
Popular Liberty Cap Variety

- 3008** 1793 Liberty Cap, S-13, B-20, Low R.4 — Corroded — ANACS. VG Details, Net Good 4. Walnut and steel-brown are blended together on both sides of this lightly corroded cent that exhibits light vertical scratches in the center of the obverse. The date and all lettering are visible on both sides. Sheldon-13 is the most plentiful 1793 Liberty Cap variety and an ideal choice for *Guide Book* collectors. Our EAC grade AG3. NGC ID# 223L, PCGS# 35489 Base PCGS# 1359

1804 Draped Bust Cent, Fine 15  
Scarce Early Issue, S-266c  
Late Die State

- 3009** 1804 S-266c, B-1, R.2, Fine 15 PCGS. Breen Die State IV. The 1804 cent is a challenging date that is scarce in all grades, and frequently missing from even long-formed collections. This Choice Fine example is relatively smooth for the issue and grade, with deep chocolate-brown surfaces that show scattered light marks and a few small planchet voids, as well as a small obverse rim bump at 2 o'clock. Struck from an advanced die stage as defined by lengthy rim cuds above RTY of LIBERTY and MERIC of AMERICA. Our EAC grade VG8. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

1812 S-289, B-4 Cent, MS62 Brown  
Scarce Large Date Variety

**3010 1812 Large Date, S-289, B-4, R.1, MS62 Brown PCGS.** Breen Die State II, with light flowlines but before the obverse stars were “pulled” toward the border. Although the S-289 is rated Rarity-1, it is an elusive variety in higher grades, with only two Mint State examples appearing in Del Bland’s Condition Census. This piece is likely one of the six or seven finest of the variety. Fully lustrous light brown surfaces are virtually flawless with sharp design features. Our EAC grade AU55. NGC ID# 224W, PCGS# 36508 Base PCGS# 1564

## PROOF FLYING EAGLE CENT

1856 Flying Eagle Cent  
Snow-9, Judd-180, PR64

**3011 1856 Snow-9 PR64 PCGS.** Several hundred proof (or pattern) Flying Eagle cents were made in 1856, and delivered to congress for approval on the proposed size reduction of the denomination. When collectors became aware of these pieces, demand grew rapidly, and the Mint struck more of the 1856-dated cents in the following few years for direct sale to collectors, with a final production total estimated between 1,500 and 2,500 coins. Debate continues on whether or not the entire mintage was of proofs, or if the restrikes were from regular production dies, but whatever the case, any Flying Eagle cent bearing the date 1856 remains highly sought-after.

This near-Gem exhibits rich coppery hues beneath the golden-brown patina over each side, with bold design definition and excellent surface preservation. A visually appealing example of this storied, low-mintage issue.

Ex: Long Beach Signature (Heritage, 6/2014), lot 4273. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

## INDIAN CENTS

1877 Indian Cent, MS64+ Red and Brown  
Low-Mintage Key Date

- 3012 1877 MS64+ Red and Brown PCGS. CAC.** Due to economic difficulties, nearly 10 million unneeded cents were returned to the Mint in 1877, most of which were then reissued in place of new coinage. The resulting low mintage of the 1877 cent makes it the scarcest of all business-strike Indian cent issues, and most extant pieces are well-worn. This satiny near-Gem retains much of its original coppery luster beneath rich burgundy overtones, and the surfaces are free of any noticeable imperfections. Some minor softness of strike is seen on the tips of select feathers and on the reverse bow, though the overall eye appeal is excellent for this key-date issue.

Ex: Long Beach Signature (Heritage, 6/2014), lot 4283. NGC ID# 2284, PCGS# 2128

1886 Type One Cent, MS66 Red  
Rare This Fine

- 3013 1886 Type One MS66 Red PCGS.** The border legend wraps around closer to the date on the Type One 1886 cent. Both varieties are elusive in high grade with full Red luster and are major rarities at the MS66 Red level. PCGS lists only six examples of each in this condition and none finer (2/18). Examples of the 1886 cent in this top grade appear at auction so infrequently that it is possible there are fewer top-grade pieces known than the certification services report.

This Premium Gem Type One coin displays a touch of gold at 12 o'clock on each side but is otherwise deep copper-orange and cherry-red. The strike is sharp and almost no carbon is visible. A major Registry Set opportunity. NGC ID# 228D, PCGS# 2156

1887 Cent, MS66 Red  
Rare in This Condition

- 3014 1887 MS66 Red PCGS.** A conditionally rare, high-end example of this otherwise plentiful Indian cent issue, showing satiny copper-orange mint luster and no distracting abrasions. The upper three headdress feathers show the usual softness, but the strike is otherwise boldly rendered. A few microscopic specks in the left obverse field are unseen by the naked eye. Only a handful of finer full Red coins are known. Population: 25 in 66 (6 in 66+) Red, 2 finer (2/18). NGC ID# 228F, PCGS# 2159

1909-S Indian Cent, MS65 Red  
First Generation Holder

- 3015 1909-S MS65 Red PCGS.** With a mintage of 309,000 coins, the 1909-S is by far the lowest-mintage issue in the Indian cent series, and it is more challenging to acquire in high grade than the 1909-S VDB Lincoln cent. This key-date coin displays satiny copper-gold luster with some russet accents on the left obverse margin. The top three headdress feathers are weak on the tips, as usual, but the coin is otherwise well-defined. Housed in an old "rattler" holder. NGC ID# 2298, PCGS# 2240

## LINCOLN CENTS

1909-S VDB Cent, MS66 Red  
Few Known Finer

- 3016 1909-S VDB MS66 Red PCGS.** An infrequently seen Premium Gem Red example of this key Lincoln cent issue, showing sharp design elements amid frosty coppery-orange and bronze-gold luster. Finer examples are major rarities. The 1909-S VDB is one of the most heavily saved early series issues, as its status as a key date was established almost immediately. However, in comparison to the number of collectors pursuing the issue in high grade, MS66 and finer examples in the Red color category are scarce. PCGS lists 15 pieces finer than the present coin (2/18). NGC ID# 22B2, PCGS# 2428

**1909-S/S Lincoln Cent, MS66+ Red  
S Over Horizontal S *Guide Book* Variety**

- 3017 1909-S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC.** The remnants of a horizontally oriented secondary mintmark are evident to the north of the primary S on this Plus-graded Premium Gem, identifying the popular *Guide Book* variety. The design elements are well-detailed and the original red surfaces are impeccably preserved, with vibrant mint luster on both sides. PCGS has graded two Red examples finer (2/18). NGC ID# 22B4, PCGS# 92434

**1911 Lincoln Cent, MS67 Red  
Old Holder, One Coin Graded Higher**

- 3018 1911 MS67 Red PCGS.** Incredibly, few more than a dozen of the 101 million cents struck in 1911 survive in this exemplary condition. Near-flawless copper surfaces exhibit rich shades of golden-orange color over the portrait. Each side showcases a full impression and soft, shimmering mint luster. Housed in a green label holder. Population: 14 in 67 (1 in 67+) Red, 1 finer (2/18). NGC ID# 22B7, PCGS# 2443

**1913-D Cent, MS66 Red  
Rarely Seen This Fine**

- 3019 1913-D MS66 Red PCGS.** Among branch mint issues from this period, the 1913-D Lincoln cent is moderately plentiful in high grade, but Gem Red examples are nonetheless scarce, and this Premium Gem Red coin is conditionally rare. Lincoln's portrait and the wheat ears are boldly rendered, and the satiny surfaces display rich coppery-red luster. There are no major abrasions or carbon spots. Population: 23 in 66 (3 in 66+) Red, 0 finer (2/18). NGC ID# 22BE, PCGS# 2464

**1914-D Cent, MS66 Brown  
Demand Exceeds Supply**

- 3020 1914-D MS66 Brown NGC.** The 1914-D is an important key date in the Lincoln cent series, and the supply of Mint State pieces fails to meet demand. A mix of light brown and sky-blue patination adheres to semiglossy surfaces, and is joined by blushes of crimson and copper-gold on the reverse. The strike is bold, marks are absent, and carbon is limited to an indistinct fingerprint fragment in the field above LIBERTY. A truly wonderful specimen that will add outstanding quality and appeal to a high-grade Lincoln cent collection.  
Ex: *FUN Signature* (Heritage, 7/2007), lot 179; *Dallas Signature* (Heritage, 10/2012), lot 3252. NGC ID# 84BX, PCGS# 2471

**1914-D Cent, MS64 Red and Brown  
First Generation Holder**

- 3021 1914-D MS64 Red and Brown PCGS.** This key Denver issue is moderately scarce in high grade and with original copper-red color. This near-Gem displays sharp definition and softly luminous coppery-gold coloration with subtle chestnut overtones that are mainly present on the reverse. Under a loupe, scattered flecks appear. Housed in a first generation "rattler" holder, with no significant abrasions. NGC ID# 22BH, PCGS# 2472

**1922 No D Cent, FS-401, MS63 Red  
Die Pair 2, Strong Reverse  
Exceedingly Rare**

- 3022 1922 No D, Strong Reverse, FS-401, MS63 Red PCGS.** Old-time collectors knew this issue simply as the “1922 Plain” cents, although the current terminology is 1922 No D. No cents were coined at the Philadelphia Mint in 1922, accounting for the great rarity of 1922-D cents with no visible mintmark, nor were any 1922 cents struck in San Francisco. Three Denver die pairs show this odd characteristic, yet Die Pair 2 is the one most-sought by specialists. An eroded and worn obverse die was heavily lapped to remove signs of die clashing — a process that eliminated the mintmark altogether — and then paired with a fresh reverse die. Mint State examples are extremely rare of the die pairing, especially with the Red designation.

This is apparently the second-finest 1922 No D Red cent known with the all-important Strong Reverse. PCGS reports a solitary MS64 Red example and none finer, while NGC lists no coins in Mint State Red with the Strong Reverse at all. The Weak Reverse varieties are rare in Mint State Red as well, but the more-desirable Strong Reverse Die Pair 2 variety is exceedingly rare, with a total of only two coins graded. The overall color of this coin is light-red with some streaks of deep reddish-gray coloration, especially in the right obverse field. Scattered carbon-gray specks frequent the obverse, and there is also one J-shaped area of carbon above O in ONE on the reverse. Population: 1 in 63 Red, 1 finer (2/18). PCGS# 37678 Base PCGS# 3287

**1926-S Lincoln Cent, MS64 Red  
Challenging Condition and Color Rarity**

- 3023 1926-S MS64 Red PCGS.** This San Francisco issue was touted as a rarity in high grades since shortly after its low mintage of 4.55 million pieces, and today it is still recognized as the preeminent condition and color rarity of the series. The strike is often blurry on even high-grade pieces, but here it is sharper than most. Original pale-orange surfaces are softly lustrous beneath a faint overlay of aged bluish-gray patina. Only a few tiny marks are visible under a loupe, with perhaps a half dozen imperceptible carbon flecks. Population: 78 in 64 (3 in 64+) Red, 2 finer (2/18). NGC ID# 22CL, PCGS# 2575

**PROOF TWO CENT PIECE**

**1873 Two Cent Piece, PR66 Red  
Final-Year, Proof-Only Closed 3 Example**

- 3024 1873 Closed 3 PR66 Red PCGS.** A Gem quality specimen of this final-year, proof-only two cent piece. All Closed 3 coins are originals and only 600 pieces are believed to have been struck. The surfaces display full deep mint red color and are void of imperfections and carbon spots. The fields are deeply mirrored and shimmer with a coppery glow. Of obvious importance to collectors of this popular, short-lived series. Housed in a green label holder. EX: *Palm Beach Signature* (Heritage, 11/2004), lot 5696. **From The Glacier Park Collection.** NGC ID# 5L57, PCGS# 3653

## THREE CENT SILVER

1866 Three Cent Silver, MS67  
Lightly Toned, Frosted Luster

- 3025 1866 MS67 PCGS.** The mintage of 22,000 pieces is deceptively large when compared to other Type Three issues, but series specialists know that 1866 three cent silver pieces are scarce-to-rare in all grades. This Superb Gem shows recutting on both 6s (Flynn RPD-001) as well as strong die clashing, especially on the reverse. The obverse die is lapped and cracked. Frosted mint luster glows from silver-gray surfaces with hints of lilac present. The motifs are sharply defined. Population: 11 in 67 (2 in 67+), 2 finer (2/18). NGC ID# 22NK, PCGS# 3686

## PROOF THREE CENT NICKEL

1877 Three Cent Nickel, PR66+ Cameo  
Proof-Only Key Issue

- 3026 1877 PR66+ Cameo NGC. CAC.** The 1877 three cent nickel is a proof-only issue and a key to the series, with only 900 examples struck. The present coin is a Plus-graded Premium Gem, with sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The surfaces are impeccably preserved and the eye appeal is outstanding. Census: 61 in 66 Cameo (5 in 66+, 5 in 66★), 26 finer. CAC: 47 in 66, 17 finer (2/18). NGC ID# 275X, PCGS# 83773

## SHIELD NICKEL

1868 Shield Nickel, MS67  
Unsurpassed Quality

- 3027 1868 MS67 PCGS.** Fletcher IIa Reverse. The star points between AM in AMERICA. The quality of this Superb Gem, one of 28.8 million Shield nickels struck in 1868, is unsurpassed at both of the leading grading services. Brilliant, frosty surfaces exhibit a pale ice-blue cast. The olive leaves and shield lines are strong with softness limited to the lower reverse stars. Die cracks throughout and polish lines in the central reverse field are typical, but the lack of mentionable abrasions is exceptional. Population: 2 in 67, 0 finer (2/18). NGC ID# 22P2, PCGS# 3795

## PROOF SHIELD NICKELS

1867 Rays Nickel, PR64+  
Splendid Iridescent Toning  
Only 25+ Pieces Struck

- 3028 1867 Rays PR64+ PCGS. Dannreuther-1. CAC.** Beautiful, iridescent cherry-red, apple-green, powder-blue, and straw-gold toning endows both sides of this well-preserved and sharply struck near-Gem. Surface imperfections are confined to a couple of tiny, unobtrusive spots on the obverse near 3 o'clock. This piece is an early die state with clear repunching on the 7. John Dannreuther (June 2007) estimates 10 to 15 proofs were struck from this die state. The proof 1867 Rays nickel is a famous rarity. The *Guide Book* mintage is only 25+ pieces. Third party Population and Census data is undoubtedly inflated due to resubmissions over the past 32 years. Population: 16 in 64 (1 in 64+), 14 finer (2/18). NGC ID# 276H, PCGS# 3818

1877 Shield Nickel, PR66  
Proof-Only Key Issue

- 3029 1877 PR66 PCGS. CAC.** A key date in the Shield nickel series, the 1877 is a proof-only issue with a mintage of only 510 pieces. This is one of the most attractive examples we have seen recently of this important date. The surfaces are toned light rose and sky-blue over both sides. The obverse fields show moderate depth of reflectivity, but the reverse is shallowly mirrored. A carefully preserved Gem with no distractions of note. Population: 39 in 66 (1 in 66+), 1 finer. CAC: 11 in 66, 2 finer (1/18).  
*Ex: Superior* (8/2002), lot 1539; *FUN Signature* (Heritage, 1/2005), lot 5720.  
**From The Glacier Park Collection.** NGC ID# 276U, PCGS# 3831

## LIBERTY NICKEL

1885 Liberty Nickel, MS66+  
Wonderful All-Around Quality  
Key to the Series

**3030 1885 MS66+ PCGS. CAC.** The 1885 is the key to the Liberty Head series in all grades, claiming a low mintage of 1.4 million coins. That total is surpassed only by the widely saved and more-available 1912-S. Unlike the final-year S-mint issue, the 1885 was left to circulate. The average certified grade falls between VF25 and VF30. This Premium Gem nearly joins the finest-known Superb Gems, of which four are reported at PCGS and one at NGC.

The impression is virtually full with only three points of softness on stars 1 and 2, and on the left ear of corn. Luster glistens softly over brilliant silver-gray surfaces that are essentially mark-free. Certain to excite Registry builders and other advanced collectors. Population: 67 in 66 (26 in 66+), 4 finer. CAC: 13 in 66, 1 finer (2/18). NGC ID# 2773, PCGS# 3846

## PROOF BUFFALO NICKELS

1913 Buffalo Nickel, PR67  
Short-Lived Type One Design

**3031 1913 Type One PR67 PCGS. CAC.** A delightful Superb Gem specimen of the short-lived Type One design, with sharply detailed design elements and impeccably preserved textured surfaces that show a few subtle hints of ice-blue and pale gold toning. Strong matte luster radiates from both sides. From a matte proof mintage of 1,520 pieces. Population: 64 in 67 (11 in 67+), 4 finer. CAC: 35 in 67, 1 finer (2/18). NGC ID# 278R, PCGS# 3988

1937 Buffalo Nickel, Stunning PR68  
Gleaming Surfaces, Amazing Colors

**3032 1937 PR68 NGC.** Delightfully toned and well-preserved, this Superb Gem displays an almost chromelike gleam that envelops both fields and devices. Sharp definition of the rugged design counterbalances smooth color progression from rose and lavender at the margins through gold and finally nickel-blue at the centers. Census: 59 in 68 (5 in 68★), 0 finer (2/18).

Ex: *Central States Signature* (Heritage, 4/2010), lot 1167. NGC ID# 278Z, PCGS# 3996

## EARLY HALF DIME

1797 Draped Bust Half Dime, AU50  
15 Stars, V-2, LM-1 Variety

**3033 1797 15 Stars, V-2, LM-1, R.3, AU50 PCGS.** This coin represents the V-2, LM-1 variety, the only variety with 15 stars on the obverse. This attractive AU specimen exhibits some light wear on the design elements, which are a little soft in the centers, but much interior detail remains intact on Liberty's hair and the lightly abraded surfaces retain traces of original mint luster. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

## SEATED HALF DIMES

1858 Half Dime, Glistening MS68 ★  
A High Condition Census Coin

- 3034** 1858 MS68 ★ NGC. CAC. This is one of the greatest Stars Obverse, No Arrows type coins known to exist, being tied for the finest 1858 half dime reported at NGC and the only piece in this grade with a Star designation. Not only is this piece sharp and virtually flawless in its preservation, but the original mint luster glows on each side in a way that is almost unheard of on lower-grade pieces. Brilliant interiors gradually bleed to lavender borders, giving the surfaces a hint of warmth. At least two sets of clash marks are visible. We have previously handled only two different examples of this issue in MS68, one of which has appeared in our auctions four times. The present coin is a third example. Census: 4 in 68 (1 in 68 ★), 0 finer. CAC: 4 in 68, 0 finer (2/18). NGC ID# 233U, PCGS# 4367

1860 Transitional Half Dime, MS64  
Judd-267, 'Coin Without a Country'

- 3035** 1860 Transitional, Judd-267, Pollock-315, R.4, MS64 PCGS. Although technically a pattern and not part of the Seated half dime series, many collectors seek an example of this so-called transitional issue as part of the regular series. It is listed in the *Guide Book* with that in mind. A reported mintage suggests just 100 pieces were made — all in circulation strike format — but that quantity is called into question by many numismatists. Any circulation of the issue was by chance, not by design. The regular “stars” obverse of 1859 was muled with the Cereal Wreath reverse of 1860, creating a strange situation where UNITED STATES OF AMERICA is omitted. The hollow-centered stars are credited to Anthony Paquet, while Mint Director James Ross Snowden was architect of the issue. It may have been primarily used in trade to fill holes in the expanding Mint Collection of U.S. coins. This lustrous, near-Gem example is brilliant and frosted with a tinge of golden toning at the borders. There are no marks to mention other than Mint-related roller marks across stars 4, 5, and Liberty’s upper portrait. Likewise, stars 9 to 11 are incomplete at the centers as a result. High points of the wreath and bow are characteristically weak. Population: 21 in 64, 26 finer (1/18).  
*From The Property of a Lady, Part II.* NGC ID# 2346, PCGS# 4373

1863-S Half Dime, Frosty MS66  
Brilliant Registry Set Coin

- 3036 1863-S MS66 PCGS Secure. V-Unlisted, Flynn-MPD-001.** The base of what may be an errant 6 appears below the rock above the primary 6 in the date. Flynn cautions that it appears slightly wider than the base of a 6 punch and that its origin cannot be confirmed. Clash marks are seen in that area and elsewhere on this immaculate, fully struck Premium Gem. Bright frosty mint luster washes over brilliant surfaces. Population: 4 in 66, 1 finer (2/18). NGC ID# 234D, PCGS# 4383

## PROOF SEATED HALF DIME

1867 Seated Liberty Half Dime, PR67  
None Finer at PCGS

- 3037 1867 PR67 PCGS. CAC.** The 1867 Seated Liberty half dime is a key date in the series in either format, with only 8,000 circulation strikes and 625 proofs made. Superb Gem proofs such as this example are seldom seen, especially with the CAC endorsement. A razor-sharp strike complements impeccably preserved surfaces with highlights of golden-tan and cerulean-blue toning. Population: 5 in 67, 0 finer. CAC: 4 in 67, 0 finer (1/18). *From The Glacier Park Collection.* NGC ID# 2364, PCGS# 4450

## EARLY DIME

1797 Draped Bust Dime, Fine 12  
Small Eagle, 13 Stars, JR-2

- 3038 1797 13 Stars, JR-2, R.4, Fine 12 NGC.** The only variety of the date with 13 stars on the obverse, the JR-2 is slightly more elusive than its 16 Stars, JR-1 counterpart. This Fine 12 example exhibits considerable wear on the design elements, but all lettering and the date are legible, and the devices are complete in outline, with some interior detail still intact. NGC ID# 236D, PCGS# 38749 Base PCGS# 4463

## BUST DIMES

1832 Capped Bust Dime, MS65  
Popular JR-4 Variety

- 3039 1832 JR-4, R.3, MS65 PCGS.** The 1832 Capped Bust dime claims a mintage of 522,500 pieces, with seven die varieties known for the date. This coin represents the JR-4 variety, with star 8 high on the cap and a wide gap between the second S in STATES and O in OF on the reverse. The design elements are sharply detailed and the well-preserved, lustrous surfaces show highlights of grayish-gold and lavender toning. Population: 18 in 65 (1 in 65+), 4 finer (1/18). *From The Glacier Park Collection.* PCGS# 38858 Base PCGS# 4521

1833 Capped Bust Dime, MS65  
Lustrous, JR-9 Variety

- 3040 1833 JR-9, R.2, MS65 PCGS. CAC.** The 8 in the date is lower than the 1, and the two 3s are even, while the second S in STATES is positioned above the S in PLURIBUS, identifying the JR-9 variety. This attractive Gem displays sharply detailed design elements and well-preserved, lustrous surfaces, with subtle hints of pale gold and lavender toning. Population: 15 in 65, 3 finer. CAC: 5 in 65, 0 finer (1/18). *From The Glacier Park Collection.* NGC ID# 237D, PCGS# 38868 Base PCGS# 4522

## SEATED DIME

**1873 Arrows Doubled Die Obverse Dime, AU58**  
**Fortin-103, Top 100 Dime Variety**  
**Finest at PCGS, Second on the Condition Census**

**3041 1873 Arrows, Doubled Die Obverse, F-103, FS-101, R.6, AU58 PCGS. CAC.** A Top 100 Seated Dime Variety. This is an exceedingly rare example of the Doubled Die Obverse Fortin-103 variety (*Cherrypickers'* FS-101) with an amazing doubled obverse die. The right portion of Liberty's shield exhibits a wide and dramatic double impression, rotated 20° clockwise. A misplaced digit in the dentils may be present as well, but it is much less prominent and pales in comparison to the spectacular die doubling.

Deep reddish-gold and olive toning covers lustrous and partially reflective surfaces that glisten beneath the natural patina. The coin carries an impressive pedigree, first from the Bob Simpson Collection of Seated Dimes, and later from Gene Gardner's incomparable collection, where he described it as "Nice for the grade. The coin is one of my favorites, if not the favorite, among all in this series." PCGS reports a single AU58 as finest of the variety, with an AU55 in second place (the Gerry Fortin coin). NGC shows one piece in MS61. We are aware of only about a dozen examples that exist in all grades. The present coin remains the second-finest certified and the sole finest at PCGS (2/18).

*Ex: Bob Simpson Collection of Seated Dimes / Long Beach Signature (Heritage, 9/2010), lot 3687; Jason Carter; Eugene H. Gardner Collection (Heritage, 6/2014), lot 30269. NGC ID# 39YE, PCGS# 145495 Base PCGS# 4665*

## MERCURY DIMES

**1916-D Mercury Dime, AU58**  
**Low-Mintage First-Year Key**

**3042 1916-D AU58 NGC.** An attractive near-Mint specimen of this first-year key. As with most 1916-D dimes, the strike is generally sharp with good separation on the central bands. Furthermore, this example is toned with dark silver-gray around the periphery, lighter on the obverse and darker on the reverse. Closer examination will locate a couple of minor scuffs on Liberty's cheek and neck, and there is a scrape on the fasces below the center which grazes the motto. The vast majority of the 264,000 pieces coined entered circulation and stayed for a long time, with the typical grade seen far below the present offering. Always in strong demand as the key date to the series.

*Ex: Long Beach Signature (Heritage, 2/2006), lot 820; Long Beach Signature (Heritage, 2/2007), lot 2978. NGC ID# 23GY, PCGS# 4906*

**1928 Mercury Dime, MS67+ Full Bands**  
**Only One Finer Coin at PCGS**

**3043 1928 MS67+ Full Bands PCGS. CAC.** The 1928 Mercury dime claims a mintage of more than 19 million pieces, but few survivors can match the quality and eye appeal of the present coin. Vivid shades of emerald-green and lavender toning highlight the peripheries of this Plus-graded Superb Gem and the design elements are sharply detailed, with Full Bands definition on the fasces. The surfaces are impeccably preserved and vibrant mint luster adds to the terrific eye appeal. Population: 44 in 67 (5 in 67+) Full Bands, 1 finer. CAC: 16 in 67, 0 finer (1/18). NGC ID# 23HX, PCGS# 4967

## EARLY QUARTER

1796 Draped Bust Quarter, B-2, Good 6  
First-Year, Low-Mintage Key

**3044 1796 B-2, R.3, Good 6 PCGS.** The Philadelphia Mint struck quarters for the first time in 1796, using two Draped Bust obverse dies and a single Small Eagle reverse to produce two die varieties for the date. A small mintage of 6,146 pieces was accomplished, making the issue scarce-to-rare in all grades today. Quarters were not struck again until 1804, by which time the reverse had been switched to the Heraldic Eagle motif, making the 1796 a scarce, single-year type.

This coin represents the B-2 variety, with the 6 positioned high in the date. The dove-gray surfaces of this Good 6 specimen are lightly abraded, aside from some thin pinscratches in the center of the obverse. The design elements are well-worn, but the major devices are completely outlined, and the date and all lettering remain legible. This coin should appeal to series specialists and type collectors alike. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

## SEATED QUARTER

1852-O Seated Quarter, AU55  
Rare in All Grades, Just Two Finer at PCGS

**3045 1852-O AU55 PCGS. Briggs 1-A.** Vertical die lines connect the arrow shafts. This example of the rare 1852-O quarter shares the same reverse as the Briggs 1-A 1851-O quarter. While the Briggs commentary that the 1852-O is "rare to nonexistent in grades XF or finer" is perhaps slightly overstated, the rarity of this New Orleans issue cannot be denied. The present Choice About Uncirculated coin displays pale golden-gray toning over reflective and partially lustrous surfaces. We note a few light field lines but none are distracting. Seldom offered and well-defined for the grade, with characteristic rounded rims and tremendous appeal for date and mint collectors. Population: 3 in 55, 2 finer (2/18). NGC ID# 23T9, PCGS# 5420

## PROOF BARBER QUARTER

1901 Barber Quarter, PR67 ★ Cameo  
Attractive Border-Toned Contrasted Proof

**3046 1901 PR67 ★ Cameo NGC. CAC.** Cameo contrast mostly disappeared from proofs in subsequent years, giving 1901 proofs extra favor among collectors partial to this format. This Superb Gem example receives recognition for strong cameo effect and displays the important NGC Star for outstanding eye appeal. CAC endorsement adds to the accolades. Pale reddish-gold toning drifts across glittering mirrored fields, deepening at the borders. The frost-white central devices are sharply defined except for the eagle's right talon. Census: 17 in 67 Cameo (4 in 67 ★), 5 finer. CAC: 14 in 67, 3 finer (1/18). NGC ID# 242G, PCGS# 85687

## STANDING LIBERTY QUARTER

1918 Quarter, MS66+ Full Head  
A Registry Set Candidate

- 3047 1918 MS66+ Full Head PCGS Secure.** Liberty's head shows adequate detail for the Full Head designation, and the shield rivets are sharply defined. The date numerals are flat but outlined, a common characteristic of the 1918 Standing Liberty quarter. A hint of champagne toning accents frosted luster on each side and no distracting abrasions are seen. Full Head coins are elusive in this grade and rare finer. Population: 55 in 66 (6 in 66+) Full Head, 14 finer (2/18). NGC ID# 2437, PCGS# 5721

## WASHINGTON QUARTER

1950-D/S FS-601 Quarter, MS66  
Scarce Overmintmark Variety

- 3048 1950-D/S FS-601 MS66 PCGS.** Visually, the overmintmark looks like D/D/S, with strike doubling on the D. Brilliant-silver surfaces show tinges of translucent gold around the devices, plus bits of russet-brown near the margins. A few light marks are visible with a loupe on the high points of the sharply struck motifs. This *Cherrypickers'* variety is listed on page 178 of the 2018 *Guide Book*. NGC ID# 245T, PCGS# 145638 Base PCGS# 5843

## EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, VG8  
Popular First-Year O-101 Variety

- 3049 1794 O-101, T-7, High R.3, VG8 PCGS.** Tompkins Die State 1/3. This coin represents the O-101 variety, the only variety with 21 berries in the reverse wreath, in a 10x11 arrangement. The problem-free gray surfaces are well-worn, but the design elements remain completely outlined. The date and all lettering remain legible. Reverse die cracks below the first S in STATES and through F in OF identify the die state. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Half Dollar, VF Details  
O-101a, Well-Defined

- 3050 1794 O-101a, T-7, High R.3 — Improperly Cleaned — NGC Details. VF.** Ex: Hilt Collection. Liberty's hair and the eagle's wings are nicely defined. The microgranular gunmetal-gray and wheat-gold surfaces are refreshingly unabraded. A cluster of minor adjustment marks, as produced, are noted on the portrait. Given the cost of acquiring a 1794 dollar, its scarce half dollar counterpart appears reasonably priced.

1795 O-125 Half Dollar, XF45  
Bold Central Motifs

- 3051 1795 2 Leaves, O-125, T-13, R.4, XF45 NGC.** Tompkins Die State 2/1. The 1795 half dollar is the more available of the two Flowing Hair type issues and is often encountered in type specialists' collections. This piece is a scarce variety, characterized in part by star 1 fully piercing Liberty's lower hair curl. Rich gunmetal-gray and dusky olive-gold patina coats each side, with only light wear seen over the well-defined design elements. Numerous mint-made adjustment marks are noted around the obverse periphery, causing minor softness of strike on the lower-right dentils. Only small abrasions and marks dot the surfaces on both sides. This piece will be of interest to both the type collector and the early half dollar variety specialist.

Ex: FUN Signature (Heritage, 1/2001), lot 7727; Chicago Signature (Heritage, 8/2011), lot 3910; Houston Signature (Heritage, 12/2013), lot 3624; Long Beach Signature (Heritage, 6/2014), lot 4506. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

**1796 Draped Bust Half Dollar, Fine Details  
16 Stars, O-102 Variety**

- 3052 1796 16 Stars, O-102, T-2, Amato-244, R.6 — Plugged — NCS. Fine Details.** Surface damage makes determining the Tompkins Die State problematic. All Draped Bust half dollars with the Small Eagle reverse bear the date 1796 or 1797, with each date consisting of two varieties. The first variety of the 1796 issue has 15 obverse stars (Overton 101), while the second variety has 16 stars (Overton 102). The 16 star variety apparently commemorated Tennessee's June 1, 1796 admission to the Union as the 16th state. It is interesting to note, however, that while the dies may have been prepared prior to this date, Mint records indicate that the first Draped Bust Small Eagle half dollars were not delivered by the Chief Coiner until February 28, 1797. Breen speculates that, for the Tennessee celebrations, the 16-star die was used for a few prooflike presentation strikings, but not recorded as regular coinage. The present 16-star example is nicely centered, and has full Fine details, which are most notable on the obverse. Some of the reverse lettering along the right and left borders is worn smooth. The surfaces are unnaturally bright and moderately hairlined, but are retoning light gray and sky blue. A few light scratches are also noted on each side. The coin has been plugged at about 12 o'clock on the obverse, and some of the letters in LIBERTY have been reengraved (on the reverse, the last A of AMERICA and the fraction have also been reengraved). These same areas have also been extensively tooled. With only 3,918 Draped Bust Small Eagle half dollars produced, and less than 300 estimated to have survived the ravages of time, even impaired specimens such as this one are in demand.  
Ex: Auction '81 (RARCOA's session, 7/1981), lot 131; FUN Signature (Heritage, 1/2002), lot 6900; ANA Signature (Heritage, 8/2004), lot 6159. NGC ID# 24EA, PCGS# 39262 Base PCGS# 6058

**1805 O-112 Half Dollar, AU55  
Sharply Struck, Original Surfaces**

- 3053 1805 O-112, T-2, R.2, AU55 NGC.** Tompkins Die State 1/1. An original, Choice About Uncirculated example of O-112, one of the readily available 1805 die marriages. Traces of reddish-gold and olive-gray toning surround the stone-gray centers of this sharply defined Draped Bust half. A broad die-clashed "collar" along Liberty's bust line and a long, curved die crack beneath STATES foreshadow the later die state, when a shifted cud obscures ES of STATES and causes a weak strike in the date area. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

**1807 Draped Bust Half Dollar, O-103a  
Choice About Uncirculated, Few Are Finer**

- 3054 1807 Draped Bust, O-103a, T-11, R.3, AU55 PCGS Secure.** Tompkins Die State 2/3. The O-103a is a condition rarity in the Draped Bust series, with a single Uncirculated example known and a Condition Census comprised of About Uncirculated pieces underneath that solitary Mint State coin. This still-lustrous example represents the latest die stage with prominent die cracks and die clashing on both sides. Mellow champagne-gold toning with intermittent warm-gray accents confirm the coin's original surfaces. The strike is sharp throughout, and only a few thin, light lines in the lower left field are of note. NGC ID# 24EM, PCGS# 39341 Base PCGS# 6079

**1807 Draped Bust Half, MS63  
Popular O-105 Variety**

- 3055 1807 Draped Bust, O-105, T-4, R.1, MS63 PCGS.** Tompkins Die State 2/1, with “wavy” clash marks above the date and no cracks on the reverse. The 1 in the date touches the curl and the 8 is low, while the star touches the eagle’s upper beak, identifying the popular and available O-105 variety.

The present coin is an impressive Select specimen from the final year of the Draped Bust design. The design elements are sharply detailed in most areas, but a touch of softness shows on Liberty’s upper curls. The pleasing surfaces are remarkably free of contact marks, aside from a solitary scrape above the eagle’s head. A small planchet flaw is evident in the left obverse field, between star 1 and the hair. Vivid shades of lavender-gray and champagne-gold toning blanket the surfaces, with strong original mint luster underneath. Overall eye appeal is outstanding. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

**1807 Draped Bust Half, AU55  
O-109a, Dramatic Die State**

- 3056 1807 Draped Bust, O-109a, T-2, R.3, AU55 NGC.** Tompkins Die State 4/2. Predominately pearl-gray surfaces cover both sides of this Overton-109a example, although freckles of deep-gray and forest-green reside in the peripheral recesses. The coin is impressively devoid of abrasions, struck from an intermediate-to-late die state with a reverse die crack through STA. A heavy diagonal crack across the portrait ranges from the hair ribbon to the drapery — undescribed in the Overton fifth edition, but documented in the more recent Tompkins’ reference. The lower left obverse field is buckled, which contributes to weakness of strike on the neck curls and, on the reverse, in the vicinity of the eagle’s beak and central field stars. The remainder of the design is bold. This coin is a Tompkins plate coin, where it illustrates obverse Die State-4 for the T-2 variety. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

**BUST HALF DOLLARS**

**1807 Capped Bust Half, AU58  
Blundered Denomination, O-112**

- 3057 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 NGC.** Complete serifs on the 1 in the date differentiate the more available O-112 from the scarce-to-rare O-111 Capped Bust variety, although both marriages share the same reverse die. This naturally toned O-112 is lustrous and sharp with reddish-gold highlights at the margins and interspersed areas of lilac and slate-gray toning over the minimally marked surfaces. The star centers and dentils are for the most part well-formed, with a scalloped outer point on star 13 typical of the John Reich design. Census: 23 in 58 (1 in 58★), 31 finer (2/18). NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1815/2 Half Dollar, AU Details  
Early Die State O-101

- 3058** 1815/2 O-101, R.2 — Tooled — PCGS Genuine. AU Details. Silver-gray surfaces retain vague traces of luster and sharp definition on the devices. Fine granularity and some light tooling are visible under a loupe in the obverse fields, and result in the Genuine designation by PCGS without a numeric grade. Struck from an early die stage, with no die cracks and what appears to be a single clashing of the dies. Remnants of the underdigit 2 beneath 5 are visible with magnification.

1820 O-103a Half Dollar, Scarce MS62  
Small Date, Curl Base 2

- 3059** 1820 Curl Base 2, Small Date, O-103a, R.2, MS62 PCGS Secure. A sharp die crack runs from the edge near star 11 to the top of 1 in the date to define the late die stage O-103a. The die marriage is the only 1820 variety with a non-overdated Small Date and a Curl Base 2. This lustrous, lilac-gray example displays pale-gold at the border. The coin is sharply struck and lightly toned throughout both sides. A number of small, deep-gray spots and build-up are scattered across the portrait and a few of the obverse stars. The O-103 variety is quite scarce in Uncirculated grades, in both its early and later die states. This O-103a is tied at the low end of the Condition Census (2/18). NGC ID# 24FD, PCGS# 39564 Base PCGS# 6121

1834 Capped Bust Half Dollar, MS65  
Small Date, Small Letters, O-120

- 3060** 1834 Small Date, Small Letters, O-120, R.4, MS65 PCGS. The O-120 variety is identified by the "Stair Step" date and the "Horn Top" 5 in the denomination. This delightful Gem exhibits well-detailed design elements, with just a touch of softness on some of the stars and Liberty's hair. A vertical tine extends from the right (facing) shield point, and star 7 shows signs of recutting. The well-preserved surfaces radiate vibrant mint luster, under attractive shades of golden-tan and lavender toning. Stephen Herrman's latest census shows no specimen of the O-120 variety graded finer than MS64. *From The Glacier Park Collection.* NGC ID# 24FY, PCGS# 39925 Base PCGS# 6166

SEATED HALF DOLLARS

1876 Seated Half, Frosty MS66  
WB-104, Open Bud, Repunched 6  
Only One Finer Among All Varieties at PCGS

- 3061** 1876 Open Bud, Repunched Date, WB-104, MS66 PCGS. The lower loop of a repunched 6 is visible between the primary 76 in the date, and the coin is struck from clashed dies. The reverse is the Open Bud Type One. This Premium Gem example is immensely frosty and well-struck with splashes of orange-gold, lavender, and olive-green over otherwise champagne-tinted luster. It is likely the finest WB-104 at either service. Population (all varieties combined): 10 in 66 (2 in 66+), 1 finer (2/18). NGC ID# 645R, PCGS# 572237 Base PCGS# 6352

**1879 Half Dollar, Brilliant MS67  
Conditionally Rare, Low-Mintage Issue**

**3062 1879 Closed Bud, WB-102, MS67 PCGS. CAC.** All circulation-strike 1879 Seated half dollars are WB-102, identified by the closed bud on the olive branch. The year 1879 began a 13-year stretch of Philadelphia-only half dollar production that persisted through the end of the Seated Liberty type in 1891. During this period, the branch mints devoted significant resources to silver dollar production in an attempt to meet the demands of the Bland-Allison Act of 1878. In 1879, Carson City struck 756,000 silver dollars, New Orleans more than 2.8 million, and San Francisco more than 9.1 million. By comparison, the solitary half dollar coinage at Philadelphia amounted to only 4,800 coins.

Prompted by its low mintage, the 1879 half dollar was heavily saved at the time of issue and is available today in most grades. Nonetheless, Superb Gems are conditionally rare, and only a few pieces are known finer than the present. CAC-approved, this brilliant MS67 coin displays a sharp strike and seemingly flawless fields that have a hint of reflectivity. The eye appeal is as superb as the preservation. Population: 18 in 67 (2 in 67+), 2 finer. CAC: 15 in 67, 0 finer (1/18).

**From The Glacier Park Collection.** NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**1883 Half Dollar, Prooflike MS66**

**3063 1883 WB-101 MS66 PCGS.** An elusive issue with a business-strike mintage of just 8,000 pieces, this delightful Premium Gem displays partially reflective fields and a snow-white, fully untuned appearance. Just a hint of strike softness shows at the top of the obverse on this otherwise sharp specimen. This represents one of the finest we have had the pleasure to offer and will be right at home in a fine collection. Population: 13 in 66 (2 in 66+), 4 finer (1/18). *Ex: Long Beach Signature (Heritage, 6/2004), lot 8408.*  
**From The Glacier Park Collection.** PCGS# 572267 Base PCGS# 6365

**PROOF SEATED HALF DOLLARS**

**1867 Seated Half Dollar, PR65 Cameo  
Lightly Toned, Well-Mirrored**

**3064 1867 PR65 Cameo PCGS Secure.** Not only is the proof 1867 a conditionally challenging issue that is difficult to locate as a Gem, but it has a low certified population in all Cameo grades. This golden-tan representative displays sharply struck devices set atop glowing, mirrored fields. As befits the grade, there are no distracting hairlines or contact marks. Population: 11 in 65 Cameo, 7 finer; 1 in 65 Deep Cameo, 2 finer (2/18). NGC ID# 27U2, PCGS# 86425

**1887 Half, PR64+ Deep Cameo  
Glassy Mirrors, Richly Contrasted**

**3065 1887 PR64+ Deep Cameo PCGS. CAC.** Just a glimpse of blue and gold toning at the rims prevents an all-brilliant designation for this Plus-graded near-Gem proof. Deep, smooth, mirrored fields adjoin frost-white devices on both sides. Deep Cameo proofs are decidedly scarce for the 1887 issue, one of the late-series Seated halves that often fill out the top end of a high-grade set. A few delicate field lines perhaps preclude a full Gem grade. The strike is full and there are no marks of consequence. Population: 2 in 64 (1 in 64+) Deep Cameo, 3 finer. CAC: 2 in 64, 3 finer (2/18).  
**From The Property of a Lady, Part II.** NGC ID# 27UN, PCGS# 96448

## BARBER HALF DOLLARS

1901-S Half Dollar, MS65  
Only One Finer at NGC

**3066 1901-S MS65 NGC.** *The Complete Guide to Certified Barber Coinage* ranks this tricky issue third in Mint State rarity, surpassed only by the 1904-S and 1896-O emissions. NGC has certified only four Gems of this date with one piece finer; PCGS has certified six pieces in MS65 and six finer (2/18).

This example offers silver surfaces lightly tinged with gold throughout, and even under a loupe there are no singularly distracting abrasions. For an S-mint coin, however, the strike is curiously soft on the right shield corner and the nearby areas. Some interesting die cracks appear on both sides, the sign of die fatigue. Census: 4 in 65 (1 in 65+), 1 finer (2/18). NGC ID# 5EPB, PCGS# 6491

1908 Barber Half Dollar, MS66  
Conditionally Rare at This Level

**3067 1908 MS66 PCGS Secure.** From a mintage of more than 1.3 million pieces, the 1908 Barber half dollar is an available date in most grades, but the issue is very rare at the MS66 grade level, and finer coins are virtually unobtainable. This sharply detailed Premium Gem exhibits well-preserved, lustrous surfaces, with attractive shades of lavender, golden-tan, and amber toning. Population: 8 in 66, 3 finer (2/18). NGC ID# 24N4, PCGS# 6512

## PROOF BARBER HALF DOLLARS

1897 Half Dollar, PR67 Deep Cameo  
Near-Brilliant With Stark Contrast

**3068 1897 PR67 Deep Cameo PCGS.** The Deep Cameo population of proof 1897 Barber halves is evenly split between PCGS and NGC, and most such coins are in high grades, namely PR66 to PR68. Demand for these top-quality coins is unceasing among Registry Set collectors and series specialists. Anyone who has personally seen a Superb Gem Deep Cameo example of this issue knows first-hand that the quality of the strike and the depth of mirroring in the fields are often unsurpassed by any other proof issue in the series. The coin offered here showcases these qualities with near-perfection. A hint of gold warms the peripheries, leaving the dramatically contrasted interiors with frost-white devices. Slight softness on the right shield corner is the only noticeable surface imperfection, and it is truly minor. Population: 16 in 67 (3 in 67+) Deep Cameo, 6 finer (1/18).

**From The Glacier Park Collection.** NGC ID# 24NZ, PCGS# 96544

1910 Barber Half Dollar, PR66  
Scarce Cameo Example

**3069** 1910 PR66 Cameo PCGS. CAC. Because the Mint switched to an all-brilliant finish for proof coins after 1901, proof issues of this period are seldom seen with cameo contrast. This spectacular Premium Gem is definitely an exception to the rule, with sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The brilliant surfaces are well-preserved and attractive. Population: 8 in 66 Cameo, 3 finer. CAC: 2 in 66, 1 finer (1/18).

*From The Glacier Park Collection.* NGC ID# 6UPF, PCGS# 86557

## WALKING LIBERTY HALF DOLLARS

1916-S Walking Liberty Half Dollar, MS65  
Sought-After First-Year Issue

**3070** 1916-S MS65 PCGS Secure. The 1916-S Walking Liberty half dollar claims a small mintage of 508,000 pieces and the issue is always in demand from branch mint type collectors because of its first year of design status. This attractive Gem is sharply detailed in most areas, but a touch of the usual softness is evident on the eagle's trailing leg. The well-preserved brilliant surfaces are lustrous and appealing. PCGS has graded 14 numerically finer examples (2/18). NGC ID# 24PN, PCGS# 6568

1917-S Walking Liberty Half, MS65  
Reverse Mintmark, Lightly Toned

**3071** 1917-S Reverse MS65 PCGS. CAC. Ex: The Dakota Collection. Despite a substantial mintage of more than 5.5 million pieces, the 1917-S Walking Liberty half dollar, with the mintmark on the reverse, is a scarce issue in MS65 condition, and finer coins are rare. Like most examples seen, this Gem shows a touch of softness on Liberty's wreath hand and the eagle's trailing leg, but the strike is sharper in other areas. The impeccably preserved surfaces radiate vibrant mint luster on both sides and display a few subtle highlights of lavender and pale gold toning. Overall eye appeal is outstanding. Population: 53 in 65 (2 in 65+), 12 finer. CAC: 16 in 65, 3 finer (2/18). NGC ID# 24PU, PCGS# 6573

**1917-S Walking Liberty Half, MS65+  
Reverse Mintmark Variant**

**3072 1917-S Reverse MS65+ PCGS Secure. CAC.** The mintmark was moved to the reverse of the Walking Liberty half dollar part way through the year in 1917. A substantial mintage of 5.5 million pieces of the new design was accomplished at the San Francisco Mint, but the issue is more elusive in high grade than the production total would suggest. Most of the coins were released into circulation at the time of issue and few examples were saved for numismatic purposes.

This coin is a spectacular Plus-graded Gem, with a bold strike that shows some emerging detail on Liberty's wreath hand and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster and attractive highlights of golden-tan toning enhance the outstanding eye appeal. Population: 53 in 65 (2 in 65+), 12 finer. CAC: 16 in 65, 3 finer (1/18). NGC ID# 24PU, PCGS# 6573

**1920-D Walker Half Dollar, MS64  
Far Better Than the Typical Representative**

**3073 1920-D MS64 PCGS.** Advanced collectors would do well to consider this Choice Uncirculated 1920-D Walking Liberty half dollar — an example that far exceeds the typical VF35 to XF40 representative. Brightly untoned surfaces glisten with satiny mint luster. The motifs exhibit a crisp strike that leaves virtually inconsequential softness over the highest design points. Abrasions are minimal. NGC ID# 24R4, PCGS# 6581

**1935 Walking Liberty Half, MS67+  
Only One Coin Finer at PCGS**

**3074 1935 MS67+ PCGS. CAC.** The 1935 Walking Liberty half dollar claims a large mintage of more than 9 million pieces, but the issue is very scarce at the MS67 grade level, and finer coins are virtually unobtainable. This Plus-graded Superb Gem offers well-detailed design elements and impeccably preserved surfaces, with a few subtle hints of pale gold toning. Vibrant mint luster adds to the terrific eye appeal. Population: 61 in 67 (6 in 67+), 1 finer. CAC: 34 in 67, 1 finer (2/18). NGC ID# 24RJ, PCGS# 6595

**1938-D Walking Liberty Half, MS67  
Sought-After Low-Mintage Issue**

**3075 1938-D MS67 PCGS. CAC.** The 1938-D Walking Liberty half dollar is always in demand because of its low mintage of 491,600 pieces. This spectacular Superb Gem exhibits sharply detailed design elements in most areas, but a touch of the usual softness is evident on the eagle's leg. The impeccably preserved surfaces radiate vibrant mint luster throughout. Population: 47 in 67 (3 in 67+), 0 finer. CAC: 23 in 67, 0 finer (2/18). NGC ID# 24RV, PCGS# 6605

## EARLY DOLLARS

1795 B-1, BB-21 Flowing Hair Dollar, VF30  
Eminently Collectible Two Leaves Type Coin

- 3076** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF30 NGC. Bowers Die State 1. This is an ideal Flowing Hair dollar for the assigned grade, with smooth, nearly mark-free surfaces and pleasing medium lilac-gray toning. The devices are well-defined for the VF30 level, with full rims and strong dentils. The B-1, BB-21 is the most plentiful two-leaves 1795 variety, perfect for both the type collector and early dollar specialists. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 B-5, BB-27 Silver Dollar, XF Details  
Last Year of Flowing Hair Design

- 3077** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Improperly Cleaned — NGC Details. XF. Bowers-Borckardt Die State II, with a crack just beginning from the left wreath stem to the edge. The BB-27 variety is easily recognized by the diagonal “bar” in the obverse field near the top curl. The light wear on this piece is confined to the central devices, with much original detail preserved on the peripheral design elements. The glossy blue-steel and chocolate-brown surfaces are lightly abraded, and the effects of the noted cleaning are not overly distracting.  
*Ex: Long Beach Signature (Heritage, 9/2011), lot 4068.*

1795 Flowing Hair Dollar, AU50  
Three Leaves, B-5, BB-27

- 3078** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU50 NGC. Bowers Die State III. The often-seen variety with the diagnostic die line behind Liberty's top hair curl. The die line from the left stem nearly reaches the border. Light flowlines and hints of die rust or spalling appear on the lower reverse. This is an intermediate die state like nearly all examples of this variety. There are no obverse clash marks on this piece. Faint evidence of a reverse die crack in its beginning stage appears at the upper reverse. The crack begins at the lower leaf of the top inside pair over the right wing to the terminal leaves and the second T of STATES. This piece retains considerable luster with light gold toning at the lower right obverse, and splashed on the reverse. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1799 7x6 Stars B-5, BB-157 Dollar, MS61  
Semiprooflike Fields, Sharp Devices

**3079** 1799 7x6 Stars, B-5, BB-157, R.2, MS61 PCGS. Die State III, showing peripheral reverse die cracks. The reverse die shows a defective U punch used for UNITED, missing the upper left corner — a feature seen on two other reverse dies that combined produced six varieties. BB-157 is relatively common in the absolute sense, but most pieces grade no finer than XF. In his *silver dollar Encyclopedia*, Q. David Bowers estimates that only 11 to 18 Uncirculated coins are known, with a similarly small number of AU pieces. A few Choice Mint State coins exist, including the Eliasberg piece, graded MS64 NGC.

This lustrous example shows splendid ivory and gold color over satiny surfaces with excellent eye appeal. Modest reflectivity appears in the fields, and the strike is sharp. No adjustment marks are visible. Housed in a green label holder.

Ex: *FUN Signature* (Heritage, 1/2010), lot 2586. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

1799 Draped Bust Dollar, AU53  
7x6 Stars, B-8, BB-165 Variety

**3080** 1799 7x6 Stars, B-8, BB-165, R.3, AU53 PCGS. Bowers Die State II. Lustrous pale silver surfaces with hints of champagne color on both sides. Prominent adjustment marks on the reverse obliterate several stars in the constellation. This variety was produced from a single set of dies, neither which saw any further use.

Ex: *Dallas Signature* (Heritage, 11/2005), lot 5084.

From *The Glacier Park Collection*. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

## GOBRECHT DOLLAR

1839 Gobrecht Dollar, PR40 Details  
Judd-104 Original, Die Alignment IV

- 3081** 1839 Name Omitted, Judd-104 Original, Pollock-116, R.3 — Plugged, Repaired, Whizzed — ANACS. PR40 Details. Silver. Reeded Edge. Die Alignment IV (medal turn, the head of Liberty is opposite the F in OF). Before bidders spend too much time trying to confirm Original vs. Restrike, here is an extended quote from the *DTS Attribution Guide*: “There are about 25 to 30 alignment IV circulated pieces in various grades. While it is impossible to die state coins much below AU, we can state that we have not seen a naturally circulated alignment IV J104 that is a Restrike. We thus presume that all naturally circ coins are Originals.” Much of the qualifiers listed on the ANACS holder are diminished by the charcoal-gray toning that covers most of each side. Slightly brighter accents are seen over the high points. NGC ID# BLY5, PCGS# 11444

## PROOF SEATED DOLLARS

1863 Seated Dollar, PR66 Cameo  
Few Cameos Known This Fine

- 3082** 1863 PR66 Cameo PCGS. CAC. OC-P2, R.4. The 1863 is distinguished as the lowest-mintage proof Seated dollar struck after the proof-only issue of 1858. Only 460 pieces were produced, and series specialists Dick Osburn and Brian Cushing estimate that fewer than half survive today in all grades, despite inflated certified population figures. Most known examples grade no finer than PR64 and have little or no cameo contrast. Premium Gems — especially Cameos — are genuinely rare. Only three Deep Cameos are reported, all at PCGS and in PR64.

This Premium Gem is one of the finest Cameos we have seen. We offered the PR68 Cameo NGC coin on numerous occasions (likely the same as the PR68 ★ Cameo NGC coin), and the PR67 Cameo NGC coin twice, but neither since 2011. The toning on this original example shows blue and violet obverse borders with a warm golden center, while the reverse displays lavender and champagne accents throughout mainly aquamarine patina. The strike is sharp, and cameo contrast is especially apparent on the obverse. Population: 3 in 66 (1 in 66+) Cameo, 1 finer. CAC: 3 in 66, 1 finer (1/18).

*From The Glacier Park Collection.* NGC ID# 252H, PCGS# 87006

1865 Seated Liberty Dollar, PR63  
Elusive Cameo Example

- 3083 1865 PR63 Cameo PCGS. OC-P2, R.3.** Osburn-Cushing Die State a/a. Minor die doubling exists on both the obverse and reverse. Throughout the war years, the number of proofs struck remained relatively stable and the percentage of certified survivors has remained steady as well. The 500-piece proof mintage in 1865 yielded an estimated 325 certified survivors (per the Osburn-Cushing website [www.seateddollarvarieties.com](http://www.seateddollarvarieties.com)). Relatively few pieces have achieved Cameo designation. This example shows a few delicate field lines that determine the grade, with pleasing bluish-gray toning at the margins and strong contrast between the sharply struck devices and mirrored fields. Population: 20 in 63 Cameo, 26 finer; 4 in Deep Cameo, 9 finer (2/18). NGC ID# 252K, PCGS# 87008

1866 With Motto Seated Dollar, PR65  
Near-Brilliant Deep Cameo  
A Conditionally Rare First-Year Type Coin

- 3084 1866 Motto PR65 Deep Cameo PCGS. OC-P2, R.3.** "The motto, 'In God We Trust,' authorized by the act of Congress of March 3, 1865, has been placed upon all the gold and silver coins of the United States susceptible of such addition since the commencement of the current year." — *Mint Director's Annual Report*, 1866.
- All proof Seated Liberty dollars struck that year are of the With Motto type, save for two famous No Motto coins, one of which is in a private collection and the other in the ANA Money Museum. The collectible With Motto proofs were struck to the extent of 725 pieces, making them generally available today, at least in low and/or non-Cameo grades. The Gem Deep Cameo offered here is conditionally rare, showcasing a full strike and stark white-on-black contrast. Both sides have a hint of delicate champagne toning that warms the frosty devices. Only 18 Deep Cameos are listed at PCGS in all grades. Population: 5 in 65 Deep Cameo, 3 finer (1/18). **From The Glacier Park Collection.** NGC ID# 46ES, PCGS# 97014

## TRADE DOLLARS

1874-CC Chop Marked Trade Dollar, MS62  
Rarely Found in Uncirculated Grades

- 3085 1874-CC Chop Mark MS62 PCGS. CAC.** Two incuse chop marks — one on the obverse, one on the reverse — are noted on the holder, but did not prevent PCGS from assigning a numeric grade to this lustrous and attractive 1874-CC Trade dollar. Most of the mintage was shipped to China, and Uncirculated examples are scarce-to-rare, with or without chop marks. The present coin displays a Micro CC mintmark, no period after FINE, with CAC endorsement. Traces of golden toning add appeal to brilliant-white surfaces. Population (with chop marks): 23 in 62, 9 finer. CAC: 1 in 62, 1 finer (2/18). NGC ID# 2532, PCGS# 87035 Base PCGS# 7035

1875-S Trade Dollar, MS65  
Conditionally Scarce Type Coin

- 3086 1875-S Type One Reverse MS65 NGC.** The surfaces are uncommonly smooth for the type, the only mentionable abrasions are a few tiny reed marks in the right obverse field. The luster is full and frosty, and both sides exhibit warm golden patina. Roller marks (as produced) bisect the centers, and there is some incompleteness of detail over the high points in those areas. Still, this attractive Gem has few rivals for either preservation or visual appeal. Census: 35 in 65, 5 finer (2/18).  
Ex: ANA Signature (Heritage, 3/2008), lot 855, where it brought \$8,050. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

1876 Trade Dollar, MS65  
Surprisingly Scarce as a Gem

- 3087 1876 Type One Obverse, Type Two Reverse, MS65 PCGS.** Richly frosted, dusky bronze patina envelops both sides of this smoothly coruscated Trade dollar in a complex mix of contributing colors. Direct light reveals the depth of toning — part grayish-blue, part rose-red, part pearlescent silver. The crisp strike shows from Liberty's hair strands to the eagle's leg and talons. A stunning Gem, with only a few finer. Population: 25 in 65 (2 in 65+), 9 finer (1/18). NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

## PROOF TRADE DOLLARS

1878 Trade Dollar, PR65 Cameo  
Sharp and Well-Contrasted

- 3088 1878 PR65 Cameo NGC.** Carson City and San Francisco continued to coin circulation-strike Trade dollars into early 1878 before new dies arrived for the resurrected standard silver dollar, which had been discontinued in 1873. Philadelphia, however, struck only proofs this year, to the tune of 900 pieces. This Gem Cameo survivor displays fully struck design elements and stark contrast. The interiors are brilliant, surrounded by light golden border toning. There is a small fleck under Liberty's outstretched hand, but no other imperfections are significant enough to act as pedigree markers. Census: 27 in 65 Cameo (3 in 65 ★, 1 in 65+★), 10 finer (2/18).  
Ex: ANA Signature (Heritage, 3/2008), lot 868. NGC ID# 27YP, PCGS# 87058

1880 Trade Dollar, PR65 Cameo  
Popular Proof-Only Issue

- 3089 1880 PR65 Cameo PCGS.** The Trade dollar was only struck in proof format in 1880, when a generous production of 1,987 pieces was accomplished at the Philadelphia Mint. This attractive Gem exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The brilliant surfaces are free of mentionable distractions. Population: 29 in 65 (1 in 65+) Cameo, 25 finer (1/18).  
**From The Glacier Park Collection.** NGC ID# 27YS, PCGS# 87060

## MORGAN DOLLARS

### 1878-CC GSA Dollar, MS65+ Frost-White and Lustrous

- 3090 1878-CC GSA MS65+ NGC.** Although more than 47,000 1878-CC dollars were dispersed from the GSA sales in black plastic holders, few examples remain in those original holders of issue. The phenomenon is especially true for high-grade coins, which collectors and dealers cracked out years ago for submission to third-party grading services. This high-end Gem example remains in its original holder, frosted and lustrous with brilliant-white surfaces and a pinpoint-sharp strike. Bagmarks are limited to a few exceedingly minor, faint field abrasions and a light luster graze on the neck truncation. It is band certified with a black box but no certificate. NGC reports just three numerically finer examples in a GSA holder. Census: 6 in 65+, 4 in 65★, 3 finer (2/18). NGC ID# 253M, PCGS# 518845 Base PCGS# 7080

### 1879-CC Morgan Dollar, MS61 Key Carson City Issue

- 3091 1879-CC MS61 PCGS.** From a small mintage of 756,000 pieces, the 1879-CC is the second-most elusive Morgan dollar from the famous Carson City Mint. This impressive Mint State specimen exhibits sharply detailed design elements and vibrant mint luster throughout. The mostly brilliant surfaces show the expected number of minor contact marks for the grade, with a few traces of sea-green and violet toning at the rims. NGC ID# 253U, PCGS# 7086

### 1879-CC Morgan Dollar, MS65 Shimmering Luster, Excellent Appeal

- 3092 1879-CC MS65 PCGS.** A faint trace of almond-tan and ice-blue tinting is present on the portrait, but most would regard this 1879-CC Morgan dollar as brilliant. Frosty cartwheel luster sweeps unencumbered across each side, revealing only a touch of localized strike weakness on the hair above Liberty's ear; a loupe shows some faint roller marks (mint made) in the same vicinity, not fully struck out of the planchet. The 1879-CC is the "other" key-date Morgan from the Carson City Mint, second to the more famous 1889-CC. This is a Normal Mintmark coin, the underrated counterpart of the more famous Capped Die variety. PCGS lists only four MS66 pieces finer, plus 11 Prooflike and Deep Mirror Prooflike coins in Gem condition (2/18).  
*Ex: Long Beach Signature (Heritage, 9/2007), lot 2299. NGC ID# 253U, PCGS# 7086*

**1879-CC VAM-3 'Capped Die' Dollar, MS64  
Colorfully Toned, Few Are Finer**

- 3093 1879-CC Capped Die, VAM-3, MS64 PCGS.** A Top 100 Variety. Attractive, multihued toning gleams over partially reflective fields of this near-Gem 1879-CC. The popular "Capped Die" feature is now recognized as a Large CC mintmark over a Small CC, despite a Carson City Mint engraver's attempt to disguise the anomaly. This is a sharply struck example with vibrant shades of blue, violet, and gold throughout both sides, and only a few minor marks are well-hidden within the toning. Finer Capped Die examples are scarce, with just 14 pieces finer at PCGS (2/18). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1880-CC GSA Dollar, MS66  
High-End for a GSA Coin**

- 3094 1880-CC GSA MS66 NGC.** Frost-white luster delivers a strong cartwheel effect on this Premium Gem 1880-CC GSA dollar. The devices are sharp, and a loupe reveals only the most insignificant luster grazes on each side. The 1880-CC dollar is plentiful overall, but Premium Gems that remain in their original hard plastic GSA holders are scarce. The GSA sales distributed more than 131,000 examples of the 1880-CC dollar. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

**1880-CC GSA Morgan Dollar, MS66+  
Incredibly High-End With Luminous Luster**

- 3095 1880-CC GSA MS66+ NGC.** This high-end Premium Gem is among the finer-known 1880-CC Morgan dollars still residing in its original hard plastic GSA holder. Liberty's cheek is flawless, and only a single small graze in the left obverse field prevents an even finer grade. The frost-white surfaces yield glowing, untuned mint luster. The eagle's breast and the hair above Liberty's ear show trivial weakness. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

**1881-S Dollar, Partially Prooflike MS68**

- 3096 1881-S MS68 PCGS.** For many, this San Francisco issue represents the ultimate Morgan dollar for type. Thousands of certified examples exist through the MS66 grade, and even MS67 pieces are readily available. High-end Superb Gems such as this brilliant MS68 example are in great demand, since numerically finer pieces are essentially unavailable. Immaculate silver surfaces are brilliantly lustrous and wholly untuned. The strike is pinpoint sharp throughout frosted motifs set on partially reflective fields. PCGS recognizes just two numerically finer coins (2/18). NGC ID# 2549, PCGS# 7130

**1886-O Morgan Dollar, MS64  
Three Coins Known Finer**

- 3097 1886-O MS64 PCGS.** Untoned interiors merge with blushes of pale gold and violet patina at the rims. Central strike detail is remarkably strong for this New Orleans Mint, while satiny luster washes over each side to enhance the visual quality. The overall preservation puts this coin just shy of the three finest known examples, all of which are graded by PCGS (2/18). NGC ID# 254W, PCGS# 7168

1889-CC Dollar, Lightly Toned AU58  
Smooth, Still-Lustrous Surfaces

**3098 1889-CC AU58 NGC.** Barely a trace of high-point friction is seen on this near-Mint 1889-CC Morgan dollar, and moderate amounts of satiny luster remain in the protected regions of the fields. A hint of champagne toning warms otherwise brilliant surfaces, and there are no significant abrasions seen.

The overall quality is unusual for an 1889-CC dollar, where any high-end About Uncirculated example is elusive. This key Carson City issue is most frequently seen in well-circulated condition. Mint State coins are highly sought-after and expensive. As a result, this attractive, near-Mint representative is sure to garner significant interest when it crosses the auction block.

*Ex: Long Beach Signature (Heritage, 6/2016), lot 4692. NGC ID# 2559, PCGS# 7190*

1889-CC Morgan Dollar, MS62  
Rarest Carson City Issue

**3099 1889-CC MS62 PCGS.** The frosty central devices exhibit a dusky, pale lavender-gray hue. The fields remain brilliant on each side, while splashes of golden-russet and steel-blue patina appear within the protected regions. These variations in color and contrast provide lovely eye appeal for this important Mint State example of the famous 1889-CC Morgan dollar. Design detail is strong throughout. The hair strands and talon lines are individually delineated. A couple of reeding marks on the lower cheek and a few minor field abrasions explain the technical assessment. The 1889-CC is well-known as the rarest Carson City Morgan dollar. As much as 93% of the original mintage (350,000 coins) may have been melted. There should be significant interest in this lot. NGC ID# 2559, PCGS# 7190

**1889-O Dollar, MS64 Deep Mirror Prooflike  
Captivating Eye Appeal**

- 3100 1889-O MS64 Deep Mirror Prooflike PCGS Secure.** Prooflike 1889-O Morgan dollars often have the added benefit of being better-struck than their non-reflective counterparts. This Choice Deep Mirror Prooflike dollar boasts brilliant, boldly contrasted centers surrounded by rings of golden-orange and cobalt-blue patina. Strike detail is pinpoint-sharp, and the eye appeal is captivating. Population: 27 in 64 (1 in 64+) Deep Mirror Prooflike, 2 finer (2/18). NGC ID# 45YN, PCGS# 97193

**1890-CC VAM-4 Tail Bar Dollar  
MS63 Prooflike, CAC Endorsed**

- 3101 1890-CC Tail Bar, VAM-4, MS63 Prooflike PCGS. CAC.** A Top 100 Variety. The unmistakable rodlike die gouge between the arrow fletchings and leaves is easily visible with the naked eye, making VAM-4 a star among variety specialists and Morgan dollar collectors in general. This is a rare designated Prooflike example, brilliant on the obverse and richly toned on the reverse. Surprisingly few marks and abrasions exist for the assigned Select grade, and this sharply struck 1890-CC is suitably CAC-endorsed as a result. Population: 3 in 63 Prooflike, 2 finer (1/18). NGC ID# 255D, PCGS# 43338 Base PCGS# 87199

**1892-CC Silver Dollar, MS65  
Better Carson City Issue in High Grade**

- 3102 1892-CC MS65 PCGS.** Brilliant, frosty mint luster illuminates well-preserved surfaces on this Gem 1892-CC Morgan dollar. The obverse shows the usual strike weakness on the hair above Liberty's ear, but the reverse is boldly defined. Tiny, scattered grazes on the obverse define the grade. The 1892-CC is available in this grade, but PCGS has seen only 35 finer non-Prooflike pieces, plus 16 Prooflike and Deep Mirror Prooflike coins in Gem condition (2/18). NGC ID# 255M, PCGS# 7214

**1893-CC Morgan Dollar, MS63  
Final Carson City Issue**

- 3103 1893-CC MS63 PCGS.** The fields are semireflective with enough frost to radiate nice cartwheel luster. The strike on this Select example is sharper than most including good hair definition above the ear. A faint hint of champagne-gold is confined mostly to the borders. A glass reveals a peppering of light marks on Liberty's portrait and in the surrounding fields, but there are no heavy marks. Housed in a prior generation blue-label holder (barcode on the back). NGC ID# 255S, PCGS# 7222

**1893-S Morgan Dollar, VF30  
Appealing Collector Coin**

- 3104 1893-S VF30 NGC.** Smooth, problem-free steel-gray surfaces characterize this high-end VF example, while the design elements show light, even wear. A tinge of blue-gray toning stretches along the outer reverse periphery from 12 to 3 o'clock. The 1893-S is inherently popular in all grades, and attractive collector-grade pieces such as this are in demand among those completing date and mintmark sets. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, AU50**  
**Lightly Circulated, Attractive Surfaces**

**3105 1893-S AU50 NGC.** Even About Uncirculated coins are elusive when seeking an 1893-S. By far, the great majority of pieces available to collectors grade no better than VF. Choice XF examples come along on occasion, but from that point on the search becomes challenging. Minted in the West, most coins circulated to the point of attrition, and few pieces were numismatically preserved.

This silver-gray example saw enough wear to minimize most of its abrasions and bagmarks. In hand, the surfaces are smooth with glints of luster remaining at the margins. A glass reveals several small nicks and lines, but they are grade-appropriate and of little visual impact. As often seen, the strike over the ear is weak — a situation compounded by moderate wear, but no more than expected for the AU50 level. The rims are sharp and ideal for the assigned grade. NGC ID# 255U, PCGS# 7226

**1895-S Dollar, Semiprooflike MS64**  
**Seldom Offered Finer**

**3106 1895-S MS64 PCGS Secure.** Semiprooflike fields increase the eye appeal of this near-Gem 1895-S Morgan, complementing sharp design elements. The surfaces are nearly brilliant save for a splash of deep bluish-gray toning on the eagle's breast. A few scattered abrasions define the grade. The 1895-S is a better date in all grades, coming from a mintage of only 400,000 pieces, but examples grading finer than the present are scarce. NGC ID# 255Z, PCGS# 7238

**1896-S Morgan Dollar, MS65**  
**Rare Any Finer**

**3107 1896-S MS65 PCGS.** Though 5 million 1896-S dollars were struck, Mint State survivorship is low and every grade point ratchets up the price. At the Gem level the 1896-S is a clear condition rarity, and PCGS has graded only five examples as MS66 or better (2/18). This distinctively toned piece is primarily silver but has prominent splashes of blue-green, reddish-violet, and gunmetal-gray patina, primarily around the left and upper margins but also extending to Liberty's nose and lips. The reverse has a "bar" of reddish-orange between the eagle's wings and color accents elsewhere. Softly struck with roller marks on the portrait but a broadly appealing coin nonetheless. NGC ID# 2564, PCGS# 7244

**1903-S Morgan Dollar, MS64**  
**Ideal Collector Grade**

**3108 1903-S MS64 PCGS. CAC.** This lightly toned near-Gem embodies the ideal collector-grade Mint State example of this semikey San Francisco issue. The surfaces show warm golden toning that deepens at the peripheries, and the well-struck design elements offer an aesthetically pleasing complement. A few small marks prevent Gem classification but none distract. The scarcity and cost of finer coins makes this CAC-approved example especially appealing. NGC ID# 256T, PCGS# 7288

1904-O Silver Dollar, MS67+ ★  
Prooflike Obverse

- 3109 1904-O MS67+ ★ NGC.** The 1904-O Morgan dollar is scarce in Superb Gem condition. This is the only Plus and Star-designated coin in MS67 at NGC with none finer, making it arguably the single finest 1904-O dollar at that service; four MS67 Prooflike coins are also listed, none Plus-graded (2/18). This piece is boldly struck and devoid of abrasions. Prooflike obverse fields earn the Star designation, while the reverse is more satiny. Tinges of gold at the outer borders frame brilliant interiors. NGC ID# 256V, PCGS# 7292

1921 Morgan Dollar, MS67  
Brightly Frosted, None Graded Finer

- 3110 1921 MS67 NGC.** A more perfect example of the final-year 1921 Morgan dollar is inconceivable, and indeed, none are graded higher at either of the leading certification services. Each side presents full strike definition throughout brightly frosted, all-brilliant surfaces. Magnification is required to view a few minute marks on the chin. The fields are entirely unabraded. Census: 13 in 67 (1 in 67 ★), 0 finer (2/18). NGC ID# 256X, PCGS# 7296

PROOF MORGAN DOLLARS

1881 Morgan Silver Dollar, PR67+  
Spectacular Patina  
From the Gardner Collection

- 3111 1881 PR67+ PCGS. CAC.** In his *Official Red Book of Morgan Silver Dollars*, Q. David Bowers (2007) wrote about the proof dollars of 1881 and gave particular praise to two attributes: "Excellent strike and deep cameo contrast go together on most pieces."

Although it lacks cameo contrast, this coin makes up for it with spectacular patina and a razor-sharp impression. A lightly toned region at the upper-right obverse hints at the cameo effect that once appeared on that side. The rest of the specimen, however, now exhibits rich violet, blue-green, orange, and jade patina. The fields are exquisitely preserved, and the overall visual appeal is grand. This gorgeous Superb Gem Morgan dollar is one of the finest survivors from a mintage of 984 proofs.

Ex: ANA Signature (Heritage, 8/2007), lot 1762; FUN Signature (Heritage, 1/2008), lot 2999; Eugene H. Gardner Collection (Heritage, 10/2014), lot 98628; Dallas Signature (Heritage, 11/2017), lot 16865. NGC ID# 2725, PCGS# 7316

1885 Morgan Dollar, PR66  
Rare Cameo Example

- 3112 1885 PR66 Cameo PCGS. CAC.** A fairly generous mintage of 930 proof Morgan dollars was accomplished at the Philadelphia Mint in 1885, but the issue was not well-produced and high-grade Cameo examples are elusive. This delightful Premium Gem is an exception to the rule, with sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The well-preserved surfaces are essentially untoned and eye appeal is outstanding. Population: 23 in 66 (3 in 66+) Cameo, 4 finer. CAC: 10 in 66, 3 finer (1/18).  
*From The Glacier Park Collection.* NGC ID# 27ZE, PCGS# 87320

1891 Morgan Dollar, PR67 Cameo  
Only 650 Pieces Struck

- 3113 1891 PR67 Cameo NGC.** A magnificent Superb Gem from a small proof mintage of 650 pieces, this coin exhibits sharply detailed design elements in most areas, with just a trace of the usual blending on the hair above the ear. The impeccably preserved surfaces include deeply mirrored fields that contrast boldly with the frosty devices. Census: 15 in 67 Cameo, 2 finer (2/18). NGC ID# 27ZL, PCGS# 87326

GOLD DOLLARS

1849 No L Gold Dollar, MS66  
Exemplary First-Year Issue

- 3114 1849 No L, D-1, Normal Stars, MS66 NGC.** Open Wreath, No L. The true No L variety (such as this coin) has two heavily repunched stars beneath the bust, plus repunching on star 9. Attractive lemon-gold color drapes both sides of this Premium Gem, imbued with outstanding luster that shines from the surfaces. The coin is sharply struck and exceptionally well-preserved. Census: 12 in 66 (1 in 66★), 7 finer (2/18).  
*Ex: Central States Signature (Heritage, 4/2008), lot 2400; Long Beach Signature (Heritage, 2/2009), lot 2339.* NGC ID# 25B7, PCGS# 521670 Base PCGS# 7501

1852 Gold Dollar, MS66  
Popular Type One Issue

- 3115 1852 MS66 PCGS.** The 1852 gold dollar is always popular with type collectors because of its relative availability in high grade. The issue is rare at the MS66 level, however. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. Population: 17 in 66, 6 finer (2/18). NGC ID# 25BP, PCGS# 7517

1853-O Gold Dollar, MS65  
Conditionally Rare Type One

- 3116 1853-O MS65 NGC. Variety 1. High Date.** A substantial mintage of 290,000 pieces matched the 1851 output of gold dollars at the New Orleans Mint, although the 1853-O is a bit scarcer. The issue is conditionally rare in Gem or finer grades. This example radiates sun-gold color with abundant mint luster throughout both sides. Marks are minimal and the strike is needle-sharp. Census: 8 in 65, 2 finer (2/18). NGC ID# 25BX, PCGS# 7524

**1854 Type Two Gold Dollar, MS64  
Rich Luster and Vibrant Color**

- 3117 1854 Type Two MS64 PCGS.** The introductory year for the Type Two Indian Princess design saw a large mintage, but the new design and larger diameter did little to solve production issues for the small dollar gold pieces. The 1854 issue is the most-available representative of this short-lived type, which lasted only until 1856. Radiant sun-gold color displays brilliant mint luster across both sides of this near-Gem example. The strike is sharp despite die clashing that plagued the gold dollar series in all of its designs. Housed in a previous generation green label holder. NGC ID# 25C3, PCGS# 7531

**1855 Type Two Gold Dollar, MS63+  
Rich Reddish Patina**

- 3118 1855 Type Two MS63+ PCGS.** The gold dollar was a perfect example of the Neoclassical need to impose order. This long-lived art movement was especially suitable for coinage since order must be imposed because of design considerations. However, the need for order goes beyond the design and layout. Thick designs cannot oppose each other on the obverse and reverse because of the need to have each side fully strike up with one blow from the press. This lesson was learned the hard way by James Longacre with his 1854 redesign (the Type Two design) of the gold dollar. Die opposition and subsequent weak central details caused Longacre to modify the coin's design again in 1856 to the Type Three design. This is a high-grade example that displays rich reddish-gold color. The strike details are remarkably sharp with all digits complete in the date. NGC ID# 25C4, PCGS# 7532

**1855-O Gold Dollar, MS61  
Only Type Two O-Mint Issue**

- 3119 1855-O MS61 PCGS. Variety 2.** Lapped reverse, as often seen. There is only one Type Two gold dollar struck at the New Orleans Mint: the 1855-O. This is also the most popular and final gold dollar from the Louisiana branch mint. Only a few hundred examples survive from a mintage of 55,000 coins. Perhaps 50 or so pieces are in Uncirculated condition. Brightly lustrous surfaces feature scattered wispy marks. Strong detail is noted on the headdress and lower wreath. Population: 15 in 61, 25 finer (2/18). NGC ID# 25C7, PCGS# 7535

**1866 Gold Dollar, MS65  
Seldom Encountered Any Finer**

- 3120 1866 MS65 PCGS.** A small business-strike mintage of 7,100 gold dollars was accomplished at the Philadelphia Mint in 1866. As might be expected, the issue is elusive in all Mint State grades and examples in MS65 condition are rare. This attractive Gem exhibits sharply detailed design elements, with prominent clash marks on both sides. The well-preserved yellow-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 10 in 65, 20 finer (2/18). NGC ID# 25D2, PCGS# 7565

**PROOF GOLD DOLLAR**

**1887 Gold Dollar, PR64 Ultra Cameo  
Glittering Late-Series Near-Gem**

- 3121 1887 PR64 Ultra Cameo NGC.** Clearly a proof, struck from the proof dies with the top of the wreath closed and 7 in the date wholly beneath the A in DOLLARS. The D, O, and A are filled. Dramatic cameo contrast elevates the frosted devices above jet-black mirrors, which are exceptionally deep throughout the coin except where Mint-related striations angle across the upper-left obverse. Some small areas of delicate lines and a few isolated patches of orange-peel texture are visible with a loupe, but do little to diminish the vibrant and rich, yellow-gold eye appeal that glitters from all points of this Choice Ultra Cameo proof. Census: 1 in 64 Ultra Cameo, 4 finer (1/18). PCGS# 97637

## EARLY QUARTER EAGLE

1805 BD-1 Quarter Eagle, MS61  
A Great Rarity in Mint State

- 3122 1805 BD-1, R.4, MS61 PCGS.** Bass-Dannreuther Die State c/b, showing a light crack through the top of the date and another through stars 5-7 and the LIB in LIBERTY. Harry W. Bass, Jr. noted repunching on reverse star 11 but no other diagnostics for this only known die variety. The Capped Bust Right quarter eagle type commenced in 1796 and lasted through 1807, but the combined mintage of all ten *Guide Book* issues amounted to only 16,452 coins. Uncirculated examples of any date or variety are genuinely rare and exist primarily in low grades. The 1805 has a surviving population estimated at fewer than 150 pieces in all grades combined. This MS61 example is near the Condition Census. The satiny straw-gold surfaces are relatively smooth, showing only light chatter for the grade. Under magnification, wispy adjustment marks can be seen in the vicinity of the date and across the portrait. Some lightness of strike is visible in the centers. Housed in a green label holder. Population: 2 in 61, 5 finer (1/18).

Ex: FUN Signature (Heritage, 1/2005), lot 8763.

**From The Glacier Park Collection.** NGC ID# BFFV, PCGS# 45511 Base PCGS# 7653

## LIBERTY QUARTER EAGLES

1842 Quarter Eagle, Scarce XF45  
Undervalued Early Philadelphia Issue

- 3123 1842 XF45 NGC.** With a mintage of just 2,823 pieces, the 1842 is an impressively scarce date in the Liberty Head series, but it is seldom recognized as such. The Charlotte and Dahlonega 1842 issues each have larger mintages and higher certified populations, yet each carries a higher market value. This Choice XF Philadelphia example shows slight softness over the high points of the devices, but there are no significant marks on either side. Lovely orange-gold color confirms its original surfaces. Fewer than 60 pieces are known in all grades combined. Census: 5 in 45, 13 finer (1/18).

**From The Glacier Park Collection.** NGC ID# 25GG, PCGS# 7723

1852-O Liberty Quarter Eagle, MS60  
Lustrous Branch Mint Issue

- 3124 1852-O MS60 NGC. Variety 2.** The 1852-O Liberty quarter eagle claims a moderate mintage of 140,000 pieces, but the issue is rarely encountered in mint condition. The strongly impressed mintmark on this variety appears to have been engraved by hand on the working die at the New Orleans Mint. This attractive MS60 specimen offers well-detailed design elements, with a touch of the usual softness on the eagle's claw and leg. The lustrous greenish-gold surfaces show the minimum number of minor contact marks for the grade. Census: 5 in 60, 29 finer (2/18). NGC ID# 7HX8, PCGS# 7766

1855-C Quarter Eagle, MS62+  
Only 3,677 Coins Struck

**3125 1855-C MS62+ NGC. Variety 1.** North Carolina gold represented 91% of deposits at the Charlotte Mint in 1855 — an average proportion relative to other imports from South Carolina and California. The vast majority of the \$216,606 in total domestic gold deposited was diverted toward the production of half eagles in 1855, although small quantities of gold dollars and quarter eagles were also manufactured. This is one of just 3,677 pieces minted for the issue. Between 85 and 105 examples are believed extant, including six or seven coins in Mint State (the certification totals are inflated).

The 1855-C has a reputation for being one of the worst-struck Charlotte quarter eagles. This example is better struck than many we have seen, with nearly full star radials, clear wing and neck feathers, and bold olive leaves. The eagle's left leg and surrounding area is typically weak. Each side is softly lustrous with yellow-gold color and minimal marks. A terrific example of the lowest-mintage North Carolina two and a half dollar. Census: 5 in 62 (1 in 62+), 3 finer (2/18). NGC ID# 25J5, PCGS# 7775

1857-O Two and a Half, MS61  
Elusive Issue in High Grade

**3126 1857-O MS61 NGC. Variety 1.** The 1857-O was the final Liberty quarter eagle issue from the New Orleans Mint, with a modest mintage of 34,000 pieces. The issue is somewhat more available than the small production total suggests because of a hoard that was discovered in Tennessee in the 1980s. This attractive MS61 example offers well-detailed design elements, with a touch of the usual softness on the eagle's leg, and lustrous orange-gold surfaces that are lightly marked for the grade. Census: 33 in 61, 15 finer (2/18). NGC ID# 25JE, PCGS# 7784

1882 Quarter Eagle, MS67  
First Known Auction Appearance  
A Top Condition Census Example

**3127 1882 MS67 PCGS.** Only the Philadelphia Mint struck quarter eagles in 1882, and just 4,000 pieces were produced. These did not circulate to any meaningful extent, and Mint State coins remain plentiful today. However, Gems are conditionally rare, and anything finer is seen with great infrequency. The MS67 coin offered here is tied with one other as the finest at PCGS by two grade points. The finest NGC coin reported is a lone MS66 (1/18).

We offered the other MS67 PCGS coin twice back in 2005, but we have not offered a comparable example since. This coin is making its debut appearance at auction. The strike is sharp, and the original orange-gold surfaces show no distracting abrasions. A hint of reflectivity is apparent in the fields. Housed in a green label holder.  
**From The Glacier Park Collection.** NGC ID# 7JTR, PCGS# 7834

## PROOF LIBERTY QUARTER EAGLE

1905 Quarter Eagle, PR65  
20th Century Proof Type Coin

**3128 1905 PR65 PCGS.** The certified population of the proof 1905 quarter eagle is nearly twice the issue's mintage of 144 pieces, revealing the unreliability of the PCGS and NGC reports with regards to this issue's rarity. It is likely that more than two thirds of the pieces struck survive, but most are low-grade. Most of the coins that we have handled graded PR60 to PR64. Gem proofs rarely appear at auction. The rich tangerine-gold surfaces of this example offer intense reflectivity and show a hint of contrast on the reverse. A couple of tiny marks in the left obverse field near Liberty's neck serve as a pedigree market but do not detract. The strike is full. Population: 23 in 65, 11 finer; 2 in 65 Cameo, 8 finer (1/18).

*Ex: Dallas Signature (Heritage, 11/2005), lot 2385.*

**From The Glacier Park Collection.** NGC ID# 7KG5, PCGS# 7931

## INDIAN QUARTER EAGLES

### 1911-D Quarter Eagle, MS61 Outstanding for the Grade

- 3129 1911-D MS61 NGC.** We have handled many 1911-D quarter eagles in the lower Mint State grades, but this is one of the most appealing examples we have seen in MS61. A bold mintmark and other sharp design elements complement satiny straw-gold luster that yields small tinges of deeper peach and orange. Faint field marks limit the grade, but without close study under a loupe the eye appeal rivals that of many higher-grade pieces. NGC ID# 7KR7, PCGS# 7943

### 1911-D Two and a Half, MS61 Original Color

- 3130 1911-D MS61 PCGS.** This well-detailed example has satiny olive-gold mint luster with only light field marks that limit the grade. The coloration is original, which is significant considering how many low-end Uncirculated and AU pieces have been brightened in an effort to receive a higher grade from the certification services. The mintmark is bold on this piece, a collector-grade example of the series key issue. NGC ID# 7KR7, PCGS# 7943

### 1911-D Two and a Half, Sharply Struck MS62 Collectible Mint State Coin

- 3131 1911-D MS62 NGC.** A sharp strike and satiny yellow luster give this Mint State 1911-D quarter eagle pleasing appeal for the grade, while a few light marks in the left obverse field determine the numeric designation. The low mintage of this issue (55,680 pieces) largely stems from a lack of commercial demand for the denomination in Western regions during that period. Although Mint State survivors are frequently traded, demand for them is ever increasing, even at the lower Mint State levels. NGC ID# 7KR7, PCGS# 7943

### 1914-D Indian Quarter Eagle, MS65 None Finer at PCGS

- 3132 1914-D MS65 PCGS. CAC.** The 1914-D Indian quarter eagle claims a fairly modest mintage of 448,000 pieces, but the issue is even more elusive in high grade than that production total would suggest. In fact, the 1914-D is the most elusive issue in the series in high grade. A number of factors contribute to this condition rarity. The 1914-D was not a well-produced issue to begin with, and many examples seen are softly struck, with die buckling around the peripheries and unsightly copper alloy spots. In addition, few examples were saved by contemporary collectors, and most survivors display numerous abrasions and luster grazes in the fields.

The present coin is a marvelous exception to the rule, with sharply detailed design elements and just a trace of die buckling evident near the obverse rim. The lustrous orange-gold surfaces are impeccably preserved, with outstanding eye appeal. This coin should find a home in the finest collection or Registry Set. Housed in a green label holder. Population: 52 in 65, 0 finer. CAC: 5 in 65, 0 finer (2/18). NGC ID# 2899, PCGS# 7947

## THREE DOLLAR GOLD PIECES

1855-S Three Dollar Gold, AU53  
Elusive Branch Mint Issue

- 3133 1855-S AU53 PCGS. CAC.** Only 6,000 business-strike three dollar gold pieces were struck at the San Francisco Mint in 1855, and few examples were saved for numismatic purposes. As might be expected, the issue is rare in high grade today. This attractive AU53 example shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces exhibit prooflike reflectivity in sheltered areas. Population: 12 in 53, 22 finer. CAC: 3 in 53, 3 finer (2/18). NGC ID# 7K5D, PCGS# 7973

1858 Three Dollar, AU58  
Low-Mintage Issue

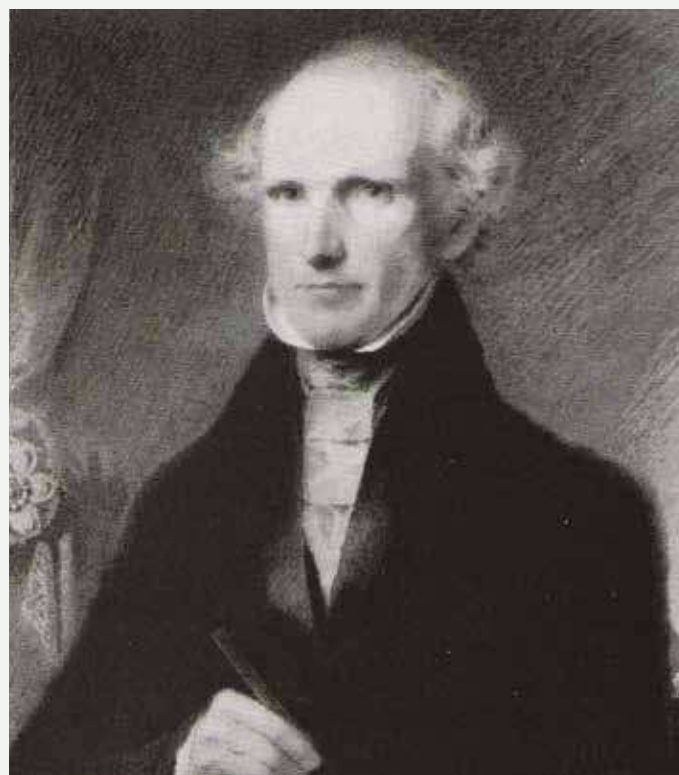

- 3134 1858 AU58 PCGS Secure. CAC.** The low Philadelphia mintage of just 2,133 pieces saw significant circulation — not always the case for three dollar gold pieces — and few Uncirculated 1858 pieces were saved. This is a still-lustrous near-Mint State example with natural wheat-gold color and orange accents with just a touch of wear. Flecks of olive-brown toning add natural appeal to the CAC-endorsed surfaces. Sharp definition remains on both sides. Population: 18 in 58, 11 finer. CAC: 3 in 58, 1 finer (2/18). NGC ID# 7K5J, PCGS# 7978

1860-S Three Dollar Gold, AU53  
Elusive S-Mint Issue

- 3135 1860-S AU53 NGC.** Only 7,000 three dollar gold pieces were struck at the San Francisco Mint in 1860, and few examples were saved by contemporary collectors, making the issue elusive in all grades today. This attractive AU53 specimen shows just a trace of wear on the well-detailed design elements and the lustrous yellow-gold surfaces are lightly abraded. Census: 12 in 53, 40 finer (2/18). NGC ID# 7K5M, PCGS# 7981

1882 Three Dollar, MS62  
Just 1,500 Coins Struck

- 3136 1882 MS62 PCGS.** From the period of lowest three dollar gold production. Only 1,500 pieces were struck in 1882. A good deal of those coins survive, as many were distributed and saved as gifts or souvenirs. This lemon-gold MS62 representative offers the prooflike reflectivity and contrast expected of such a low-mintage issue. Strike detail is good without softness on the date or denomination. Microscopic marks are peppered throughout the fields, but they are seen mainly under a glass. NGC ID# 25N5, PCGS# 8004

Mint Engraver James B. Longacre

## PROOF THREE DOLLAR GOLD PIECE

1881 Three Dollar Gold, PR66 Cameo  
A Condition Census, CAC-Approved Rarity

**3137 1881 PR66 Cameo PCGS. CAC.** With only 500 circulation strikes produced, the 1881 three dollar gold piece boasts the lowest mintage in the series and is an important key date. High-grade survivors of the circulation issue are rare. Equally rare, however, is the proof variant. Paul Taglione once wrote (1986): 1881 Proofs rank amongst the best preserved of the series and there are some really exceptional specimens of this date ... I would dare claim that it is distinctly possible (likely?) that there are more high quality Proofs known than counterpart business strikes." This remains true strictly in terms of high-grade populations, but it misrepresents the availability of the 1881 proof overall.

The accepted mintage of the proof issue is 54 coins, but this was not always known. In the Dr. Wheeler, et al Collection sale (5/1937), Thomas Elder stated that "probably not over 15 or 20 proofs" were struck, which was in line with the perceived rarity of the issue at the time. Estimates of the mintage gradually increased over time, and the 54-coin figure began appearing in the 1960s. In his *Proof Encyclopedia*, Walter Breen presented coinage figures drawn from Mint records, consisting of 40 pieces issued in gold proof sets on February 9th, 10 additional coins delivered in late March, and four more in the final quarter — a total of 54 proofs.

The modern-day availability of this issue is one of more active debate. Q. David Bowers, in his 2005 treatise *The United States Three Dollar Gold Pieces: 1854-1889*, estimates the number known to be 45 or more pieces. However, in years past, the availability of proofs has been skewed by misattribution of prooflike circulation strikes. David Akers (1979) wrote: "... deceptive first strikes exist that are virtually indistinguishable at first glance from actual proofs." The combined PCGS and NGC certified proof population records 76 grading events, which is highly inflated by resubmissions. Since our Permanent Auction Archives began in 1993, we have offered an 1881 proof three dollar piece on only 20 occasions, including two appearances of an impaired coin. In our experience, this issue is significantly rarer than Bowers' estimate of at least 45 coins suggests.

The Premium Gem offered here is among the finer 1881 proofs known and is tied for the finest example that we have seen. It is the only PR66 coin that we have ever handled in a PCGS holder, and it has been more than 13 years since its last offering. The only semi-recent appearance of a comparable Cameo proof is a PR66 Cameo NGC coin in lot 5844 of the FUN Signature Auction (Heritage, 1/2013), which realized \$47,000. This CAC-approved PCGS coin has the potential to set a new price record. The bright surfaces display orange-gold color and are impeccably preserved. The cameo contrast is outstanding, the devices appearing to float atop liquidlike fields. The strike is full, and eye appeal is seemingly unsurpassable. A Condition Census coin at PCGS, which lists two PR66 Cameos, two PR66 Deep Cameos, and a lone PR67 Cameo finer. CAC has awarded green labels to just two Cameos in this grade and one finer (1/18).

Ex: Dallas Signature (Heritage, 11/2005), lot 2396.

From *The Glacier Park Collection*. NGC ID# 28AP, PCGS# 88045

## EARLY HALF EAGLES

1795 Small Eagle Five Dollar, AU55  
Elusive BD-6 Variety, S Over D

**3138** 1795 Small Eagle, S Over D, BD-6, R.5, AU55 NGC. Bass-Dannreuther Die State b/c. A popular S Over D variety with the final S in STATES punched over an errant D — this blundered reverse was used for two of the 12 different 1795 Small Eagle varieties. Both BD-6 dies show curious linear die gouges periodically around the borders, and in this state some light peripheral die cracks. Collectively, the 1795 half eagle was the first gold coin struck by the infant Philadelphia Mint, after a coinage impediment was alleviated. The Mint Act of April 2, 1792 required an excessive surety bond for Mint officers, and those best suited for the job of assayer and coiner were unable to post the bond. The Mint Act required a \$10,000 bond be posted by officers whose annual salary was only \$1,500. On February 8, 1794, David Rittenhouse wrote to Congress that “a man’s ability to give security depends much on accidental circumstances, little connected with either his qualifications or his moral character.”

Gold coinage began in July 1795. Moses Brown of Massachusetts made the first deposit of gold on February 12, 1795, providing 128 ounces. The first delivery of half eagles consisted of 744 coins that the Chief Coiner delivered to the Mint Treasurer for distribution. Given the number of die pairs used, it is likely that 1795-dated Small Eagle fives were coined into 1796.

This pleasing Choice AU BD-6 coin exhibits bright yellow-gold color with hints of reflectivity in the fields, especially near the borders. Both sides are lightly marked as expected, but there are no significant abrasions. A splendid piece, this important half eagle will make a nice addition to a specialized variety collection, or a date or type set.

Ex: FUN Signature (Heritage, 1/2010), lot 2150, where it realized \$37,375. NGC ID# 25ND, PCGS# 519855 Base PCGS# 8066

1800 Capped Bust Right Five, AU53  
Popular BD-5 Variety

**3139** 1800 BD-5, High R.3, AU53 NGC. Bass-Dannreuther Die State d/b. Diagnostics for the variety include, but are not limited to: No flag on the 1 in the date; reverse star 13 touches the back of eagle’s neck; both feet of the final A in AMERICA touch the eagle’s right (facing) talon; and the last S of STATES is over a cloud space. A pleasing green-gold representative that seems solidly graded at AU53. Excellent detail, and just a few minuscule marks on each side.

Ex: ANA National Money Show (Heritage, 3/2007), lot 1884; Central States Signature (Heritage, 5/2007), lot 3577; FUN Signature (Heritage, 1/2008), lot 4053. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1803/2 Half Eagle, BD-1, AU Details

**3140** 1803/2 BD-1, R.4 — Repaired — PCGS Genuine. AU Details. Bass-Dannreuther Die State b/c. Although the reverse is extensively cracked, this is one of the earlier die states for the BD-3 variety. This reverse was previously employed for the BD-7 1802 die marriage, wherein it initially cracked. This example shows little true wear and is well-struck with complete dentils and bold devices. The bright yellow-gold surfaces are partially lustrous, but tooling in the obverse fields prevents a numeric grade. The overdate, diagnostic of all four 1803 varieties, remains clear.

1803/2 Capped Bust Right Half Eagle, AU58  
Imperfect T, BD-1 Variety

**3141 1803/2 BD-1, R.4, AU58 PCGS.** Bass-Dannreuther Die State a/b. A respectable mintage of 33,506 Capped Bust Right half eagles was accomplished in 1803, with four die varieties known for the date. This coin represents the BD-1 variety, with a broken right foot on the T in LIBERTY and the star pointing to the upper beak tip on the reverse. Two leftover obverse dies from 1802 were overdated and used to strike all the 1803-dated half eagles. The BD-1 obverse was used on three of those varieties, while BD-4 was produced with an obverse that shows a perfect T in LIBERTY. The reverse die was used previously to strike the BD-7 variety of 1802. The BD-1 is the most available variety of the date, with a surviving population of 150-200 examples in all grades.

This impressive near-Mint specimen shows just a trace of actual wear on the design elements, which are sharply detailed in most areas, but exhibit the typical softness on the eagle's claw and arrows. The antique-gold surfaces are lightly abraded and retain much of their original mint luster. The overall presentation is most attractive. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1805 Half Eagle, BD-1, MS63  
Lustrous Mint State Type Coin  
Conditionally Scarce

**3142 1805 BD-1, High R.3, MS63 PCGS.** Bass-Dannreuther Die State a/a. BD-1 is the most plentiful 1805 half eagle variety, with as many as 225 pieces believed extant, according to John Dannreuther in *Early U.S. Gold Coin Varieties*. Although a common date among early gold issues, the 1805 half eagle is conditionally scarce in MS63 and rare finer. All varieties combined, we have previously handled a Select example of this date on only 15 occasions with a comparably small number of finer pieces. Much more often seen are AU-level coins, many of which are impaired.

The piece offered here displays softly frosted yellow-gold luster and an even strike. No adjustment marks are seen at the borders but a few do appear on the upper hair curls of the obverse portrait. Slight strike weakness occurs on the border stars and the eagle's left (facing) wing junction. The only grade-limiting surface imperfection is some light chatter in the obverse fields. A high-end type or date representative. Population: 39 in 63 (1 in 63+), 21 finer (1/18).

**From The Glacier Park Collection.** NGC ID# 25P4, PCGS# 45615 Base PCGS# 8088

1809/8 Half Eagle, BD-1, AU58  
Exceptional Color, Luster Remains

1810 Capped Bust Left Half Eagle, AU53  
Small Date, Tall 5, BD-1 Variety

**3143** 1809/8 BD-1, High R.3, AU58 PCGS Secure. Bass-Dannreuther Die Stat a/b, clashed reverse. Slight high-point friction is visible on each side of this near-Mint coin, although much luster remains in the fields, creating a cartwheel effect when rotated in-hand. The original orange-gold surfaces bleed to deeper amber-gold in the centers and yield to lighter yellow-gold at the outer peripheries. The surfaces are remarkably smooth, adding to the eye appeal of the sharp devices. No adjustment marks are present. Only one variety is known for the 1809 half eagle, and fewer than 300 examples likely survive in all grades. High-end AU coins with original luster and patina are rare and highly sought-after among specialists. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

**3144** 1810 Small Date, Tall 5, BD-1, High R.3, AU53 NGC. Bass-Dannreuther Die State c/c, with rust lumps in the reverse field above the eagle. This is the second most plentiful variety of the year, with a surviving population of 150-225 examples, but it is substantially scarcer than the Large Date, Large 5 variety. This pleasing piece has excellent luster with attractive green-gold surfaces and limited abrasions that are consistent with the grade. Ex: *Houston Signature* (Heritage, 12/2008), lot 1977. NGC ID# BFXM, PCGS# 507596 Base PCGS# 8106

**1810 Large Date Half Eagle, BD-4, MS63**  
**Lustrous, Sharply Struck Type Coin**

- 3145 1810 Large Date, Large 5, BD-4, R.2, MS63 NGC.** Bass-Dannreuther Die State a/a, uncracked and unclashed. Most of the 100,287 half eagles struck in 1810 were likely of this variety, as it is relatively plentiful in relation to the three other 1810 die pairings. It is the second and final use of the obverse and the only use of the reverse. Perfect die state examples such as the present are popular for representing the type, particularly when located in attractive Mint State condition. This piece is appealing and sharply struck everywhere except on the eagle's talons, which show minor softness. Bright yellow-gold mint luster shows only a few light abrasions. Finer pieces are rare and highly sought-after. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

**1813 Half Eagle, AU Details**  
**Scarcer BD-2 Variety**

- 3146 1813 BD-2, R.4 — Scratch — PCGS Genuine. AU Details.** Bass-Dannreuther Die State d/b. This variety is the scarcer of the two from 1813, with the first S in STATES more-or-less centered above the E in PLURIBUS. The scratch referred to by PCGS is a thin, relatively unobtrusive pinscratch located in the lower left reverse field. The design motifs are boldly struck, and the orange-gold surfaces display cherry- and purple-red accents around raised devices. The piece has a softly lustrous, slightly subdued appearance, but, other than the previously-mentioned pinscratch, there are few noticeable surface marks.  
*Ex: Long Beach Signature (Heritage, 9/2014), lot 3408.*

**1813 Capped Head Left Half Eagle, BD-2, AU58**  
**First Year of the Design Type**

- 3147 1813 BD-2, R.4, AU58 NGC.** Bass-Dannreuther Die State d/b, with the cracks at the bust tip and through CA in AMERICA in the early stages. The scarcer of two known varieties for the year, with the first S in STATES close to the scroll's edge. The warm yellow-orange surfaces of this near-Mint specimen show just a trace of friction. Minimally marked, though an apparent rim bump is noted at the lower right obverse and faint traces of adjustment marks are seen in the dentils.  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 2681. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116*

**1818 BD-1 Half Eagle, MS61**  
**The Only 'Normal' Dies**

- 3148 1818 BD-1, R.5, MS61 NGC.** Bass-Dannreuther Die State b, with a cracked reverse. Mint Engraver John Reich left the Mint in 1817, and Robert Scot is credited with making slight alterations to the Capped Bust design in 1818. The area under the folds of the cap is slightly different (among other differences), but side-by-side comparison with the 1815 is required for a full appreciation of these subtle changes. Scot also employed Reich's "secret" notched Star 13 punch for all stars on the obverse die, apparently not noticing the "signature" notch on one of the rays.

Three varieties comprise the entire 1818 half eagle issue — strangely, none of the obverse or reverse dies are repeated one variety to the next. Only the BD-1 dies are described as "normal," without overt Mint anomalies. All 1818 varieties are scarce. BD-1 has an estimated survival rate of 50 to 65 coins, few of which remain Uncirculated. This is a gorgeous, original Mint State example with attractive, green-gold surfaces and bold dentils. The strike is trivially soft on the highest portrait curls and the tops of the eagle's talons, but the main central elements are crisply defined. Mint luster coruscates over both sides. Census: 3 in 61, 19 finer (2/18). NGC ID# BFXV, PCGS# 519911 Base PCGS# 8119

**CLASSIC HALF EAGLE**

**1838-C Classic Head Five, XF45**  
**Popular One-Year Type Coin**

- 3149 1838-C XF45 NGC. Breen-6517, Normal 5, Variety 1, R.4.** The Classic Head five is a one-year type and, by definition, a first-year-of-issue coin. As such, it is revered by branch mint gold and type collectors alike. A combination of factors make it difficult to find the 1838-C in higher grades: Central strike weakness, lapped dies, and numerous abrasions all contribute to the lack of Choice specimens. This lustrous, green-gold example shows some unavoidable deficiencies of strike, but it retains much of its luster and eye appeal. Abrasions, although frequent, are relatively minor. Doug Winter suggests 200 to 250 pieces survive. Census: 32 in 45, 39 finer (2/18). NGC ID# 25S5, PCGS# 8177

**LIBERTY HALF EAGLES**

**1842 Liberty Half Eagle, AU55**  
**Elusive Small Letters Variety**

- 3150 1842 Small Letters AU55 NGC.** The 1842 Liberty half eagle with the Small Letters reverse splits a small mintage of 27,578 pieces with its Large Letters counterpart, making it an elusive issue in all grades. This attractive Choice AU specimen exhibits well-detailed design elements, with a touch of light wear on the high points. The still-lustrous orange-gold surfaces are lightly abraded and appealing. Census: 6 in 55, 8 finer (1/18). NGC ID# 25ST, PCGS# 8207

**1844-O Half Eagle, MS61+**  
**Appealing for the Grade**

- 3151 1844-O MS61+ NGC. Variety 4.** The mintmark is centered over the VE in FIVE and the vertical shield lines extend upward into the horizontal lines. The 1844-O half eagle is scarce in Mint State. This piece is a trifle weak on the hair curls around Liberty's face but sharp elsewhere. Satiny straw-gold mint luster shows minimal abrasions, and those that are present are light. Census: 16 in 61 (1 in 61+), 42 finer (2/18). NGC ID# 25TA, PCGS# 8222

**1851-D Five Dollar, AU58**  
Well-Struck, Few Marks

- 3152 1851-D AU58 NGC. Variety 31-W.** A yellow-gold Borderline Uncirculated Dahlonaga type coin. Marks are surprisingly few, with a thin field line above the hairbun barely worthy of comment. The strike is crisp for the remote Southern branch facility, even on the eagle's neck feathers. Much nicer than the usually encountered 1851-D. Census: 18 in 58, 12 finer (2/18). NGC ID# 25U8, PCGS# 8248

**1851-O Liberty Half Eagle, AU55**  
Low-Mintage, Branch Mint Issue

- 3153 1851-O AU55 NGC. Variety 1.** This is a rare issue in any grade and a very rare one in Mint State, due both to the small mintage of 41,000 coins and their status as the first O-mint half eagles produced since 1847: Most pieces promptly entered circulation. This attractive piece boasts orange-gold surfaces tinged with hazel, and while the central strike is typically somewhat soft, the excellent luster and overall eye appeal more than compensate. Census: 16 in 55, 24 finer (1/18).  
Ex: FUN Signature (Heritage, 1/2009), lot 5417. NGC ID# 25U9, PCGS# 8249

**1859-C Liberty Half Eagle, AU55**  
Lustrous, Lightly Abraded Example

- 3154 1859-C AU55 NGC. Variety 1.** Despite a few light, scattered abrasions, the surfaces are highly lustrous on this Choice AU example, with attractive yellow-gold coloration and a strike that, while weak on the reverse, is better than expected on the obverse. Census: 23 in 55, 47 finer (1/18).  
Ex: FUN Signature (Heritage, 1/2009), lot 5440. NGC ID# 25VC, PCGS# 8281

**1859-C Five Dollar, MS60**  
Rare in Uncirculated Condition

- 3155 1859-C MS60 NGC. Variety 2.** The loops of the 8 in the date are wide, one of the diagnostic markers for the second of two obverses known for the 1859-C half eagle (31,847 coins struck). In 2008, Doug Winter estimated that perhaps five or six of the 175 to 225 examples extant survived in Uncirculated condition. Strike detail is uniformly bold on the obverse, while the reverse is characteristically soft — a defining feature of every known 1859-C five dollar gold piece. Small abrasions occur over yellow-gold surfaces. Census: 4 in 60, 10 finer (2/18). NGC ID# 25VC, PCGS# 8281

**1865-S Liberty Half Eagle, AU55**  
Low-Mintage S-Mint Issue

- 3156 1865-S AU55 NGC.** The 1865-S Liberty half eagle claims a low mintage of 27,612 pieces, making it an elusive issue, especially in high grade. In fact, before a few high-quality examples were recovered from the wreck of the S.S. *Brother Jonathan*, the 1865-S was unknown in Mint State. This attractive Choice AU specimen offers well-detailed, lightly worn design elements and lightly abraded orange-gold surfaces. Census: 17 in 55, 14 finer (1/18). NGC ID# 25VX, PCGS# 8299

**1869-S Five Dollar, AU58**  
Rare and Underappreciated

- 3157 1869-S AU58 PCGS Secure.** Like many San Francisco issues in this series, the 1869-S half eagle is underrated and rare in high grade. Attractive AU coins are seldom seen, and only five Mint State pieces are reported by PCGS and NGC combined (2/18). This coin shows slight high-point friction but retains luster in the fields with original wheat-gold color. Minor strike weakness is visible on the hair curls around Liberty's face and on the reverse fletchings. A curved mark in the left obverse field near star 3 and 4 is the only mentionable abrasion. Population: 3 in 58, 2 finer (2/18). NGC ID# 25W8, PCGS# 8318

**1870-S Liberty Half Eagle, AU55**  
Unknown in Mint State

- 3158 1870-S AU55 NGC.** The 1870-S Liberty half eagle is an elusive, low-mintage issue that remains unknown in mint condition. This attractive Choice AU representative displays well-detailed design elements that show some minor wear over the high points. The yellow and greenish-gold surfaces exhibit the typical number of ticks and minor abrasions for the grade. Census: 15 in 55, 2 finer (1/18). NGC ID# 25WB, PCGS# 8321

**1874-S Half Eagle, AU58**  
Among the Finest Certified Examples

- 3159 1874-S AU58 NGC.** Only 16,000 half eagles were struck at the San Francisco Mint in 1874. It seems unlikely that any of the coins were saved for numismatic purposes, as there was little interest in collecting branch mint issues at that time. The issue is very rare in AU58 condition and no examples have been certified in Mint State.

The present coin is an attractive near-Mint specimen, one of the finest survivors of the small mintage, with just a trace of wear on the high points of the design elements and lightly abraded orange-gold surfaces that retain significant amounts of original mint luster. Overall eye appeal is quite strong. Census: 9 in 58, 0 finer (2/18). NGC ID# 25WR, PCGS# 8335

**1879-CC Liberty Half Eagle, AU53**  
Elusive Issue in High Grade

- 3160 1879-CC AU53 NGC. CAC. Variety 2-A.** From a mintage of 17,281 pieces, the 1879-CC Liberty half eagle is not difficult to locate in lower circulated grades, but it becomes very scarce at the AU53 level. This attractive specimen exhibits sharply struck design elements, with just a touch of wear over the high points, and lustrous orange-gold surfaces that show only minor abrasions. A diagnostic die line is evident through the E in LIBERTY. NGC ID# 25X8, PCGS# 8349

**PROOF LIBERTY HALF EAGLE**

**1906 Five Dollar Liberty, PR65 Cameo**  
Only 85 Proofs Produced

- 3161 1906 PR65 Cameo NGC.** After 1900 the mintage for proof Liberty half eagles only drops below 100 pieces twice, in 1906 and 1907. Using the conventional rule-of-thumb of a 50% survival rate, that would indicate that somewhere around 40-45 piece still exist out of the mintage of 85 proofs for this year. However, CoinFacts gives an estimate of 60-75 proofs that are believed known. This piece is among the finer examples, especially those with cameo contrast. Only 20 combined grading events have been recorded for higher-graded pieces at both services (2/18). A mere three non-Cameo pieces have been certified finer by both NGC and PCGS, and only one Ultra Cameo has been graded (by NGC). This is a bright, deeply mirrored example that shows medium golden-rose color and stark contrast between the frosted devices and highly reflective fields. Census: 3 in 65 Cameo, 12 finer (2/18). NGC ID# 28DC, PCGS# 88501

## INDIAN HALF EAGLES

1911-D Five Dollar, AU58  
Partially Lustrous, Original Surfaces

- 3162** 1911-D AU58 PCGS. CAC. A brush of friction over the fields leaves them with an olive-gold hue that contrasts with the satiny orange-gold luster in the design recesses. No loss of detail is apparent, and there are no distracting abrasions. Eye appeal is outstanding for an AU-level Indian half eagle. With only 72,500 pieces struck, the 1911-D is a semikey in all grades. NGC ID# 28DR, PCGS# 8521

1911-D Half Eagle, MS62  
Elusive CAC Example  
Condition Key in Mint State

- 3163** 1911-D MS62 NGC. CAC. The Indian half eagle series has numerous conditionally elusive dates, not least among which is the 1911-D, with its mintage of only 72,500 pieces. Small denomination gold production dwindled at Denver in 1911. For the quarter eagle, this was due to a lack of commercial demand. For the half eagle, the small mintage was due to a combination of limited commercial need and a stockpile of coins leftover from 1909, when the Denver Mint had coined more than 3.4 million pieces. The small 1911 emission was the last half eagle coinage at Denver until 1914.

The 1911-D is scarce in all Mint State grades and rare finer than MS63. This collectible MS62 coin is well-struck and satiny with original honey-gold luster. Light field marks limit the grade, but eye appeal surpasses expectations. The CAC green label is rarely seen on pieces in this grade. Census: 55 in 62 (1 in 62+), 31 finer. CAC: 31 in 62, 12 finer (2/18). NGC ID# 28DR, PCGS# 8521

1911-S Indian Half Eagle, MS64  
Repunched Mintmark, FS-501

**3164 1911-S/S FS-501 MS64 PCGS.** Auction appearances of the 1911-S half eagle in MS64 or better condition have been few and far between, even in recent years. Two recent offerings of a near-Gem in our auctions, in 2015 and 2016, realized nearly \$13,000 each, indicating sustained collector demand for high-end examples of this date from several years earlier, when an NGC coin in the same grade realized a similar price (\$12,650). This example is satiny and well-struck, showing beautiful orange-gold, lavender, and silvery hues across minimally abraded surfaces. FS-501 shows an errant S mintmark south of the primary S. This interesting Indian gold variety is readily collectible. Population: 27 in 64 (1 in 64+), 8 finer (2/18). PCGS# 145723 Base PCGS# 8522

1929 Indian Head Half Eagle, MS63  
Rare Final-Year Key Issue  
Exceptional Quality for the Grade

**3165 1929 MS63 PCGS.** The 662,000-piece mintage of 1929 half eagles is misleading, since most of the issue never saw circulation. The current PCGS population report shows less than 10% of the certified population in circulated grades, where MS63 certified coins outnumber the entire circulated population 3 to 1. Still, the 1929 half eagle ranks at the top of all Indian fives in overall rarity and the issue remains in strong demand among collectors.

This Select Uncirculated example shows a sharp strike throughout the centers and bold definition on the peripheral elements. It is free of the often-seen indented line that runs along the borders on many 1929s, and the fields are remarkably smooth and unabraded for the issue. Even, honey-gold coloration reaches across both sides and is highly attractive, while the intensely lustrous surfaces show only a few wispy marks for the grade. NGC ID# 28E2, PCGS# 8533

1929 Indian Half Eagle, MS64+  
Final Year of the Denomination  
Elusive Key Issue

**3166 1929 MS64+ PCGS, CAC.** The Philadelphia Mint struck a substantial mintage of 662,000 Indian half eagles in 1929, the first time any five dollar gold coins had been struck at any U.S. Mint since 1916 (at San Francisco). The 1929 mintage would be the last hurrah for the denomination, as the stock market crash of 1929 ushered in the Great Depression, and there was little demand for gold coins in the devastated economy. Most of the coins were never released into circulation and remained in government custody until the Gold Recall of 1933. The bulk of the large mintage was later melted and stored as gold bars at the Fort Knox Bullion Depository.

The 1929 Indian half eagle is a key issue in the series today. PCGS and NGC have combined to certify a total of 579 examples in all grades, ranging from XF40 through MS65. Although most survivors are in Mint State grades, the 1929 is very rare in MS65 condition and no finer coins have been certified at either of the leading grading services (2/18), making this Plus-graded Choice example a good balance of value versus quality. The 1929 has always been a collector favorite and examples began appearing at auction at least as early as lot 1290 of the Carter-Dykstra-Street Collections (Thomas Elder, 6/1936). Recent sales include the MS64+ PCGS example in the FUN Signature (Heritage, 1/2017) that realized \$70,501.

The present coin is an attractive Choice example with the well-deserved Plus designation. The design elements are sharply detailed throughout and the well-preserved orange-gold surfaces radiate vibrant mint luster on both sides. This coin displays an often-seen feature of this issue, a reverse perimeter crease through the tops of the letters in the legend. Overall eye appeal is terrific. PCGS has graded 10 numerically finer examples (2/18). NGC ID# 28E2, PCGS# 8533

## PROOF INDIAN HALF EAGLES

1908 Indian Head Five, PR65  
Attractive Matte Proof Type Coin

**3167 1908 PR65 PCGS.** The year 1908 marked the beginning of the Indian Head design type, the first major design change on that denomination since 1839. The Mint Director's *Annual Report* for the fiscal year 1908, stated:

"The designs for the five dollar and the two and one-half dollar gold pieces were prepared by [an] American sculptor, Mr. Bela L. Pratt, of Boston. The striking characteristic of these coins is that they are executed in intaglio, or, more strictly speaking, 'incused,' an innovation that is unique in coinage. It was adopted upon the suggestion of Dr. William Sturgis Bigelow, of Boston, to the President as a plan of coinage to get the best results in artistic work and at the same time preserve for commercial interests the uniformity of the stacking of the pieces."

The new design, issued in the unique sunken relief format, encouraged the Mint to make another change to normal coinage practices: altering the finish of proof coins from polished fields to a sandblast texturing similar to that employed on some art and award medals. Thus, the 1908 matte proof Indian half eagle is a first of American coinage in many ways and today is sought-after both as a type coin and as an intriguing element of early 20th century Mint experimentation.

The Gem example offered here is sharp and free of bothersome marks. The original olive-gold surfaces yield delicate orange-gold undertones that are most attractive. Population: 19 in 65, 18 finer (1/18).

**From The Glacier Park Collection.** NGC ID# BYJ6, PCGS# 8539

1909 Half Eagle, PR64  
Only 40 to 50 Proofs Known

**3168 1909 PR64 PCGS.** Proof half eagles of 1909 and 1910 are of great interest to gold collectors because of the type of finish used in just these two years. Once referred to as the "Roman Finish," it is, visually, a cross between a brilliant and matte proof, giving the coin a semibrilliant, satiny appearance with a microgranular texture under a loupe. The finish was produced by striking the coins on planchets that received no special polishing before coinage, and then foregoing the sandblast process that had been performed in 1908; one could argue the proof finish of the 1909 and 1910 half eagles is no finish at all. In the past, these coins have occasionally been confused with high-grade circulation strikes, although the trained eye will notice a distinct difference in the texture.

The 1909 also stands out with one of the two lowest mintages of the proof Indian half eagle series: 78 coins. PCGS estimates that only 40 to 50 pieces survive in all grades today, making this a true proof gold rarity. This is a pleasing example for the grade that shows only a few light lines in the fields when viewed beneath a loupe. The satiny straw-gold surfaces show a trace of pale olive-green color. Population: 14 in 64, 15 finer (1/18).

Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 8539.

**From The Glacier Park Collection.** NGC ID# 25ZS, PCGS# 8540

## EARLY EAGLE

1801 BD-2 Eagle, AU53  
Tines in Liberty's Cap

- 3169** 1801 BD-2, R.2, AU53 PCGS. Bass-Dannreuther Die State a/a, with no clashing or cracking visible. The vertical spines in Liberty's cap are not clash marks but are from some other form of damage to the die. Heritage numismatist Mark Borckardt has suggested that the damage may have been caused by a small set screw that fell onto the die at one point during the operation of the press. The surfaces of this coin are bright straw-gold and retain a fair amount of the original semiprooflike finish in the fields. Some deeper reddish patina is seen in the protected areas. BD-2 is a plentiful variety among early gold issues and represents most of the 1801 eagles seen, ideal for type purposes.

Ex: FUN Signature (Heritage, 1/2003), lot 8732; FUN Signature (Heritage, 1/2005), lot 30490.

From The Glacier Park Collection. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

## LIBERTY EAGLES

1839/8 Ten Dollar, AU Sharpness  
Type of 1838, Large Letters

- 3170** 1839 Type of 1838, Large Letters — Cleaning — PCGS Genuine. AU Details. Remnants of an 8 beneath the 9 in the date is diagnostic of this earlier type. The obverse design was changed part way through 1839, and while the Type of 1838 is slightly more plentiful than is the Type of 1840, the former is highly popular as a two-year subtype representative. This sharply detailed piece is lightly cleaned, but retains small remnants of prooflike mirroring in the protected regions of the fields, with consistent yellow-gold color overall. Scattered abrasions are noted, though they are not overly distracting.

Ex: ANA Signature (Heritage, 8/2014), lot 3979.

1846-O Liberty Eagle, AU55  
Popular New Orleans Issue

- 3171** 1846-O AU55 PCGS. Variety 3. Although only light wear shows on the well-detailed design elements, this later die state piece only shows the ball of extra metal within the loop of the 6 (the extra metal inside the loop is thought to be the result of a defective die punch, rather than an overdate as once believed). The pleasing orange-gold fields are reflective in protected areas despite myriad minor hairlines that are present. Housed in an older PCGS holder, without quotation marks around the 5 in the date. Population: 12 in 55, 3 finer (1/18).

Ex: FUN Signature (Heritage, 1/2006), lot 5399. NGC ID# 554J, PCGS# 8595

1848-O Liberty Eagle, AU53  
Underrated Branch Mint Issue

- 3172** 1848-O AU53 NGC. CAC. **Variety 1.** Like many New Orleans eagles, the 1848-O is generally available in lower grades, but becomes quite rare near the Mint State level. This piece has pleasing green-gold surfaces with subtle rose toning. The central design definition is somewhat weak as usual. Census: 25 in 53, 57 finer. CAC: 8 in 53, 11 finer (1/18).  
*Ex: FUN Signature (Heritage, 1/2009), lot 5519. NGC ID# 2634, PCGS# 8600*

1852-O Eagle, Choice AU  
Scarce in all Grades

- 3173** 1852-O AU55 NGC. **Variety 1.** The entire production of 1852-O eagles comprised 18,000 coins, and about 150 to 200 pieces survive. Two die varieties are known. This one shows the mintmark centered over EN. Slight friction occurs over well-detailed relief elements, and the strike is characteristic for the O-mint. Each side is lightly abraded with yellow-gold color. Census: 22 in 55, 10 finer (2/18). NGC ID# 263D, PCGS# 8609

1862 Liberty Eagle, AU53  
Elusive Low-Mintage Issue

- 3174** 1862 AU53 NGC. A meager mintage of 10,995 Liberty eagles was struck in 1862, certainly a small total in absolute terms, but about average in the context of the series. This AU53 example shows a trace of wear on the hair and coronet but the pleasing orange-gold surfaces are lightly abraded and the overall presentation is quite attractive. Census: 16 in 53, 33 finer (2/18). NGC ID# 2649, PCGS# 8635

PROOF LIBERTY EAGLE

1903 Ten Dollar, PR65  
A Rarity in Any Grade

- 3175** 1903 PR65 PCGS. CAC. PCGS and NGC combined report 88 grading events for the 1903 proof eagle, most of which are non-Cameos (1/18). Although this figure is less than the 96 pieces struck, it is still likely that duplication exists in the census. PCGS estimates that only 50 to 65 proofs survive in all grades. In our experience, this issue may be rarer still. Only a handful of auction appearances of this issue have happened in recent years, and since our Permanent Auction Archives began in 1993, we have seen a proof 1903 eagle on only 17 previous occasions. The last of these was in the Summer FUN Signature (Heritage, 7/2013), where a PR64 PCGS coin realized more than \$17,000. This CAC-endorsed Gem is far superior. The coin is needle-sharp and displays deep tangerine-gold coloration with deeply mirrored fields. Under a loupe, no distractions are visible. Population: 7 in 65 (1 in 65+), 1 finer. CAC: 4 in 65, 1 finer (1/18).  
*From The Glacier Park Collection.* NGC ID# 28GA, PCGS# 8843

## INDIAN EAGLES

1907 No Periods Indian Ten, MS65  
Beautiful Luster, Ideal No Motto Type Coin

- 3176 1907 No Motto MS65 PCGS.** Ex: Harbor View. Whether seeking a nice No Motto coin or a single example of the Indian Head type, the 1907 No Periods issue is arguably the best candidate. It is often found with outstanding eye appeal, as seen here, and is affordable in Gem condition but not nearly as common as, for instance, the 1932. This piece is well-struck and vibrantly lustrous, showing deep tangerine-gold color with hints of lilac in the centers. NGC ID# 28GF, PCGS# 8852

1908-D No Motto Eagle, MS63  
Lovely Rose-Gold Luster

- 3177 1908-D No Motto MS63 PCGS.** Several thin die cracks are visible around the obverse periphery, and both sides show faint metal flowlines at the rims. The interiors are frosty and luminous. This well-struck No Motto 1908-D eagle has original rose-gold luster and exhibits only minor abrasions, making it more appealing than many MS63 coins that we have seen. This issue is scarce in higher grades. NGC ID# 28GH, PCGS# 8854

1911-D Ten Dollar, AU58+  
High-End Key Date With CAC Approval

- 3178 1911-D AU58+ PCGS. CAC.** The first 1911-D eagles were struck on April 26. Ultimately, a paltry 30,100 pieces were minted through the end of the year, making this a series key and placing great pressure on high-end examples. Uncirculated coins are beyond the reach of most collectors. This near-Mint example offers slightly better detail on the obverse than the reverse. Glowing satin luster remains over minimally abraded yellow-gold surfaces. All-original and exceedingly nice for the grade. NGC ID# 28GU, PCGS# 8869

1912-S Ten Dollar, MS63  
Outstanding Color and Luster

- 3179 1912-S MS63 PCGS.** The appeal of this conditionally scarce 1912-S eagle is drawn from the original, frosty luster that casts each side in honey-gold hues, with minimal abrasions limiting the grade. Under a loupe, trivial strike softness is seen on the eagle's wing and talons. The 1912-S is often seen weakly struck, but the eye appeal of the present piece seems unaffected. This issue is scarce in finer grades and rare at the Gem level. NGC ID# 269G, PCGS# 8872

1912-S Ten Dollar, MS64+  
Few Known Finer

- 3180 1912-S MS64+ PCGS Secure. CAC.** In *Indian Gold Coins of the 20th Century*, Mike Fuljenz calls this issue "a true condition rarity." The 1912-S Indian eagle is available in the lowest Mint State grades, but the population begins to thin in MS63 and finer levels. Gems are costly and rarely offered, making high-end Choice coins the finest that most collectors will consider for a date and mintmark set. This example offers the rare combination of a Plus designation and a CAC green label, and showcases eye appeal that would fit in well with an otherwise Gem-quality collection. The strike is above average for the issue, and other than a few marks on Liberty's cheek there are no distracting abrasions. Population: 81 in 64 (25 in 64+), 15 finer. CAC: 28 in 64, 3 finer (2/18). NGC ID# 269G, PCGS# 8872

1913-S Ten Dollar, MS61  
Original Honey-Gold Luster

- 3181 1913-S MS61 PCGS.** Boldly struck design elements complement satiny honey-gold luster on this lower-end Mint State example. Light surface marks appear on each side, but a small tick on Liberty's jaw is the only individually mentionable abrasion. With a mintage of only 66,000 pieces, the 1913-S Indian eagle is a semikey in all grades. Uncirculated examples are genuinely scarce. NGC ID# 28GZ, PCGS# 8874

## LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, AU53  
First-Year Philadelphia Type Coin

- 3182 1850 AU53 NGC.** The double eagle denomination was introduced in 1850, and a large first-year mintage of more than 1.1 million pieces was accomplished at the Philadelphia Mint. This impressive AU53 specimen displays just a touch of high-point wear on the design elements and the orange-gold surfaces show some grade-consistent chatter in the fields, with traces of original mint luster on both sides. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, AU55  
Debut Year for the Liberty Twenty

- 3183 1850 AU55 NGC.** The smooth surfaces of this Choice About Uncirculated double eagle are minimally marked for the grade, with natural patina that wavers between honey and butterscotch coloration, for the overall look of fine antique gold. Traces of mint luster add to the eye appeal. Liberty's curls show moderate wear, although all of the motifs are well-defined. Always popular for its first-year-of-issue status, the 1850 is almost always heavily abraded at the AU level but not so here. NGC ID# 268F, PCGS# 8902

1850 Liberty Double Eagle, AU58  
First Year of the Denomination

- 3184 1850 AU58 NGC.** From a substantial Philadelphia mintage of more than 1.1 million pieces, the 1850 Liberty double eagle is a popular first-year type issue. This impressive near-Mint example exhibits just a touch of wear on the high points of the strongly impressed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster, with a few traces of prooflike reflectivity in sheltered areas. NGC has graded 74 numerically finer examples (1/18). NGC ID# 268F, PCGS# 8902

1850-O Liberty Double Eagle, XF45  
Excellent First-Year Branch Mint Type

- 3185 1850-O XF45 PCGS Secure.** Liberty's cheek is smooth and any field abrasions are softened by moderate circulation to give this Choice XF twenty a smooth appearance and substantial eye appeal. Radiant sun-gold color reinforces a surprising amount of mint luster in protected areas. While the 1850-O had a significant mintage of 141,000 pieces, most of these double eagles circulated to one extent or another, and few high-grade examples survive. Population: 77 in 45, 71 finer (2/18). NGC ID# 268G, PCGS# 8903

1851-O Liberty Double Eagle, AU53  
Type One Branch Mint Issue

- 3186 1851-O AU53 PCGS. Variety 2.** Some light wear shows on the strongly impressed design elements of this attractive AU53 specimen, and the pleasing orange-gold surfaces exhibit the expected number of minor abrasions for the grade, but both sides retain much of their original mint luster and the overall presentation is most appealing. Population: 57 in 53, 81 finer (1/18). NGC ID# 268J, PCGS# 8905

1851-O Liberty Double Eagle, AU58  
Rare Any Finer

**3187 1851-O AU58 NGC.** Ex: Eagle Collection. The 1851-O is the most obtainable New Orleans double eagle in terms of overall rarity and is slightly more available than the 1852-O in higher grades. This is a popular issue with type collectors, because it is typically seen with a better strike and nicer coloration than other O-mint double eagles. Calling the 1851-O a “common date” is, of course, a relative term; an estimated 175-225 pieces are known in the various About Uncirculated grades, the great majority in the lower range. The 1851-O is quite scarce as a properly graded AU55, rare in AU58, and very rare in any Uncirculated grade.

The present example is bright green-gold, sharply defined in the centers with the usual softness around the margins. A few light handling marks are evident, the most obvious ones in front and back of Liberty’s head. Census: 66 in 58 (1 in 58+), 19 finer (2/18). Ex: *Eagle Collection of Double Eagles* (Heritage, 1/2002), lot 4004, *Sacramento ANA Signature* (Heritage, 3/2011), lot 4901. NGC ID# 268J, PCGS# 8905

1851-O Liberty Twenty, AU58  
Elusive Issue in High Grades

**3188 1851-O AU58 PCGS. CAC.** Ex: “Col.” E.H.R. Green / Eric P. Newman Collection. While the banking sector was experiencing increasing demand for coins, this period also saw some of the largest gold exports from the California gold fields during the Gold Rush. Despite its high mintage (315,000 pieces), the 1851-O Liberty double eagle experienced a high attrition rate. High-end AU examples are scarce, and the date is a notable rarity across the Mint State threshold. This near-Mint example boasts rich lemon-gold patina and retains substantial original, semiprooflike mirroring in the fields. A highly attractive early New Orleans twenty, close to full Mint State — appealing in every way. Population: 21 in 58, 13 finer. CAC: 8 in 58, 3 finer (2/18).

Ex: *Dallas Signature* (Heritage, 2/2015), lot 3253. NGC ID# 268J, PCGS# 8905

1852-O Liberty Double Eagle, AU53  
Traces of Prooflike Reflectivity

- 3189 1852-O AU53 NGC. Variety 1.** A lovely example of this scarce issue with bright greenish-gold surfaces. Minor circulation and handling marks appear on both sides, as expected for the grade. All design elements are nicely defined, and the surfaces exhibit slight reflectivity with considerable luster. Although finer grade examples survive from the original mintage of 190,000 coins, this example is highly collectible and would make a splendid addition to almost any collection by date, type, or Mint.  
*Ex: Atlanta Signature (Heritage, 4/2006), lot 2131. NGC ID# 268L, PCGS# 8907*

1852-O Liberty Double Eagle, AU58  
Seldom Encountered Finer

- 3190 1852-O AU58 NGC. Variety 1.** From a substantial mintage of 190,000 pieces, the 1852-O Liberty double eagle is a relatively available Type One date in lower circulated grades. However, the issue is scarce in Near-Mint condition, and finer examples are rare. This attractive piece displays bright orange-gold luster with satiny surfaces and hints of reflectivity. The design motifs are nicely detailed, with only a trace of wear visible on the high points. The scattered surface marks are trivial, none standing out among the others. This impressive example is destined for a high-grade collection of early double eagles. Census: 87 in 58 (4 in 58+), 22 finer (1/18).  
*Ex: Sacramento Signature (Heritage, 3/2011), lot 4904. NGC ID# 268L, PCGS# 8907*

1854 Small Date Liberty Double Eagle, AU58

- 3191 1854 Small Date AU58 NGC.** The 1854 Liberty double eagle with the small numerals in the date is more available than its Large Date counterpart. This pleasing near-Mint specimen offers lightly abraded orange-gold surfaces and well-detailed design elements that show just a trace of friction on the high points. Much original mint luster remains intact, adding to the outstanding eye appeal. NGC has graded 35 numerically finer examples (1/18). NGC ID# 268R, PCGS# 8911

1854-O Liberty Double Eagle, XF45  
 Low-Mintage Branch Mint Rarity  
 Newly Discovered Example

**3192 1854-O XF45 NGC. Variety 1.** The 1854-O Liberty double eagle is a classic rarity in the American gold series, from a minuscule mintage of just 3,250 pieces. The 1854-O and 1856-O are the rarest Type One double eagles from the New Orleans Mint, and both are key issues in their own right. Traditionally, the 1856-O has been considered slightly more elusive than the 1854-O, but recent research indicates the two issues are virtually tied in terms of absolute rarity. Our latest rosters of known specimens list exactly 24 examples of each date, with a number of additional appearances that may, or may not, represent earlier citations of the coins in the main rosters. In terms of high-grade rarity, the 1854-O is clearly more difficult to locate, as the issue is unknown in Mint State grades. PCGS and NGC have combined to certify 33 examples of the 1854-O including an unknown number of resubmissions and crossovers (2/18). Heritage Auctions is pleased to present this newly discovered specimen in its first identified public offering.

A substantial number of double eagles were struck at the New Orleans Mint in 1850 and 1851, but the mintage was smaller in 1853, and production plummeted in 1854, when the San Francisco Mint opened for coinage operations. The great majority of gold deposits during that period came from the rich California gold fields, and it was much cheaper and safer for the miners to transport their gold ore to the new facility at San Francisco than to send it on an arduous journey to New Orleans for coinage. Deposits dwindled to a trickle at the Southern mint, and gold coinage never reached pre-1854 levels again, before the facility was closed in 1861, after the start of the Civil War.

Apparently, all the coins from the tiny mintage were released into circulation at the time of issue and none were saved for numismatic purposes. There was little interest in collecting large denomination gold coins in the 19th century because the face value of each coin was so high. Systematically saving date runs of double eagles was prohibitively expensive for the average collector and the few well-heeled numismatists that did collect double eagles were content to update their collections by purchasing gold proof sets from the Philadelphia Mint every year. Interest in collecting branch mint issues only became widespread after Augustus Heaton published his seminal treatise on mintmarks in 1893, by which time the 1854-O twenties had been suffering wear and attrition for almost 40 years. Speaking of the rare New Orleans double eagles (1854-O, 1856-O, and 1879-O) in his 1893-dated work, Heaton noted:

“From the very limited use of gold in the greater part of the United States, these pieces are not to be found by simply waiting for them to appear in circulation as in the case of silver coin, nor will they form part of the collections that revert to dealers for sale.”

Ruling out circulation finds, private purchases from dealers, and public offerings, Heaton concluded the only way to acquire one of these rare double eagles was through extensive contacts with bank tellers, Mint personnel who could sift through bullion deposits at the Mint, bullion brokers, and similarly placed employees in other financial institutions. His conclusions seem justified, as the 1854-O was an extremely elusive issue in the 19th and early 20th century. Most of the great gold collectors of the era, like Lorin G. Parmelee, Virgil Brand, William Woodin, John M. Clapp and his son, John H. Clapp, and others, never succeeded in acquiring a specimen of the 1854-O for their collections. The earliest public offering we have been able to locate was the coin in lot 1124 of the Nickerson-Butler-Edwards Collections (Thomas Elder, 12/1933), "1854 New Orleans. Don't believe we ever had it before. It has a sale record of \$200. Very fine. Unpriced in Raymond's book." It seems likely that only two examples of the 1854-O double eagle were in numismatic hands before the 1930s, the coin in Waldo Newcomer's collection and the William Cutler Atwater specimen.

Waldo Newcomer purchased Augustus Heaton's collection around 1918, but Heaton did not collect double eagles himself, so it is unlikely Newcomer acquired his coin in this fashion. However, as President of the National Exchange Bank, Chairman of the Board of the Atlantic Trade Bank & Trust Company, and CEO of the Baltimore Trust Company, he was certainly well-placed to pursue his collecting interests through financial channels, as Heaton suggested. The inventory of his collection lists his coin as Very Fine, with a value of \$500 and the notation, "Extremely rare. Only other known specimen in the Atwater Collection." (Thanks to Ron Guth for this information).

William Cutler Atwater was a wealthy collector from New York City who pursued a career in the coal business. He formed a fabulous collection of U.S. coins that was sold by B. Max Mehl in 1946, but he stopped actively collecting around 1923, so he must have acquired his 1854-O at an early date, like Newcomer.

After the great Gold Recall of 1933, astute financiers, like Louis Eliasberg and Dr. Charles W. Green began collecting gold coins as a means of legally investing in gold at a time when most avenues to do so were closed to U.S. citizens. It seems likely that the increased collector demand prompted bankers and Mint personnel to ferret out rare gold issues from the massive influx of old gold coinage turned in and sell them to well-connected dealers and collectors for a profit during this period. While always remaining elusive, the 1854-O began appearing with much greater frequency in the 1930s and '40s (see roster below). Previously unknown examples have surfaced in shipwreck finds and European holdings in recent times, as well.

The present coin is an attractive Choice XF specimen that has been a highlight of an old family collection for many years. It is possible this coin first appeared in one of the Additional Auction Appearances listed in the roster below, but we have not been able to trace its history to any previous public offering. Completely fresh to the market, this piece displays sharply struck design elements that show only light wear on the devices. Although the prongs of the coronet and Liberty's curls show some blending, the star centers are all complete, with full radials. A diagnostic die lump appears on Liberty's neck, near the largest curl, and the date is small, slanting up to the right. The vivid orange-gold surfaces exhibit the usual number of minor abrasions for such a large gold coin that spent some time in circulation, but none are large or unduly distracting. Traces of prooflike

reflectivity are evident in sheltered areas around the devices. The overall presentation is most appealing for this classic gold rarity. We expect intense competition from series specialists when this lot is called. The 1854-O Liberty double eagle is listed among the *100 Greatest U.S. Coins*. Census: 3 in 45, 13 finer (2/18).

### Roster of 1854-O Liberty Double Eagles

The following roster was compiled with the assistance of Ron Guth, P. Scott Rubin, and Saul Teichman.

1. **AU58 NGC.** Gilhousen Collection (Superior, 2/1973), lot 854; Harry W. Bass, Jr.; Bass Collection (Bowers and Merena, 5/2000), lot 780; San Francisco Signature (Heritage, 7/2005), lot 10397.
2. **AU58 NGC.** Auction '79 (Stack's, 7/1979), lot 934; ANA Building Fund Sale (Steve Ivy, 12/1981), lot 1560; Superior (2/1992), lot 2938; Superior (1/1993), lot 1484; FUN Signature (Heritage, 1/2002), lot 4011; FUN Signature (Heritage, 1/2004), lot 3087.
3. **AU58 NGC.** Recovered from the wreck of the *S.S. Republic*; Monaco Rare Coins (privately, 2004); private collection.
4. **AU58 PCGS.** Cicero Collection (New Netherlands, 12/1960), lot 8; H. Jeff Browning; Dallas Bank Collection (Sotheby's/Stack's, 10/2001), lot 10; Hansen Collection.
5. **AU55 NGC.** Chicago Signature (Heritage, 8/2015), lot 4449; Central States Signature (Heritage, 4/2016), lot 4815.
6. **AU55 PCGS.** Robert Marks Collection (American Auction Association, 11/1972), lot 1056; James and Margaret Carter Collection (Stack's, 3/1986), lot 528; Auction '88 (David Akers, 7/1988), lot 974; Cincinnati Collection (Heritage, 1/2005), lot 8829; Pittsburgh Signature (Heritage, 10/2011), lot 5099; Central States Signature Sale (Heritage, 4/2014), lot 5793, realized \$362,500.
7. **AU55 PCGS.** Lester Merkin (10/1966), lot 372; Stack's (3/1990), lot 1362; Long Beach Signature (Heritage, 2/2001), lot 7079; Rarities Sale (Bowers and Merena, 8/2007), lot 1906; Dallas Signature (Heritage, 10/2008), lot 3012, realized a record \$603,750; FUN Signature (Heritage, 1/2011), lot 5246.
8. **AU55 PCGS.** Richmond Collection (David Lawrence, 7/2004), lot 2246; Rarities Sale (Bowers, 8/2010), lot 1818.
9. **AU55 NGC.** Bowers and Ruddy (6/1975), lot 1129; Long Beach Signature (Heritage, 6/2014), lot 4897, realized \$381,875.
10. **AU53 NGC.** Long Beach Signature (Heritage, 2/1994), lot 5521; FUN Signature (Heritage, 1/1999), lot 8414; Pre-Long Beach Sale (Goldberg Auctions, 2/2017), lot 1337.
11. **AU53 PCGS.** A specimen pictured on PCGS CoinFacts website that cannot be plate matched to any appearance on this roster.
12. **AU50 PCGS.** Alex Shuford Collection (Abe Kosoff, 5/1968), lot 2412; John Jay Pittman; Pittman Collection, Part I (David Akers, 10/1997), lot 1128; Superior (6/1998), lot 2361; ANA Signature (Heritage, 8/2014), lot 5686, realized \$329,000.
13. **AU50 PCGS.** William Van Roden Collection (Stack's, 5/1968), lot 910; Eugene Detmer Collection (Stack's, 2/1983), lot 1078; Auction '89 (RARCOA, 7/1989), lot 450; Denver Signature (Heritage, 8/2006), lot 5592; Baltimore Auction (Bowers and Merena, 11/2007), lot 4668; Central States Signature (Heritage, 4/2015), lot 5424.
14. **AU50 PCGS.** Amon Carter Collection (1/1984), lot 841; ANA Signature (Heritage, 8/1997), lot 7821; Mid-Winter ANA Signature (Heritage, 3/1998), lot 6507; Superior (9/1998), lot 2227; California Sale (Goldberg Auctions, 10/2000), lot 1142; Long Beach Signature (Heritage, 1/2004), lot 7239.
15. **AU50 PCGS.** Public Auction Sale (Stack's, 6/1979), lot 586; DEA and U.S. Marshals Service Sale (Heritage, 12/1988), lot 1370; FUN Signature (Heritage, 1/2003), lot 4873.
16. **AU50.** Louis Eliasberg, Sr.; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 883.
17. **AU50.** R.L. Miles, Jr. (Stack's, 10/1968), lot 833; James and Margaret Carter Collection (Stack's, 1/1986), lot 408.
18. **AU50.** ANA Convention Auction (Paramount, 8/1974), lot 967; ANA Convention Auction (New England Rare Coin Auctions, 7/1979), lot 427; King of Siam Sale (Bowers and Merena, 10/1987), lot 2011; Charles Kramer Collection (Superior/Stack's, 11/1988), lot 730; Auction '90 (David Akers, 8/1990), lot 1947; James E. Haldan Collection (Sotheby's, 6/1996), lot 136; Americana Sale (Stack's, 1/2008), lot 9111.
19. **AU50.** Josiah K. Lilly Collection; Smithsonian Institution.
20. **XF45 NGC.** From an old family collection, off the market for many years. **The present coin.**
21. **XF40 PCGS.** Peter J. Schemenauer Estate (Bowers and Merena, 7/2005), lot 2721.
22. **XF Details Cleaned NGC.** Mann and Smedley Collections (Bowers and Merena, 9/1988), lot 549; FUN Signature (Heritage, 1/2014), lot 5515.
23. **VF30 PCGS.** Two sisters with roots in Tennessee; Eldorado Sale (Stack's, 5/2009), lot 158.
24. **XF Details Cleaned Net VF30 ANACS.** Bell Collection (RARCOA, 4/1963), lot 843; Tollett and Pryor Collections (Stack's, 4/1971), lot 884; James and Margaret Carter Collection (Stack's, 3/1986), lot 529; James A. Stack Collection (Stack's, 11/1989), lot 1494; Rarities Sale (Bowers and Merena, 1/1999), lot 1467; Houston Signature (Heritage, 12/2008), lot 2244.

### Additional Auction Appearances

(Catalogs not available for comparison or lacking sufficient detail for plate matching.)

- A. Rarities Sale (Bowers and Merena, 1/2010), lot 829.
- B. ANA Signature (Heritage, 8/1998), lot 5733.
- C. Bullet Sale (Heritage, 4/1990), lot 596.
- D. Ronald Kessler Collection (Sotheby's, 3/1990), lot 374.
- E. Central States Auction (RARCOA, 4/1976), lot 420.
- F. Public Auction Sale (Abner Kreisberg, 6/1969), lot 1127.
- G. Arrowhead Collection (Sotheby's, 5/1987), lot 345.
- H. Pacific Collection (Hughes, 2/1978), lot 1378.
- I. Public Auction Sale (Abner Kreisberg, 1/1970), lot 1935.
- J. Fontani Collection (Kreisberg and Schulman, 3/1965), lot 182.
- K. Baldenhofer Collection (Stack's, 11/1955), lot 1511.
- L. Waldo Newcomer, inventory number 973; Colonel E.H.R. Green, via B. Max Mehl, circa 1931; King Farouk, via Stack's; Palace Collections of Egypt (Sotheby's, 2/1954), lot 180; Abe Kosoff.
- M. Stephen Allen Collection (Stack's, 12/1950), lot 110.

- N. Menjou Collection (Numismatic Gallery, 6/1950), lot 1955.
- O. Dr. Charles W. Green (B. Max Mehl, 4/1949), lot 806.
- P. Memorable Collection (Numismatic Gallery, 3/1948), lot 759.
- Q. Public Auction Sale (Stack's, 12/1947), lot 579.
- R. Public Auction Sale (Hollinbeck Coin Co., 11/1947), lot 10.
- S. Lee Collection (Stack's, 10/1947), lot 1775.
- T. William Cutler Atwater, before 1923; Atwater Collection (B. Max Mehl, 6/1946), lot 1336.
- U. F.C.C. Boyd (World's Greatest Collection, Numismatic Gallery, 1/1946), lot 938.
- V. J.F. Bell Collection (Stack's, 12/1944), lot 897.
- W. 444th Sale (J.C. Morgenthau, 6/1940), lot 68.
- X. 399th Sale (J.C. Morgenthau, 5/1939), lot 452.
- Y. Wheeler-Norton Collections (Thomas Elder, 9/1938), lot 1529.
- Z. 356th Sale (J.C. Morgenthau, 12/1935), lot 237.
- AA. McCaw-Bauer-Leech Collections (Thomas Elder, 1/1934), lot 1204.
- BB. Nickerson-Butler-Edwards Collections (Thomas Elder, 12/1933), lot 1124. NGC ID# 268T, PCGS# 8912

1855 Liberty Twenty, AU58  
Rare Issue in Higher Grades

- 3193** 1855 AU58 NGC. The stars on the left are shallowly impressed, but only a trace of high-point wear shows on the design elements of this attractive near-Mint specimen. The pleasing orange-gold surfaces exhibit some minor, grade-consistent abrasions, but much of the original mint luster remains intact. Census: 78 in 58 (1 in 58+), 19 finer (1/18). NGC ID# 268V, PCGS# 8914

1857-S Liberty Double Eagle, MS64  
Exceptional Type One Coin

- 3194** 1857-S MS64 PCGS. Before the recovery of the S.S. *Central America*, the 1857-S Liberty double eagle was an extremely rare issue in Mint State grades. The supply of nice specimens was augmented considerably by the salvaged treasure, but the 1857-S is still scarce at the MS64 grade level. This attractive Choice example displays sharply detailed design elements and vivid orange-gold surfaces, with vibrant mint luster and only minor signs of contact. Population: 75 in 64 (5 in 64+), 52 finer (1/18). NGC ID# 2696, PCGS# 8922

1858-O Liberty Double Eagle, AU53  
Type One Branch Mint Issue

- 3195** 1858-O AU53 NGC. **Variety 3.** After the San Francisco Mint opened in 1854, only small amounts of gold arrived in New Orleans for further coinage. Mintage figures quickly dwindled from that date until the end of operations at the start of the Civil War. From 1854 to 1861, New Orleans only coined an average of 14,000 double eagles per year, with the mintage of 35,250 coins in 1858 representing the largest annual production during the aforementioned period.

This double eagle is an attractive green-gold representative with a few minor bagmarks and hairlines, but generally pleasing surfaces. A few minute rim bruises are evident on the obverse. Traces of luster and hints of pale orange toning add to its overall eye appeal. Census: 25 in 53, 61 finer (1/18).

Ex: *Central States Signature* (Heritage, 4/2008), lot 2493; *FUN Signature* (Heritage, 1/2009), lot 4137. NGC ID# 2698, PCGS# 8924

**1858-O Double Eagle, AU58  
A New Orleans Rarity**

- 3196 1858-O AU58 NGC. Variety 4.** At the AU58 level, the 1858-O double eagle is rare but not quite in the Condition Census. NGC and PCGS report a dozen Mint State coins, likely with some duplication, the finest of which is a lone MS63 piece at NGC (2/18). Almost all examples of this issue that we have handled graded XF to AU; only three Uncirculated coins have appeared in our auctions since 1993, indicating just how rare the 1858-O is in high grade.

Although only 35,250 coins were struck, two obverse dies and at least three reverse dies were used to create four different known combinations. Variations in date and mintmark placement are the key diagnostics. This Variety 4 coin has bright, semiprooflike fields with small abrasions scattered about. The strike is sharp on the obverse with the only area of weakness being on the reverse stars. Census: 28 in 58 (3 in 58+, 2 in 58 ★), 10 finer (2/18).

Ex: *Long Beach Signature* (Heritage, 1/2004), lot 7261. NGC ID# 2698, PCGS# 8924

**1861 Twenty Dollar, MS60  
Excellent Type Coin**

- 3197 1861 MS60 PCGS.** The 1861 double eagle claims a substantial mintage of nearly 3 million pieces, making it an available Type One issue and a popular choice for type collectors. This attractive Mint State example exhibits sharply detailed design elements and lustrous yellow and rose-gold surfaces that show the expected number of minor abrasions for the grade. NGC ID# 269G, PCGS# 8932

**1863-S Liberty Twenty, AU58  
Strong Mint Luster Remains**

- 3198 1863-S AU58 NGC.** Small S mintmark. This near-Mint San Francisco Type One double eagle shows signs of brief circulation and retains plentiful luster across its frosted surfaces. Light abrasions and field chatter are minor in nature. Liberty's hair curls are a bit soft, yet on balance the eye appeal is strong. Most high-grade 1863-S twenties are shipwreck recoveries, and possibly the present coin is one of those. NGC ID# 269R, PCGS# 8940

1865 Liberty Double Eagle, MS63+  
Sharply Detailed, Lustrous Example

- 3199 1865 MS63+ NGC.** A smallish business-strike mintage of 351,175 Liberty double eagles was accomplished at the Philadelphia Mint in 1865. The 1865 was also the final Type One double eagle struck at the Philadelphia facility, an important consideration for type purposes. Before the recovery of the *S.S. Republic*, the 1865 double eagle was almost unknown in Mint State, but 320 examples grading AU through MS65 were recovered from that historic wreck, making the issue much more available today in high grade.

The present coin is a Plus-graded Select specimen, with razor-sharp definition on all design elements and lightly marked yellow and orange-gold surfaces. Both sides radiate vibrant mint luster, with exceptional eye appeal. This coin should find a home in a fine collection of Liberty double eagles. NGC ID# 269U, PCGS# 8943

1866 Motto Twenty Dollar, AU55  
FS-801, Doubled Die Reverse

- 3200 1866 Doubled Motto, FS-801, AU55 PCGS Secure.** This *Cherry-pickers'* variety carries a small premium over normal dies among double eagle specialists. The Motto shows wide doubling on N of IN GOD WE TRUST, with lesser doubling on G and R. Choice orange-gold surfaces display attractive mint luster and only small abrasions. A loupe reveals some light lines in the left obverse field, and the strike is softened by brief circulation. Population: 77 in 55, 133 finer (2/18). NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

1866-S Liberty Twenty, AU53  
First-Year Type Two Issue

- 3201 1866-S Motto AU53 NGC.** This is the first year of the Type Two design with the addition of the motto IN GOD WE TRUST on the reverse, an important consideration for type purposes. Light wear visits the high points of this lustrous yellow-gold specimen. This example has some light surface marks that are consistent with the grade.

Ex: *Long Beach Signature* (Heritage, 6/2011), lot 4910. NGC ID# 26B2, PCGS# 8950

1866-S Liberty Twenty, AU55  
First With Motto Issue

- 3202 1866-S Motto AU55 NGC. CAC.** The famous Type Two design, with the motto IN GOD WE TRUST on the reverse, was introduced on the double eagle in 1866 and the San Francisco Mint struck a substantial mintage of 842,250 pieces of the new design. This impressive Choice AU specimen is lightly worn and moderately abraded for the grade, with lustrous yellow and orange-gold surfaces. NGC ID# 26B2, PCGS# 8950

**1870-S Double Eagle, Sharp MS61  
Fewer Marks Than the Grade Implies**

- 3203 1870-S MS61 PCGS.** Typically, 1870-S twenties show soft strikes and many bagmarks. This example is reasonably well-struck with a minimum number of marks, although the left obverse field and Liberty's cheek have number of moderate abrasions. Flashy mint luster amplifies pleasing sun-gold color of throughout both sides of this scarce Type Two double eagle. Population: 62 in 61, 14 finer (2/18). NGC ID# 26A9, PCGS# 8959

**1871 Twenty Dollar Liberty, AU55  
Low-Mintage Type Two Issue**

- 3204 1871 AU55 PCGS Secure. CAC.** The 1871 Type Two double eagle claims a fairly small mintage of 80,120 coins. The issue is rare in all Mint State grades and AU coins are only marginally available. This attractive Choice AU example displays lightly abraded fields and original orange-gold coloration with vibrant mint luster throughout. The design elements are well-detailed, with just a touch of wear. Population: 40 in 55, 39 finer. CAC: 2 in 55, 10 finer (2/18). NGC ID# 26AA, PCGS# 8960

**1871-S Double Eagle, MS61  
Brightly Frosted Mint Luster**

- 3205 1871-S MS61 PCGS.** Micro S. An 1871-S double eagle is a prize at any Uncirculated grade level, but examples are exceedingly rare in better condition than this MS61. Each side displays a characteristic impression and brightly frosted mint luster. The only major mark over the peach-gold surfaces occurs on Liberty's jaw, but it does not affect the overall appeal of the coin. PCGS reports 33 finer submissions (2/18). NGC ID# 26ND, PCGS# 8962

**1871-S Double Eagle, MS61  
Lustrous and Pleasing**

- 3206 1871-S MS61 PCGS.** This Type Two San Francisco issue is the most plentiful double eagle of the year in high grade but Mint State coins are scarce. Frosty yellow-gold luster shows well-detailed design elements with the expected scattering of light abrasions across each side. Most 1871-S twenties in mint condition grade MS60 or MS61, and finer examples are seldom offered. Population: 59 in 61, 33 finer (2/18). NGC ID# 26ND, PCGS# 8962

**1872 Liberty Double Eagle, MS61  
Condition Rarity in Finer Grades**

- 3207 1872 MS61 PCGS.** With few exceptions, Uncirculated Type Two double eagles are scarce. The 1872 is elusive in any Mint State grade and is genuinely rare above MS61. This collectible example displays a bold strike and vibrant yellow-gold luster. Heavy abrasions limit the grade, as expected. Population: 54 in 61, 13 finer (2/18). NGC ID# 26AD, PCGS# 8963

1873 Double Eagle, MS63  
Open 3, Conditionally Rare

- 3208 1873 Open 3 MS63 PCGS.** A majority of 1873 Open 3 double eagles at PCGS are reported in the AU58 to MS62 grade range. The issue's conditional rarity quickly becomes apparent in MS63, and there are merely 11 submissions in better grades (2/18). Surface marks are largely thin and superficial, the only important abrasion is located in the field adjacent to Liberty's eye. The devices are well-impressed, save for the flat reverse stars, and the peach-gold surfaces radiate thick mint frost. NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS63  
Doubled LIBERTY, FS-101

- 3209 1873 Open 3, Doubled Die Obverse, FS-101, MS63 PCGS.** LIBERTY is boldly die doubled on this Open 3 variety. The current coin is among the finest pieces attributed as FS-301 at PCGS, and it is an above-average Mint State example of the date overall. Bold design elements and frosted orange-gold mint luster produce strong eye appeal, while light, scattered abrasions are in harmony with the grade. Population: 10 in 63, 0 finer (2/18). NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873-S Liberty Double Eagle, MS61  
Scarcer Open 3 Variety

- 3210 1873-S Open 3 MS61 PCGS.** Mint records indicate just over 1 million Liberty double eagles were struck at the San Francisco Mint in 1873, split between the Closed 3 and Open 3 designs. The Open 3 coins were struck after their Closed 3 counterparts and are seen less often in today's market. Apparently, Chief Coiner A. Loudon Snowden believed the Closed 3 in the date looked too much like an 8 and successfully lobbied to change that numeral punch early in the year. Because it took some time for the new dies to reach the West Coast, most of the S-mint mintage for the year was completed before the new dies arrived, using the older Closed 3 motif. The 1873-S Open 3 double eagle is very scarce in MS61 condition, and finer coins are very rare.

The present coin is an attractive MS61 example, with well-detailed design elements and vibrant mint luster throughout. In keeping with the grade, the orange-gold surfaces show a large number of minor ticks on both sides. Population: 66 in 61, 9 finer (2/18). NGC ID# 26AM, PCGS# 8979

1873-S Open 3 Twenty Dollar, Clean MS61  
Major Condition Rarity Any Finer

**3211 1873-S Open 3 MS61 NGC.** Side-by-side, there are only subtle differences between the Closed 3 and Open 3 date logotypes — unlike other denominations, where the variance is more pronounced. Most 1873-S twenties are the Closed 3 variety, making the Open 3 a challenge for type collectors and double eagle specialists. The Open 3 ranks as the rarest Type Two San Francisco twenty overall, a fact that is sometimes unknown to collectors.

The present Open 3 double eagle appears high end for its MS61 grade. Peach-gold surfaces display clean fields and just a few minor marks on the portrait. Mint luster remains vibrant and frosty throughout, furthering the visual appeal. The strike is virtually full, where Liberty's hair definition and the eagle's neck feathers show particularly bold detail. Census: 56 in 61, 5 finer (2/18). NGC ID# 26AM, PCGS# 8979

1874 Twenty Dollar, MS62  
Decidedly Rare Any Finer

**3212 1874 MS62 PCGS Secure.** The 1874 double eagle joins other Type Two issues as reasonably available in lesser grades, but quite scarce in Mint State and unarguably rare in Select Uncirculated or finer. Even the great influx of gold twenties from Europe and other foreign holdings has not affected the high-grade rarity (most of those coins congregate in lower Uncirculated grades).

This vibrant and lustrous 1874 is on the edge of a finer grade, limited only by some frictionlike bagmarks that dot the fields. The strike is essentially full, while frosted mint luster imbues the rich-gold surfaces with tremendous eye appeal. It is worth noting PCGS has seen just eight numerically finer examples, and NGC just one such piece. Population: 43 in 62, 8 finer (2/18). NGC ID# 26AN, PCGS# 8970

**1874 Liberty Double Eagle, MS62**  
**Rare Any Finer**

- 3213 1874 MS62 PCGS Secure. CAC.** The 1874 double eagle claims a moderate Philadelphia Mint production total of 366,780 pieces. The issue is not difficult to locate in grades from VF through AU, but Mint State coins are elusive and most Uncirculated examples grade no better than MS61. The 1874 is definitely scarce in MS62 condition and finer coins are rare. Demand for all Type Two double eagles is quite strong in today's market, making high-grade specimens, like the present coin, particularly desirable.

This attractive MS62 specimen offers vivid orange-gold surfaces with the expected number of minor contact marks for the grade. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. Population: 43 in 62, 8 finer. CAC: 5 in 62, 0 finer (2/18). NGC ID# 26AN, PCGS# 8970

**1874-CC Twenty Dollar, AU50**  
**Most Challenging Issue for the Year**

- 3214 1874-CC AU50 NGC. Variety 1-A.** The die chip on the jaw and the closely spaced mintmark are characteristic of this variety. The 1874-CC has a higher mintage than the 1875-CC double eagle, but it is much scarcer. It is also the most challenging issue for the year. Khaki and reddish-gold surfaces yield traces of luster. An unsurprising number of abrasions appear in the fields, and strike detail is typical. NGC ID# 26AP, PCGS# 8971

**1874-CC Liberty Double Eagle, AU53**  
**Popular Branch Mint Type Coin**

- 3215 1874-CC AU53 NGC. Variety 3-A.** The 1874-CC claims the second-highest production total of any Carson City double eagle, at 115,085 pieces. In addition to the large mintage, the 1874-CC surfaced in significant numbers in European hoards in recent times, making the issue relatively available in the context of the series. This attractive AU53 example is lightly worn and lightly abraded, with lustrous orange-gold surfaces. This coin would be an excellent choice for a branch mint type set. NGC ID# 26AP, PCGS# 8971

**1874-S Twenty, MS62**  
**Splendid Original Patina**

- 3216 1874-S MS62 PCGS Secure. CAC.** Broad S Mintmark. Among Uncirculated double eagles, the MS60 and MS61 grades are seemingly far below the status of this MS62 1874-S, which combines attractive reddish-gold and lemon highlights over lightly marked, sun-gold surfaces. The strike is sharp, as expected for the issue. Housed in a Gold Shield PCGS holder with CAC endorsement. PCGS reports just four numerically finer examples, and NGC has certified only five in a finer grade. NGC ID# 26AR, PCGS# 8972

1875-CC Twenty Dollar, AU53  
Luster Glows From the Design Recesses

- 3217 1875-CC AU53 PCGS. Variety 2-B. The 5 in the date is mostly under the curl, and the right edge of the second C in the mintmark is in line with the left edge of the T below. Luminous luster glows around the raised design elements. Yellow-gold surfaces are lightly abraded, showing an identifying mark under the eye and a grease mark near the N in UNUM. The Carson City Mint manufactured 111,151 double eagles in 1875 — a low for the middle part of the decade. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU58  
CAC Approval

- 3218 1875-CC AU58 PCGS. CAC. Variety 5-A. The base of the 7 is centered over a dentil, the second C in the mintmark is left of the T, and there is a die line above the E in AMERICA. Sharpness of strike is good around the borders but softens in the centers. Vibrant remaining mint frost and original yellow-gold surfaces compensate for the incompleteness with terrific eye appeal. A lovely CC Type Two twenty. NGC ID# 26AT, PCGS# 8974

1876-CC Liberty Twenty, AU53  
Variety 5-A

- 3219 1876-CC AU53 PCGS. Variety 5-A. The series-high mintage of 138,441 pieces makes the 1876-CC Liberty double eagle a relatively available issue and a popular branch mint type coin. This attractive AU53 example exhibits some light wear on the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. A vertical die crack is seen to the left of the date and another connects most of the letters in the denomination, identifying the Variety 5-A. NGC ID# 26AW, PCGS# 8977

1876-CC Liberty Double Eagle, AU53

- 3220 1876-CC AU53 NGC. Variety 4-A. The 1876-CC boasts the largest production total of any Liberty double eagle from the Carson City Mint, at 138,441 pieces. However, the issue is not as easy to locate in high grade as the high mintage would suggest. If not for a hoard of Uncirculated specimens that surfaced in the early 1990s, the 1876-CC would be nearly unobtainable in Mint State. This attractive AU53 example exhibits strongly impressed design elements with some light wear on the high points. The orange-gold surfaces are lightly abraded and retain traces of original mint luster. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU53  
Attractive, Brassy-Gold Color

- 3221 1876-CC AU53 NGC. CAC. Variety 3-A. Despite its large mintage of 138,441 pieces and regardless of foreign hoard coins that returned to the U.S. over the past few decades, the 1876-CC remains stubbornly scarce with decent surfaces and color. This CAC-endorsed AU53 example will satisfy even the choosiest collector. Abrasions are light and natural orange-gold surfaces retain plentiful luster. A shallow scrape near star 5 is the sole mark of note. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU58  
Original, Lustrous Surfaces

- 3222 1876-CC AU58 PCGS Secure. Variety 4-A. It is difficult to discern actual wear on this lustrous near-Mint coin, although a blanket of surface chatter on each side and olive-colored toning areas on the high points of the devices suggest slight friction. The patina is original, and the devices show sharp definition. The 1876-CC is a popular date among collectors seeking a single coin from this mint. NGC ID# 26AW, PCGS# 8977

1876-S Liberty Twenty, MS63  
Final Type Two Issue

**3223 1876-S MS63 PCGS.** Despite a mintage of nearly 1.6 million pieces, the 1876-S Liberty double eagle is a scarce issue in MS63 condition, and finer coins are rare. This attractive Select specimen exhibits vivid orange-gold surfaces, with vibrant mint luster and a few scattered, minor contact marks. The design elements are well-detailed and the eye appeal is outstanding. PCGS has graded 17 numerically finer examples (1/18). NGC ID# 26AX, PCGS# 8978

1877-CC Twenty Dollar, Choice XF  
CAC Approved, Original Toning

**3224 1877-CC XF45 PCGS Secure. CAC. Variety 2-C.** CAC is parsimonious in bestowing green seals on 19th century gold, but the present original sea-green and peach-gold Carson City twenty bears the coveted "bean." The curls display wear, but luster emerges from the design recesses, and the only reportable mark is a tick on the sixth vertical shield stripe. CAC: 16 in 45, 49 finer (2/18). NGC ID# 26AZ, PCGS# 8983

1877-CC Double Eagle, AU53  
Popular Carson City Issue

**3225 1877-CC AU53 PCGS Secure.** For three years during the mid-1870s, the Carson City Mint struck more than 100,000 double eagles. In 1877, though, only 42,565 pieces were struck. The production at San Francisco was more than 40 times greater, and much of the gold mined in Nevada was shipped by rail to California instead of the closer facility. The present sun-gold example displays ample luster and is free from any distracting abrasions. NGC ID# 26AZ, PCGS# 8983

1878-CC Double Eagle, AU50  
Tiny Mintage of 13,180 Coins

**3226 1878-CC AU50 PCGS Secure. Variety 1-A.** The 7 is centered directly over a dentil and two die gouges appear below the Wide CC mintmark. After years of substantial double eagle production, Carson City output fell to a meager 13,180 twenty dollar gold pieces in 1878 — the fifth-lowest total among CC issues. A survival rate of approximately 3% makes the 1878-CC exceedingly scarce in the absolute sense.

Given the low mintage, it should come as little surprise that this lightly circulated AU example exhibits distinct semiprooflikeness in the fields. The surfaces feature deep yellow-gold color that lightens a touch over the motifs, which display modest blending. Small marks are inconsequential. NGC ID# 26B4, PCGS# 8986

**1878-S Twenty Dollar Liberty, MS62**  
Colorful Lustrous Example

- 3227 1878-S MS62 PCGS Secure. CAC.** The 1878-S Liberty double eagle claims a substantial mintage of 1.7 million pieces, but the issue is surprisingly difficult to locate in grades above the MS62 level. This impressive MS62 offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of grade-consistent contact marks. PCGS has graded only 12 numerically finer examples (2/18). NGC ID# 338K, PCGS# 8987

**1882-CC Liberty Double Eagle, AU53**  
Sharply Struck, Lightly Worn Example

- 3228 1882-CC AU53 NGC. Variety 1-B.** The 1882-CC Liberty double eagle claims a modest mintage of 39,140 pieces, but the issue is not as difficult to locate as that small production total would suggest. This attractive AU53 example exhibits only light wear over the strongly impressed design elements and the pleasing orange-gold surfaces show only minor abrasions. NGC ID# 26BF, PCGS# 8997

**1882-CC Liberty Double Eagle, AU55**  
Nice Luster and Color

- 3229 1882-CC AU55 PCGS. CAC. Variety 2-B.** The left foot of the 1 in the date aligns with the left side of a dentil and the point of the 2 is centered above the space between two dentils, identifying the Variety 2-B. A faint die crack travels through the base of the letters in the denomination. This impressive Choice AU specimen exhibits just a touch of wear on the sharply detailed design elements and the lightly abraded orange-gold surfaces retain most of their original mint luster. NGC ID# 26BF, PCGS# 8997

**1882-CC Liberty Twenty, AU58**  
Lightly Abraded and Lustrous

- 3230 1882-CC AU58 PCGS. Variety 1-B.** The point of the 2 in the date is centered over a dentil and the second C in the mintmark is slightly higher than the first, identifying this piece as a Variety 1-B. Only a trace of wear shows over the high points of the design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. A network of spidery die cracks runs through most of the letters in the reverse legends and a vertical die line is visible in front of Liberty's eye. The overall presentation is most attractive. NGC ID# 26BF, PCGS# 8997

**1882-CC Liberty Double Eagle, AU58**  
Sharply Struck and Lightly Worn

- 3231 1882-CC AU58 NGC. CAC. Variety 1-B.** The Carson City Mint struck no double eagles in 1880 or 1881, and only 39,140 twenties were produced in 1882. Fortunately, the 1882-CC boasts a better-than-average survival rate and the issue is actually one of the more available CC-mint double eagles from the 1880s. This lightly worn and lightly abraded near-Mint specimen offers pleasing orange-gold surfaces that retain most of their original mint luster. NGC ID# 26BF, PCGS# 8997

**1883-CC Double Eagle, AU53**  
Smooth Original Surfaces

- 3232 1883-CC AU53 PCGS. Variety 2-A.** An available Carson City issue compared to many other double eagles from this mint, popular as a type coin for collectors seeking a single Carson City twenty. This piece is luminous in the fields and sharply detailed on the devices. Original bronze-gold surfaces are remarkably smooth, despite the reputation of Carson City double eagles for being heavily abraded. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, AU53  
Red-Gold Surfaces

- 3233 1883-CC AU53 NGC. Variety 2-A.** The import of a group of 1883-CC double eagles in recent years has been a boon to this area of collecting, allowing more collectors to participate in the market for Carson City gold. This is a marvelous example in original AU53 condition. A rich reddish-gold hue, good strike detail, and partial glowing luster are eminently eye-appealing. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Head Twenty, AU55  
Attractively Lustrous Fields

- 3234 1883-CC AU55 NGC. Variety 2-A.** Original luster glows in the protected portions of the fields, and olive-gold patina appears on the relief elements where light high-point wear prevents a Mint State grade. A few light abrasions are seen under a loupe but evade the unaided eye, save for a cluster of marks on Liberty's cheek. An unusually attractive Carson City double eagle for this grade. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Double Eagle, AU58  
Scarce in Higher Grades

- 3235 1883-CC AU58 NGC. Variety 2-A.** Attributed by die chips near stars 8 and 9, and a die gouge from the dentils above the E in STATES. With a mintage approaching 60,000 coins, the 1883-CC is a middle-availability Carson City issue that becomes notably scarce in mint condition. Well-struck, medium yellow-gold surfaces retain mint luster on each side. The lack of detracting abrasions adds to the appeal of this borderline-Uncirculated example. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS62+  
Lustrous and Fully Struck

- 3236 1883-CC MS62+ PCGS. CAC. Variety 1-B.** This is a much scarcer variety that is characterized by the mintmark positioned approximately between the Y and D of TWENTY DOLLARS, diagonal die lines in the shield on the reverse, and a prominent die line between star 13 and the rim on the obverse. While this CC twenty is known for soft definition, especially on Liberty's hair, that is not the case with this piece. The hair and star radials are sharply rendered. As one would expect, the mint luster is thick and frosted. This reddish-gold example has a few grade-limiting marks, but the overall eye appeal is significant on this popular Carson City double eagle. A coin of nearly unsurpassed technical and aesthetic quality. Population: 23 in 62 (1 in 62+), 4 finer. CAC: 3 in 62, 1 finer (2/18). NGC ID# 26BH, PCGS# 8999

1884-CC Double Eagle, Choice AU

- 3237 1884-CC AU55 PCGS. Variety 1-A.** Original olive-gold patina exudes luster in the fields and complements boldly detailed motifs in the centers. Scattered light marks and a few scuffs appear under a loupe, as normally seen on AU-level Carson City gold. The 1884-CC double eagle is an available date, suitable for type purposes when a CC-mint coin is desired. NGC ID# 26BK, PCGS# 9001

## 1884-CC Double Eagle, Original AU55

- 3238** 1884-CC AU55 NGC. Variety 1-A. The undeniable originality of this Choice About Uncirculated Carson City double eagle should generate plenty of interest. Reddish and khaki-gold hues merge with abundant remaining mint luster. Quite a bit of original "crust" remains within the protected areas. Crisply impressed and void of major flaws. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Head Twenty, AU55  
Incontrovertible Originality

- 3239** 1884-CC AU55 PCGS. CAC. Variety 1-A. The originality of this red-gold Choice AU twenty from the Carson City Mint is incontrovertible, accounting for the CAC endorsement. Both sides retain abundant luster within the protected regions. Strike detail is bold, as often seen for this well-made issue. A couple of ticks adjacent to the forecurls are the sole mentionable marks. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU58  
More Available CC-Mint Issue

- 3240** 1884-CC AU58 PCGS. CAC. Variety 1-A. The 1884-CC is one of the best-produced issues in the Carson City series. As such, it is frequently used for type purposes. This high-end AU example retains much original luster, especially notable around the stars on the obverse and various devices on the reverse. Light, even reddish-orange color and sharply struck throughout. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, MS61  
Frosty Luster, Wheat-Gold Color

- 3241** 1884-CC MS61 PCGS. Variety 1-A. Things were trending down in Carson City in 1884. The population was half of what it had been a decade before, the number of advertisements in the local newspaper was lower, and fewer gold deposits were being made at the Carson City Mint. Indeed, the facility would shut its doors for four and a half years starting in 1885. Nevertheless, a substantial mintage of 81,139 double eagle was accomplished, these being among the few accessible CC twenties in high grades. This well-struck 1884-CC representative maintains frosty mint luster and vibrant wheat-gold coloration with a touch of rose to accent. Scattered grazes occur over each side, but none overly distract. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, MS62  
Original Surfaces, Thick Mint Frost  
Perfect Carson City Type Coin

**3242 1884-CC MS62 PCGS. CAC. Variety 1-A.** One variety is known for the 1884-CC double eagle. Intersecting die lines appear above the designer's initials. Most Carson City twenty dollar gold pieces are extremely difficult, if not impossible to locate in mint condition. This issue is one of the few exceptions. From a mintage of 81,139 coins, the 1884-CC is relatively collectible in high grades. Circulated coins still vastly outnumber their Uncirculated counterparts, but a fair number of examples are known in MS60 and MS61. This is the highest grade most collectors could ever hope to obtain. A handful of coins are known finer.

The hair strands, stars, and feathers are well-struck. Yellow-gold surfaces awash in rich, frosty mint luster exhibit remarkably few serious abrasions, in part explaining the CAC approval sticker. Simply a marvelous, carefully preserved example of a well-produced Carson City double eagle in original, untouched condition. Population: 86 in 62 (1 in 62+), 6 finer. CAC: 12 in 62, 3 finer (2/18). NGC ID# 26BK, PCGS# 9001

1889-CC Double Eagle, AU58  
Just a Touch of Wear

**3243 1889-CC AU58 PCGS. Variety 1-A.** Light high-point friction is mainly restricted to Liberty's portrait, which has olive-colored toning on the cheek and hair curls. The fields are lustrous with brighter yellow-gold color. Scattered light abrasions appear throughout. The 1889-CC is a popular date in the Carson City series, and coins grading finer than the present are elusive with decent eye appeal. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS60  
Elusive in Mint Condition

**3244 1889-CC MS60 PCGS. Variety 1-A.** Coinage production at the Carson City Mint resumed in 1889 after a break in operations dating back to 1885. The facility limited output to 30,945 double eagles and 350,000 Morgan dollars upon resumption. Both issues are in ever-strong demand and are especially elusive in high grades. The 1889-CC twenty is very scarce in mint condition. Examples are almost unseen beyond MS62, and even they push the limits of obtainability. This MS60 offering has numerous scattered marks across luminous yellow-gold surfaces. Abundant mint frost shimmers over sharply rendered relief elements. NGC ID# 26BV, PCGS# 9011

1889-CC Twenty Dollar, MS61  
Lustrous Red-Gold Example

- 3245 1889-CC MS61 PCGS. Variety 1-A.** Although the Carson City Mint only struck Morgan dollars and Liberty Head double eagles in 1889, it was an important year for the facility. Specialist Rusty Goe writes in *The Mint on Carson Street*: "The year 1889 proved to be a time of the defiance of odds for the Carson City Mint; ironically, it was also the year that signaled the beginning of the end." Many thought the CC-mint would never strike a coin again after 1885, but its 1893 closure was impending. A total of 30,945 1889-CC double eagles were produced. Mint State survivors are conditionally rare. This lustrous, unworn twenty has a reddish-gold hue and crisp detail on the stars (both sides), hair, and feathers. Peppered bagmarks define the grade. NGC ID# 26BV, PCGS# 9011

1890-CC Liberty Twenty, AU53  
Lightly Worn, Late Die State Example

- 3246 1890-CC AU53 NGC. Variety 1-A.** This impressive AU53 example is from a late state of the dies that shows little evidence of die doubling on the denomination and exhibits considerable loss of detail on the eagle's tail, due to lapping. The strongly impressed design elements are lightly worn and the lustrous orange-gold surfaces are lightly abraded in most areas. A group of four short scratches on Liberty's cheek defines the grade. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU55  
Late Die State

- 3247 1890-CC AU55 PCGS. Variety 1-A.** Mintmark centered over the space between TWENTY DOLLARS. The rightmost tailfeathers are lapped. This well-impressed, minimally circulated Carson City gold piece displays a trace of blending over the high points. Partial luster radiates from the recesses of the design, lightening each orange-gold side. There were 91,209 CC twenties minted in 1890, making this one of the more accessible issues from the facility. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, AU55  
Lightly Abraded and Lustrous

- 3248 1890-CC AU55 NGC. Variety 1-A.** Double eagles from the Carson City Mint have a special charisma and the 1890-CC is always in demand because of its relative availability in high grade. This attractive Choice AU specimen displays pleasing orange-gold surfaces with a minimal number of minor contact marks for the grade. Just a touch of wear is evident on the strongly impressed design elements and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, AU55  
Lightly Worn, Lustrous Specimen

- 3249 1890-CC AU55 PCGS. **Variety 1-A.** The lightly worn design elements of this Choice AU Carson City double eagle are sharply detailed in most areas, but the eagle's tail shows some incompleteness, due to lapping. A thin die crack travels through the tops of most of the letters in the reverse legend. The lightly abraded orange-gold surfaces retain most of their original mint luster and the overall presentation is quite attractive. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, AU58  
Nice Luster and Color

- 3250 1890-CC AU58 NGC. **Variety 2-B.** An attractive near-Mint example of this popular Carson City issue, with sharply detailed design elements that show just a trace of wear over the high points. The pleasing orange-gold surfaces exhibit the expected number of minor contact marks for a large gold coin that spent a little time in circulation, but vibrant mint luster still radiates from both sides. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, AU58  
Popular Branch Mint Type Issue

- 3251 1890-CC AU58 PCGS. **Variety 1-A.** The 1890-CC Liberty double eagle claims a fairly generous Carson City mintage of 91,209 pieces and the issue enjoys a higher-than-average survival rate, making it a popular choice with branch mint type collectors. Just a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS60  
Remarkably Lustrous Surfaces

- 3252 1890-CC MS60 PCGS. **Variety 1-A.** The 1890-CC twenty is typically seen with thick mint luster and numerous abrasions from bag-to-bag transfer in Europe over the past 125 years. This piece shows pleasing reddish-gold patina and the mint luster is bright. Many 1890-CC double eagles are not fully struck, but this one displays bold definition over all the design elements on each side. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, MS61  
Coruscating Mint Luster

- 3253 1890-CC MS61 PCGS **Secure. Variety 2-B.** In 1890, coinage output at the Carson City Mint, including all denominations, was third-highest in the facility's entire 21-year run. A total of 91,209 double eagles were struck, and the issue has a survival estimate of about 3%. Perhaps 10% of those coins are known in Mint State (a reflection of large-scale exports), making the 1890-CC a popular date for type purposes.

Coruscating mint frost swirls across this light yellow-gold Uncirculated double eagle. Strike definition is strong over the portrait and eagle, but the obverse stars display incomplete centers. The cheek and fields are minimally abraded. NGC ID# 26BY, PCGS# 9014

**1892-S Liberty Double Eagle, MS64+  
Vivid Color, Vibrant Mint Luster**

- 3254 1892-S MS64+ PCGS Secure.** The 1892-S Liberty double eagle is a popular Type Three issue, from a substantial mintage of 930,150 pieces. As might be expected, the 1892-S is an available issue in grades up to the MS63 level, but Choice specimens are scarce, and finer examples are rare. This spectacular Plus-graded Choice example displays sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 21 numerically finer examples (1/18). NGC ID# 26C7, PCGS# 9021

**1894 Type Three Double Eagle, MS64+  
Condition Rarity in Finer Grades**

- 3255 1894 MS64+ PCGS Secure. CAC.** The 1894 twenty dollar is definitely scarce in MS64 condition, and finer coins are prime condition rarities. This Plus-graded Choice example exhibits sharply detailed design elements with well-preserved, orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is outstanding. PCGS has graded three numerically finer examples (2/18). NGC ID# 26CB, PCGS# 9025

**1898-S Liberty Double Eagle, MS65  
Extremely Rare Any Finer**

- 3256 1898-S MS65 PCGS.** From a large mintage of 2.5 million pieces, the 1898-S Liberty double eagle is a scarce issue in MS65 condition, and finer examples are almost unobtainable. This spectacular Gem example exhibits sharp definition on all design elements and the well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded one numerically finer example (1/18). NGC ID# 26CL, PCGS# 9034

**1901-S Liberty Twenty, MS64+  
Nice Color and Luster**

- 3257 1901-S MS64+ PCGS Secure. CAC.** Despite a substantial mintage of more than 1.5 million pieces, the 1901-S Liberty double eagle is a scarce issue in MS64 condition, and finer coins are very rare. This Plus-graded Choice specimen displays vivid orange-gold surfaces that are minimally marked for the grade, with vibrant mint luster and well-detailed design elements. PCGS has graded only two numerically finer examples (1/18). NGC ID# 26CT, PCGS# 9040

**1906 Double Eagle, MS63  
Rare So Fine With a CAC Label**

- 3258 1906 MS63 PCGS. CAC.** Lovely orange-gold mint luster shimmers as it illuminates sharp design elements and relatively clean fields. Abrasions on this Select Mint State example are refreshingly light and unobtrusive for the grade, especially on the reverse. The 1906 is a slightly better 20th century date with a mintage of only 69,596 pieces. PCGS lists just 36 pieces finer than the present. CAC: 12 in 63, 9 finer (2/18). NGC ID# 26D4, PCGS# 9049

**1907 Liberty Twenty, MS65  
Exceptional Final-Date Type Coin  
Registry Set Contender**

- 3259 1907 MS65 PCGS.** A spectacular Gem example, from the last year of the Liberty design, this coin exhibits razor-sharp definition on all design elements and the well-preserved peach-gold surfaces radiate vibrant mint luster, with terrific eye appeal. From a substantial mintage of more than 1.4 million pieces, the 1907 Liberty twenty is a favorite choice with type collectors. Population: 22 in 65 (1 in 65+), 0 finer (1/18). **From The Glacier Park Collection.** NGC ID# 26D7, PCGS# 9052

**1907-D Liberty Double Eagle, MS65+  
Vivid Color, Vibrant Mint Luster**

- 3260** 1907-D MS65+ PCGS. From a mintage of 842,250 pieces, the 1907-D Liberty double eagle is seldom encountered in grades above the MS65 level. This delightful Plus-graded Gem exhibits sharply detailed design elements throughout and the well-preserved peach-gold surfaces radiate vibrant mint luster from both sides. The only flaw of note is a shallow scrape in the right obverse field. PCGS has graded 21 numerically finer examples (2/18). NGC ID# 26D8, PCGS# 9053

**HIGH RELIEF DOUBLE EAGLES**

**1907 High Relief Double Eagle  
Wire Rim**

- 3261** 1907 High Relief, Wire Rim — Surfaces Tooled — PCGS Genuine. In our opinion, this coin has AU details. The fields have been lightly smoothed, apparently to diminish the effects of contact marks. One scratch remains, however, through several rays near 9 o'clock on the obverse. The surfaces are bright overall and the design elements are sharply detailed. Just the slightest trace of high-point friction can be detected. This is still an impressive example of Augustus Saint-Gaudens' crowning achievement in U.S. coinage.

**1907 High Relief Saint-Gaudens Twenty  
Wire Rim, AU Details**

- 3262** 1907 High Relief, Wire Rim — Cleaned — PCGS Genuine Secure. AU Details. This is a remarkably attractive example for a coin that has been lightly cleaned, showing bright yellow-gold surfaces and sharp detail. The natural luster of a High Relief double eagle is often satiny such that the slightly subdued luster of this piece is hardly noticed. A brush of friction on the elevated edge of the eagle's wing prevents an assessment of Uncirculated Details. A moderately affordable example of this sought-after first-year issue and High Relief type that still retains a degree of eye appeal.

**MCMVII Wire Rim High Relief, MS62  
Bright and Satiny Classic Design**

- 3263** 1907 High Relief, Wire Rim MS62 NGC. One of the great successes of Augustus Saint-Gaudens' classic design for the twenty dollar gold piece was creation of a coin that looked more like a medal than a circulating coin. The combination of striking the coin in high relief and uncluttering the surfaces allowed the viewer to concentrate on the central devices, thus creating a more dynamic design.

Both Saint-Gaudens and President Roosevelt thought it best to not include mention of the deity on the new gold coins, thus removing the traditional motto IN GOD WE TRUST. Moving E PLURIBUS UNUM the edge freed up more space, but required the use of a tripartite collar. Such a collar had never been used on a regular production coin, but had been used on pattern Morgan dollars in 1885. The success of these design decisions is readily apparent on the bright, satiny surfaces of the present coin. At first glance, this example appears to be much finer than the stated grade. A loupe reveals the yellow-gold surfaces have taken on a number of small, but individually insignificant contact marks on each side. The strike details are fully brought up throughout, and the eye appeal is excellent.

Ex: *Chicago Signature* (Heritage, 8/2011), lot 7676. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS63  
Wire Rim, Saint-Gaudens' Final Work

**3264** 1907 High Relief, Wire Rim MS63 PCGS Secure. The *Mint Director's Annual Report* of 1908 reported the beginning of production for the new eagle and double eagle, calling attention to designs "prepared by the eminent sculptor, the late Augustus Saint Gaudens, to whom great credit is due for the artistic merits of these coins." Saint-Gaudens had triumphed in his endeavor to combine the high relief and classical elegance of ancient Greek coinage into designs that were both beautiful and wholly American. At one point, after viewing Saint-Gaudens' early models, President Roosevelt wrote in a letter: "Those models are simply immense — if such a slang way of talking is permissible in reference to giving a modern nation one coinage at least which shall be as good as that of the ancient Greeks."

The eagle and double eagle designs were the crowning achievement of the sculptor, who died in early August 1907, before ever seeing his work put into production. Afterward, the double eagle design went through several stages of relief reductions before arriving at a low-relief version that was suitable for efficient mass coinage but was artistically inferior to Saint-Gaudens' original models. A few Ultra High Relief patterns are known of the original concept, but for most collectors these are unobtainable. The 12,367 High Relief coins struck in late 1907 are realistically the closest to Saint-Gaudens' original models that most collectors can hope to acquire. This Select representative is fully struck and luminous with satin honey-gold luster. A few unimportant surface marks do not detract from the classical beauty of design. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, Wire Rim, MS66  
Exceptionally Thick Satiny Luster

**3265 1907 High Relief, Wire Rim MS66 NGC.** The story is often told of how President Roosevelt gave out High Relief twenties to friends as mementoes. But he was not the only one to do so. Saint-Gaudens' wife, Augusta, also recognized the importance of the coins and their value. In Louise Hall Tharp's 1969 work *Saint-Gaudens and the Gilded Era* she related:

"Augusta instructed Charles Brewster [her friend and attorney] to buy Saint-Gaudens gold coins for her. Very shortly, however, he could find "but three more" twenty-dollar gold pieces and warned her that there was "a premium of \$10 on the double eagle." This time Augusta was not asking for advice; she told him to buy all he could, especially the high-relief examples. ... Augusta gave her coins to members of her family, most probably sold some as the price increased - and saved one for display at "Aspet."

The special nature of these coins was recognized by those closest to their production immediately upon their release, and the High Relief twenties were specially struck on hydraulic presses and have continued to fascinate collectors and non-collectors alike since they were issued in late 1907.

This exceptional coin was among the first produced, probably in the batch struck in November 1907. These pieces showed a 'fin' or piece of extruded metal, sometimes around both sides of the coin. The wire rim on this piece is complete around the obverse, but little is seen on the reverse. Each side has lovely, thick satiny mint luster that is virtually unaffected by contact mark or grazes. As usually seen on High Reliefs, the striking details are complete throughout. Ex: *Long Beach Signature* (Heritage, 6/2011), lot 5156, where it brought \$69,000. NGC ID# 26F2, PCGS# 9135

## SAINT-GAUDENS DOUBLE EAGLES

### 1908-S Saint-Gaudens Twenty, AU58 Low-Mintage San Francisco Issue

- 3266 1908-S AU58 PCGS.** Only Type Three twenties (Long Rays/With Motto) were produced at all three mints, with the San Francisco Mint striking just 22,000 pieces. That quantity could have been struck in less than four hours, had it not been for problems with the collar dies. Scarce in all grades, the 1908-S pieces are generally well-produced. This near-Mint example displays vibrant yellow-gold surfaces with remarkably few abrasions and barely discernible wear. Nearly full mint luster illuminates a sharp strike throughout both sides. NGC ID# 26FA, PCGS# 9149

### 1910 Saint-Gaudens Double Eagle, MS65 Seldom Encountered Any Finer

- 3267 1910 MS65 PCGS.** The 1910 Saint-Gaudens double eagle claims an adequate mintage of 482,000 pieces. Although proofs were struck earlier in the year, business-strike production did not begin until November. Research by Roger W. Burdette indicates the majority of the coins were used to settle accounts in foreign trade. This attractive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded six numerically finer examples (1/18). NGC ID# 26FF, PCGS# 9154

### 1910 Saint-Gaudens Twenty, Lustrous MS65

- 3268 1910 MS65 PCGS.** A medium-sized mintage of 482,000 Saint-Gaudens double eagles was accomplished at the Philadelphia Mint in 1910. Roger W. Burdette estimates 464,000 coins were exported to European and Latin American destinations near the time of issue, and only a few were seen in circulation in this country. Some substantial foreign holdings have surfaced in recent times, but most repatriated examples grade no better than MS63. This delightful Gem offers sharply detailed devices and lustrous orange-gold surfaces with no mentionable distractions. PCGS has graded six numerically finer examples (1/18). NGC ID# 26FF, PCGS# 9154

### 1924-S Double Eagle, MS64 Heavily Melted Issue

- 3269 1924-S MS64 PCGS.** Coin collecting after FDR's Gold Recall made picking the true rarities from recent double eagle issues a mystery. Which dates had been all but destroyed? Which were waiting in Central American or European banks, ready to be repatriated to the U.S. when the time was right? At one point the 1924-S was thought to be a top-tier rarity, but time has settled it into a mass-melted yet available-for-a-price issue ... except in grades finer than the MS64 example offered here, where PCGS has certified just seven such coins (2/18). Light yellow-gold surfaces are softly lustrous with scattered marks but few significant abrasions. *Ex: Long Beach Signature (Heritage, 9/2013), lot 6921, where it brought \$12,925.* NGC ID# 26G9, PCGS# 9179

1926 Double Eagle, MS66  
FS-101, Tripled Die Obverse

- 3270 1926 Tripled Die Obverse, FS-101, MS66 PCGS.** Recent research by Roger Burdette determined that approximately 10% of 1926 P-Mint double eagles in all grades have the Tripled Die Obverse. It is evident in the lower-right elements of the design, especially in the date and monogram area. The surrounding rays, stars, and nearby oak leaves also show this feature. This is a lustrous and attractive Premium Gem, sharply struck with variegated lemon-gold, lilac, and fire-orange color. Remarkably few marks are visible under a loupe. NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

## COMMEMORATIVE SILVER

1936 Boone Half Dollar, MS68  
Splashes of Colorful Patina, None Finer

- 3271 1936 Boone MS68 NGC.** Each side of this top-quality Boone half dollar showcases colorful splashes of golden-orange, crimson, rose, and green patina, allowing radiant mint luster to shine through. The underlying surfaces are virtually mark-free, and strike detail is complete. Census: 6 in 68 (2 in 68★, 1 in 68+★), 0 finer (2/18). NGC ID# BYFX, PCGS# 9266

1936-D Columbia Half Dollar, MS68  
Impeccably Preserved and Attractively Toned

- 3272 1936-D Columbia MS68 PCGS. CAC.** From a distribution of only 8,009 pieces, the Columbia half dollar commemorates the 150th anniversary of the designation of Columbia as the capital of the state of South Carolina. This incredible MS68 specimen is among the finest survivors of the meager production, with sharply detailed design elements and virtually pristine, satiny surfaces that show highlights of sea-green, pale gold, and lavender toning. Population: 26 in 68 (4 in 68+), 0 finer. CAC: 10 in 68, 0 finer (1/18). NGC ID# BYGD, PCGS# 9292

1920 Maine Half Dollar, MS68  
Registry-Grade Example

- 3273 1920 Maine MS68 NGC.** While this design by Anthony de Francisci — better-known as the designer of the Peace dollar — is one of his lesser works (Cornelius Vermeule in particular had some scathing words for the Maine commemorative), collectors respect it as part of the series. This coin is of particular interest, as it is the *single finest* representative in the combined certified population and an NGC Registry Set collector essential as such (1/18). Remarkably smooth surfaces glow beneath a light layer of patina that shifts from pale silver-gray to bolder greenish-gold, with a few hints of crimson-tan away from the well-defined devices.  
*Ex: Long Beach Signature (Heritage, 2/2011), lot 4093; FUN Signature (Heritage, 1/2015), lot 4449. NGC ID# BYGY, PCGS# 9326*

## COMMEMORATIVE GOLD

1915-S Panama-Pacific Gold Dollar, MS67  
Among the Finest Graded

- 3274 1915-S Panama-Pacific Gold Dollar MS67 PCGS.** The 1915-S commemorative gold dollar was a popular souvenir at San Francisco's Panama-Pacific International Exposition. A total of 15,000 coins were distributed, most of them individually for \$2 each. This fully struck Superb Gem offers eye-appealing peach-gold color and a dearth of visible marks. Mint luster is thickly frosted. The mintmark is repunched southwest. Population: 72 in 67, 0 finer (2/18). NGC ID# BYLH, PCGS# 7449

**1922 Grant Gold Dollar, MS67+  
Terrific Eye Appeal, With Star**

- 3275 1922 Grant Gold Dollar, With Star, MS67+ PCGS. CAC.** An identical mintage of 5,015 pieces were struck and distributed for both Grant Memorial gold dollar variants. While the With Star variant is nominally of higher value in lower grades, at the highest Mint State levels both varieties are equally sought and valued. This wonderful With Star example shows cherry-red, deep-orange, and canary-yellow shades with lilac overtones. A sharply struck and immaculately preserved Superb Gem, the PCGS Plus designation with CAC endorsement nearly position this piece among the finest known representatives.

Ex: *Houston Signature* (Heritage, 12/2015), lot 3465. NGC ID# BYPS, PCGS# 7459

**MODERN BULLION COINS**

**1987 Half-Ounce Gold Eagle, MS70  
Attractive, Shimmering Luster**

- 3276 1987 Half-Ounce Gold Eagle MS70 NGC.** The second-year half-ounce Gold Eagle is plentiful in MS69, but NGC lists only 52 coins in MS70 and PCGS reports just eight others this fine (2/18). For Registry purposes, this issue is conditionally rare. The present coin displays a bold strike and shimmering, softly frosted mint luster that is devoid of even minor abrasions. NGC ID# 26N8, PCGS# 9812

**1988 One-Ounce Gold Eagle, MS70  
Elusive in the Finest Grade Possible**

- 3277 1988 One-Ounce Gold Eagle MS70 NGC.** The beautifully preserved luster is especially attractive on this shimmering one-ounce Gold Eagle. The strike is sharp, and the coin is a superior Registry Set candidate. NGC lists only 75 examples of this date in MS70, and PCGS has seen 12 (2/18). MS69 coins are found with regularity, but the top-grade pieces are rarely offered at auction. NGC ID# 26PC, PCGS# 9824

**1989 Half-Ounce Gold Eagle, MS70  
Scarce This Fine**

- 3278 1989 Half-Ounce Gold Eagle MS70 NGC.** In 1989, half-ounce Gold Eagle coinage was nearly identical for business strikes and proofs (44,829 of the former, 44,798 of the latter). Top-grade examples of the regular issue are scarce and in demand among Registry Set collectors. This piece displays a full strike and satiny yellow-gold luster with perfect surfaces. NGC ID# 26NA, PCGS# 9832

**1989 One-Ounce Gold Eagle, MS70  
Scarce Registry Coin**

- 3279 1989 One-Ounce Gold Eagle MS70 NGC.** Shimmering, softly frosted mint luster graces the sharp, pristine surfaces of this top-grade 1989 one-ounce Gold Eagle. Although more than 415,000 examples of this issue were struck, those certified in perfect MS70 condition are scarce. NGC reports 55 top-grade Registry Set candidates and PCGS 26 (2/18). NGC ID# 26PD, PCGS# 9834

**1990 Half-Ounce Gold Eagle, MS70  
Rare in This High Grade**

- 3280 1990 Half-Ounce Gold Eagle MS70 NGC.** A particularly satiny example, this top-grade 1990 half-ounce Gold Eagle displays a full strike and outstanding eye appeal. Only 31,000 half-ounce coins were struck in 1990, and NGC has graded just 49 pieces MS70; PCGS lists an additional three coins in this highest-possible grade (2/18). A flawless and rare Registry coin. NGC ID# 26NB, PCGS# 9842

**1991 Half-Ounce Gold Eagle, MS70**  
**Last Issue With a Roman Numeral Date**

- 3281 1991 Half-Ounce Gold Eagle MS70 NGC.** The 1991 is the last date in the subset of half-ounce Gold Eagles characterized by a Roman numeral date. The classical style was replaced with Arabic numerals in 1992. Top-grade MCMXCI half-ounce Gold Eagles are scarce and in demand among Registry Set collectors. This piece is frosty and flawless, showing rich straw-gold coloration. NGC ID# 26NC, PCGS# 9852

**1995-W Silver Eagle, PR70 Ultra Cameo**  
**Low-Mintage Key Issue**

- 3282 1995-W Silver Eagle PR70 Ultra Cameo NGC.** From a small mintage of 30,125 pieces, the 1995-W is the acknowledged key to the Silver Eagle series. This magnificent example exhibits deeply mirrored fields that contrast profoundly with the fully struck, richly frosted design elements. The brilliant surfaces are technically perfect and eye appeal is terrific. NGC ID# CFWX, PCGS# 9887

**1995 Quarter-Ounce Gold Eagle, MS70**  
**Small Top-Grade Population**

- 3283 1995 Quarter-Ounce Gold Eagle MS70 NGC.** In MS70, the 1995 quarter-ounce Gold Eagle is a rarity and in high demand among Registry Set collectors. NGC lists only 54 pieces this fine and PCGS 10 (2/18). This example is fully struck and shimmers with pristine yellow-gold mint luster. A loupe only makes the coin even more appealing. NGC ID# 26MB, PCGS# 9890

**1999 Silver Eagle, MS70**  
**Exceedingly Elusive at This Top Level**

- 3284 1999 Silver Eagle MS70 NGC.** Silver Eagle production increased significantly in 1999 to satisfy heightened demand for investment-grade silver bullion leading up to Y2K. More than 7.4 million Silver Eagle circulation strikes were produced that year. Despite the massive output, the issue is exceedingly elusive in this top grade. Brilliant silver surfaces are mark-free. Satin luster glistens over fully struck motifs. Ideal for an advanced Silver Eagle set. NGC ID# 26JX, PCGS# 9947

**1999-W Quarter-Ounce Gold Eagle, MS69**  
**Struck From Unfinished Proof Dies**

- 3285 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** The reverse insert is signed by former (and future?) Mint Director Philip N. Diehl. PCGS does not list a population for coins in Diehl Signature holders, although collectively, coins in MS69 are the most frequently seen for this *Guide Book* variety. Nonetheless, MS69 PCGS coins are important for Registry Sets, and only a dozen pieces are certified MS70 at that service (2/18), which does not supply the demand for top-grade coins. This piece is sharp and virtually flawless, showing satiny golden mint luster. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**1999-W Quarter-Ounce Gold Eagle, MS70**  
**Unfinished Proof Dies Variety**

- 3286 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC.** This is a highly popular *Guide Book* variety, struck with West Point proof dies that were not yet polished to a proof finish. Numerous examples are known in MS68 and MS69, but NGC has only certified 56 coins in MS70 (2/18). This piece displays sharp detail and bright satin luster, which shows no abrasions. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

## TERRITORIAL GOLD

(1842-52) A. Bechtler Gold Dollar, MS60  
27 G., 21 C., Plain Edge, K-24

- 3287** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge, MS60 NGC. K-24, R.3. August Bechtler inherited the family coining business from his father, Christian, around 1840. The Bechtler gold coinage was highly regarded for its consistent weight and fineness, and examples could be found in circulation until the Civil War. This attractive Mint State specimen is sharply struck and lightly marked for the grade. Traces of prooflike reflectivity show in the sheltered areas around the devices. Listed on page 393 of the 2018 *Guide Book*. NGC ID# 2B99, PCGS# 10040

1851 Humbert Fifty, Hefty Choice XF  
Reeded Edge, 887 Thous., K-6

- 3288** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. XF45 NGC. K-6, R.4. This iconic fifty dollar octagonal gold piece is from the first year of production at the U.S. Assay Office, operated by Moffat & Co. under the nominal authority of U.S. Assayer Augustus Humbert. Like all moderately circulated fifty dollar "slugs," it has few edge marks, but the corners are relatively unscathed — unlike many circulated survivors of this highly collectible early variety. Abrasions are distributed and relatively minor save for a small cluster near the CA in AMERICA. The pale gold fields are slightly granular, and luster glimmers from the wings and scrollwork. Listed on page 396 of the 2018 *Guide Book*. Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1990. NGC ID# ANH9, PCGS# 10214

1853 Assay Office Twenty Dollar, MS63  
K-18, 900 THOUS.

**3289 1853 Assay Office Twenty Dollar, 900 Thous. MS63 PCGS. CAC. K-18, R.2.** The 1853 Assay Office twenty ranks among the most plentiful of all territorial California gold issues. Curtis, Perry & Ward operated the U.S. Assay Office of San Francisco after Moffat & Co. was dissolved, under contract with the federal government to produce various denominations of gold ingots to serve the local economy. Although not a product of the United States Mint, this issue served as a predecessor to the Liberty Head double eagle for a couple of years before the Assay Office was converted into the San Francisco Mint.

This frosty, highly lustrous piece has brilliant green-gold surfaces and strong aesthetic appeal. Both sides are exceptional in quality with only a few surface marks that are consistent with the grade. Listed on page 399 of the 2018 *Guide Book*. Population: 35 in 63 (1 in 63+), 28 finer. CAC: 10 in 63, 6 finer (2/18).

Ex: Baltimore Signature (Heritage, 3/2009), lot 3450. NGC ID# ANHD, PCGS# 10013

## PATTERNS

1852 Ring Dollar in Gold, Judd-145, Thin Planchet  
PR68 Cameo, Finest Certified

**3290** 1852 Gold Dollar, Judd-145 Thin, Pollock-173, Low R.6, PR68 Cameo NGC. An annular pattern with a wide opening that restricts the legends to the date, denomination, and country name. The lower half of the reverse displays a wreath. Struck in gold with a plain edge. Both thick and thin planchet variants are known of this pattern. The thicker variant weighs around 32 grains, and examples are believed to be original strikings. The restrikes weigh around 25 grains and are struck on thinner planchets.

The reason for experimentation with gold dollars (Judd-136 to Judd-148) was to provide a larger, more convenient diameter for the coins. Gold dollars were small and easily lost, and in the early 1850s they represented a substantial amount of money for the average worker. Convenience lost out, however, to a more practical solution: The amount of silver was reduced in most subsidiary coinage in 1853, which returned the silver denominations to the channels of commerce rather than going to the melting pot. And the gold dollar diameter was increased in 1854, via the Type Two format.

It is tempting to call this piece flawless. We can find no technical flaws on either side, and obviously NGC thought the same. The fields are heavily striated and give each side deep reflectivity. By way of contrast, the devices are heavily frosted, which gives the piece a cameo effect. For pedigree identification — which is important on a gold pattern in such a high grade — there is a small lint mark near the reverse rim, to the right of the R in DOLLAR. No one will probably ever duplicate the collection of gold patterns assembled by Dr. Wilkison, but the ambitious collector today could assemble a set of gold dollar patterns. This piece would be the cornerstone of such a collection. NGC ID# 299B, PCGS# 11604

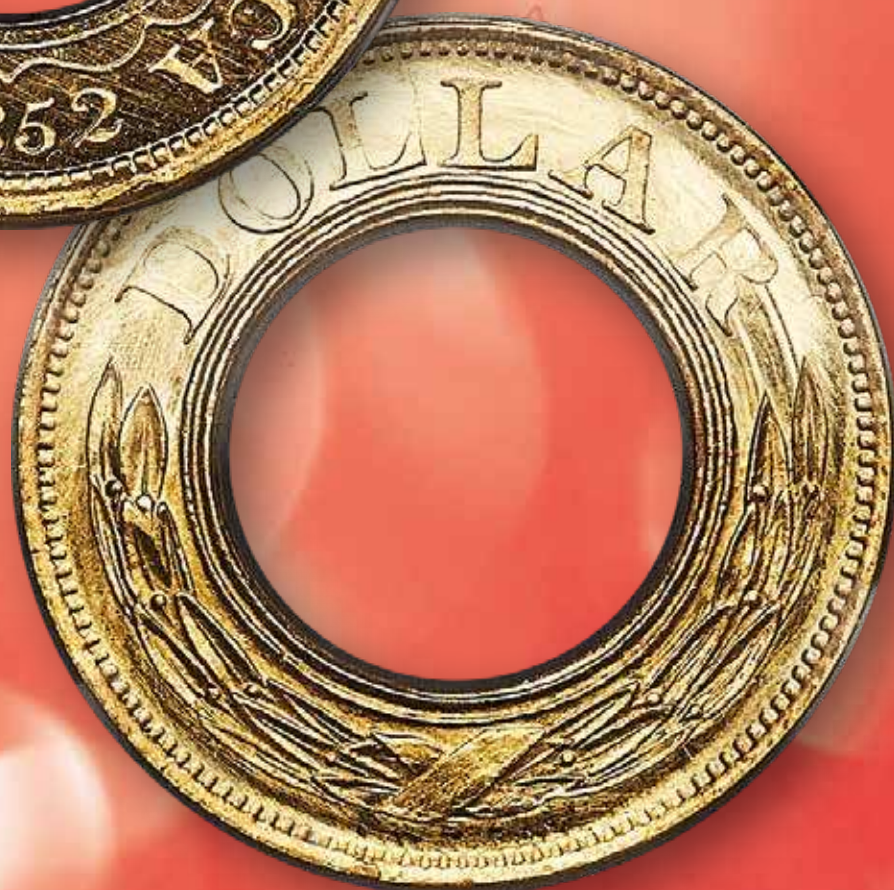

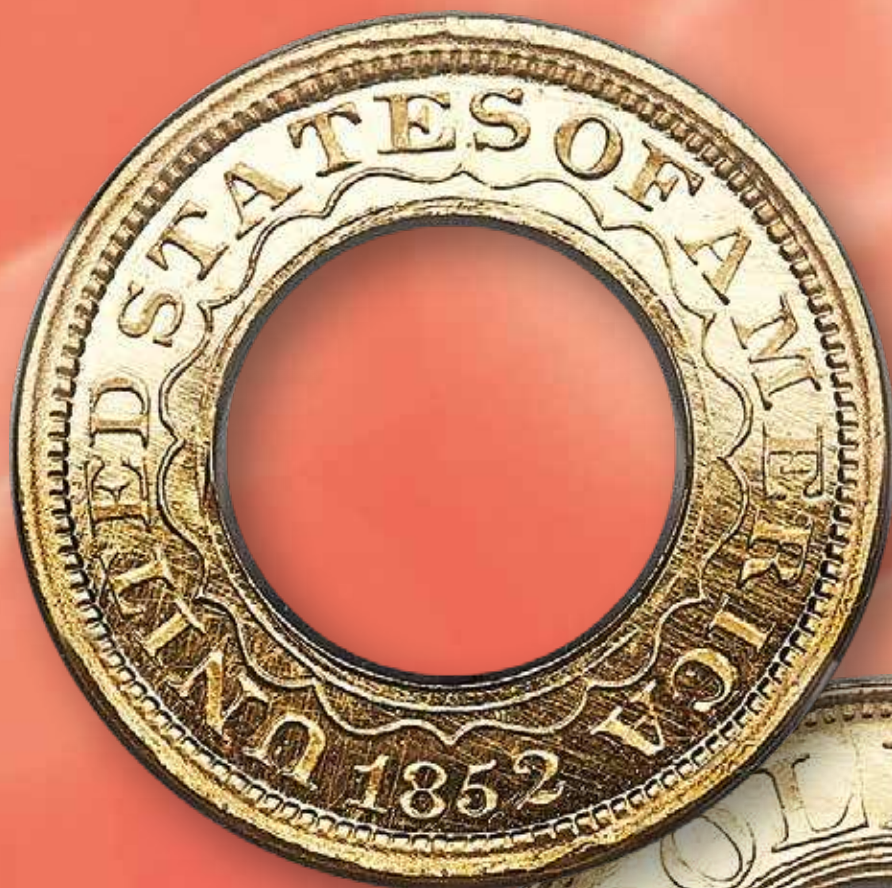

1871 Quarter in Aluminum  
Judd-1103, PR65 Cameo  
Only Two or Three Pieces Known

**3291** 1871 Quarter Dollar, Judd-1103, Pollock-1239, High R.7, PR65 Cameo PCGS. Struck from the regular issue dies for 1871 quarter dollars. Struck in aluminum with a reeded edge. While these have traditionally been termed regular dies trial pieces, there really was no consideration given to striking quarters in aluminum in 1871. Rather, these were struck for collectors, and there are also variants in copper and nickel. Only two or three aluminum pieces are believed known. There are three or four copper examples, but only the Lohr coin is known in nickel. This is a remarkable aluminum striking. The fields are deeply mirrored with frosted devices on each side. A few small planchet imperfections are seen in the right obverse field and there is strike weakness on the top of the eagle's right (facing) wing. Brilliant throughout. PCGS# 407450

*End of Session One*

# SESSION TWO

## COLONIALS

- 3292** 1723 Hibernia Farthing, DEI GRATIA MS65 Brown PCGS. M. 3.9-Bb.1, W-12290, R.5. An impressive mahogany-brown and steel-gray Gem. The strike is sharp, marks are absent, and only a subtle spot between the BE in HIBERNIA merits mention. The Bb.1 reverse is distinctive due to two large die chips. Listed on page 46 of the 2018 *Guide Book*. NGC ID# 2AT6, PCGS# 176
- 3293** 1779 Rhode Island Ship Token, No Wreath, Brass, XF40 NGC. Betts-562, W-1730, R.3. A British propaganda medal, intended to convince the Dutch to remain neutral in the Revolutionary War. The usual variety, from the obverse die with VLUGTENDE but the offending word (which implied Admiral Howe retreated) is removed from the lower obverse periphery, as issued. The walnut-brown surfaces are pleasing despite a spot above the leftmost mast. Listed on page 50 of the 2018 *Guide Book*. NGC ID# 26LC, PCGS# 588
- 3294** 1773 Virginia Halfpenny, Period, MS65 Red and Brown PCGS. CAC. Newman 20-N, W-1540, R.4. The reverse is approximately 70% red, and the obverse is close to 50% red. The king's cheek and the open fields are steel-blue. A pleasing and evenly struck Gem with outstanding eye appeal. Listed on page 47 of the 2018 *Guide Book*. Population: 9 in 65 Red and Brown, 1 finer (2/18).  
Ex: Milwaukee Signature (Heritage, 8/2007), lot 12; Cincinnati Central States (Heritage, 4/2009), lot 955. NGC ID# 2ATK, PCGS# 241
- 3295** 1787 Connecticut Copper, Small Head Right, ETLIB INDE, VF35 NGC. M. 1.1-A, W-2700, R.3. Die alignment: 170°. A well-centered if lightly granular copper with the eye appeal needed to transcend several small green spots on both sides. The 1787 Connecticut Small Head obverse was also mated with reverse die VV; it is elusive in that other combination with only about a dozen known. The Small Head coppers always enjoy strong demand from type collectors and variety specialists. Listed on page 63 of the 2018 *Guide Book*.  
Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part IX (Heritage, 11/2017), lot 15030. NGC ID# AVKV, PCGS# 346
- 3296** '1787' Machin's Mills Halfpenny AU50 PCGS. Vlack 17-87B, W-7910, R.2. Machin's Mills was a private late 18th-century New York coiner, associated with diemaker James F. Atlee. This deep brown example is well-struck for the issue, particularly near Britannia's waist. Marks and granularity are minimal, though we note a hair-thin diagonal flan flaw on the upper reverse. Listed on page 69 of the 2018 *Guide Book*. NGC ID# 2B47, PCGS# 469
- 3297** 1785 Vermont Copper, VERMONTS VF20 NGC. RR-2, Bressett 1-A, W-2005, R.2. A deep mahogany-brown example with smooth surfaces and an uneven strike. A couple of narrow flan flaws are on the lower obverse. Struck several degrees off-center toward 4:30. The Vermont coppers variously tried to Latinize the state name as VERMONTS, VERMONTIS, and VERMONTENSUM before settling on VERMON. Listed on page 74 of the 2018 *Guide Book*. NGC ID# 2B55, PCGS# 539
- 3298** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU58 PCGS. N. 13-X, W-6855, R.2. A radial die crack at 6 o'clock on the reverse helps confirm this readily available variety, always at the forefront for type collectors. The glossy and original chocolate-brown surfaces show only faint wear with a sharp strike. A brief area of minor pitting on the lower-right obverse does not detract from the outstanding eye appeal. Listed on page 89 of the 2018 *Guide Book*. NGC ID# AX5E, PCGS# 883

## PROOF COLONIAL

- 3299** 1795 Talbot, Allum & Lee Cent PR64 Brown PCGS. Fuld-1, W-8620, R.1. This splendid Choice proof exhibits medium brown surfaces, a bold strike, and reflective fields, with trivial spots on each side. Minor clash marks in the left obverse field are often encountered on this variety. Housed in a green-label PCGS holder. Only a few of these have earned a proof grade from PCGS. Population: 7 in 64 Brown, 5 finer (2/18). Listed on page 78 of the 2018 *Guide Book*. NGC ID# 2B65, PCGS# 90640

## HALF CENTS

### 1793 Half Cent, C-2, VF Details

- 3300** 1793 C-2, B-2, R.3 — Damaged, Repaired, Tooled, Burnished — ANACS. VF Details, Net VG8. Despite the multiple disclaimers on the ANACS holder, this piece retains a significant level of eye appeal with hints of blue on the light brown obverse. The olive reverse retains traces of steel toning among the devices. Our EAC grade Good 6. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

### 1793 C-2 Half Cent, VF Details

- 3301** 1793 C-2, B-2, R.3 — Environmental Damage — PCGS Genuine Secure. VF Details. The deep-brown surfaces show considerable granularity, yet the motifs retain much of their definition, with mostly readable legends and date. This is a highly collectible example of this single-year type, despite roughness in the fields and some indistinct peripheral elements. Our EAC grade VG8.
- 3302** 1795 Plain Edge, No Pole, Thin Planchet, C-5a, B-5a, R.3, VF20 PCGS Secure. A pleasing deep brown representative. The surfaces are microgranular and generally unmarked. Liberty's neck shows a narrow flan flaw. The usual die state with a heavy biplanar diagonal crack on the reverse, which affects the sharpness of HALF CENT. Very close to coin turn. Our EAC grade VG10. NGC ID# 2225, PCGS# 35083 Base PCGS# 1018
- 3303** 1797 1 Above 1, C-1, B-1, R.2, VF25 PCGS Secure. Manley Die State 4.0 with prominent obverse cracks and buckling, causing softness of the impression opposite of the CA in AMERICA. A charming tan-brown Liberty Cap type coin. Marks are essentially absent, and granularity is confined to shallow flan imperfections near the E in UNITED, the E in STATES, and the HA in HALF. Our EAC grade Fine 15. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042
- 3304** 1797 Plain Edge, Centered Head, C-2, B-2, R.3, Fine 15 PCGS. Perfect coin alignment of the reverse die. This well-circulated piece shows a typical amount of wear for the variety, although the planchet quality is excellent. Reddish tinting of the obverse fields complements walnut-brown surfaces elsewhere. Scattered, microscopic marks appear under a loupe but do not detract. The obverse rim is complete, while the reverse border is weak from 3 to 6 o'clock. Our EAC grade Fine 12. NGC ID# 2228, PCGS# 35104 Base PCGS# 1036

**3305 1804 Spiked Chin, C-6, B-6, R.2, AU58 PCGS. CAC.** Manley Die State 11.0. A popular Spiked Chin die marriage noted for its reverse die cuds, which gradually extend across much of the periphery. Some specialists have assembled extensive die state collections of Cohen-6, and the present piece would fall near the end of such a set, as it lacks only the retained cud above the O in OF. A coruscating golden-brown half cent with glimpses of lavender and navy-blue toning on the upper obverse. Our EAC grade XF40. NGC ID# 222G, PCGS# 35161 Base PCGS# 1075

**3306 1804 Crosslet 4, No Stems, C-12, B-11, R.2, MS62 Brown PCGS.** The glossy olive-brown surfaces of this attractive MS62 example show traces of original mint luster and only minor signs of contact, but some slight porosity is evident on the obverse. One tiny dark alloy spot is visible in the right obverse field, near the bust. The design elements are sharp and eye appeal is quite strong. Our EAC grade AU50. NGC ID# 222F, PCGS# 35173 Base PCGS# 1072

**3307 1809 C-3, B-4, R.1, MS64 Brown PCGS.** A plentiful variety, the 1809 C-3, B-4 half cent is an excellent choice for a date or type collection. Peripheral weakness is frequently encountered. This attractive Choice Mint State half cent exhibits pleasing tan surfaces with light cartwheel luster. Scattered carbon spots and minuscule corrosion spots are consistent with the grade. Our EAC grade AU55. NGC ID# 222P, PCGS# 35224 Base PCGS# 1123

**3308 1834 C-1, B-1, R.1, MS65 Brown PCGS. CAC.** Only one die pair is known for the 1834, despite a reported mintage of 141,000 pieces. This is an intricately struck Gem that boasts unblemished surfaces and exceptional eye appeal. Predominantly ebony-brown, though the reverse displays light tan undertones. Our EAC grade MS60. CAC: 8 in 65, 0 finer as Brown (2/18). NGC ID# 2232, PCGS# 35285 Base PCGS# 1165

**3309 1853 C-1, B-1, R.1, MS65 Brown PCGS. CAC.** Generous amounts of mint red remain across each side of this softly lustrous Gem Uncirculated half cent. Deep-blue overtones prompt the Brown color assignment, although a Red and Brown designation would be equally accurate. The strike is sharp in all regards. A loupe reveals just a few microscopic marks, where a tiny tick on the nose is perhaps the largest, yet it is barely worthy of mention. Our EAC grade MS63. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

## LARGE CENTS

1793 S-3, B-4 Chain Cent, Fine Details

**3310 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Corroded, Tooled, Damaged — ANACS. Fine Details, Net Good 4.** The Sheldon-3 die pair is the most plentiful Chain cent variety with a population approximately equal to the total population of the other four varieties combined. This piece has noticeably corroded dark brown surfaces with extensive tooling on the obverse, and minor dents on both sides. The date and LIBERTY are visible and the chain is bold. Our EAC grade Fair 2. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-7, B-8 Wreath Cent, Fine 12 Details  
Important Wreath Cent Rarity

**3311 1793 Wreath, Vine and Bars Edge, S-7, B-8, Low R.6 — Heavily Corroded — ANACS. Fine 12 Details.** This important cent has the sharpness of VF20, in our opinion, on dark steel-brown surfaces that are noticeably corroded. However, the ANACS description seems overly harsh. About two dozen examples of the S-7 die pairing are known, and this piece ranks in the top dozen known. Our EAC grade VG8.  
*From The Loma Linda Collection, Part III.* NGC ID# 223H, PCGS# 35453 Base PCGS# 1347

**3312 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Environmental Damage — PCGS Genuine Secure. VG Details.** Deep mahogany-brown fields contrast with gunmetal high points. The legends are readable and the motifs are well-outlined. The surfaces are generally slightly granular, though the reverse shows pitting near the CA in AMERICA, along with traces of forest-green verdigris. Our EAC grade AG3.

**3313 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4 — Corroded — ANACS. VF30 Details.** This olive-brown Wreath cent exhibits moderately corroded surfaces, although it retains considerable sharpness on the obverse and reverse design motifs. Slight verdigris is hidden among the lettering and devices. Our EAC grade VG8.  
*From The Loma Linda Collection, Part III.*

**3314 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Damage — PCGS Genuine. VF Details.** A nicely defined chocolate-brown Wreath cent with moderately granular surfaces. The rims display distributed minor dings, Liberty's jaw and chin show small marks, and a few slender diagonal scratches are located above the O in ONE and the F in OF. Our EAC grade VG7.

**3315 1794 Head of 1794, S-39, B-27, R.6 — Tooled — PCGS Genuine. VG Details.** An important variety that is rarely encountered in the marketplace, the S-39 is represented here by a dark olive example that shows light obverse and reverse corrosion with blended scratches, including several in the central reverse. Close to 30 examples of the variety are known in all grades. Our EAC grade AG3.  
*From The Loma Linda Collection, Part III.*

**3316 1794 Head of 1794, S-53, B-45, R.6 — Environmental Damage — PCGS Genuine. VG Details.** Intermingled tan and steel-brown patina appears on both sides with light corrosion and trivial hairlines. The obverse of this piece exhibits stronger details than the reverse. Our EAC grade AG3.  
*From The Loma Linda Collection, Part III.*

**3317 1794 Head of 1795, S-70, B-62, R.2, VF20 PCGS.** Breen Die State II. As normally seen, a strong radial die crack is seen from the edge between the T and Y of LIBERTY and travels to, then beyond the brow of Liberty. Die chipping is visible along the crack near the forehead. This deep-brown Sheldon-70 has generally smooth surfaces and sharp definition for the assigned grade. A few minor marks are noted on the portrait and a small rim indent exists between the I and C of AMERICA. Housed in an old green label holder. Our EAC grade VG10. NGC ID# 223R, PCGS# 35693 Base PCGS# 1365

- 3318** 1795 Plain Edge, S-78, B-8, R.1, VF25 NGC. A charming olive-brown Liberty Cap type coin. The surfaces are pleasing despite unobtrusive marks near Liberty's mouth and the O in ONE. The reverse rim is slightly incomplete near 4 and 6 o'clock. Our EAC grade Fine 15.

Ex: *Central States Signature (Heritage, 4/2011)*, lot 3996. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

- 3319** 1796 Reverse of 1795, S-93, B-34, R.3 — **Environmental Damage — PCGS Genuine Secure. VF Details.** An early die state of this conditionally challenging Sheldon variety, noted for its long stems. Mahogany-brown high points contrast with deeply toned fields. Intermittently and moderately granular, but no marks are detrimental. Our EAC grade VG8.

**1796 S-107, B-13 Cent, VG8**

Ex: Dr. French

- 3320** 1796 Reverse of 1794, S-107, B-13, R.5, VG8 PCGS. The steel-brown surfaces of this important cent exhibit old, well-blended scratches with slight roughness that was sufficient to prevent a PCGS grade assessment. A small rim bruise is noted at 3 o'clock. Semi-glossy surfaces enhance the eye appeal of this cent. This piece is tied with several others for seventh finest in Del Bland's Condition Census. Our EAC grade VG7.

Ex: Dr. George P. French; B. Max Mehl (1929 FPL), lot 128; T. James Clarke; B. Max Mehl (4/1949), lot 2326; Willard C. Blaisdell; Jack H. Beymer (3/1981); G. Lee Kuntz (*Superior*, 10/1991), lot 119; Larry Briggs Rare Coins.

From *The Loma Linda Collection, Part III*. NGC ID# 223W, PCGS# 35792 Base PCGS# 1404

**1797 NC-1 Cent, VF Details**

Fifth Finest of Eight Known

- 3321** 1797 Rev of 1795, Plain Edge, NC-1, B-1, R.7 — **Environmental Damage — PCGS Genuine. VF Details.** Del Bland records this piece as "Sharpness of VF25 but porous" and assigns a net grade of Good 5. Bill Noyes suggests VF20 sharpness, net Good 3. We agree with Bland's assessment, placing this piece in the fifth position among eight known examples. This piece has excellent sharpness and exhibits moderate corrosion over the dark steel-brown surfaces. The corrosion is evenly distributed across both sides and allows retention of good eye appeal. Our EAC grade Good 5.

Ex: *Peter Boisvert (5/1991)*; *Larry Briggs Rare Coins*.

From *The Loma Linda Collection, Part III*.

**1797 NC-3 Cent, Fine Details**

Condition Census

- 3322** 1797 Reverse of 1797, Stems, NC-3, B-11, Low R.6 — **Repaired — PCGS Genuine. Fine Details.** Del Bland assigns a sharpness grade of Fine 12 and a net grade of VG7, placing this piece in a third place tie in his Condition Census. Bill Noyes suggests VG8 sharpness, net Good 6 and places this cent in the fifth spot in his roster. It is our opinion that a few more points should be deducted. We agree with a Fine 12 sharpness grade to this glossy dark brown cent that has a lightly hammered and burnished obverse, and a pleasing reverse. Our grade suggests a census ranking of ninth or 10th finest for the variety. Our EAC grade Good 4.

Ex: C. Douglas Smith; Alfred Bonard; Charles French (*privately*, 5/1967); R.E. Naftzger, Jr.; EAC Sale (4/1989), lot 74; Larry Briggs Rare Coins.

From *The Loma Linda Collection, Part III*.

- 3323** 1798 Second Hair Style, S-166, B-32, R.1, VF35 PCGS. Breen Die State V. The dominant die crack through the E in UNITED to the right edge of the fraction and the rim below shows advanced deterioration of the die. A still-later die stage exists with additional cracks, not visible on the present example. Attractive olive-brown surfaces are otherwise sharply defined, with strong hair definition for the Choice VF grade. A small rim bump above the Y in LIBERTY is of minor concern. Our EAC grade Fine 15. NGC ID# 2244, PCGS# 36068 Base PCGS# 1434

**1799/8 Cent, Fine 15 Details**

S-188, B-2, Famed Rarity

- 3324** 1799/8 S-188, B-2, R.4 — **Corroded — ANACS. Fine 15 Details.** A famed rarity and highly sought-after as such in any grade, with or without surface problems. This example has Fine 15 sharpness, according to ANACS, but significant corrosion is present on each side. LIBERTY, the wide date, and the reverse legends are readable, and the portrait and wreath maintain good detail. Dark steel-brown surfaces. Our EAC grade Good 5.

From *The Loma Linda Collection, Part III*.

- 3325** 1799 S-189, B-3, R.2, Fair 2 PCGS Secure. Most of the date is present, since only the bases of the digits have merged into the rim. The portrait is strongly outlined except for the lowest shoulder curl. Portions of LIBERTY, STATES, and AMERICA emerge when the coin is rotated at arm's length. The tan-brown and sea-green surfaces are microgranular, and the portrait displays a few faint marks. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

1799 S-189 Cent, Good 4

**3326** 1799 S-189, B-3, R.2, Good 4 ANACS. This medium brown cent has the sharpness of Good 4, with lightly corroded surfaces. The corrosion is even across both surfaces, and is not distracting to this important cent. The date is partially visible and LIBERTY is complete, with most of the reverse lettering present. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

**3327** 1799 S-189, B-3, R.2 — Scratch — PCGS Genuine. Good Details. A medium to deep brown key-date cent with granular surfaces and a number of hair-thin marks on the portrait. The date is close to full. ONE CENT and STATES OF are bold. The fraction is faint, and the other legends are partially clear. Our EAC grade Fair 2.

**3328** 1799 S-189, B-3, R.2 — Corroded, Heavily Tooled — ANACS. Fine 12 Details. Liberty's hair curls show relatively good sharpness, but ONE CENT on the reverse is weak. All border legends on both sides are bold save for the date, which is mostly worn away, leaving only the final 9 visible. Both sides of this deep walnut-brown coin are granular, and the obverse shows heavy, crude tool marks on the lower portrait and in the right field. Our EAC grade AG3.

1800/1798 NC-5, B-3 Cent, VG Details  
Only Three Known

**3329** 1800/1798 Style One Hair, NC-5, B-3, R.8 — Environmental Damage — PCGS Genuine. VG Details. The reverse rim break over F AME is diagnostic for this variety, and that key attribution feature simplifies identification of this extremely rare variety. The design motifs are fully outlined, and the date and most lettering remains visible on each side. Called AG3 in Bland's census, this piece is the third finest of three known examples. Our EAC grade AG3. *From The Loma Linda Collection, Part III.*

**3330** 1802 S-232, B-12, R.1, AU50 NGC. Ex: Jules Reiver Collection. A sharply detailed example of the variety with mottled steel and olive surfaces, especially on the reverse. An intermediate die state example with visible clash marks on both sides, but little evidence of die cracks on either side. Only faint die cracks from the border to the top of O and the tops of AM may be seen, and these are quite faint. Our EAC grade VF35. Ex: Henry C. Hines; *Stack's* (11/19/1949); Willard C. Blaisdell (2/8/1971); Jules Reiver Collection (*Heritage*, 1/2006), lot 19527. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

**3331** 1802 NC-1, B-3, High R.5, VF25 PCGS. The bisecting obverse die crack that identifies most examples of the NC-1 is clearly visible on this pleasing olive-brown cent. A few minor handling marks are evident, with a small corrosion spot at 5 o'clock on the obverse border. This example is tied for the 10th finest in Del Bland's census and ninth finest in Bill Noyes' census. Our EAC grade VG10. Ex: Steve Long; Donald Petersen (10/1982); Del Bland (1/8/1983); Jack H. Robinson (*Superior*, 1/1989), lot 493; Larry Briggs Rare Coins. *From The Loma Linda Collection, Part III.* PCGS# 36335 Base PCGS# 1470

**3332** 1804 S-266b, B-1, R.2 — Environmental Damage — PCGS Genuine. Good Details. The deep brown surfaces are evenly granular, but the legends are generally sharp. STATES OF and the date are faint but readable. No marks are noticeable. The 1804 is key to a date collection of both large cents and silver dollars. Our EAC grade Good 4.

**3333** 1804 S-266a, B-1, R.2 — Corroded, Damaged — ANACS. VF Details, Net VG8. The medium olive-brown surfaces of this important key issue are noticeably corroded with various other surface marks and possible lamination defects. This issue is often missing from date or variety sets, even among advanced collectors. Our EAC grade Good 4. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

**3334** 1804 S-266c, B-1, R.2 — Environmental Damage — PCGS Secure Genuine. Fine Details. Most 1804 cents are in Very Good or lower grades, but all the legends are bold on this ebony-brown key-date. The surfaces are granular but without any relevant marks. This is the popular late die state with cuds above both RTY and MERIC. Our EAC grade Good 5.

**3335** 1804 Restrike MS63 Brown PCGS. Privately minted in the 1860s, the 1804 Restrike cent is not a restrike at all, but a fantasy strike that combined an 1803 obverse die (S-261) with the date altered to 1804, with an 1820 reverse die. The purpose was to allow collectors an opportunity to acquire a cent bearing the 1804 date without the considerable cost of a genuine high-grade 1804 cent. These pieces are highly collectible today. This Select Mint State example has pleasing olive and dark chocolate surfaces with good eye appeal. The reverse is rotated 90 degrees. Our EAC grade AU55. *From The Loma Linda Collection, Part III.* NGC ID# 224J, PCGS# 45344

1807/6 S-273 Cent, AU55  
Large 7 Over 6

**3336** 1807/6 Pointed 1, Large 7, S-273, B-3, R.1, AU55 NGC. This is one of the frequently encountered varieties among 1807 cents, and it is highly popular as an overdate that is visible without magnification. It carries a separate listing in the Guide Book, generating considerable demand from date and major variety collectors. A few scattered marks are consistent with the grade of this pleasing olive-brown cent. Our EAC grade XF40. NGC ID# 224N, PCGS# 36442 Base PCGS# 1528

**3337** 1817 13 Stars, N-7, R.3 — Edge Damaged — PCGS Genuine. Fine Details. This is the extremely rare early die state, sans mouse, that lacks the small die chip on the top of Liberty's head. Only about half a dozen of these early die state pieces are known. This example has pleasing chestnut and walnut-brown surfaces with trivial cuts on the edge. Our EAC grade VG8. *From The Loma Linda Collection, Part III.*

- 3338 1820 Large Date, N-13, R.1, MS65 Brown NGC.** A lustrous chocolate-brown and steel-gray Matron Head type coin. Pristine save for a tiny tick on the forehead. N-13 is the usually encountered high-grade 1820 cent, courtesy of the Randall Hoard. But the present Gem is an exceptionally nice example, without the spotting associated with the variety. Certified in a circa-2000 holder. Our EAC grade AU55. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615
- 3339 1820 Large Date, N-13, R.1, MS65 Brown PCGS.** The deep golden-brown surfaces teem with luster and exhibit a superior strike. Smooth aside from minor field contact above the portrait. Carbon is inconsequential on this Matron Head type coin; a Gem from the Randall Hoard. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615
- 3340 1820 Large Date, N-13, R.1, MS64+ Red and Brown PCGS Secure.** Newcomb-13 is a plentiful Randall Hoard cent with large numerals widely spaced between the 8 and 2. It represents Die State B, with the obverse cracked through all stars, as usually seen for the variety. Borderline Gem surfaces flash fiery mint luster, with bluish-brown overtones and sharply struck devices. Only slight flowlines exist at the reverse borders, where the dentils remain sharp. A few small carbon spots exist primarily on the obverse, but they do not detract from the exceptional eye appeal. Our EAC grade MS63. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616
- 3341 1820 Small Date, N-15, R.2, MS61 Brown PCGS.** The large T in LIBERTY nearly touches the coronet line. N-15 is plentiful in circulated grades but is far rarer in Mint State than the 1820 N-13. Struck from rusted dies, this satiny dark brown cent is uncommonly free from marks. Our EAC grade AU50. PCGS# 36703 Base PCGS# 91615
- 3342 1821 N-2, R.1, XF45 PCGS Secure.** The 1821 did not participate in the Randall Hoard, and as a result, this low-mintage date is very rare in mint condition. Even Choice XF examples are elusive. The present mahogany-brown cent is well-defined, and mentionable marks are limited to a couple of thin abrasions on the base of Liberty's neck. Our EAC grade VF25. NGC ID# 2258, PCGS# 36709 Base PCGS# 1621
- 3343 1822 N-3, R.2, MS62 Brown PCGS Secure.** A strong inner circle is seen inside of the left-side obverse dentils, while the 182 in the date are well-spaced, and the final 2 is close. Struck from an intermediate die state, with the faintest of die cracks from the base of MERICA to the stem point. Glimpses of mint red contribute to the attractive chestnut-brown patina, with intermittent deep-blue overtones. The surfaces are hard, smooth, and nearly free from abrasions. Some small indents on Liberty's cheek are from die rust. The strike is sharp except for the high points of Liberty's curls. Our EAC grade AU50. NGC ID# 2259, PCGS# 36718 Base PCGS# 1624
- 3344 1822 N-4, R.2, MS62 Brown NGC.** A plentiful variety, the 1822 N-4 can be found in or near Mint State with relative ease. The Noyes Census lists two dozen pieces that grade AU55 or finer. Mahogany-brown surfaces host lighter olive-tan at the lower-left reverse. Our EAC grade AU55.  
Ex: *Fort Worth Signature (Heritage, 3/2010)*, lot 129. NGC ID# 2259, PCGS# 36721 Base PCGS# 1624
- 3345 1823 Restrike, N-3, R.2, AU58 PCGS Secure.** A middle die state without the radial crack through Liberty's chin. The crack above ONE is faint but present. The reverse displays extensive rust and a rim cud exists above stars 5 and 6, as usual for the variety. A pleasing golden-brown and apple-green example. Struck outside the Mint at the time of the Civil War, or soon afterward, possibly by or for Joseph Mickley, from an 1823 obverse die and a reverse die first used in 1813. Our EAC grade AU50. NGC ID# 225C, PCGS# 81627
- 3346 1825 N-3, R.3, MS61 Brown PCGS.** A trace of the late state die crack is visible at the bust point over the serif of the 1. Imperfectly centered with a wide right border and narrow left border. Mottled gold appears on the dark brown surfaces of this pleasing cent. Both sides have insignificant marks. Our EAC grade AU55. NGC ID# 225F, PCGS# 36790 Base PCGS# 1642
- 3347 1827 N-5, R.2, MS63 Brown NGC.** A mahogany-brown example with traces of brick-red in protected regions. Well-struck aside from the leaves below the C in AMERICA. The cheek displays minute marks, while the reverse is nearly pristine. Our EAC grade AU55.  
Ex: *Long Beach Signature (Heritage, 2/2002)*, lot 5069; *Charlotte ANA (Heritage, 3/2003)*, lot 5061; *Long Beach Signature (Heritage, 2/2011)*, lot 3045. NGC ID# 225H, PCGS# 36850 Base PCGS# 1651
- 3348 1828 Large Narrow Date, N-2, R.2, MS62 Brown PCGS.** Die State A. N-2 shows the BER in LIBERTY recut. This Mint State example displays a bold strike and satiny olive-brown patina. Grade-limiting abrasions are trivial and invisible without a loupe. A pleasing lower-end Mint State Matron Head type coin. Our EAC grade XF45. PCGS# 36877 Base PCGS# 1654
- 3349 1829 Large Letters, N-2, R.2, MS62 Brown NGC.** N-2 always has a die crack through the first four stars, and the present example is from the later die state with an additional crack through the final three stars. A bold chocolate-brown cent with minor field marks near the forehead and the ME in AMERICA. Our EAC grade AU50. NGC ID# 225K, PCGS# 36913 Base PCGS# 1663
- 3350 1830 Large Letters, N-8, R.1, MS63 Brown PCGS.** Glossy, reddish chocolate-brown color blankets both sides of this well-preserved Newcomb-8 cent. The 0 is noticeably high in the date, and the TA in STATES are overly close together. A faint die crack from the edge below star 1 to the bust truncation suggests a mid-to-late die state, as do fading dentils on the lower reverse. Several of the obverse stars are rounded, yet the central motifs are well-struck. Our EAC grade AU55. NGC ID# 225L, PCGS# 36955 Base PCGS# 1672
- 3351 1833 N-5, R.1, MS64+ Brown NGC.** EX: Mervis Collection. Sharply detailed with excellent cartwheel luster, this cent has olive, tan, and delicate blue toning on the obverse, olive and blue-steel toning on the reverse. A trace of faded red remains on the reverse. Our EAC grade AU58.  
Ex: *Adam Mervis Large Cent Collection (Heritage, 1/2014)*, lot 2168. NGC ID# 225P, PCGS# 37030 Base PCGS# 1696
- 3352 1834 Small 8, Large Stars, Medium Letters, N-1, R.1, MS64 Brown NGC.** This carefully preserved large cent has consistent golden-brown color, aside from glimpses of original red within Liberty's coronet. A couple of light marks on the cheek do not substantially affect the eye appeal. Our EAC grade MS60.  
Ex: *Central States Numismatic Society (RARCOA, 5/1971)*, lot 242, where it realized \$75; *Long Beach Signature (Heritage, 6/2004)*, lot 7031, where it brought \$806.15. NGC ID# 225R, PCGS# 37051 Base PCGS# 1708
- 3353 1835 Head of 1836, N-7, N-17, R.1, MS63 Brown NGC.** Ex: Jules Reiver Collection. Though they are technically the same variety, the difference in appearance between early and late die state examples is dramatic. The obverse has noticeable annular swelling through the stars. Die rust is visible on both sides. Attractive deep rose-brown surfaces are exceptionally clean. A review of Newcomb's text is interesting, as he actually alluded to the fact that N-7 and N-17 may be the same variety, even though he gave them different numbers. He correctly identified the obverse as the same die for both N-7 and N-17, and he also stated: "Although this [reverse] die is now rusted and worn it probably was originally die E [of N-7]." Our EAC grade AU50.  
Ex: *Garry Fitzgerald (11/13/1968)*; *Jules Reiver (Heritage, 1/2006)*, lot 20022. NGC ID# 225S, PCGS# 37057 Base PCGS# 1714
- 3354 1837 Plain Cords, Small Letters, N-5, R.2, MS64 Brown PCGS Secure.** Newcomb-5 receives its own *Guide Book* listing, as the sole Plain Cords, Small Letters die variety. It can also be attributed by the die crack across the tops of NITED STA. A lustrous chocolate-brown Choice cent that boasts practically mark-free surfaces. Our EAC grade MS60. NGC ID# 225U, PCGS# 37144 Base PCGS# 1732
- 3355 1839 Booby Head, N-6, R.2, MS63 Brown PCGS.** Die cracks from the U and D in UNITED help attribute this deep chocolate-brown cent. The satiny surfaces are devoid of relevant marks or spots. Encapsulated in an old green label holder. Our EAC grade AU55. NGC ID# 225Z, PCGS# 37240 Base PCGS# 1751

**3356 1839 Booby Head, N-15, Low R.6 — Scratch — PCGS Genuine. VF Details.** Just under 30 examples of this elusive variety are known today. The obverse of this light brown example displays myriad scratches, and the reverse exhibits minor verdigris. Despite its shortcomings, this is an important opportunity for the advanced collector. Our EAC grade VG7.  
*From The Loma Linda Collection, Part III.*

**3357 1840 Large Date, N-5, R.1, MS64 Brown PCGS. CAC.** Grellman Die State c. This chocolate-brown N-5 example displays only a few, largely inconsequential marks over the smooth, Choice surfaces. The late die stage shows light flow lines and weakened denticles with a soft strike on stars 6 through 9 and a small rim cud below the date. The interior elements are sharper, and the eye appeal is considerable. Our EAC grade MS60.  
*Ex: FUN Signature (Heritage, 7/2014), lot 3045. NGC ID# 2266, PCGS# 395831 Base PCGS# 1820*

**3358 1846 Small Date, N-8, R.1, MS65 Brown NGC. CAC.** Myriad die lines beneath the chin of Liberty identify Newcomb-8, which ranks among the more available 1846 marriages. The present chestnut-brown Gem has exceptionally nice surfaces. The strike shows minor inexactness on the first three stars. Our EAC grade MS60. PCGS# 403874 Base PCGS# 1865

**3359 1849 N-14, R.3, MS65 Brown NGC.** Grellman Die State c, the usual die state for higher grade examples of this variety. This piece has pleasing olive surfaces with hints of blue overtones, showing considerable mint red, especially on the reverse. Our EAC grade MS62. PCGS# 405667 Base PCGS# 1886

**3360 1850 N-7, R.2, MS65 Red and Brown NGC.** Die lines behind the neck curls identify the variety. A shallow die lump resides just below the middle of Liberty's jawline. Well struck except for the obverse stars and some of the denticils, with rich red-brown coloration and a few scattered carbon flecks. The surfaces are free of marks on both obverse and reverse. A highly attractive Gem example of this later large cent date. Our EAC grade MS62.  
*Ex: EAC Sale (4/1995), lot 449; Col. Steven Ellsworth (3/2004); FUN Signature (Heritage, 1/2008), lot 225. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890*

**3361 1850 N-7, R.2, MS65 Red and Brown PCGS Secure.** Attractive fire-orange luster shines through areas of brownish-blue toning throughout both sides of this Gem N-7 cent. A number of die lumps confirm the variety — one on Liberty's neck just below the midpoint of the jawline, and several small lumps on the reverse lettering. The strike is sharp for the die marriage, since all of the diagnostic lumps are present and not faded from die wear. The surfaces are virtually mark-free and without carbon. Our EAC grade MS63. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

**3362 1852 N-12, N-13, R.1, MS66 Brown PCGS.** Grellman Die State b. A high-grade chocolate-brown Mature Head type coin. The strike is sharp, though the appearance is slightly blurry due to worn-out dies. Virtually void of contact, though tiny flecks are noted above the hairbun and the T in CENT. Our EAC grade MS60. NGC ID# 226J, PCGS# 147260 Base PCGS# 1898

**3363 1853 N-25, R.1, MS66+ Brown PCGS Secure. CAC.** Grellman Die State b. Light repunching below the 1 in the date helps identify the Newcomb die marriage. An unabraded and carbon-free Premium Gem with lavender toning aside from a blush of orange-gold in the central reverse. STATES OF, the date, and the lower stars lack a full strike due to out-of-parallel dies. Our EAC grade MS62. NGC ID# 226K, PCGS# 403927 Base PCGS# 1901

## FLYING EAGLE CENTS

**3364 1857 MS64 PCGS.** This satiny near-Gem shows warm apricot-gold luster around the margins with more traditional tan-gold in the centers. There is slight strike softness on the eagle's tailfeathers, but the overall definition is pleasing, and the surfaces are free from distracting abrasions.  
*Ex: Santa Clara Signature (Heritage, 11/2000), lot 6666; Long Beach Signature (Heritage, 5/2003), lot 5182; Central States Signature (Heritage, 4-5/2009), lot 1074. NGC ID# 226P, PCGS# 2016*

**3365 1857 MS64 PCGS.** This satiny and remarkably unblemished chestnut-gold near-Gem likely merits a higher technical grade, but the strike is typical on the tailfeather tips, cotton leaves, and wreath knot. The Flying Eagle cent was struck for commerce only in 1857 and 1858. NGC ID# 226P, PCGS# 2016

### 1857 Flying Eagle Cent, MS65 Vibrant Mint Luster

**3366 1857 MS65 PCGS. CAC.** Vibrant luster is the hallmark of this 1857 Flying Eagle cent, from an issue that can be difficult to find with that elusive quality. The surfaces are almond-tan in the center with glimpses of orange-gold near the rims. There are no mentionable signs of contact, save for a tiny rim nick at 3 o'clock on the obverse. The strike is sharp throughout. PCGS has seen 19 finer submissions (2/18). NGC ID# 226P, PCGS# 2016

**3367 1857 Doubled Die Obverse, Snow-3, FS-105, MS64 PCGS. CAC.** Die doubling is evident on UNITED STATES OF AMERICA, the eagle's beak, and the tailfeathers. The coin is sharply struck and free of bothersome abrasions, showing luminous tan-gold luster on each side. The CAC green label confirms the eye appeal. NGC ID# 2276, PCGS# 410231 Base PCGS# 2016

## INDIAN CENTS

**3368 1861 MS66 PCGS. CAC.** A softly frosted, virtually carbon-free Premium Gem type coin of the copper-nickel composition. Rich amber, gold, olive, and copper-red hues adorn each side without distracting abrasions. Slight softness is seen only on the tips of the upper headdress feathers. PCGS lists only 13 finer examples (2/18). NGC ID# 227G, PCGS# 2061

**3369 1862 MS66+ PCGS.** Blended apricot-gold and apple-green shades invigorate this lustrous and sharply struck Premium Gem. Carbon is confined to two tiny flecks on the portrait. Marks are absent except for a small tick in the upper-left obverse field. Exceptional quality for this copper-nickel type issue. NGC ID# 227H, PCGS# 2064

**3370 1864 Bronze No L MS66 Red PCGS.** Struck from clashed dies that were polished not long before, producing semiprooflike reflectivity in the fields. The original copper-orange surfaces have a few microscopic pepper specks on the obverse and a lone spot on the reverse, imbedded in the shield. The tips of the upper headdress feathers are weak, but the remainder of the design elements show sharp definition. NGC ID# 227L, PCGS# 2078

**3371 1864 L On Ribbon MS65 Red and Brown PCGS. CAC.** This copper-orange Gem displays subtle auburn overtones that earn it the Red and Brown designation. Splendid preservation of the satiny luster earns the CAC green label. Although this coin is well-struck, moderate die wear is evident on each side, particularly the upper obverse. NGC ID# 227M, PCGS# 2080

**3372 1864 L on Ribbon, Snow-5, FS-2304, MS65 Red and Brown NGC.** Snow-5 shows repunching on the tops of the 18, with evidence of tripling on the 1. This well-struck L on Ribbon coin shows blushes of auburn and burgundy toning atop copper-orange mint luster. Scattered flecks are noted under a loupe. NGC ID# 227M, PCGS# 37403 Base PCGS# 2080

- 3373 1864 L On Ribbon, Repunched Date, Snow-10, FS-2306, MS64 Red and Brown PCGS.** The PCGS insert also lists the obsolete *Cherry-pickers'* number, 006.73. The 86 are widely repunched within the loops. A sharply struck near-Gem with pleasing and coruscating surfaces. Orange-red is plentiful although the centers are apple-green. PCGS# 37418 Base PCGS# 2080
- 3374 1866 MS64+ Red PCGS Secure.** Gem Red 1866 Indian cents are rare and costly, making high-end Choice coins much more appealing to casual collectors of this series. This Plus-graded near-Gem displays satiny copper-gold luster. A small fleck is visible near Liberty's nose, and strike softness affects the headdress feathers and the lower portion of the wreath. Population: 40 in 64 (4 in 64+) Red, 35 finer (2/18). NGC ID# 227P, PCGS# 2087
- 3375 1868 MS65 Red and Brown PCGS. CAC.** This Gem Red and Brown coin features subtle burgundy overtones atop coppery-red mint luster. The strike is sharp, and neither side exhibits significant abrasions. A smattering of small specks is seen under a loupe. NGC ID# 227S, PCGS# 2092
- 3376 1869 MS65 Red and Brown PCGS. CAC.** This Gem Red and Brown coin leans toward the Red spectrum, showing carbon-free copper-orange luster that has subtle chestnut overtones in the centers. The surfaces are satiny and unblemished, and the devices are sharp. Higher-grade 1869 Indian cents are elusive. NGC ID# 227T, PCGS# 2095
- 3377 1873 Open 3 MS65 Red and Brown PCGS. CAC.** The more available of the two logotypes overall, the Open 3 1873 Indian cent is conditionally elusive finer than the present Gem example. The outer margins and the fields surrounding the devices retain significant amounts of original mint red, while the interiors have mellowed to a medium brown patina. The devices are fully detailed. NGC ID# 227Y, PCGS# 2107
- 3378 1877 VF35 NGC.** This is a perfect collector-grade example of the series key date in Choice VF condition. Chocolate-brown surfaces are well-defined with the top ribbon diamond evident and LIBERTY fully readable. Soft gunmetal-blue tones appear occasionally within the recesses. NGC ID# 2284, PCGS# 2127
- 3379 1877 XF45 PCGS Secure.** Shallow N in ONE. If not for grade-consistent wear on the high points, this Choice XF 1877 would warrant an even finer grade. Marks or abrasions are remarkably few and minuscule on either side. Attractive mint red remains around the margins, blending seamlessly into pleasing tan-brown coloration. The surfaces are smooth with essentially no noticeable instances of carbon. NGC ID# 2284, PCGS# 2127

**1884 Cent, Blazing MS66 Red  
Just Three Coins are Numerically Finer**

- 3380 1884 MS66 Red PCGS Secure.** Huge mintages of Indian Head cents were the norm in the early 1880s. With more than 23 million pieces struck, the 1884 issue was a much smaller mintage than any of the previous three years, and most pieces circulated. Amazingly few Premium Gem coins exist today, and numerically finer examples are very rare. This example displays stunning cherry-red coloration surrounding tan-gold centers and devices. The strike is superb. Marks are minuscule and only a few unobtrusive carbon flecks are visible with a glass. Population: 18 in 66 (3 in 66+) Red, 3 finer (2/18). NGC ID# 228B, PCGS# 2150
- 3381 1885 MS65 Red PCGS.** Well struck with blazing red luster and only a few insignificant marks. Both sides show scattered carbon flecks, with a slightly larger number of specks on the obverse. The strike could hardly be sharper, with only slight incompleteness at the edge of the second diamond. Population: 70 in 65 (1 in 65+) Red, 20 finer (2/18).  
Ex: *Central States Signature* (Heritage, 4/2000), lot 6538; *Baltimore Signature* (Heritage, 7/2003), lot 5344; *Palm Beach Signature* (Heritage, 11/2004), lot 5242; *FUN Signature* (Heritage, 1/2011), lot 4112. NGC ID# 228C, PCGS# 2153
- 3382 1886 Type One MS65 Red and Brown PCGS Secure. CAC.** AMERICA is positioned closer to the date on the Variety 1 1886 Indian cent, with the lowest headdress feather pointing between the IC. This Gem Red and Brown coin shows blended copper-orange, burgundy, and chestnut-brown hues. The strike is sharp, and a few tiny flecks on the reverse are not bothersome. NGC ID# 228D, PCGS# 2155
- 3383 1894 MS66 Red and Brown PCGS Secure.** Showing a sharp strike and frosty, glowing mint luster, this Premium Gem 1894 Indian cent leans toward the red end of the color spectrum more than the brown. Rich copper-orange hues cover most of the obverse and part of the reverse, while burgundy and olive coloration makes up the balance. NGC ID# 228N, PCGS# 2188
- 3384 1898 MS66 Red PCGS Secure.** Frosty original copper-orange mint luster bathes this Premium Gem Red 1898 Indian cent in a vibrant cartwheel effect. The devices are sharp, and a few faint flecks do not detract. The 1898 is scarce in this grade and is rarely offered finer. Population: 59 in 66 (2 in 66+) Red, 12 finer (2/18). NGC ID# 228T, PCGS# 2201
- 3385 1902 MS66 Red PCGS.** This plentiful 20th century date becomes conditionally elusive in the upper Red grades and is genuinely rare finer than the present Premium Gem. Frosty fire-orange luster and sharp motifs complement a lack of abrasions. Scattered small specks appear on the reverse. Population: 66 in 66 (8 in 66+) Red, 11 finer (2/18). NGC ID# 228X, PCGS# 2213
- 3386 1904 MS66+ Red PCGS Secure.** A sharp type coin with frosty, vibrant copper-orange mint luster that is surprisingly uniform across both sides. Under a loupe, only the most insignificant surface marks or specks are discernible. Higher-grade 1904 cents are rarely encountered. Population: 76 in 66 (10 in 66+) Red, 7 finer (2/18). NGC ID# 228Z, PCGS# 2219
- 3387 1908-S MS65 Red PCGS.** An unusually crisp strike and vibrant cartwheel luster proclaim the quality of this smooth apricot-gold Gem. Nearly pristine aside from a fleck above the second T in STATES. From the first year of cent production at San Francisco; a popular low-mintage issue.  
Ex: *Long Beach Bullet* (Heritage, 2/2000), lot 24; *Christopher Young Collection* (Heritage, 4/2001), lot 5735. NGC ID# 2296, PCGS# 2234
- 3388 1909 MS66 Red PCGS. CAC.** The Philadelphia issue of the final-year Indian Head cent is available in MS66 Red but rare finer with only 16 pieces so graded at PCGS (1/18). This frosty copper-red example shows minor weakness on the top three headdress feathers but is otherwise well-struck. A few small pepper specks of carbon do not detract. CAC: 68 in 66, 2 finer (1/18). NGC ID# 22AZ, PCGS# 2237
- 3389 1909-S MS63 Brown NGC. CAC.** Glowing luster radiates from copper-gold surfaces that are imbued with traces of auburn-red and light tan. The design features are generally well-defined, including clarity on all four diamonds. A couple of faint marks on the Indian's cheek define the grade.  
Ex: *Long Beach Signature* (Heritage, 2/2007), lot 2247. NGC ID# 22B4, PCGS# 2238

## PROOF INDIAN CENTS

- 3390 1859 PR64 PCGS.** This Choice proof displays a full strike and pleasingly reflective fields. Modest contrast is seen on the tan-gold obverse, although the olive-tinted reverse shows less separation of field and device. A few specks and unimportant contact marks determine the grade. NGC ID# 2299, PCGS# 2247
- 3391 1883 PR67 Brown PCGS.** A spectacular Superb Gem Indian cent with razor-sharp design elements and deeply mirrored fields that show no mentionable distractions. The outstanding visual feature of this piece is the rich violet and blue-green patina that blankets both sides.  
Ex: *FUN Signature (Heritage, 1/2014)*, lot 3468. NGC ID# 842U, PCGS# 2336
- 3392 1886 Type One PR65 Red PCGS.** Blushes of cherry-red endow the obverse field and the upper-reverse border. Well struck, flashy, and essentially pristine save for a small spot on Liberty's neck. Certified in a first-generation holder. Population: 18 in 65 Red, 14 finer (2/18). NGC ID# 22A7, PCGS# 2347

## LINCOLN CENTS

- 3393 1909-S VDB MS64 Red and Brown PCGS.** Its long-standing status as the ultimate "demand rarity" of the Lincoln cent series does not seem in jeopardy, and the 1909-S VDB remains in short supply regardless of grade. This attractive near-Gem Red and Brown example is an optimal grade for a large cross-section of collectors. Blue overtones are seen over the lustrous mint red surfaces, with a few small areas of deep patina and strong mint luster. A sharp strike completes the substantial eye appeal. NGC ID# 22B2, PCGS# 2427
- 3394 1909-S VDB MS64 Red and Brown PCGS.** Three different mintmark positions are known for the 1909-S VDB. Here, the mintmark is low and to the right, almost fully beneath 0 in the date. Auburn-brown and mint red shades display deep blue overtones to create excellent eye appeal across both sides of this smooth and lustrous near-Gem Uncirculated example. The Choice surfaces are sharply struck and free of any carbon spots, with just a few tiny, inconsequential marks. NGC ID# 22B2, PCGS# 2427
- 3395 1909-S VDB MS64 Red and Brown NGC. CAC.** Lovely satin-smooth surfaces display lustrous, tan-gold color throughout both sides of this original and attractive 1909-S VDB cent. Sharply struck overall, including the all-important designer's initials, which are pinpoint-sharp. Simply put, there are no distracting marks or carbon to be found anywhere on this conservatively graded, CAC-endorsed near-Gem. NGC ID# 22B2, PCGS# 2427
- 3396 1909-S VDB MS65 Red and Brown NGC. CAC.** The original red surfaces of this important key Lincoln cent have mellowed to light chestnut-brown in some areas, but only insignificant signs of contact are present and satiny mint luster shines through the patina. The design elements are uniformly sharp and the designer's initials are bold. NGC ID# 22B2, PCGS# 2427

### 1909-S VDB Lincoln Cent, MS65 Red Gorgeous Luster

- 3397 1909-S VDB MS65 Red PCGS Secure.** Glowing fire-orange hues abound on the frosty surfaces of this Gem Red 1909-S VDB Lincoln cent. The strike is full, and the surfaces are devoid of distracting abrasions. A few faint, scattered flecks on the reverse do not affect the eye appeal. A thoroughly appealing coin and one that pretty much dissolves any need to consider a higher-grade piece. NGC ID# 22B2, PCGS# 2428

### 1909-S VDB Lincoln Cent, MS65 Red Attractive, Glowing Luster

- 3398 1909-S VDB MS65 Red NGC.** A lovely Gem Red example of this inaugural key Lincoln cent, showing blended bronze, olive, and coppery-gold hues over glistening, frosty mint luster. The design elements are boldly rendered, and the surfaces are devoid of bothersome abrasions. Finer pieces are only infrequently seen, with 40 so-graded coins at NGC (2/18). NGC ID# 22B2, PCGS# 2428
- 3399 1909-S MS65 Red PCGS. CAC.** Apricot-gold and lime-green shades alternate across this lustrous first-year Gem. Marks are absent and carbon is inconsequential. An outstanding example of the popular low-mintage issue. Certified in a green label holder. CAC: 58 in 65, 43 finer (2/18). NGC ID# 22B4, PCGS# 2434
- 3400 1909-S MS65 Red NGC. CAC.** Yellowish hues at the borders meld into pale peach-red color that characterizes originally toned examples of this low-mintage Without VDB cent. Coruscating mint luster flows across both sides. Abrasions and carbon are nearly absent from the sharply struck surfaces, limited to a few tiny marks and a dot or two of deep toning on the reverse. Almost inexplicably, the 1909-S remains undervalued especially in Gem Red or finer levels. CAC endorsed. Census: 48 in 65 Red, 8 finer. CAC: 27 in 65, 6 finer (2/18). NGC ID# 2298, PCGS# 2240
- 3401 1911 MS66+ Red PCGS Secure.** Some die wear is visible in the fields on this high-end Premium Gem, but the design elements are nonetheless sharply defined. Original copper-orange luster glows on each side with no mentionable carbon spots. Only 15 finer Red coins are reported at PCGS (2/18). NGC ID# 22B7, PCGS# 2443
- 3402 1911-D MS65 Red PCGS. CAC.** Satiny copper-orange mint luster is original on this Gem Red CAC coin, and only a couple of small specks are visible in the right obverse field. The centers are well-struck, although portions of the obverse border show weakness due to die fatigue. NGC ID# 22B8, PCGS# 2446
- 3403 1912-S MS65 Red PCGS.** A much better date, the 1912-S is seldom seen in Gem condition. Well-struck except on the LU in PLURIBUS and the O in ONE. Pumpkin-gold overall with scattered tiny spots and an area of gray patina on the left reverse. Certified in a first generation holder. NGC ID# 22BC, PCGS# 2458

**3404 1913-D MS65 Red PCGS. CAC.** The 1913-D Lincoln cent is not often found in Gem Red condition, and this CAC-approved piece is especially appealing for the grade. Satiny copper-orange luster shows no abrasions and has only a few minute specks visible under a loupe. The obverse is razor-sharp, although the reverse is predictably weak on the O in ONE. CAC-approved in an old, two-piece green label holder. PCGS lists 23 finer Red examples (2/18). NGC ID# 22BE, PCGS# 2464

**3405 1914-D MS63 Brown PCGS.** This satiny chocolate-brown example of the key-date 1914-D Lincoln cent shows hints of gold and steel-blue when tilted beneath a light. An old line on Lincoln's jacket is the only abrasion of note. This piece is fully struck from early-state dies, showing pronounced rims and border legends, with a mattelike texture to the surfaces. Eye appeal is exceptional for the grade. NGC ID# 84BX, PCGS# 2471

**3406 1914-S MS65 Red and Brown PCGS Secure. CAC.** A well-struck Gem with satiny luster on the obverse and mattelike texturing on the reverse. Light chestnut toning accents coppery-orange mint luster, and there is a noticeable lack of bothersome carbon spotting or abrasions. The 1914-S is scarce in MS65, and no finer Red and Brown coins are reported at PCGS (2/18). NGC ID# 22BJ, PCGS# 2475

**3407 1915-D MS66 Red PCGS.** A delightful coin for the specialist who demands original color and surfaces. Full red appears on both sides with no noticeable fading, and only a few carbon flecks are scattered across both sides, particularly at O in ONE and above the date. The fields and raised devices are excellent, with only tiny ticks found under scrutiny, including a short mark hidden in Lincoln's hairline. A prize for the Lincoln cent collector and a coin that is currently tied behind one numerically finer coin at PCGS. Population: 40 in 66 (4 in 66+) Red, 1 finer (2/18). NGC ID# 22BL, PCGS# 2482

**3408 1919 MS67+ Red PCGS.** Daubs of tan, orange, and rose are all well within the Red context on this marvelously preserved 1919 Lincoln cent, which additionally offers blazing luster and needle-sharp, problem-free surfaces. The PCGS Plus designation confirms its high-end Superb Gem status. Population: 74 in 67 (12 in 67+) Red, 18 finer (2/18). NGC ID# 22BY, PCGS# 2515

**3409 1919-D MS65 Red PCGS.** A frosty, unabraded Gem with original copper-orange luster. The obverse is boldly defined, while the reverse shows extensive die erosion and consequential weakness. No obvious carbon spotting is seen. The 1919-D is scarce in this condition and rare finer. Population: 77 in 65 (5 in 65+) Red, 17 finer (2/18). NGC ID# 22BZ, PCGS# 2518

**3410 1920-S MS64 Red PCGS.** Early branch mint issues are known for their rarity in full Red, and the 1920-S is no exception. The present orange-gold near-Gem is essentially free from contact, although minute flecks are scattered. The dies were slightly out of parallel, causing incompleteness of strike on the lower obverse and upper reverse. Certified in a green-label holder. NGC ID# 22C5, PCGS# 2530

**3411 1921 MS66 Red NGC.** The 1921 issue is known as a strike rarity in the series, yet this example is particularly sharp on both obverse and reverse, with glistening yellow-orange surfaces and exceptional mint luster. Marks and carbon are virtually nonexistent on the pristine, finely grained surfaces. Housed in a previous generation NGC holder with the greenish-border label (no barcode). Scarce at the Premium Gem level, and rare any finer. NGC ID# 22C6, PCGS# 2533

#### 1922 No D Cent, Strong Reverse, Pleasing AU50

**3412 1922 No D, Strong Reverse, FS-401, AU50 PCGS. CAC.** The weaker first 2 in the date diagnoses Die Pair 2, the official 1922 No D cent, along with the Strong Reverse, of course; although the two Weak D varieties both show the first 2 in the date stronger than the second 2. The No D also shows TRUST stronger than IN GOD WE. This piece has pleasing milk-chocolate surfaces with no mentionable marks other than a few ticks on Lincoln's hair and cheek. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

#### 1925-S Cent, MS65 Red and Brown Attractive Surfaces

**3413 1925-S MS65 Red and Brown PCGS.** Both sides offer a blend of apricot, peach, and mahogany shadings. This softly lustrous Gem has few marks or flyspecks, making for an uncommonly appealing example of its little-saved San Francisco issue. Great for the series specialist. Population: 13 in 65 (1 in 65+) Red and Brown, 0 finer (2/18). NGC ID# 22CH, PCGS# 2565

**3414 1927 MS67 Red PCGS.** Sharp design elements reside amid blazing, carbon-free luster that shows warm orange-gold color in the centers, bleeding to lighter yellow-gold at the borders. An incredibly attractive Registry Set candidate, among the finest seen by PCGS or NGC. Population: 59 in 67 (5 in 67+) Red, 0 finer (2/18). NGC ID# 22CM, PCGS# 2578

#### 1928-S Cent, MS65+ Red and Brown Much Original Color Remains

**3415 1928-S MS65+ Red and Brown PCGS Secure. CAC.** Subtle chestnut, olive, and lilac hues appear throughout the copper-gold surfaces on this high-end Gem, and no distracting carbon spotting is observed. The obverse is sharp, but the reverse shows weakness on the O in ONE, as usual. This piece is distinctive as the only Plus-graded Red and Brown Gem at PCGS with none finer, although that service lists a number of Red coins in MS65 and MS66. CAC lists three Gems as the finest Red and Brown coins awarded a green label, of which the present coin is the only one with a Plus designation (2/18). NGC ID# 22CT, PCGS# 2592

**3416 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS.** Unmistakable die doubling exists on the obverse at IN GOD WE TRUST, LIBERTY, and the date (especially visible at 4). This is a brilliant, flame-orange example with quicksilver accents on Lincoln's head and the lower-central reverse that yields tremendous eye appeal. Brilliant mint luster radiates from all angles. Marks and carbon are minimal. Population (all doubled die varieties combined): 46 in 65 Red (2 in 65+), 41 finer (2/18). NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

**3417 1955 Doubled Die Obverse, FS-101, XF45 PCGS. CAC.** True to form, the die doubling is spectacular on this sharply defined Choice XF cent. Even brown toning covers both sides, with only a few microscopic flecks on the reverse and a bit of inoffensive microporosity on the obverse — minor in all respects, visible under a loupe. One of the few CAC-endorsed examples at this grade level. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

## PROOF LINCOLN CENTS

**3418 1909 PR64 Red PCGS.** The strike is razor-sharp as expected for the matte proof format, illuminated by softly lustrous hues that range from peach-orange to vibrant mint red. Isolated splashes of orange-brown and scattered pinpoint carbon flecks visit small areas of the finely textured, near-Gem surfaces. Population: 55 in 64 Red, 117 finer (2/18). NGC ID# 22KS, PCGS# 3305

**3419 1912 PR66 Brown PCGS. CAC.** A generous amount of mint red remains beneath an overall bluish-brown patina that gives this Premium Gem cent exceptional eye appeal. The sharp strike adds to visual allure. A loupe reveals no marks of consequence, with a scattering of carbon flecks at the upper-left obverse and lower-right reverse. Population: 30 in 66 (5 in 66+) Brown, 2 finer. CAC: 14 in 66, 0 finer (2/18). NGC ID# 22KV, PCGS# 3312

**3420 1936 Type Two — Brilliant Finish PR65 Red PCGS.** This spectacular Gem exhibits deeply reflective fields and sharply detailed design elements throughout. The original red surfaces are well-preserved, with the more popular all-brilliant finish of the Type Two proofs. NGC ID# 22L3, PCGS# 3335

**3421 1937 PR65 Red Cameo NGC.** Few 1937 proofs achieve the Gem level or finer in Red Cameo format, which requires exceptional mirrored fields to provide most of the contrast for the raised devices that seldom display blatant mint frost. This example has deep, glassy reflectivity across the flame-orange fields. The razor-sharp devices are satinlike and display patina that is a notch lighter for discernible contrast and incredibly strong eye appeal. Census: 14 in 65 Cameo (1 in 65★), 24 finer (2/18). NGC ID# 22L5, PCGS# 83338

**3422 1952 PR67 Red Ultra Cameo NGC.** This is the single finest of just five Red Ultra Cameo proofs at NGC (2/18). Fully struck devices are starkly contrasted against liquidlike mirroring in the fields, and the preservation of the surfaces is almost flawless. An important Registry coin. NGC ID# 22LC, PCGS# 93365

**3423 1954 PR68 Red Cameo PCGS Secure.** Both sides of this high-end Registry coin show stark cameo contrast, including fiery-orange devices and liquidlike fields. The strike is sharp and the preservation nearly flawless. Easily among the finest Registry Set candidates available in a PCGS holder. Population: 12 in 68 Red Cameo, 6 finer in 68 Red Deep Cameo (2/18). NGC ID# BMA5, PCGS# 83371

## TWO CENT PIECES

**3424 1864 Small Motto, FS-401, MS61 Brown NGC.** The ephemeral Small Motto variety is far scarcer than its 1864 Large Motto successor. This well-struck and satiny representative offers consistent walnut-brown toning and is devoid of detrimental marks. Ex: FUN Signature (Heritage, 1/2015), lot 9372. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

**3425 1864 Small Motto, FS-401, MS63 Brown PCGS Secure.** The Small Motto is an elusive variant among survivors from the overall mintage of nearly 20 million 1864 two cent pieces. A necessity for type collectors as well as series specialists, the Small Motto subtype circulation strikes were struck from a single die pair. This Select Uncirculated example displays glossy chocolate-brown surfaces and a razor-sharp strike. Numerous die cracks encircle each side. Population: 63 in 63 Brown, 63 finer (2/18). NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

**3426 1865 Fancy 5 MS66 Red NGC.** A beautiful fire-red Premium Gem. No marks are apparent, and carbon is confined to a solitary rim fleck at 7 o'clock. The strike is sharp except on TRUST. For all 1865 two-cent pieces, Census: 23 in 66 Red, 2 finer (2/18). Ex: Central States Signature (Heritage, 4/2012), lot 3440. NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

**3427 1870 MS64 Red PCGS. CAC.** The 1870 was the first date of the two cent denomination with a mintage less than 1 million pieces, and production would continue to fall off over the next two years. Red examples of this issue are scarcer than those of most earlier dates. This well-struck, orange-gold, near-Gem shows few abrasions but has occasional spots, including a prominent one on the upper left portion of the wreath. Population: 21 in 64 (1 in 64+) Red, 16 finer. CAC: 4 in 64, 2 finer (2/18). Ex: Dallas Signature (Heritage, 11/2005), lot 407; FUN Signature (Heritage, 1/2007), lot 1923. NGC ID# 22NE, PCGS# 3608

## PROOF TWO CENT PIECES

**3428 1864 Large Motto PR64 Red and Brown PCGS.** Hair-thin slivers of toning form a woodgrain pattern on each side of this Choice proof, visible under a loupe but vanishing to the unaided eye. Most of the surfaces are satiny with copper-orange luster. Sharp design elements add to the eye appeal. NGC ID# 274T, PCGS# 3622

1864 Large Motto Two Cent  
PR65 Red and Brown  
Old Green Label Holder

**3429 1864 Large Motto PR65 Red and Brown PCGS.** Glossy, mirrored surfaces showcase areas of crimson, olive, and chestnut-brown color. The strike is sharp, and a few scattered flecks are well-hidden by the patina. The 1864 Large Motto proof is elusive in high grade and rarely offered finer than the Gem level with any color designation. Housed in an old green label holder of the two-piece, plastic collar design. Population: 41 in 65 (1 in 65+) Red and Brown, 35 finer (including Red and Red Cameo pieces) (2/18). Ex: FUN Signature (Heritage, 1/2005), lot 5547. From The Glacier Park Collection. NGC ID# 274T, PCGS# 3622

**3430 1868 PR66+ Brown PCGS Secure. CAC.** This Plus-graded Premium Gem is among the finest Brown proofs endorsed by CAC. The strike is razor-sharp, complemented by reflective fields and deep toning in shades of copper-orange, rose-red, violet, and blue. The eye appeal is outstanding, surpassing that of many Red and Brown coins that we have seen. Population: 5 in 66 (1 in 66+) Brown, 1 finer; 23 in 66 Red and Brown, 3 finer; 10 in 68 Red, 2 finer. CAC: 4 in 66 Brown, 0 finer (1/18). NGC ID# 274X, PCGS# 3636

**3431 1870 PR66 Red and Brown PCGS.** This high-end proof is among the finest Red and Brown pieces certified. The obverse displays cherry-red and gold hues, while the reverse has faint olive tinting of otherwise yellow-gold fields. Both sides are deeply reflective and fully struck without carbon spotting. The 1870 proof two cent piece is scarce this fine.

*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5686.*

**From The Glacier Park Collection.** NGC ID# 274Z, PCGS# 3643

**3432 1871 PR64 Red PCGS. CAC. FS-102.** Orange-gold brilliance complements deep mirroring in the fields of this Choice proof, and the strike is sharp. Few Red proofs are CAC-approved, making this coin a rare find for the quality-conscious collector. All 1871 proofs are FS-102, showing die doubling on IN GOD WE TRUST. CAC: 3 in 64, 17 finer (2/18).

*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5690.*

**From The Glacier Park Collection.** NGC ID# 22NH, PCGS# 3647

**3433 1872 PR64 Red and Brown PCGS Secure.** Smooth and partially reflective peach-orange proof surfaces display vertical bands of reddish-brown toning that account for the assigned Red and Brown Choice proof grade. Just 65,000 circulation strikes were produced, adding to the demand for high-grade proofs. A scattering of carbon flecks is confined primarily to the obverse of this near-Gem coin, with generous areas of red that illuminate a sharp proof strike. NGC ID# 2752, PCGS# 3649

---

### 1873 Two Cent, PR65 Red and Brown Closed 3, Proof-Only Key Date

**3434 1873 Closed 3 PR65 Red and Brown PCGS Secure.** The two cent series is a highly collectible short set that can be completed in both circulation-strike and proof format. This 1873 Closed 3 example from an estimated mintage of 600 proofs is the hands-down key after the 1864 Small Motto. An even blend of amber-gold and deep tan-brown patina covers each side. The fields are semireflective and well-preserved. NGC ID# 2753, PCGS# 3652

---

## THREE CENT SILVER

**3435 1851 MS66 PCGS. CAC.** The first-year issue in the three cent silver series is plentiful overall but conditionally rare finer than MS66. CAC-approved coins are scarce in this grade. The present example displays frosty mint luster with a hint of champagne tinting. The centers are weakly struck, and portions of the rims are not fully brought up. PCGS lists 21 higher-grade coins (2/18). NGC ID# 22YX, PCGS# 3664

**3436 1851 MS66 PCGS Secure. CAC.** Frosty mint luster and delicate champagne toning encompass the unabraded surfaces of this Premium Gem first-year type coin. Minor strike weakness is visible on the central shield, but other design elements are better defined. PCGS lists only 21 higher-grade representatives (2/18). NGC ID# 22YX, PCGS# 3664

**3437 1862 MS66 PCGS.** The 1862 is an available Type Three issue, but pieces grading finer than MS66 are conditionally rare. This Premium Gem is frosty, mostly brilliant, and beautifully preserved; a few small areas of blue and russet toning appear beneath a loupe. Some of the usual strike weakness is visible on the central shield. PCGS lists 21 higher-grade representatives (2/18). NGC ID# 22ZB, PCGS# 3680

**3438 1862 MS67 PCGS.** The 1862 is one of the most plentiful Type Three issues, but Superb Gem examples are conditionally scarce. This piece is frosty and nearly brilliant, showing only a few hints of golden color. Moderate strike weakness appears in the centers, as typically seen on the type. None are numerically finer at PCGS or NGC (2/18). NGC ID# 22ZB, PCGS# 3680

**3439 1862 MS67 NGC.** An impressive Superb Gem, this frosty beauty exhibits an above average strike and highly lustrous silver surfaces with faint peripheral gold toning. Census: 24 in 67 (1 in 67★), 0 finer (2/18). NGC ID# 22ZB, PCGS# 3680

**3440 1870 MS64 PCGS. CAC.** Only 3,000 silver three cent pieces were struck in 1870, with regular production of this series being entirely suspended just two years later. High-grade examples are scarce. This CAC-approved near-Gem displays sharp devices and semiprooflike fields, cast in warm golden toning. Population: 16 in 64, 20 finer. CAC: 4 in 64, 14 finer (2/18). NGC ID# 22ZL, PCGS# 3691

---

## PROOF THREE CENT SILVER

**3441 1866 PR64 Cameo NGC.** The highly reflective fields show impressive cameo contrast against the frosted devices. A loupe fails to locate any apparent marks. A sharply struck and untoned specimen. Census: 16 in 64 Cameo, 22 finer (2/18).

*Ex: Dallas Signature (Heritage, 10/2009), lot 208; Long Beach Signature (Heritage, 9/2010), lot 3432; New York Signature (Heritage, 11/2013), lot 3171.* NGC ID# 27CC, PCGS# 83716

**3442 1868 PR66 NGC.** Blue-green, gold, amber, and lilac-gray toning blankets each side of this Premium Gem proof, showcasing fully struck devices and unmarked surfaces. The 1868 proof is conditionally scarce this fine. Census: 16 in 66, 7 finer; 5 in 66 Cameo, 2 finer (2/18). NGC ID# 2U25, PCGS# 3718

---

## THREE CENT NICKELS

---

### 1882 Three Cent Nickel, MS66 Seldom Seen as a Circulation Strike

**3443 1882 MS66 NGC.** After a mintage of more than a million pieces the previous year, production for 1882 business strike three cent nickels dropped in 1882 to a mere 22,200 pieces. Proofs are much easier to locate, especially in higher grades. This is an especially lustrous example with no suggestions of the usual prooflikeness in the fields. The mint luster shows just the slightest hint of pale golden and lilac toning. Fully struck. Census: 11 in 66, 2 finer (2/18). NGC ID# 275D, PCGS# 3750

**3444 1883 MS62 PCGS.** With only 4,000 pieces struck, the 1883 three cent nickel is a better date in all grades and genuinely scarce in Mint State. This piece displays sharp definition and satiny mint luster. Olive-gold toning over each side yields tinges of iridescence. Population: 17 in 62, 31 finer (2/18). NGC ID# 2765, PCGS# 3751

## PROOF THREE CENT NICKELS

**3445 1866 PR66 Cameo PCGS Secure.** The second-year issue in the proof three cent nickel series is occasionally available in Cameo grades, but Premium Gems are elusive, and finer pieces are rare. This high-end Cameo displays deep mirroring in the fields and frosty luster over sharp devices. Neither side exhibits toning. Population: 22 in 66 (2 in 66+) Cameo, 2 finer; 9 in 66 (1 in 66+) Deep Cameo, 6 finer (2/18). NGC ID# 275L, PCGS# 83762

**3446 1878 PR67 NGC.** This spectacular Superb Gem displays impeccably preserved surfaces with moderately reflective fields and well-detailed, frosty design elements. Eye appeal is outstanding. No finer non-Cameos are listed at NGC, although a number of Cameos and a couple of Ultra Cameos are reported in this condition (2/18). NGC ID# 275Y, PCGS# 3774

**3447 1883 PR67+ Cameo PCGS Secure. CAC.** The 1883 proof is scarce in the upper Cameo grades and rare with Deep Cameo contrast. This CAC-approved Registry candidate is almost flawlessly preserved, showing a full strike and pleasing contrast. The surfaces are devoid of toning. Population: 59 in 67 (9 in 67+) Cameo, 3 finer. CAC: 41 in 67, 1 finer (2/18). NGC ID# 2765, PCGS# 83779

### 1886 Three Cent Nickel, PR67 Very Rare Any Finer

**3448 1886 PR67 PCGS. CAC.** From a mintage of 4,290 pieces, the 1886 three cent nickel is very scarce in PR67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem exhibits well-detailed design elements that show just a trace of softness on the hair above the ear. The impeccably preserved surfaces include hazily reflective fields and frosty devices. Population: 74 in 67 (3 in 67+), 3 finer. CAC: 28 in 67, 1 finer (1/18).

*From The Glacier Park Collection.* NGC ID# 2768, PCGS# 3782

## SHIELD NICKELS

**3449 1872 MS65 PCGS.** A highly underrated series, a Shield nickel collection would include many conditionally scarce dates such as the 1872, which is elusive in MS65 and rare finer. The present example displays satiny luster with a light champagne hue. Minor strike weakness occurs on the most elevated wreath leaves. Population: 50 in 65 (1 in 65+), 35 finer (2/18). NGC ID# 22P6, PCGS# 3799

### 1880 Shield Nickel, XF45 The Key to the Series

**3450 1880 XF45 PCGS.** With only 16,000 pieces struck, the 1880 Shield nickel is the rarest date in the series and a major stopper in Uncirculated condition. This Choice XF coin will be a highlight in a circulated date collection, and it retains enough detail to fit in with lower-grade Uncirculated pieces. The faintly luminous surfaces display nickel-gray coloration with gold and russet accents throughout. A mark is noted on the lower left portion of the shield, just above the date. Population: 8 in 45, 47 finer (2/18). NGC ID# 276E, PCGS# 3810

## PROOF SHIELD NICKELS

### 1866 Rays Shield Nickel, PR64 Cameo Rare CAC-Approved Example

**3451 1866 Rays PR64 Cameo PCGS. CAC.** Proof 1866 Shield nickels are the first of their type, all struck with rays between the stars on the reverse. Examples are a challenge to locate with white-on-black cameo surfaces such as those seen on this coin. Mostly brilliant throughout, the surfaces are exceptionally clean and the contrast is rather stark between the fields and devices. This is the only PR64 Cameo endorsed by CAC. CAC: 1 in 64, 24 finer (1/18).  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5810.*

*From The Glacier Park Collection.* NGC ID# 276G, PCGS# 83817

**3452 1870 PR66 Cameo PCGS. CAC.** This delightful Premium Gem proof exhibits strongly impressed design elements, but some letters in the reverse legend are incomplete, due to lapping. The deeply reflective fields contrast boldly with the frosty devices and no mentionable distractions are evident. High-end Cameos are the finest pieces available to collectors, as no Deep Cameos are reported by PCGS. Population: 26 in 66 (3 in 66+) Cameo, 2 finer. CAC: 13 in 66, 0 finer (10/17). NGC ID# 276L, PCGS# 83824

**3453 1878 PR65 Cameo PCGS. CAC.** This is a boldly struck example with reasonable contrast and light gold and sea-green hues. The surfaces are well-preserved and attractive. The 1878 proof Shield nickel is a scarce issue with any degree of cameo contrast. Population: 11 in 65 (2 in 65+) Cameo, 40 finer (including Deep Cameos). CAC: 6 in 65, 16 finer (2/18).

*Ex: Long Beach Signature (Heritage, 9/2003), lot 5951; Dallas Signature (Heritage, 12/2004), lot 5511.*

*From The Glacier Park Collection.* NGC ID# 276V, PCGS# 83832

- 3454 1879 PR66 Cameo PCGS. CAC.** Cameo regular date 1879 proof Shield nickels are scarce in all grades, and PCGS has seen only one Deep Cameo, graded PR67. This well-contrasted, CAC-approved Premium Gem Cameo is sharp and beautifully preserved, showing a hint of ice-blue toning overall. Population: 18 in 66 Cameo, 7 finer. CAC: 9 in 66, 4 finer (2/18). NGC ID# 22PG, PCGS# 83833

## LIBERTY NICKELS

- 3455 1883 With Cents MS66 PCGS.** An important type coin, this Premium Gem With Cents Liberty nickel represents the third and final major design type employed for five cent pieces in 1883. The strike is remarkably sharp on the wreath considering the minor softness visible on stars 1, 2, 12, and 13. Both sides of this satiny coin show warm golden toning. PCGS lists eight finer representatives (2/18). NGC ID# 22PH, PCGS# 3844
- 3456 1893 MS66 PCGS. CAC.** The 1893 Liberty nickel is scarce in MS66 and rare this fine with a CAC green label. Finer pieces are prohibitively rare. This coin displays frosty mint luster and delicate champagne toning. Several peripheral stars and the lower-left portion of the wreath exhibit strike softness as usual, but the preservation is superb. Population: 37 in 66 (4 in 66+), 1 finer. CAC: 17 in 66, 2 finer (2/18). NGC ID# 2778, PCGS# 3854
- 3457 1896 MS66 PCGS.** The 1896 Liberty nickel is a rare issue in MS66 condition and no coins have been certified in higher numeric grades. This well-detailed Premium Gem exhibits virtually pristine lustrous surfaces, with highlights of pink and pale gold toning. Population: 27 in 66 (4 in 66+), 0 finer (2/18). NGC ID# 277B, PCGS# 3857
- 3458 1899 MS66+ PCGS. CAC.** Satiny luster displays warm golden toning on each side with no distractions. The strike is remarkably sharp throughout, and eye appeal is outstanding, as the CAC green label suggests. The 1899 Liberty nickel is available in MS66, but PCGS has Plus-graded only 15 pieces in this grade and lists six Superb Gems finer (2/18). NGC ID# 22PR, PCGS# 3860
- 3459 1912-D MS65 NGC.** Minor softness is visible overall on this Gem Denver coin, but the major design elements are defined. A hint of champagne color warms the satiny nickel-gray surfaces, and no abrasions are mentionable. The 1912-D is available in this grade but elusive finer. Examples are in high demand as the only Denver coins struck of this design type. NGC ID# 277P, PCGS# 3874
- 3460 1912-D MS65 PCGS.** Ribbons of lilac and gray on the obverse accent deep golden toning on both sides of this Gem example. Slight softness is noted on the lower-left portion of the wreath on Liberty's temple, but the stars are bold. Satiny luster shows no distracting abrasions. Higher-grade 1912-D Liberty nickels are elusive. NGC ID# 277P, PCGS# 3874
- 3461 1912-S MS65 PCGS Secure.** The San Francisco Mint began striking minor denominations in 1908, with the Indian Head cent. The nickel followed in 1912, with a coinage of 238,000 coins. This key date is sought-after in Gem condition. The present example displays delicate pastel toning and satiny mint luster. The lower-left portion of the wreath and the stars are well-defined, although minor softness is visible on Liberty's temple. NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

### 1889 Liberty Nickel, PR67 Sharp Devices, Reflective Fields

- 3462 1889 PR67 PCGS Secure.** This delightful Superb Gem exhibits razor-sharp definition on all design elements, including the usual trouble spots in the lower wreath. The impeccably preserved brilliant surfaces include deeply reflective fields, but field/device contrast is minimal. Overall visual appeal is terrific. Population: 13 in 67, 0 finer (2/18). NGC ID# 277X, PCGS# 3887

### 1895 Nickel, PR66 Cameo High-End for the Issue

- 3463 1895 PR66 Cameo NGC. CAC.** A handful of Premium Gem Cameos and Ultra Cameos are the finest 1895 proofs reported at NGC. This CAC-approved example is fully struck and displays a hint of ice-blue tinting to the mirrored fields and over the frosted design elements. Modest field-device contrast is discernible on each side. Census: 5 in 66 Cameo, 2 in 66 Ultra Cameo finer. CAC: 8 in 66, 4 finer (2/18). NGC ID# 2785, PCGS# 83893
- 3464 1897 PR67 NGC. CAC.** A thin veil of sky-blue, sea-green, and rose patina lightly covers marvelously preserved, partly contrasted surfaces, speaking to the undeniable originality of this Superb Gem proof. This issue is scarce in PR67, with or without a Cameo designation, and finer coins are rarely offered. CAC: 13 in 67, 0 finer (2/18). NGC ID# 2787, PCGS# 3895
- 3465 1905 PR67 PCGS.** Lavender border toning surrounds yellow-gold and mint-green interior hues, giving this Superb Gem proof excellent eye appeal and originality. The strike is sharp throughout. No contact marks are seen. Population: 34 in 67 (4 in 67+), 2 finer (2/18). NGC ID# 278F, PCGS# 3903
- 3466 1909 PR67 Cameo NGC. CAC.** Glittering, highly reflective mirrored fields contrast boldly with the sharply struck, frosted devices. The ear of corn — troublesome even on the proof issues for 1909 — shows only a touch of weakness on this coin. Translucent-gold rim and border toning adds eye appeal to the otherwise brilliant surfaces. Census: 31 in 67 Cameo (2 in 67+, 6 in 67★), 8 finer; 3 in 67 Ultra Cameo, 0 finer. CAC: 30 in 67, 2 finer (2/18). NGC ID# 278K, PCGS# 83907

**1912 Liberty Nickel, PR67  
Brilliant With CAC Approval**

- 3467 1912 PR67 PCGS Secure. CAC.** The final year of the Liberty nickel series saw the production of 2,145 proofs. No Cameo designation has been awarded, but this Superb Gem clearly features partly reflective fields and a delicate overlay frost over the devices. The full impression, lack of contact, and marvelous visual quality should entice series specialists and type collectors. Population: 11 in 67 (2 in 67+), 0 finer. CAC: 7 in 67, 1 finer (2/18). NGC ID# 278N, PCGS# 3910

**BUFFALO NICKELS**

- 3468 1913-D Type One MS67 NGC. CAC.** A colorful palette of steel-blue, violet, and harvest-gold decorates the obverse, while the reverse displays grayish-blue shades with orange highlights around the raised elements. Mint luster glows from the nearly unmarked surfaces of this beautifully toned Superb Gem Type One nickel. Struck from a worn obverse die, the motifs are nevertheless sharp and well brought-up. The obverse is boldly strike doubled, visible at the feather ends, the date, and the chief's lips and chin. Census: 26 in 67 (4 in 67+, 1 in 67★, 1 in 67+★), 1 finer. CAC: 30 in 67, 0 finer (2/18). NGC ID# 22PX, PCGS# 3916

**1914/3-S Buffalo Nickel, MS64  
FS-101, Cherrypickers' Variety**

- 3469 1914/3-S MS64 NGC. FS-101.** This *Cherrypickers'* variety possibly resulted from repunching on the master die and may have affected many working dies. This sharply struck example is lightly toned in golden-tan, gray, and rose hues. Each side is carefully preserved and lustrous with few marks for the grade. The crossbar of an underdigit 3 appears at the top of the 4.  
Ex: *Pittsburgh Signature (Heritage, 8/2004)*, lot 5524. NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

- 3470 1915-D Two Feathers, FS-401, AU55 PCGS.** A rare *Cherrypickers'* variety caused by die lapping, the same cause as the popular Three or Three-and-a-Half Legged varieties. PCGS has certified just five examples in all grades, with the present lot as the single finest (2/18). A coruscating and unblemished nickel with light gray toning and minor peripheral incompleteness of strike. PCGS# 569432 Base PCGS# 3928

**1915-S Nickel, MS66  
Colorfully Toned, Old Holder**

- 3471 1915-S MS66 NGC.** Sea-green and orange-gold toning graces this lustrous and unabraded Premium Gem. The strike is sharp except on the hair above the braid. An outstanding representative of an early and low-mintage branch issue. Certified in a pre-hologram holder. Census: 25 in 66 (2 in 66+), 0 finer (2/18). NGC ID# 22R9, PCGS# 3929

**1915-S Nickel, Luminous MS66  
Few Finer Pieces Known**

- 3472 1915-S MS66 PCGS. CAC.** Delicate iridescent toning appears throughout each side of this Premium Gem 1915-S nickel, and the luster glistens with unabraded luminance. Moderate central strike weakness is a little more noticeable on the obverse than the reverse, as normal for the issue. The 1915-S is seldom offered this fine and is a major condition rarity finer. Population: 35 in 66 (1 in 66+), 3 finer. CAC: 10 in 66, 1 finer (2/18). NGC ID# 22R9, PCGS# 3929

- 3473 1918/7-D FS-101 — Cleaned — NGC Details. VF.** From late-in-life dies, showing metal flowlines around the margins and radial die cracks. The stone-white surfaces exhibit vertical hairlines across the motifs. The broad downstroke and crossbar of the underdigit 7 are unmistakable. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1918/7-D FS-101 Nickel, VF25  
Famous 20th Century Rarity**

- 3474 1918/7-D FS-101 VF25 PCGS Secure.** One of the rarest and most famous 20th century overdates in this series or any other, and widely in-demand as a result. Circulation has caused merging over the highest points of the design, and each side exhibits deep nickel-gray patina. The overdate and diagnostic crack on the hair braid remain bold. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3475 1921 MS66 PCGS. CAC.** Some die lapping is visible in the obverse fields, but the reverse appears to be from a newer die. Both sides show excellent central sharpness for a 1920s issue. Luster glistens and is free of mentionable toning. PCGS lists only 32 finer coins, and CAC-approved representatives are scarce in this grade. CAC: 43 in 66, 3 finer (2/18). NGC ID# 22RT, PCGS# 3947

**1921-S Nickel, MS63  
Scarce San Francisco Issue**

- 3476 1921-S MS63 PCGS. CAC.** The nickel-gray surfaces are sharply struck and attractive for a 1921-S, which is one of the lower-mintage semikey issues of the series. The bison is well-defined, particularly on the head and shoulders, which are sometimes weak on this San Francisco date. The mint luster is a bit more subtle on the obverse than the reverse, yet eye appeal is strong as suggested by the CAC endorsement. CAC: 4 in 63, 28 finer (2/18). NGC ID# 22RU, PCGS# 3948

- 3477 1921-S Two Feathers, FS-401, XF45 PCGS.** The green-label holder is undesignated as Two Feathers, but this is the scarce variety with the innermost feather absent, presumable due to die lapping to remove clashmarks. Any 1921-S nickel is desirable, due to its low mintage of 1.5 million pieces. The unmarked stone-gray surfaces exhibit occasional minor granularity. Population: 2 in 45, 7 finer (2/18). NGC ID# 22RU, PCGS# 38452 Base PCGS# 3948

**1925 Nickel, Multicolor MS67  
Top-Grade Registry Coin**

- 3478 1925 MS67 NGC.** The 1925 Buffalo nickel is rare this fine and unknown in higher grades. Frosty, pristine mint luster on each side complements attractive multicolor toning and well-struck design elements. Registry Set collectors will want to take a close look at this lovely top-grade coin. Census: 9 in 67, 0 finer (2/18). NGC ID# 22S2, PCGS# 3954
- 3479 1925-D MS64 NGC.** A blanket of olive-gold overlays otherwise multicolor toning on this near-Gem 1925-D nickel, while the surfaces fail to reveal any of the small abrasions typically associated with the MS64 grade level. Some strike weakness is present, as expected, on the bison's head and shoulder. NGC ID# 22S3, PCGS# 3955
- 3480 1925-S MS63 PCGS.** Central weakness on both sides of this Select Mint State example is typical of nearly all surviving 1925-S Buffalo nickels. This piece has full mint luster with splashes of gold toning on its brilliant light gray surfaces. NGC ID# 22S4, PCGS# 3956

- 3481 1930 Doubled Die Obverse, FS-103, MS66+ PCGS Secure.** *Cherrypickers'* calls the 1930 FS-103 "the strongest of the doubled-eye doubled dies." The eye is widely doubled southeast. This lustrous wheat-gold and gunmetal-gray Premium Gem has a pristine appearance. The centers lack a full impression, and the surfaces exhibit a moderate orange-peel texture due to long-in-use dies. PCGS# 569451 Base PCGS# 3969

- 3482 1930-S MS66+ PCGS. CAC.** This available San Francisco issue is conditionally rare in grades finer than MS66, with only eight coins so graded at PCGS and none at NGC (2/18). This CAC-approved example displays delicate iridescent toning over frosty surfaces that are free of abrasions. Minor strike weakness is noted over the central high points, as always. NGC ID# 22SJ, PCGS# 3970

- 3483 1938-D/D MS67+ PCGS. CAC.** The D/D mintmark never has, or will, create the sensation of the 1938-D/S mintmark in the Buffalo nickel series, but it is an interesting variety nonetheless. It is particularly so on this pristine, Plus-graded Superb Gem, which is tied for the finest-known of the D/D variant and among the finest of any 1938-D Buffalo nickel, regardless of the mintmark style. Vibrant hues of flame-gold and violet join rainbow iridescence at the borders. Pale-gold, lilac, and ice-blue toning cover the less-vivid central devices. The coin is sharply struck and boldly lustrous, with no untoward marks or distractions. Population (D/D variety): 19 in 67+, 0 finer. CAC: 19 in 67, 0 finer (2/18). NGC ID# 22T2, PCGS# 93984 Base PCGS# 3984

**PROOF BUFFALO NICKELS**

- 3484 1914 PR66 PCGS. CAC.** The 1914 date is in higher relief than that on the 1913 issues, quite evident on this proof issue. Clearly, the Mint was already aware of the date's inclination to wear during circulation. Despite the effort, raised digits only subjected the date to greater exposure, and thus more rapid wear. The proof offered in this lot is fully struck, with intricately detailed design elements including high-relief numerals in the date. Faint iridescence visits satinlike matte proof surfaces on each side. There are no mentionable contact marks.  
*From The Glacier Park Collection.* NGC ID# 278T, PCGS# 3991

- 3485 1914 PR66 PCGS. CAC.** This Premium Gem proof is fully struck and luminous, showing champagne-gray and golden toning over beautifully preserved surfaces. The 1914 matte proof is often seen with excellent eye appeal, as demonstrated here, but CAC-approved coins are infrequently available. NGC ID# 278T, PCGS# 3991

- 3486 1936 Type One — Satin Finish PR66 PCGS.** Peripheral rainbow toning graces the satiny, iridescent surfaces of this Premium Gem proof, producing a warm visual effect and accenting the craggy features of the chief and bison. The strike is resoundingly sharp throughout both sides.  
*From The Glacier Park Collection.* NGC ID# 278X, PCGS# 3994

- 3487 1937 PR66 PCGS.** A butter-gold specimen with glassy fields and sharply impressed motifs. Only the hair above the braid lacks full definition. The final-year proof Buffalo nickel, although business strikes were coined at Denver the subsequent year. NGC ID# 278Z, PCGS# 3996

- 3488 1937 PR67 PCGS. CAC.** 1937 proofs were exclusively the brilliant, mirrored-field style. This Superb Gem is fully struck with reddish-gold, overtones over glossy, lilac-gray fields and devices. The glittering surfaces are essentially flawless, while the sharply defined motifs appear raised in medallion fashion against the glassy-smooth fields. PCGS reports just 35 numerically finer proofs.  
*From The Glacier Park Collection.* NGC ID# 278Z, PCGS# 3996

- 3489 1937 PR67 PCGS Secure. CAC.** A hint of light champagne color appears across mirrored fields and satiny devices on this fully struck Superb Gem proof. Although this issue is not particularly scarce in PR67, CAC-approved coins are in a minority. The 1937 is the final proof issue in the Buffalo nickel series and one of only two with a brilliant finish. PCGS lists 35 finer coins, and CAC has endorsed 16 finer pieces (2/18). NGC ID# 278Z, PCGS# 3996

**3490 1937 PR67+ PCGS. CAC.** This is a beautifully preserved, CAC-endorsement Superb Gem example of the final proof issue in the Buffalo nickel series. The devices are fully struck, and the fields are deeply mirrored with no evidence of repolishing after the initial preparation of the dies. There is a hint of field-device contrast on each side beneath a touch of light golden toning. Clearly, this piece was struck from an early die state. PCGS reports 35 finer non-Cameo proofs with eight Cameos in the same grade as this piece (2/18). NGC ID# 278Z, PCGS# 3996

**3491 1937 PR67+ PCGS. CAC.** Delicate lavender, yellow-gold, and mint-green hues accent the mirrored fields and satiny devices of this high-end Superb Gem proof. The sharp strike and CAC endorsement complete the eye appeal. PCGS lists 35 finer non-Cameos, plus eight Cameos in this same grade (2/18). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKEL

**3492 1943-P Doubled Die Obverse, FS-106, MS67 PCGS Secure.** The famous "Doubled Eye" variety, listed in the *Guide Book* and among the Top 10 varieties of the entire Jefferson nickel series. Besides the eye, LIBERTY and the date are doubled in a counterclockwise direction. Lustrous and magnificently preserved with splashes of pastel lime-green and wheat-gold patina across the reverse. NGC ID# 22TP, PCGS# 38497 Base PCGS# 4174

## EARLY HALF DIMES

**1794 Half Dime, XF Details  
V-3, LM-3, Sharply Defined**

**3493 1794 V-3, LM-3, R.4, — Tooled — PCGS Genuine. XF Details.** Bold die cracks on the lower reverse confirm the Valentine variety. The obverse is richly detailed and displays partial olive-gray toning. The field is repaired beneath Liberty's chin, and the neck and cheek are lightly smoothed. The gunmetal-gray and slate reverse is sharp and appears original.  
Ex: *Long Beach Signature (Heritage, 6/2014)*, lot 3515.

**3494 1795 V-2, LM-3, R.5 — Polished — NGC Details. XF.** A very scarce variety that is interesting for a heavy linear crack across the portrait and through the R in LIBERTY. Deeply toned with an aquamarine obverse and a lilac-red reverse. Glossy from a wipe, and the obverse displays heavy planchet marks (as made) on the cheek and Liberty's hair. The cheek also has a fairly large strike-through, as coined.  
Ex: *ANA National Money Show (Heritage, 2/2014)*, lot 3228.

**3495 1795 V-5, LM-8, R.3 — Cleaned, Retoned — ANACS. AU Details, Net XF45.** This piece is evenly struck but is characteristically weak on the eagle's wings and portions of Liberty's hair. Little wear is visible, and an old cleaning is the only obvious imperfection. Olive-gold and cobalt-blue toning appears over each side. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

**3496 1797 15 Stars, V-2, LM-1, R.3 — Cleaned — PCGS Genuine. Fine Details.** 15 stars encircle the portrait of Liberty on this variety, and both 7s in the date are from the smaller punch used during this year. The surfaces are unnaturally bright from an old cleaning, but small patches of lavender and aquamarine toning remain around the margins. The border dentils are complete around both sides, and much of the central weakness is due to strike, not wear.

**3497 1800 V-1, LM-1, R.3 — Cleaned — PCGS Genuine. VF Details.** The late die state, showing a rim cud below the date but without the strike doubling on the numerals that usually accompanies this state. This coin is lightly circulated with bright steel-gray surfaces and bold borders. An old, light cleaning is the only imperfection.

**1800 V-2, LM-3 Half Dime, VF30  
LIBEKTY Obverse**

**3498 1800 LIBEKTY, V-2, LM-3, R.4, VF30 ANACS.** The usual late die state with heavy die buckling in the central reverse. Strike weakness is visible on the corresponding portion of the obverse portrait as a result. The borders are mostly complete nonetheless, and moderate detail remains in the devices. This lavender-gray LIBEKTY type coin displays deeper gunmetal-blue toning in the fields. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

## SEATED HALF DIMES

**3499 1853 Arrows MS66 PCGS.** This luminous Premium Gem shows sharp relief definition despite moderate die erosion in the fields. Ice-blue luster features warmer olive-gold overtones across the interiors on each side. Finer 1853 Arrows half dimes are rarely offered. Population: 62 in 66 (14 in 66+), 11 finer (2/18). NGC ID# 233Y, PCGS# 4356

**3500 1860 MS67 PCGS.** The strike is incredibly sharp on this colorfully toned Superb Gem half dime, an amazing survivor of exceptionally high quality. Rings of blue, green, violet, gold, and russet cling to the outer areas. Much of the reverse remains brilliant. Population: 52 in 67 (8 in 67+), 4 finer (2/18). NGC ID# 2347, PCGS# 4377

## PROOF SEATED HALF DIMES

**3501 1859 PR64 ★ Cameo NGC. CAC. Flynn-RPD-001.** The briefly issued Paquet subtype, which has hollow-centered stars and a different rendition of the Seated Liberty figure. As usual for the 1859 proofs, the date is repunched south, most apparent on the base of the 1. Ocean-blue and lavender-red toning fills the obverse border, but the reverse is stone-white. CAC: 6 in 64, 6 finer (2/18). NGC ID# 23CD, PCGS# 84438

**1860 Seated Half Dime, PR67  
Splendid Toning and Preservation**

- 3502 1860 PR67 PCGS.** The Mint struck 1,000 proofs in 1860, an overly ambitious mintage in the early stages of selling proofs — at a premium above face value — to any willing customer. Many of the proofs went unsold and were melted at year's end. Thankfully, this Superb Gem example survived. It displays an attractive blend of mint-green, rose, and violet hues that overlay glassy-mirrored fields and frosted devices. Neither PCGS nor NGC report a numerically finer example. PCGS population: 5 in 67, 0 finer; 2 in 67 Cameo, 0 finer (2/18). NGC ID# 235V, PCGS# 4443

**EARLY DIMES**

**1797 JR-1 16 Stars Dime, Good 6  
Die Break at Date**

- 3503 1797 16 Stars, JR-1, R.4, Good 6 PCGS.** The Small Eagle reverse was used on the dime only in 1796 and 1797. Only two varieties are known for the latter issue, which are easily differentiated by the number of peripheral stars on the obverse. The 16 Stars *Guide Book* variety is the more plentiful of the two, although it is still elusive. This piece shows advanced wear that weakens portions of the borders, although the central devices are boldly outlined with some hair and feather detail remaining. The steel-gray surfaces show light marks under a loupe, consistent with the grade. NGC ID# 236C, PCGS# 38748 Base PCGS# 4462

- 3504 1805 4 Berries, JR-2, R.2 — Corroded — ANACS. XF Details, Net VF30.** This Heraldic Eagle type coin offers a wealth of detail, but the lavender-gray surfaces are minutely granular. The high points are stone-white. Abrasions are confined to a couple of thin marks on the shield and a small depression in the upper-right obverse field. In a small-sized holder. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

- 3505 1807 JR-1, R.2, VF35 PCGS.** The sole die marriage of the date, and the final dime variety of the Draped Bust design. This is a well-defined example bathed in deep walnut-brown, gunmetal-gray, and ocean-blue toning. UNITED and the upper left obverse stars show softness due to out-of-parallel dies. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

- 3506 1807 JR-1, R.2, VF35 PCGS.** Struck from a clashed state of the dies, representing the only known die pair for the 1807 Draped Bust dime. The coin is well-detailed in the centers but weakly struck along the left margins — frequently a characteristic of lower denominations produced on a screw press. Dusky lavender-gray toning blankets each side. Housed in an old green label holder. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

**BUST DIMES**

- 3507 1811/09 JR-1, R.3, VF30 PCGS.** Only one die variety is known for this elusive issue, showing strong 09 underdigits on each side of the 11 in the date. Any problem-free example of this issue is scarce, regardless of grade. This high-end VF coin displays moderate detail and original pewter-gray surfaces with deeper olive-gray color in the fields. A problem-free coin with strong eye appeal. NGC ID# 236V, PCGS# 38772 Base PCGS# 4487

- 3508 1821 Large Date, JR-7, R.2, XF45 PCGS.** Medium-gray toning displays blue and pale-rose accents on both sides of this lightly worn, Choice XF example. The E is a touch low and the second S in STATES is high, while the 1 is below the left edge of the curl to confirm the JR-7 Large Date variety. Struck from lightly clashed dies, with a few faint lines and tiny marks. NGC ID# 236Y, PCGS# 38797 Base PCGS# 4496

**1822 JR-1 Dime, VG8  
Better Capped Bust Date**

- 3509 1822 JR-1, R.4, VG8 PCGS Secure.** The only dies for the date. A steel-gray representative of this challenging Capped Bust date. Minimally abraded overall, despite one horizontal hair-thin mark above the eagle. Nearly all of LIBERTY and E PLURIBUS UNUM are present, and the peripheral legends are clear. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

- 3510 1831 JR-4, R.2, MS63 PCGS Secure.** A gunmetal-gray and walnut-brown Capped Bust type coin with satiny, unblemished surfaces. Well-struck and pleasing. Although JR-4 is available in circulated grades, Mint State examples are difficult to locate and underrated. NGC ID# 237B, PCGS# 38852 Base PCGS# 4520

**SEATED DIMES**

- 3511 1853-O Arrows, F-106, R.4, MS61 PCGS Secure.** A steel-gray representative with unmarked surfaces and a typical strike. A small spot is noted beneath the O in ONE. The 1853-O is plentiful in well-circulated grades, but surprisingly rare in Mint State. Population: 2 in 61, 10 finer (2/18). PCGS# 538006 Base PCGS# 4604

**1857 Dime, Boldly Struck MS66  
An Important Condition Rarity**

**3512 1857 F-108, R.2, MS66 PCGS.** Available in lower grades, the 1857 Seated dime becomes rare at the Premium Gem level and anything finer is almost unobtainable. This piece is boldly struck, with satiny luster that is devoid of distracting abrasions. Both sides show splashes of aquamarine, amber, violet, and champagne toning. Die chips are visible around stars 2 through 6 and 12 and 13, a diagnostic of the variety. Population: 9 in 66 (2 in 66+), 1 finer (2/18). PCGS# 538098 Base PCGS# 4614

**3513 1880 F-102a, R.4, MS67 NGC.** On the obverse, forest-green and lavender margins frame the orange-red center. The reverse displays splashes of russet and aquamarine. The smooth surfaces are lustrous, and the devices are sharply detailed. Census: 11 in 67 (1 in 67★), 4 finer (2/18).

*Ex: Long Beach Signature (Heritage, 9/2014), lot 3939; Long Beach Signature (Heritage, 1/2015), lot 3688. NGC ID# 23AT, PCGS# 538644 Base PCGS# 4688*

**3514 1887 F-108, R.2, MS67 NGC.** The date is high with a slight downward slope. This colorfully toned Superb Gem example displays strong cartwheel luster and rainbow iridescence throughout both sides. The strike is surprisingly weak around the peripheries, but sharp in the centers — diagnostic of the F-108 die marriage. Weakness at Liberty's head and at the obverse legend (where the first A in AMERICA is filled) carries over to the top of the wreath at its outer elements. Census: 5 in 67, 2 finer (2/18). PCGS# 538728 Base PCGS# 4698

## PROOF SEATED DIMES

**3515 1867 PR64 Cameo PCGS. CAC. Repunched Date. F-103, R.5.** Repunching on the 1, 8, and 7 in the date and a diagonal die line between the bow loops confirm the die marriage. Both sides of this example show strong mirrors and contrast. The central devices are brilliant with varying degrees of green-gold and blue toning around the borders. We note a few small marks and delicate lines. Population: 18 in 64 Cameo, 12 finer; 2 in 64 (1 in 64+) Deep Cameo, 1 finer (2/18). NGC ID# 23CR, PCGS# 84760

**3516 1873 Arrows, F-102, R.4, PR64 NGC.** Lilac-red toning dominates the obverse, save for a blush of ocean-blue near OF AMER. The reverse has a brilliant center and rose-red border. Portions of the upper-left wreath are incompletely struck. The Arrows, Legend Obverse proof subtype is very scarce, struck for only two years. NGC ID# 23DH, PCGS# 539033 Base PCGS# 4769

**1873 Arrows Dime, PR65+  
F-102, Popular Two-Year Type**

**3517 1873 Arrows, F-102, R.4, PR65+ PCGS.** Die defects on Liberty's leg, reflective fields, and needle-sharp definition help confirm the proof origin of this near-Gem Arrows dime from a mintage of 500 coins. Both sides remain mostly brilliant, save for a blush of dusky color at the upper obverse rim. Arrows were added to the design in 1873 after the weight was adjusted upward to an even 2.5 grams. NGC ID# 23DH, PCGS# 539033 Base PCGS# 4769

**3518 1881 F-103, High R.6, PR66 NGC.** A low-mintage date, the 1881 was struck with three proof die marriages. Fortin-103 is the rarest, first reported by John Dannreuther in 2014. The pick-up point is a full first S in STATES. Golden-brown and ocean-blue toning endow this sharply struck and unblemished Premium Gem. NGC ID# 23D6, PCGS# 539051 Base PCGS# 4778

**3519 1883 F-103, R.3, PR65 NGC. Gold CAC.** Even without a loupe, the incredible quality of this piece compared to other Gem proofs that we have seen is immediately apparent. There is a small mark above the N in ONE, but otherwise the surfaces appear almost pristine. The obverse has delicate olive-gold and rose toning, while the reverse displays more traditional rose-gold, blue, violet, and peach in concentric bands. Well-struck and housed in a prior generation holder. NGC ID# 23D8, PCGS# 539053 Base PCGS# 4780

## BARBER DIMES

**3520 1895 MS65 PCGS Secure. CAC.** The 1895 has the lowest mintage of any Philadelphia Barber dime issue. This sharply struck Gem is predominantly steel-gray, but displays lilac and cobalt-blue shades in protected regions. Exceptionally void of contact, and a desirable addition to an advanced holding. CAC: 3 in 65, 11 finer (2/18). NGC ID# 23DV, PCGS# 4806

**3521 1902-O MS64 PCGS.** Frosty original luster and sharp design elements are the hallmarks of this Choice coin, although splashes of gold, lavender, and blue-green border toning add to the eye appeal. The interiors exhibit champagne-gray color. The 1902-O dime is scarce in this grade and rare finer, having circulated extensively at the time of issue. Population: 27 in 64 (3 in 64+), 13 finer (2/18). NGC ID# 23EK, PCGS# 4828

**1905 Dime, Border-Toned MS66+  
A Registry Set Candidate**

**3522 1905 MS66+ PCGS. CAC.** The 1905 Barber dime is elusive in the finer Mint State grades, rare in MS66 and uncollectible for most enthusiasts in finer condition. This Plus-designated CAC coin displays sharp detail and frosty original luster. Brilliant interiors yield to gold and blue border toning. Under a loupe, faint repunching is visible on the base of the 1 and the flag of the 5 in the date. Population: 11 in 66 (3 in 66+), 4 finer. CAC: 7 in 66, 5 finer (2/18). NGC ID# 24FX, PCGS# 4835

**3523 1909-D MS65 PCGS Secure.** The 1909-D is a scarce issue in high Mint State, with only 30 to 40 unduplicated examples estimated to survive in MS65 or finer grades. Just 954,000 pieces were struck — most of the mintage circulated, and few examples were saved. This lustrous Gem displays reddish-tan toning at the margins surrounding pearlescent silver centers. Only tiny marks and abrasions are visible under a loupe. Population: 17 in 65, 36 finer (2/18). NGC ID# 23FC, PCGS# 4851

**1911 Dime, Toned MS67  
An Elite High-Grade Survivor**

**3524 1911 MS67 PCGS. CAC.** Merely 41 grading events are reported in MS67 or better condition at PCGS and NGC combined for an issue that boasts a mintage in excess of 18.8 million coins. This is one of the elite survivors, destined for a fine set of Barber dimes. Vibrant luster emanates from surfaces dramatically toned in shades of russet, orange, rose, and green patina. Strike and preservation are both excellent. A single tick occurs on the 1 in DIME. Population: 25 in 67 (2 in 67+), 2 finer. CAC: 12 in 67, 2 finer (2/18). NGC ID# 23FJ, PCGS# 4857

**3525 1914-D MS66+ PCGS.** Satiny and original, this high-end Premium Gem displays lovely lavender, amber, olive-green, and gold toning over each side with no distracting abrasions. Slight strike weakness is noted on the lower wreath. The 1914-D dime is rare in this grade and finer. Population: 23 in 66 (5 in 66+), 4 finer (2/18). NGC ID# 23FU, PCGS# 4866

**PROOF BARBER DIMES**

**3526 1896 PR65 PCGS.** A fully struck proof with reflective fields beneath a blanket of dusky champagne-gray toning on each side. Some deeper olive hues emerge on the reverse at certain angles. No contact marks are visible on this lightly toned Gem. NGC ID# 23G9, PCGS# 4880

**3527 1897 PR66 Cameo NGC.** A well-contrasted Premium Gem Cameo proof, this 1897 Barber dime exhibits warm russet-gold toning on both sides, with sharp design elements and deeply reflective fields. Under a loupe, the only visible flaw is an old line on Liberty's eyebrow. Census: 15 in 66 Cameo, 26 finer (3/15). NGC ID# 23GA, PCGS# 84881

**3528 1912 PR66 PCGS.** Splashes of blue-green toning are seen in the center of the reverse and right obverse field. Lemon-gold and russet patina are also prominent. Smooth surfaces and a razor-sharp strike confirm the quality. Only 700 proofs were produced. NGC ID# 23GT, PCGS# 4896

**1912 Dime, Beautifully Toned PR67+  
Modest Contrast on Each Side**

**3529 1912 PR67+ PCGS Secure. CAC.** This high-end Superb Gem is needle-sharp and flawlessly struck, with near-flawless preservation. A Cameo designation would have been awarded were it not for beautiful multicolor toning that casts each side in rose-gold, sun-orange, lilac-blue, and mint-green hues. Nonetheless, modest field-device contrast is visible on each side. Population: 14 in 67 (5 in 67+), 0 finer; 5 in 67 (1 in 67+) Cameo, 0 finer. CAC: 15 in 67, 1 finer (1/18). NGC ID# 23GT, PCGS# 4896

**MERCURY DIMES**

**3530 1916-S MS66 Full Bands PCGS.** This Premium Gem is well-struck and mark-free with light gray color near the centers. Beautiful russet, crimson, orange, green, and cobalt-blue iridescence occurs in the fields and near the peripheries. An exquisitely preserved and original 1916-S Full Bands dime.

Ex: New York Signature (Heritage, 7/2004), lot 5849; Long Beach Signature (Heritage, 9/2004), lot 6217; FUN Signature (Heritage, 1/2006), lot 2127; Dallas Signature (Heritage, 12/2017), lot 3610. NGC ID# 23GZ, PCGS# 4909

**1917-D Dime, MS65 Full Bands  
Champagne-Gold Accents**

**3531 1917-D MS65 Full Bands PCGS.** The faintest blushes of peripheral champagne-gold color accent this bright D-mint dime with Full Bands definition. The centers are brilliant and sharply struck. Satiny mint luster glimmers over well-preserved surfaces void of mentionable flaws. Surprisingly few high-grade examples survive from a mintage of 9.4 million coins. Population: 46 in 65 Full Bands, 14 finer (2/18). NGC ID# 23H3, PCGS# 4913

**3532 1918-D MS66 PCGS.** PCGS and NGC combined list only a half dozen Full Bands representatives of the 1918-D dime in MS66 and finer grades. Non-Full Bands coins such as the present one are also rare this fine but are more affordable for budget-conscious collectors. Frosty, bright mint luster is devoid of abrasions and dazzles the eye. Struck slightly unevenly, the right-hand borders are sharp, but the outer edge of the left-hand peripheral legends is weak. The center on each side is also slightly weak, as expected for a non-Full Bands coin. Population: 22 in 66 (1 in 66+), 2 finer (1/18). NGC ID# 23H6, PCGS# 4918

**3533 1918-S MS63 Full Bands PCGS.** MS64 is the median grade for Full Bands examples of the 1918-S Mercury dime. This Select coin is nearly as well-preserved and will appeal to many date and mintmark collectors. A few wisps of lilac appear throughout gold and olive toning on each side. The strike is sharp in the centers but slightly weak along the lower reverse, with metal flowlines visible elsewhere in the margins. No distracting abrasions are observed. NGC ID# 23H7, PCGS# 4921

**3534 1919-D MS62 Full Bands PCGS. CAC.** This attractive MS62 specimen exhibits well-detailed design elements, including Full Bands definition on the fasces. An interesting die crack stretches vertically through Liberty's neck. The lightly marked, lustrous surfaces show highlights of greenish-gold and lavender toning. NGC ID# 23H9, PCGS# 4925

#### 1920-D Dime, MS65 Full Bands Needle-Sharp Strike, Lovely Color

**3535 1920-D MS65 Full Bands PCGS Secure. CAC.** Full Bands coins are rare for the 1920-D, as are examples with a fully struck 0 in the date. This colorful Gem possesses both attributes, with a nearly full strike rim-to-rim on both sides. As the MS65 grade suggests, marks are minimal, limited to a tiny tick on the fasces and a diminutive nick on the nose. Lavender, blue, and golden-rose toning covers both sides of this CAC-endorsed dime. Population: 57 in 65 Full Bands, 32 finer. CAC: 13 in 65, 10 finer (2/18). NGC ID# 23HC, PCGS# 4931

#### 1921 Dime, MS64 Full Bands Entirely Brilliant

**3536 1921 MS64 Full Bands PCGS.** Silver coin production was famously low in 1921 as the American economy was going through a rough patch. The Mint struck 1.2 million dimes, and examples of this quality are scarce. Both sides remain wholly brilliant and exhibit crisp central strike detail. Definition softens a touch around the rims. A couple of tiny flecks define the grade. Struck from rotated dies. NGC ID# 23HE, PCGS# 4935

**3537 1924-S MS64 Full Bands PCGS Secure.** Dappled ocean-blue and chestnut-gold toning graces this lustrous and attractively patinated Choice dime. The surfaces are virtually void of contact, and the strike is sharp aside from minor softness on the tops of the LIB in LIBERTY. A better branch mint issue. NGC ID# 23HL, PCGS# 4947

#### 1928-D Dime, MS66 Full Bands Frosty and Brilliant, Few Coins Finer

**3538 1928-D MS66 Full Bands PCGS. CAC.** A conditionally scarce Gem Full Bands example of this otherwise plentiful Denver issue. The design elements are sharp, and each side displays frosty, brilliant mint luster. Minor strike doubling is evident on the date numerals. This issue is scarce in MS66 and rare finer, with the present coin among the finest endorsed by CAC with Full Bands. Population: 28 in 66 (2 in 66+) Full Bands, 6 finer. CAC: 9 in 66, 0 finer (2/18). NGC ID# 23HY, PCGS# 4969

**3539 1929 MS67 Full Bands PCGS.** This spectacular Superb Gem exhibits sharp design elements and vibrant mint luster throughout with Full Bands definition on the fasces. The surfaces are impeccably preserved, with some areas of mirrorlike die polish on the lower obverse. Population: 91 in 67 (6 in 67+) Full Bands, 1 finer (2/18). NGC ID# 23J2, PCGS# 4973

**3540 1935-D MS67 Full Bands PCGS.** Speckled golden-russet patina over bright surfaces with satin luster suggests an originality that should appeal to discerning specialists. Few marks are seen on each side, but separation between the bands is obvious. Population: 53 in 67 (8 in 67+) Full Bands, 0 finer (2/18). NGC ID# 23JD, PCGS# 4995

**3541 1935-D MS67 Full Bands PCGS.** Plentiful in lower grades, the 1935-D is scarce in MS67 Full Bands and unknown numerically finer. This piece is sharp and frosty, showing mostly brilliant luster with golden accents around the borders. The preservation is outstanding. Population: 53 in 67 (8 in 67+) Full Bands, 0 finer (2/18). NGC ID# 23JD, PCGS# 4995

#### 1942/1 Dime, Sharp MS62 Famous Guide Book Overdate

**3542 1942/1 FS-101 MS62 NGC.** Engraving date numerals into the master dies largely eliminated overdates on 20th century coinage. The 1942/1 overdate is a classic example of a rare Mint hubbing error, and it created a sensation when discovered. By then, many of the affected dimes had circulated and any Mint State examples are scarce. This nearly untuned Uncirculated 1942/1 is softly lustrous with satinlike surfaces and a sharp strike. Both the 4 and 2 show underlying digits, as well as a trace of the hubbing error at 9. Census: 35 in 62, 38 finer (2/18). NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

1942/1 Dime, MS62 Full Bands  
FS-101, Famous Guide Book Variety

- 3543** 1942/1 FS-101 MS62 Full Bands PCGS Secure. This piece may have sat untouched in Whitman or similar folder for an extended period. The obverse, formerly exposed, has developed rich antique patina, while the reverse remains mostly bright with pale sky-blue accents. Both sides are uniformly sharp with a bold overdate and clearly separated central bands. Minute flecks fail to distract. Population: 12 in 62 Full Bands, 38 finer (2/18). NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

1806 B-2 Quarter, VF35  
Violet-Gray Patina

- 3548** 1806 B-2, R.2, VF35 ANACS. Tompkins Die State 1/4. The obverse is in a perfect state, while the reverse exhibits several prominent cracks. B-2 features the C in the denomination close to the branch stem and the upright of the E in STATES over the cloud break. Wispy lines and pleasing violet-gray patina appears over each side. The portrait maintains good detail despite extensive circulation. Certified in a small-sized holder. NGC ID# 23RD, PCGS# 38928 Base PCGS# 5314

## TWENTY CENT PIECE

- 3544** 1875-CC MS61 NGC. BF-2, R.1. This lustrous and lightly toned apricot-gold representative is surprisingly devoid of abrasions. The strike is bold aside from incompleteness on the eagle's breast. A desirable Carson City type coin. NGC ID# 23R6, PCGS# 5297

## PROOF TWENTY CENT PIECES

- 3545** 1875 PR60 PCGS. BF-2, R.4. The BF-2 die marriage is scarcer as a circulation strike than as a proof. That said, the Brunner and Frost reference suggests no more than 10% of all 1875 proofs are of the BF-2 variety with the date further left than BF-1 or BF-3. This proof example is brilliant and uncontrasted with medium mirrors and some delicate lines in the obverse fields, while the reverse displays a pale-gold tinge and slightly greater reflectivity. The strike is sharp throughout both sides. NGC ID# 27GZ, PCGS# 5303
- 3546** 1875 PR62 PCGS. BF-1, R.1. Milky champagne toning graces mirrored fields on each side of this collectible proof 1875 twenty cent piece. Grade-limiting marks are minor, making this piece ideal for the budget-conscious type collector seeking a nice coin for the grade. NGC ID# 27GZ, PCGS# 5303

## EARLY QUARTERS

1796 B-1 Quarter, Good Details  
Clear Date

- 3547** 1796 B-1, R.4 — Plugged — NCS. Good Details. Tompkins Die State 3/3. A crudely plugged hole at 12 o'clock relative to the obverse is visible despite reengraving of LIBERTY and the wreath bow. Other areas of this Small Eagle type coin are unevenly worn, as is often the case with this issue in low grades. The surfaces are microgranular under a loupe but appear smooth to the unaided eye, showing steel-gray color. The date is clear aside from the lower portion of the 6. NGC ID# 23RA, PCGS# 38919 Base PCGS# 5310

## BUST QUARTERS

- 3549** 1825/4/(2) B-2, R.2, AU53 ANACS. Attractive navy-blue and golden-brown toning adorns the margins of this lightly circulated Capped Bust type coin. The left obverse field exhibits moderate contact, while the remainder of the coin shows only trivial marks. Housed in a small-sized holder.  
Ex: Atlanta Signature (Heritage, 8/2001), lot 5867. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

1825/4/(2) Quarter, B-2, AU58  
Attractively Toned on Each Side

- 3550** 1825/4/(2) B-2, R.2, AU58 NGC. Tompkins Die State 1/2. The Browning-2 variety is the most-available of three die marriages for the 1825 issue. All are overdates of some kind. The B-2 overdate resembles a 5 over 3, although current wisdom suggests that is not an option — the underdigit is either a 4 or a 2, or both. Only a touch of wear separates this naturally toned example from a Mint State grade. Blue and rose accents augment medium silver-gray shades. Only a few small marks exist on the sharp and softly lustrous, near-Mint surfaces. Census (all varieties combined): 40 in 58 (1 in 58+), 75 finer (2/18). NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

## SEATED QUARTERS

- 3551** 1843-O Large O, FS-501, VF25 PCGS. A limited number of 1843-O quarters were struck with a large mintmark. Survivors are usually seen in mid- or low-grade circulated condition, and examples are rarely seen finer than the present. Original olive-gray toning appears in the fields, and the lightly worn devices show lighter battleship-gray coloration. Strong detail remains in the eagle's feathers and Liberty's gown, and the surfaces are problem-free. Population (FS-501): 2 in 25, 12 finer (1/18). NGC ID# 23SS, PCGS# 395927 Base PCGS# 5405

**3552 1850-O MS61 PCGS. Briggs 2C.** A scarce issue in Uncirculated condition, the 1850-O usually lacks a good strike and seldom has much eye appeal. This example is sharply struck except for the left-hand stars, which show rounding. The rims and dentils are sharp and the date is bold. Mint luster shines beneath pleasing silver-gray surfaces, while the die rust on Liberty's portrait is not extreme. Population: 4 in 61, 10 finer (2/18). NGC ID# 23T5, PCGS# 5416

**3553 1855 Arrows MS63 PCGS Secure.** More than 2.8 million pieces were struck, making the 1855 Arrows quarter among the most available issues in Mint State. Still, it is somewhat elusive at the Select level — especially with the dappled reddish-gold and silver-lilac surfaces of this sharply struck survivor. Population: 31 in 63 (3 in 63+), 32 finer (2/18). NGC ID# 23U8, PCGS# 5435

**3554 1858-S — Scratch — PCGS Genuine. AU Details. Briggs 2-B.** The 1858-S has a low mintage of 121,000 pieces, and its survival rate was meager, since few if any Gold Rush participants collected coins. When encountered, the '58-S is usually in XF or lower grades. The present lightly circulated example has a good strike and faint wheat-gold toning. Two parallel thin marks cross the lower obverse, and both sides display delicate hairlines.

**3555 1861 MS64 NGC.** Type Two Reverse. The mintage of the 1861 Philadelphia quarter was about eight times greater than its 1860 predecessor, mostly because bullion imports were significantly larger in 1861. The present lustrous near-Gem has faint straw-gold toning, a sharp strike, and splendidly smooth surfaces. NGC ID# 23TT, PCGS# 5454

**3556 1874-S Arrows MS65 PCGS. Briggs 1-A.** This is a bright and lustrous Gem on the obverse, with hints of orange toning along the left margin. While the reverse is similar, it displays a subtle umbrella of pale-blue and light orange-gold toning near the top. This issue comes sharply struck, and it is always in demand as a short-lived type coin. Arrows at the date signify a small adjustment in silver content. The seemingly insignificant change in weight was important, as the government tried to keep balance between gold and silver, so both types of coins could circulate freely. Population: 50 in 65 (1 in 65+), 41 finer (2/18).

*From The Glacier Park Collection.* NGC ID# 23VY, PCGS# 5495

**3557 1875 MS65 NGC.** Type One Reverse with wide feet on the A in STATES. Golden-brown and apple-green toning blankets this sharply struck and coruscating Gem. Impressively devoid of contact, and housed in a pre-hologram holder. Census: 35 in 65 (2 in 65+, 1 in 65★), 18 finer (2/18). NGC ID# 23UX, PCGS# 5498

**3558 1880 MS65 PCGS. Briggs 1-A.** This sharply struck Gem displays traces of golden patina along the left-side borders. Lustrous with smooth fields and one minor reed impression on Liberty's chest. A scant 13,600 pieces were produced. Population: 43 in 65, 51 finer (2/18). NGC ID# 23VC, PCGS# 5512

**3559 1888 MS65 PCGS. Briggs 1-A.** Only 10,000 quarter dollars were struck at Philadelphia in 1888, although heavy preservation of the issue in the 19th century accounts for its collectibility today in Mint State. This Gem is frost-white, lustrous, and mostly well-struck with few marks viewable upon close inspection. A high-end example for the grade.

*Ex: Dallas Signature (Heritage, 11/2005), lot 1281.*

*From The Glacier Park Collection.* NGC ID# 23VL, PCGS# 5520

## PROOF SEATED QUARTERS

### 1860 Seated Quarter, PR65

#### Conditionally Scarce

**3560 1860 PR65 PCGS. Briggs 9-H.** Type One Reverse. Mint records indicate that 1,000 proof 1860 quarters were struck, although Walter Breen noted that as few as 542 pieces may have actually been sold to collectors. Gem survivors are scarce. This is a deeply mirrored, golden-toned example with modest field-device contrast on each side. There are no distracting contact marks. The slightest hint of golden toning warms the surfaces. Population: 18 in 65, 9 finer; 8 in 65 (3 in 65+) Cameo, 3 finer (2/18).

*Ex: Baltimore Signature (Heritage, 7/2003), lot 6961.*

*From The Glacier Park Collection.* NGC ID# 23WM, PCGS# 5556

**3561 1867 PR65 NGC. Briggs 2-B.** A die lump on the lower drapery confirms the proof dies. The strike is sharp across the lightly frosted, virtually unmarked motifs of this Gem mirrored proof. Original blue and reddish-gold toning is deepest at the margins, lightening to pale translucent gold at the centers. A glass reveals a few deep freckles and some inconsequential, delicate field lines. The post-war proof mintage was average (625 pieces struck), but the 1867 is in extra demand because of a low circulation-strike mintage — only 16,000 pieces. Census: 25 in 65, 19 finer (2/18). NGC ID# 23WY, PCGS# 5566

### 1891 Quarter, Toned PR67

#### Final-Year Proof Type Coin

**3562 1891 PR67 PCGS. Briggs 1-A.** Rotation beneath a light exhibits rich peach, olive-gold, lilac, and blue-green toning. The deeply mirrored fields are undisturbed beneath the rich patina. The strike is sharp, and the surfaces are clearly original. In the final year of the Seated quarter series, proof coinage amounted to only 600 pieces, and Superb Gem survivors are scarce. Encased in an old green label holder. Population: 4 in 67, 10 finer (including eight Cameos and one Deep Cameo) (2/18).

*Ex: Long Beach Signature (Heritage, 5/2008), lot 364; ANA Signature (Heritage, 7-8/2008), lot 261.* NGC ID# 23XP, PCGS# 5592

## BARBER QUARTERS

1893 Barber Quarter, MS66+  
Only One Finer Coin at PCGS

- 3563 1893 MS66+ PCGS. CAC.** A spectacular Plus-graded Premium Gem, from the second year of the Barber design, this coin exhibits sharply detailed design elements throughout, and the well-preserved surfaces radiate vibrant mint luster, under attractive shades of lavender and greenish-gold toning. Population: 21 in 66 (7 in 66+), 1 finer. CAC: 10 in 66, 1 finer (2/18). NGC ID# 23XW, PCGS# 5604

1893-O Quarter, Sharp MS66  
Frosted and Appealing New Orleans Type

- 3564 1893-O MS66 PCGS Secure.** Delicate caramel-gold and pearl-gray toning graces this lustrous and sharply struck early branch mint Premium Gem. The coin is splendidly preserved, with merely a few faint grazes on the portrait — none of which inhibit the eye appeal or brilliant frosted luster. Population: 14 in 66 (1 in 66+), 4 finer (2/18). NGC ID# 23XX, PCGS# 5605

1896-S Quarter, Uncirculated Details  
Sharp and Toned

- 3565 1896-S — Improperly Cleaned — NGC Details. Unc.** An unworn example of this key San Francisco issue, that shows glossy surfaces that have retoned since being lightly cleaned. Gold, russet, lavender, and gunmetal-blue toning blankets each side. No major abrasions are seen. Only 188,039 coins were struck of this date and mint, making it one of the three keys in the Barber quarter series. Problem-free Uncirculated examples are rare. NGC ID# 23Y9, PCGS# 5615

- 3566 1901-S — Improperly Cleaned — NCS. Good Details.** The 1901-S stands out among its peers with a meager production total of 72,664 coins. Only the 1913-S has a lower mintage, but this issue is considerably scarcer. The cleaning is entirely inoffensive, rendering well-worn surfaces a light steel-gray hue.

1902-S Barber Quarter, MS65  
Original Lavender-Gray Patina

- 3567 1902-S MS65 PCGS.** From a mintage of 1.5 million pieces, the 1902-S Barber quarter is rare at the MS65 grade level. This attractive Gem exhibits well-preserved, lustrous surfaces and sharp design elements under shades of lavender-gray and golden-brown toning. Population: 11 in 65 (1 in 65+), 12 finer (2/18). NGC ID# 23YU, PCGS# 5633

- 3568 1906-D MS65 NGC.** Satiny with a delicate champagne hue, this Gem 1906-D Barber quarter is not only conditionally scarce, it is attractive. Stars 3 and 11 show strike weakness, as do the eagle's right (facing) talons and the right shield corner. Neither side exhibits a notable abrasion. Census: 17 in 65, 1 finer (2/18). NGC ID# 23Z6, PCGS# 5643

- 3569 1909-O — Cleaned — NGC Details. Unc.** A hint of light golden color accents the satiny silvery-gray surfaces of this unworn 1909-O Barber quarter. Luster is diminished by a light cleaning, but a lack of severe abrasions gives the coin some appeal. The 1909-O is a scarce date in Uncirculated condition. NGC ID# 23ZJ, PCGS# 5655

- 3570 1913-S Good 6 PCGS.** Most key-date 1913-S quarters survive in AG to Good condition, having been plucked from circulation by collectors during the 1930s. Clear outlines of the major motifs remain. Each side displays mixed shades of light steel and deep gray patina. One of only 40,000 coins minted. NGC ID# 23ZW, PCGS# 5666

- 3571 1913-S VG8 PCGS.** The lowest mintage regular-issue Barber quarter. From the production of 40,000 pieces, survivors are collected in all grades. This example is well-defined for the Very Good level. The silver-white and charcoal-gray surfaces are unblemished. Housed in an old green-label holder. NGC ID# 23ZW, PCGS# 5666

- 3572 1916-D MS67 NGC.** A spectacular Superb Gem from the final year of the design, with well-detailed design elements and vibrant mint luster, under vivid shades of champagne-gold, violet, and amber toning. Census: 15 in 67 (2 in 67+, 2 in 67★), 1 finer (2/18). NGC ID# 2426, PCGS# 5674

## PROOF BARBER QUARTER

- 3573 1892 PR65 PCGS Secure.** Type Two Reverse. A medley of lovely pastel shades include sea-green, robin's egg-blue, and peach-red colors throughout both sides of this Gem proof. Sharply struck, frosted devices share the same attractive patina as the reflective fields for little overt contrast, yet the effect is visually impressive nonetheless. Population: 31 in 65 (1 in 65+), 48 finer (2/18). *From The Property of a Lady, Part II.* NGC ID# 2427, PCGS# 5678

## STANDING LIBERTY QUARTERS

- 3574 1917 Type One MS66 Full Head NGC.** Satiny, luminous mint luster glistens on each side of this high-end Full Head type coin, illuminating fully struck design elements and pristine surfaces. Delicate blue-green and champagne hues encompass the obverse, while the reverse displays warmer gold toning that deepens toward the borders. NGC ID# 242Z, PCGS# 5707

- 3575 1917 Type One MS66+ Full Head PCGS.** Struck from a slightly later die state that produces vibrant, frosty luster on each side of this high-end Full Head 1917 Type One quarter. The strike is sharp as usual, and a small mark on Liberty's outstretched arm is the only imperfection of note. A hint of light champagne toning graces each side. NGC ID# 242Z, PCGS# 5707
- 3576 1917-S Type One MS65 Full Head PCGS.** Original luster emerges from beneath dappled olive-russet toning on each side of this well-preserved Gem Type One quarter. The strike lacks nothing in sharpness, and a few small abrasions are well-hidden by the patina. The 1917-S is the scarcest Type One issue of this year in high grade Full Head. NGC ID# 2433, PCGS# 5711
- 3577 1917 Type Two MS66 Full Head PCGS.** Frosty mint luster complements warm orange-gold and lavender toning on this high-end Full Head coin. The shield rivets are a trifle soft as usual, as well as the eagle's breast feathers. Exceptionally well-preserved surfaces place this coin in a conditionally scarce grade, with only 15 finer Full Head pieces reported at PCGS (2/18). NGC ID# 2434, PCGS# 5715
- 3578 1918-S MS63 Full Head PCGS.** Even Gem or finer 1918-S quarters are often softly struck on the shield rivets, yet this brilliant and razor-sharp Select Uncirculated example is unusually well-struck. Shield rivets 3 and 4 show only minor weakness. A Full Head and five full toes represent the sharp strike top-to-bottom, and the eagle's wing edges are crisp. Brilliant silver luster flows across nearly unmarked frosted surfaces, with just a couple of reverse luster grazes. NGC ID# 2439, PCGS# 5725
- 3579 1921 MS65 PCGS.** A hint of champagne toning graces the frosty, mostly unabraded surfaces of this Gem 1921 quarter. The shield rivets are well-defined as usual, and Liberty's head exhibits characteristic softness at the temple. Die wear produces strike weakness around the border on each side. NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS64 Full Head  
Golden-Gray Semikey**

- 3580 1921 MS64 Full Head PCGS Secure.** The Mint restricted quarter dollar production to 1.9 million coins in 1921, creating a semikey in the process. An overlay of dusky golden-gray patina covers needle-sharp motifs, specifically the chain mail, rivets, shield, and Liberty's temple. The tops of the date digits and the eagle's breast are the only areas of softness. Glistening underlying mint luster. NGC ID# 243H, PCGS# 5741
- 3581 1924 MS65 Full Head PCGS.** Struck from worn dies but still sharp in most areas, with only partial incompleteness on the shield rivets. This tan-gold Gem displays frosty, luminous surfaces with no distracting abrasions. Suitable for a high-end Standing Liberty quarter collection. NGC ID# 243L, PCGS# 5747
- 3582 1925 MS66 Full Head PCGS. CAC.** The 1925 is the first issue in the series with recessed date numerals, and high-end Full Head coins are underrated compared to some other dates in the series. This piece boasts sharp head detail and delineated toes, with nearly full detail on the shield rivets. Satiny mint luster shows peach-gold and olive-russet toning in a woodgrain pattern. Population: 82 in 66 (3 in 66+) Full Head, 14 finer. CAC: 15 in 66, 4 finer (2/18). NGC ID# 243P, PCGS# 5753

- 3583 1927-D MS64 Full Head PCGS.** Liberty's head is sharp and the shield rivets are mostly defined, but the toes and bottom two stars are weak as usual. This satiny near-Gem exhibits only light luster grazes and has a hint of champagne-gray toning. The 1927-D is a slightly better date in high grade. NGC ID# 243V, PCGS# 5763

## WASHINGTON QUARTERS

- 3584 1932-D MS63 PCGS Secure.** Both the 1932-S and 1932-D issues anchor the Washington quarter series, although the Denver Mint issue is scarcer in mid-to-high Uncirculated grades by many multiples. Dappled golden-gray freckles cover the obverse of this lustrous and well-struck 1932-D, while the reverse is brilliant-white and equally sharp. Marks are limited to a tiny one in the strands beneath R in LIBERTY. NGC ID# 2448, PCGS# 5791
- 3585 1932-D MS63 PCGS Secure.** The mintage was low — just 436,800 pieces — as one might expect for the country in the midst of a Great Depression. Along with the 1932-S, the 1932-D represents the key Washington quarter issue, and Uncirculated examples are always in high demand. Soft mint luster glows beneath sharply struck lilac-gray surfaces of this Select Mint State example. A few flecks of deeper toning confirm the original surfaces. NGC ID# 2448, PCGS# 5791
- 3586 1932-D MS64 PCGS.** In Gem condition, both the 1932-D and 1932-S become conditionally scarce and are major stoppers for many collectors. This Choice 1932-D is nearly as well preserved and is much more accessible. Sharp design elements and satiny luster join dusky golden toning on each side. A few small abrasions do not detract. NGC ID# 2448, PCGS# 5791
- 3587 1932-D MS64+ PCGS.** This satiny coin is vibrantly lustrous and sharply struck. Brilliant interiors yield to yellow-gold border toning on each side. Only a few tiny marks on Washington's cheek prevent full Gem classification from PCGS. The 1932-D is one of the two major key dates in the series and is highly sought-after in all grades. NGC ID# 2448, PCGS# 5791
- 3588 1932-S MS65 PCGS.** The two mintmarked 1932 issues are known to even casual hobbyists as the keys to the long-lived Washington quarter series. The 1932-S has the lowest mintage but is nonetheless more available in better grades than its chief rival, the 1932-D. The present Gem exhibits booming luster and sharp devices. Dappled olive and khaki-gold toning further attests to the originality. PCGS lists only four finer representatives (2/18).  
*Ex: FUN Signature (Heritage, 1/2013), lot 4768.*  
**From The jwb1040 Collection, Part II.** NGC ID# 2449, PCGS# 5792
- 3589 1938 MS67+ PCGS.** In terms of numeric grade, this 1938 Washington quarter is conditionally scarce and among the finest at PCGS. In terms of eye appeal, it is in a small minority of elite Registry-grade coins. Satin mint luster yields delicate rainbow toning on each side in pastel hues. The strike is sharp, and the preservation is virtually flawless. Population: 88 in 67 (10 in 67+), 0 finer (2/18).  
**From The jwb1040 Collection, Part II.** NGC ID# 244N, PCGS# 5806
- 3590 1941-D MS67+ PCGS. CAC.** Exceptional preservation and vibrant luster give this golden-toned Superb Gem exceptional visual appeal. The strike is sharp throughout. The 1941-D Washington quarter is scarce this fine at PCGS, and only a few higher-grade pieces are known. Population: 63 in 67 (12 in 67+), 3 finer. CAC: 35 in 67, 3 finer (2/18).  
**From The jwb1040 Collection, Part II.** NGC ID# 244Y, PCGS# 5815

**1950 Quarter, MS67+**  
**Delicately Toned, Tied for Finest**  
**Doubled Die Reverse**

- 3591 1950 Doubled Die Reverse, FS-801, MS67+ PCGS.** A Registry Set essential, this high-end Superb Gem 1950 quarter is CAC-approved as one of the finest certified by either service. The strike is bold, and the preservation is nearly flawless. Both sides display satiny champagne luster with iridescent hues near the extreme outer peripheries. FS-801 shows bold die doubling on the reverse at the eagle's beak and is rare this fine. Population (all varieties included): 71 in 67 (8 in 67+), 0 finer; (FS-801) 7 in 67 (2 in 67+), 0 finer (2/18).  
*From The jub1040 Collection, Part II.* NGC ID# 245S, PCGS# 145633 Base PCGS# 5841

- 3592 1962 MS67 PCGS. CAC.** Splendid apricot and apple-green peripheral toning enhances the already superb eye appeal of this almost flawless Registry Set candidate. The strike is sharp, and a loupe reveals no mentionable imperfections. The 1962 is an elusive late-date silver issue in high grade; the present piece is among the finest at PCGS and CAC. Population: 24 in 67, 0 finer. CAC: 13 in 67, 0 finer (2/18).  
*Ex: FUN Signature (Heritage, 1/2004), lot 6497.*  
*From The jub1040 Collection, Part II.* NGC ID# 246P, PCGS# 5872

**PROOF WASHINGTON QUARTER**

**1950 Quarter, PR65 Deep Cameo**  
**Conditionally Rare in Gem or Finer Grades**

- 3593 1950 PR65 Deep Cameo PCGS.** Frost-white motifs rise above silver-mirrored fields, a rarity among 1950 proof quarters, which are seldom seen with any degree of contrast. Brilliant and unblemished, this meticulously preserved example is untoned except for a hint of pale gold at the lower-reverse legend. The mintage of 51,386 proofs has yielded fewer than two dozen Deep Cameos at PCGS and NGC combined. Population: 2 in 65 Deep Cameo, 6 finer (1/18). NGC ID# 27HW, PCGS# 95982

**EARLY HALF DOLLARS**

- 3594 1794 O-101, T-7, High R.3 — Damaged — NCS. VG Details.** The centers show moderate marks and digs along with crude repair work that weakens the definition of the central devices. However, the portrait and eagle remain mostly outlined. The rims are weakened at 8 and 2 o'clock on both sides due to the repair work. On the reverse, UNITED STATES (OF) AMERICA is clear, but OF is effaced. The obverse shows LIBER(TY), the 4 in the date, and several stars plainly, but is weak on the T in LIBERTY and the 9 in the date. The Y and 17 are effaced. Steel-gray color is uniform over both sides. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

- 3595 1794 O-101a, T-7, High R.3, AG3 NGC.** Tompkins Die State 1/5. The late die state crack at OF is visible, and the reverse rim is bold. The obverse rim is worn smooth with the date barely discernible. LIBERTY and most of the stars are plain, and all reverse legends are clear. The eagle is worn away, but Liberty's profile is well-outlined. Each side offers smooth lavender-gray surfaces and is pleasing for the grade. Some of the loss of detail is due to the coin's late die stage, with bi-level sinking of the die on the central-to-upper reverse. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1795/1795 Flowing Hair Half Dollar, VF30**  
**2 Leaves, O-112, T-20**

- 3596 1795/1795 2 Leaves, O-112, T-20, R.4, VF30 NGC.** Tompkins Die State 4/1. The scarce O-112 die pair showcases one of the most dramatic date-punching blunders in U.S. Mint history — merely calling the spread south “wide” is underselling how incredible it is. A richly toned Choice VF example, the coin shows a range of shadings, from dusky-gold to green and slate-gray. Struck from a late state of the obverse die, the coin also displays one of the most distinctive die cracks of the early half series, with a bold, bisecting die crack that descends from the edge above R in LIBERTY, through the portrait at Liberty's earlobe, and to the 9 in the date. The BE in LIBERTY is broadly recut. Strong detail remains beneath the patina, with a few small marks and areas of minor roughness. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

- 3597 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4 — Scratched — ANACS. Fine Details, Net VG8.** Tompkins Die State 5/2. A ragged die break with a cud beneath the bust tip provides immediate identification of the obverse die, with the O-113a die marriage confirmed by 9 berries left and right on the reverse. Four short cuts in the obverse field, now toned over and softened by wear, accounts for the net grade. The surfaces display natural bluish-gray toning with sharp definition on the rims and motifs despite substantial wear. Housed in an old generation small ANACS holder.

- 3598 1803 Large 3, Small Reverse Stars, 12 Arrows, O-101, T-1, R.3, VF35 ANACS.** Cream-white high points complement gunmetal fields. A lightly abraded example that shows a mostly complete E PLURIBUS UNUM, though the LU is partial. The left wing and the curls near the ear are well-defined. Certified in a small-sized holder. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

**1803 O-103 Half Dollar, Attractive AU53  
Large 3, Large Reverse Stars**

**3599** 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, AU53 PCGS. Tompkins Die State 2/3. The obverse is shared with O-101 and O-102, while the Large Stars reverse defines Overton-103. This still-lustrous example approaches the Choice level with attractive iridescent toning throughout both sides. The reverse is sharply struck while the obverse shows a bit of softness on Liberty's central hair strands. The variety is rare in Uncirculated condition, increasing demand for attractive About Uncirculated representatives. Population (all Large 3 varieties): 11 in 53, 25 finer (2/18). NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

**1805 O-111, T-3 Half Dollar, AU53  
Original Patina, Late Die State**

**3600** 1805 O-111, T-3, R.2, AU53 NGC. Tompkins Die State 3/4. A textbook example of the late die state — ideal for Bust half collectors who specialize in interesting die cracks and near-terminal die stages. The obverse was lapped to remove clashing, and the reverse shows a heavy crack from the top of STAT(ES) through OF AMERICA to beyond the eagle's tail. A pair of cracks make a "T" intersection with the main crack — one between A and M to the wing, and another from the base of the I through the olive leaves to the bottom of the right (facing) wing. Another bold crack runs along the top of UNIT. About half of the field stars are gone in this late die state, as are parts of the clouds. Weakness occurs at OF and the eagle's right wingtip. Sharp detail on Liberty's hair strands and the rest of the eagle confirm the AU53 grade. Steel-blue and gold accents retain mint luster and complement the original, warm-gray patina. NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

**1806 Half Dollar, AU53  
O-106, Knob 6, Small Stars**

**3601** 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU53 PCGS. Tompkins Die State 2/1. The 8 in the date is minutely recut on this variety, with two prominent die scratches on the reverse — one from the upper-right shield corner, the other from the eagle's tail to the arrow fletchings. The present coin is partially lustrous and shows almost no wear, although some strike weakness occurs on the stars and clouds above and to the right of the eagle's head, as well as on Liberty's lower bust. Silvery interiors cede to russet and olive border toning. Population (all Knob 6, Small Stars varieties combined): 6 in 53, 10 finer (2/18). NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

**1806 No Stem Half Dollar, O-109, AU53  
Pointed 6, Draped Bust Type Coin**

**3602** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU53 PCGS. Tompkins Die State 1/2. This Pointed 6, No Stem half dollar enjoys strong remaining detail on the hair curls and wing feathers. Definition is slightly softer on the eagle's head, neck, and tailfeathers. Champagne-gold and steel-gray patina covers relatively smooth, minimally marked surfaces that radiate partial luster from the recesses. A great problem-free Draped Bust type coin. Struck from an early die stage. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

**3603** 1806 Pointed 6, Stem, O-120a, T-28, R.4, XF45 NGC. In late die states, the reverse of O-120 features a large internal die break on the shield, just below the horizontal crossbars. A pleasing representative with rich forest-green peripheral patina. We note only a slight rim knock above the second S in STATES. Ex: FUN Signature (Heritage, 7/2010), lot 3660. NGC ID# 24EJ, PCGS# 39326 Base PCGS# 6071

**1807 O-102 Draped Bust Half, Colorful AU53  
Light Toning, Luster Remains**

- 3604** 1807 Draped Bust, O-102, T-8, R.2, AU53 NGC. Tompkins Die State 2/2, an early to middle state of the dies. Aquamarine and gold toning at the margins yields to stone-gray patina on the obverse, but the reverse is more comprehensively toned in the same colorful shades. All of the motifs retain sharp definition despite numerous light marks and slight wear from circulation. Overton-102 is a readily available Draped Bust die marriage, and favored among type collectors for that reason. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

**1807 Draped Bust Half, AU50  
O-103, Scarce in About Uncirculated**

- 3605** 1807 Draped Bust, O-103, T-11, R.3, AU50 PCGS. Tompkins Die State 2/2. The obverse has a fine die crack from star 7 to LI and the top of the head. No reverse die cracks are evident. A delightful example, this scarce 1807 Draped Bust half dollar has bright, untuned silver surfaces that retain hints of luster. The devices are slightly subdued, and both sides show multiple die clashing. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

**BUST HALF DOLLARS**

**1807 Capped Bust Half Dollar, VF Details  
O-111b, Bearded Goddess Variety**

- 3606** 1807 Capped Bust, Bearded Goddess, O-111b, R.5 — Improperly Cleaned — NCS. VF Details. The 5 in the denomination is punched over a 2, and the die crack connecting Liberty's chin to the breast is nearly fully formed — an identifying mark for the so-called "Bearded Goddess" variety. That crack actually extends up to the eye and through the forecurls on this piece. The design elements are well-worn with better central detail on the obverse. An improper cleaning has rendered each side light silver-gray and moderately hairlined. Areas of deeper gray color are seen. *From The Jub1040 Collection, Part II.* NGC ID# 24EN, PCGS# 39358 Base PCGS# 39357

**1811 Bust Half, MS62  
Small 8, O-110**

- 3607** 1811 Small 8, O-110, R.1, MS62 PCGS. The 8 in the date is smaller than the surrounding 1s, and all four digits lean sharply left. Silver luster shines through a thin veneer of lilac-gray toning on this frosted O-110 example. The strike is sharp on the central devices, with slight weakness from stars 6 to 10 and on the cap folds. Flat areas on the rim at about 6 and 12 o'clock are noted, seemingly Mint-related in nature. Population (all Small 8 varieties): 29 in 62 (2 in 62+), 84 finer (2/18). NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

- 3608** 1821 O-106, R.1, MS62 PCGS. A nearly horizontal die line above the base of the shield is the pick-up point for Overton-106, one of only seven die marriages for the date. This well-struck example displays ocean-blue, lilac, and straw-gold toning. The satiny surfaces are refreshingly free from abrasions. NGC ID# 24FF, PCGS# 39584 Base PCGS# 6128

- 3609** 1821 O-107, R.3, AU58 PCGS. Rotation beneath a light reveals rich forest-green, golden-brown, and navy-blue patina. Satiny and sharply struck with uncommonly unmarked surfaces. The O-107 is the scarcest 1821 die marriage, and is most easily identified by the proximity of star 7 with the left corner of Liberty's cap. NGC ID# 24FF, PCGS# 39586 Base PCGS# 6128

- 3610** 1828 Square Base 2, Small 8s, Large Letters, O-112, R.3, MS60 PCGS. Rich sea-green, rose-red, and sun-gold toning encompasses this satiny and unmarked Bust half dollar. Portions of the peripheries are incompletely brought up, but the eye appeal is nonetheless significant. Certified in an old green-label holder. NGC ID# 24FR, PCGS# 39766 Base PCGS# 6151

- 3611** 1830 Small 0, O-107, R.2, MS61 NGC. A conditionally rare die marriage, seldom seen in Mint State. The present example displays rich steel-gray, forest-green, and autumn-brown toning. Luster accompanies the design elements, and marks are limited to thin lines above star 8 and below the UN in UNUM. NGC ID# 24FU, PCGS# 39817 Base PCGS# 6156

**1831 Bust Half, Lustrous Near-Gem  
O-103, Pleasing Surfaces**

- 3612** 1831 O-103, R.1, MS64 PCGS. CAC. The stand of the 5 in the denomination is recut, and a wispy die crack connects the bases of the date digits. This is a sharply struck and lustrous near-Gem with essentially brilliant surfaces and an ephemeral hint of almond-gold patina. The fields are well-preserved. A faint vertical mark on the cheek and a tiny tick on the nose are the only marks worthy of mention. *Ex: Long Beach Signature (Heritage, 6/2004), lot 8393.* *From The Glacier Park Collection.* NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

- 3613 1831 O-115, R.4, MS62 PCGS Secure.** This Overton variety features a unique reverse with the middle line of the third vertical stripe extended beyond the lowest tip of the shield. Each side exhibits a ring of gunmetal patina around the rims. Patina lightens in the centers to shades of antique golden-gray. Soft luster, good strike detail, and relatively clean fields add to the original eye appeal. NGC ID# 24FV, PCGS# 39852 Base PCGS# 6159

**1832 Small Letters Half, MS64  
O-103, Recut 5 in 50C**

- 3614 1832 Small Letters, O-103, R.1, MS64 NGC. CAC.** Shades of peach-gold and blue cover the smooth obverse, while dove-gray, amber-gold, and blue toning appear on the reverse of this attractive O-103 half. The surfaces are brightly lustrous and satiny, with plentiful eye appeal for the near-Gem grade. The variety is known for its recut 5 in the denomination, with a diagnostic die lump in the drapery fold above the 18 in the date. Housed in a prior-generation NGC holder (pre-barcode) with the early NGC full-width hologram.  
*Ex: Allstate Coin Co. (8/1992); ANA Signature (Heritage, 8/2016), lot 4682. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160*

- 3615 1832 Small Letters, O-105, R.3, MS62 NGC.** Light tan toning graces the borders of this lustrous and impressively mark-free representative. The major devices show a sharp strike, although the stars are mostly flat and slightly drawn to the edge. The date is low and nearly joined to the rim, approaching the O-105a late die stage. Tied at the low end of the Condition Census, according to both the Parsley and Stephen Herrman listings (2/18). NGC ID# 24FW, PCGS# 39862 Base PCGS# 6160

- 3616 1833 O-102, R.1, MS61 NGC. CAC.** Dove-gray and honey-gold patina. A lustrous, satiny Mint State representative that displays refreshingly undisturbed surfaces, rewarded by CAC endorsement. Sharply struck aside from the upper horizontal shield lines and a few letters in PLURIBUS.  
*Ex: Long Beach Signature (Heritage, 9/2003), lot 7028; Summer FUN Signature (Heritage, 7/2011), lot 3616.*  
**From The jub1040 Collection, Part II.** NGC ID# 2CN4, PCGS# 39888 Base PCGS# 6163

- 3617 1834 Large Date, Large Letters, O-103, R.2, MS63 PCGS Secure.** Golden-brown and olive-green toning blankets this lustrous and lovely Select Capped Bust half dollar. Marks are uncommonly few, though the strike is incomplete near the juncture of the eagle's left (facing) wing. Overton-103 is often attributed by an overlong tail feather that reaches the inner olive branch. NGC ID# 24FY, PCGS# 39907 Base PCGS# 6164

**1834 Bust Half, MS64  
O-116, Small Date, Small Letters**

- 3618 1834 Small Date, Small Letters, O-116, R.1, MS64 NGC.** The drapery clasp has a bold double outline, among the diagnostics for the collectible O-116. A tiny "worm" in the field below star 1 may be the remnant of a previous impression of bust drapery, and on the reverse an outer tailfeather pierces the two upper olive leaves, where it extends to the underside. Freckles of tan-gold and ocean-blue toning accompany this Choice half dollar, but the majority of the satiny and unmarked surfaces are pearl-gray. As usual for O-116, several of the star interiors are flat, and slight weakness on the scroll exists at UR of PLURIBUS. NGC ID# 24FY, PCGS# 39921 Base PCGS# 6166

**SEATED HALF DOLLARS**

**1839 No Drapery Seated Half, Original AU50  
Popular One-Year Type**

- 3619 1839 No Drapery, WB-101, Die Pair 4, R.4, AU50 PCGS.** A first- and one-year type, the 1839 No Drapery Seated half dollar is decidedly rare in Mint State, leaving high-grade circulated pieces to fill the slot for most collectors. This AU example boasts dove-gray surfaces with charcoal-gray accents around all devices — an original, attractively toned coin. Population: 22 in 50, 87 finer (2/18).  
*Ex: Summer FUN Signature (Heritage, 7/2011), lot 3634. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230*

**1846-O Half Dollar, AU50  
WB-106, Scarce Tall Date Variety**

- 3620 1846-O Tall Date, WB-106, Die Pair 24, R.5, AU50 NGC.** When the cataloger once shared an 1846-O half dollar with an old-time coin dealer, asking if it was a Tall Date, that dealer replied by asking, "How much is it?" That was the day that the diagnostics were committed to memory. The lower right serif and the crossbar are clearly separated on the Tall Date, and they lightly touch on the Medium Date. This example has minor grade-consistent marks on its light silver surfaces with peripheral blue, gold, and iridescent toning. Census: 3 in 50, 13 finer (2/18). NGC ID# 24H9, PCGS# 572053 Base PCGS# 6256

**1853 WB-101 Half Dollar, Lustrous MS64  
Single-Year Arrow and Rays Type**

- 3621 1853 Arrows and Rays, WB-101, MS64 PCGS.** More than 3.5 million pieces were struck in Philadelphia of the one-year Arrows and Rays type, yet Gem examples are few and far between for collectors. This brilliant and frosted near-Gem is a suitable alternative, with sharply struck motifs and only minor marks. Housed in a first generation rattler holder, the coin radiates cartwheel silver luster across both sides. PCGS reports just 27 numerically finer pieces (2/18). NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275
- 3622 1857 WB-101 MS64 NGC.** Lavender-red and sea-green toning embraces this intricately impressed and coruscating Choice No Motto half. Contact is minimal, though a small flan flaw is located near star 13. Encased in a first generation holder. Census: 23 in 64, 13 finer (2/18). PCGS# 572099 Base PCGS# 6290
- 3623 1874 Large Arrows, WB-102, MS62 PCGS.** More than 2.3 million pieces were struck, yet Mint State examples — although available — are not in any sense common. The Large Arrows variant is, by far, the most often seen and a popular selection for the two-year type. Deep gunmetal-blue toning overlays shades of olive-gold on this attractive example. Slight weakness exists at stars 7 and 8, as well as Liberty's upper hair strands. Only small marks exist, visible under magnification. NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346
- 3624 1874 Large Arrows, WB-102, MS63 PCGS.** Dusky powder-blue and olive-gray toning visits this lustrous and lightly abraded Seated type coin. The strike is crisp except on the eagle's left (facing) ankle. The Arrows, Motto design was coined for only two years. NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

- 3625 1875-S Very Small S, WB-101, Die Pair 21, R.3, MS64 PCGS.** Dappled, dusky golden-brown toning resides on the fully lustrous surface of this frosty near-Gem Seated half dollar. This is an excellent candidate for a high-grade type set or advanced date and mintmark collection of Seated halves. PCGS has certified 85 finer examples, all varieties included (2/18). NGC ID# 24KE, PCGS# 572229 Base PCGS# 6351

- 3626 1884 Repunched Date, WB-102, MS64 PCGS Secure.** The base of the 4 is lightly repunched, characteristic of the entire business mintage of just 4,400 pieces. This nicely struck and well-preserved near-Gem shows semiprooflike surfaces. The orange-gold toning is faint except on the right reverse and between the ES in STATES. NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

- 3627 1890 WB-101 MS64 PCGS Secure.** All known 1890 half dollars are WB-101, defined as a Normal Date variety. This Choice example is semiprooflike in the fields but unfinished in the reverse shield recesses. The strike is sharp, and abrasions are at a minimum. Brilliant interiors cede to amber-gold and violet at the borders. NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

- 3628 1891 WB-101 MS63+ PCGS.** A high-end example for its Select Uncirculated grade, signified by the PCGS Plus designation. Mostly silver-white surfaces display a thick mantle of mint frost, with a few light luster grazes but no serious marks. Traces of almond-gold and light-gray toning add originality around the borders. The strike is sharp throughout both sides of this nearly Choice survivor from a mintage of 200,000 pieces. Population: 2 in 63+, 97 finer (2/18). PCGS# 572276 Base PCGS# 6373

**PROOF SEATED HALF DOLLARS**

**1866 Seated Half Dollar, PR65  
Multihued Toning, First-Year Motto Issue**

- 3629 1866 Motto PR65 NGC.** The introduction of the motto in 1866 created a new subtype in the Seated half dollar series, and 725 proofs were struck that year. Gold-toned centers anchor mixed olive-green and blue marginal hues on the obverse of this Gem proof, while the reverse is attractively patinated in the latter colors. Reflective fields exhibit only a few tiny contact marks beneath the toning, while the motifs are fully struck. Census: 11 in 65, 11 finer; 3 in 65 Cameo, 5 finer (2/18). NGC ID# 27TZ, PCGS# 6424
- 3630 1873 No Arrows, Closed 3, PR64 Cameo PCGS Secure.** Light butter-gold toning adorns the peripheries of this nicely struck and prominently mirrored near-Gem. The motifs exhibit pleasing frost. The fields display a few hair-thin lines that are as-made, present on the planchet prior to the strike. Only 600 proofs were produced. NGC ID# 27U8, PCGS# 86431

**1874 Arrows Half Dollar, PR64**  
Technically and Visually High End

- 3631 1874 Arrows PR64 PCGS. CAC.** A dazzling display of cerulean-blue, cobalt-blue, and red-gold toning engulfs both sides of this deeply mirrored, highly attractive Arrows proof. Just 700 proofs were struck in 1874 as a finale to the short-lived Arrows design. The coin is sharply struck with technical quality that suggests a finer grade, housed in an old green label holder with CAC endorsement. Population: 62 in 64, 26 finer; 26 in 64 Cameo (1 in 64+), 7 finer. CAC: 10 in 64, 13 finer (2/18). NGC ID# 27UV, PCGS# 6435

- 3632 1877 PR63 PCGS Secure.** Type Two Reverse (Closed Bud). The mirrored fields retain their deep reflectivity despite a few grade-determinant faint lines, and a coat of mint frost over the sharply struck devices adds eye appeal. A touch of pale-gold on the rims frames the otherwise brilliant-white surfaces. Population: 47 in 63, 42 finer (2/18). NGC ID# 27UC, PCGS# 6438

- 3633 1878 PR65 NGC.** Vivid shades of cerulean-blue and emerald-green toning blanket the well-preserved surfaces of this delightful Gem, from a proof mintage of 800 pieces. The design elements are sharply detailed and the fields are deeply reflective beneath the patina. Census: 21 in 65, 20 finer (2/18). NGC ID# 27UD, PCGS# 6439

- 3634 1879 PR64 Cameo PCGS Secure.** This brilliant Choice proof displays stark white-on-black contrast and bold design elements. Light hairlines in the fields prevent a Gem designation but are not seen by the unaided eye. Elusive in Cameo grades. NGC ID# 27UE, PCGS# 86440

**1881 Half Dollar, PR65**  
Beautiful Original Toning

- 3635 1881 PR65 PCGS. CAC.** Original toning forms concentric rings on this Gem proof, including shades of orange-gold, violet, blue, and mint-green. The strike is a trifle soft on the eagle's left (facing) leg and upper wing, and the obverse is slightly weak on the lower portion of Liberty's hair curls. The deeply reflective fields are problem-free. CAC-approved proofs in this grade are rare. *From The Property of a Lady, Part II.* NGC ID# 27UG, PCGS# 6442

- 3636 1882 PR64 PCGS.** Glimmering fields and razor-sharp, frosty devices offer superb eye appeal on this Choice proof, complemented by vivid ocean-blue, violet, and orange-gold toning on each side. No distracting marks are visible, and a hint of cameo contrast is apparent on each side even through the patina. *From The Property of a Lady, Part II.* NGC ID# 27UH, PCGS# 6443

**1882 Half Dollar, PR66**  
Lovely Original Toning

- 3637 1882 PR66 PCGS.** While the various mints were concentrating on Morgan dollars throughout the 1880s, smaller denomination silver coins had extremely low mintages. For example, the Philadelphia Mint coined 5,500 half dollars in 1882, including 1,100 proofs and 4,400 circulation strikes. This Premium Gem proof exhibits deeply mirrored fields beneath thick sea-green and iridescent toning. Population: 21 in 66, 24 finer, including Cameo and Deep Cameo proofs (2/18). NGC ID# 27UH, PCGS# 6443

- 3638 1883 PR63 PCGS.** This mostly brilliant Select proof shows tinges of gold around the outer borders, with a few light lines in the fields that limit the grade. Liberty's temple is a trifle weak, but the strike is otherwise sharp on both sides. The reverse is cameo-contrasted, while the obverse is only modestly contrasted. *From The Property of a Lady, Part II.* NGC ID# 27UJ, PCGS# 6444

- 3639 1885 PR64+ Cameo NGC.** Iridescent rainbow colors form an oval window on the obverse, framing the frost-white portrait of Liberty. Similar rainbow colors encircle the reverse margins, while the interior fields display a pale reddish-gold hue. Liberty's head and the surrounding stars show minor weakness. The eye appeal is exceptional. Census: 22 in 64 Cameo (2 in 64+, 1 in 64★), 33 finer; 0 in 64 Ultra Cameo, 5 finer (2/18). NGC ID# 27UL, PCGS# 86446

- 3640 1886 PR63 Cameo PCGS. CAC.** Hints of russet and gold accent this otherwise brilliant Cameo proof. Sharp design elements complement a depth of mirroring and contrast that is captivating. Cameo-contrasted 1886 proof half dollars are elusive with CAC endorsement. CAC: 3 in 63, 19 finer (2/18). *From The Property of a Lady, Part II.* NGC ID# 27UM, PCGS# 86447

- 3641 1889 PR63 PCGS.** This is a sharp, deeply reflective proof that might have received a Cameo designation were it not for a blush of dusky golden toning on each side that cedes to deeper olive and russet at the borders. Any minor marks that limit the grade are well-hidden by the original patina. *From The Property of a Lady, Part II.* NGC ID# 27UR, PCGS# 6450

**1890 Seated Half, PR65 Cameo  
Noteworthy Brilliant Proof**

- 3642 1890 PR65 Cameo PCGS.** This razor-sharp Gem example displays brilliant, glassy-smooth fields that are deeply mirrored with noticeable cameo contrast on each side. Just 590 proofs were struck to complement 12,000 circulation strikes. High-grade examples remain in strong demand in either format. Population: 7 in 65 (1 in 65+) Cameo, 8 finer; 6 in 65 (1 in 65+) Deep Cameo, 5 finer (1/18). *Ex: Santa Clara Signature (Heritage, 11/2002), lot 7403; Baltimore Signature (Heritage, 7/2003), lot 7702.*  
**From The Glacier Park Collection.** NGC ID# 27US, PCGS# 86451

**BARBER HALF DOLLARS**

**1897 Half Dollar, Frosty MS65  
Elusive in This Grade**

- 3643 1897 MS65 PCGS.** As with most of the series, the 1897 Barber half dollar circulated extensively, and few high-end Mint State pieces were set aside for numismatic purposes. Gem examples are scarce today, and finer coins are rare. This MS65 representative displays frosty, shimmering mint luster and a sharp strike with no distracting abrasions. Each side displays delicate toning that ranges from pale champagne to deeper olive-gold. Population: 24 in 65 (1 in 65+), 16 finer (2/18). NGC ID# 24LY, PCGS# 6477

**1904-S Barber Half Dollar, XF40  
Attractively Toned Key Issue**

- 3644 1904-S XF40 PCGS.** CAC. The 1904-S is one of the most challenging issues in the Barber half series to find in original XF40 condition. This attractive example displays classic old-silver toning over smooth, minimally marked surfaces. All of the letters in LIBERTY are fully visible. CAC endorsement adds to the obviously strong appeal. Any Barber half in this grade with natural surfaces has a surplus of ready buyers, and the 1904-S ranks near the top in terms of collector demand. NGC ID# 24MP, PCGS# 6500

- 3645 1908-D MS63 PCGS.** CAC. 1908 was the third and final year that four mints struck Barber half dollars. The present smooth and nicely struck 1908-D example has good luster and light peach-gold patina. The margins display glimpses of russet and blue-green toning. CAC: 3 in 63, 30 finer (2/18). NGC ID# 24N5, PCGS# 6513

- 3646 1908-O MS65 PCGS.** CAC. *Ex: Friend.* Dale Friend chose this lovely Gem to represent the '08-O in his collection because of its remarkable aesthetic appeal. Both sides have frosty luster with champagne toning and a frame of gold, blue, and lilac. Slight weakness is evident as usual near the right shield tip. CAC: 8 in 65, 23 finer (2/18).  
*Ex: Larry Whitlow; Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars (Heritage, 1/2009), lot 2952.* NGC ID# 24N6, PCGS# 6514

- 3647 1909 MS64 PCGS.** CAC. This delicately toned near-Gem displays shades of champagne, lavender, and ice-blue across softly frosted, surprisingly clean surfaces. No areas of noticeable strike weakness are seen, and the eye appeal is just as strong as the CAC endorsement suggests. NGC ID# 24N8, PCGS# 6516

- 3648 1915 AU55 PCGS Secure.** CAC. With a mintage of only 138,000 coins, the 1915 Barber half dollar is one of the better dates of the series. This Choice AU coin is not only scarce in this grade level, but it is one of only two for the grade with a CAC green label. Sharply detailed design elements reside amid smooth battleship-gray surfaces with daubs of olive and russet toning around the borders. CAC: 2 in 55, 23 finer (2/18). NGC ID# 24NR, PCGS# 6532

- 3649 1915 AU58 PCGS.** Subtle overlays of russet-gold toning on the high points of this near-Mint 1915 barber half indicate slight high-point wear that prevents a Mint State grade but does not reduce the sharpness of the design. A touch of strike weakness appears on the eagle's right (facing) wing junction. Luster remains in the fields. NGC ID# 24NR, PCGS# 6532

**PROOF BARBER HALF DOLLARS**

- 3650 1893 PR65 PCGS.** This Gem proof is fully struck with frosty devices and mirrored fields. Areas of olive-green, blue, violet, russet, and gold toning appear over each side, and any small grade-limiting lines or marks are well-hidden by the rich patina. Ideal for collectors looking for a proof with old-time toning.  
**From The Property of a Lady, Part II.** NGC ID# 24NV, PCGS# 6540

**1893 Half Dollar, PR66 Cameo  
Beautifully Toned**

- 3651 1893 PR66 Cameo PCGS.** CAC. Less than half of the Cameo proofs certified in this grade are CAC-approved. Beautifully mirrored fields showcase blue, violet, russet, and amber-gold toning, which sets off the champagne-tinged, frosty devices for a stark cameo effect on both sides. Slight strike weakness occurs on the eagle's right (facing) shoulder, but the coin is otherwise sharp. Population: 23 in 66 (3 in 66+) Cameo, 9 finer; 6 in 66 Deep Cameo, 4 finer. CAC: 20 in 66, 6 finer (2/18).  
**From The Property of a Lady, Part II.** NGC ID# 6UKV, PCGS# 86540

**1894 Half Dollar, PR66 Cameo  
Vibrant Rim Toning Around Brilliant Centers**

**3652 1894 PR66 Cameo PCGS Secure.** The rims showcase rings of golden-orange patina, leaving the centers wholly untoned and allowing for maximum appreciation of the Cameo contrast that results from deeply reflective fields and frosted devices. A loupe is required to see what little contact prevents an even higher grade. From a mintage of 972 proofs. Population: 22 in 66 (3 in 66+) Cameo, 5 finer in this category (2/18). NGC ID# 24NW, PCGS# 86541

**3653 1895 PR64 PCGS.** This beautifully toned Choice proof has the eye appeal of a higher grade thanks to shades of blue, violet, orange-gold, and mint-green toning on each side. The strike is sharp even on the eagle's talons and the right shield corner. No mentionable imperfections are seen.  
*From The Property of a Lady, Part II.* NGC ID# 24NX, PCGS# 6542

**3654 1896 PR64 PCGS.** This glimmering, toned proof is fully struck on the devices and deeply mirrored in the fields. Both sides exhibit mottled multicolor toning but with a distinctive russet-gold hue over the interiors. The obverse has a hint of cameo contrast despite the patina.  
*From The Property of a Lady, Part II.* NGC ID# 24NY, PCGS# 6543

**3655 1897 PR63 PCGS.** Blue, gold, and russet-gray are the dominant hues on this toned Select proof. The devices are fully brought up, and the obverse has a hint of cameo contrast despite the deep patina. There are no absolute keys in the proof Barber half dollar series, making it readily collectible, especially in middle grades such as that of the present coin.  
*From The Property of a Lady, Part II.* NGC ID# 24NZ, PCGS# 6544

**1897 Half Dollar, PR64 Deep Cameo  
Complete Brilliance, Stark Contrast**

**3656 1897 PR64 Deep Cameo PCGS Secure.** From a mintage of 731 specimens, this near-Gem half dollar with Deep Cameo contrast is the perfect Barber proof for collectors in search of a piece that appears as it did the day it was struck. Complete brilliance heightens the white-on-black effect. The motifs are expectedly fully struck. A few minor wisps preclude a higher grade but do not affect the eye appeal. Population: 5 in 64 (1 in 64+) Deep Cameo, 37 finer (2/18). NGC ID# 24NZ, PCGS# 96544

**3657 1898 PR64 Cameo PCGS.** This sharp Choice proof displays untuned, satiny luster on the devices with deep mirroring in the fields that shows lavender-gray, rose-gold, and blue-green coloration. The patina gives the fields an inky-black appearance at certain angles, which accents the Cameo effect. Cameo 1898 proof half dollars are a minority of this issue's population. Population: 27 in 64 (2 in 64+) Cameo, 55 finer (Deep Cameos included) (2/18).  
*From The Property of a Lady, Part II.* NGC ID# 24P2, PCGS# 86545

**3658 1899 PR64 PCGS.** Save for a few faint splashes of lavender color near the borders, this near-Gem proof is brilliant. The fields are deeply mirrored, and sharp detail appears on the devices. Faint slide lines on Liberty's cheek appear to be all that prevents a full Gem designation.  
*From The Property of a Lady, Part II.* NGC ID# 6C4V, PCGS# 6546

**3659 1900 PR64 PCGS.** In addition to a full strike and excellent depth of mirroring in the fields, this Choice 1900 proof also displays outstanding original toning in shades of lavender, olive, and russet, which gives each side a unique and intriguing appearance. Both sides have a hint of field-device contrast despite the patina.  
*From The Property of a Lady, Part II.* NGC ID# 24P4, PCGS# 6547

**3660 1901 PR65+ PCGS.** This high-end Gem shows exceptional surface preservation beneath deep russet, amber, and olive-gold toning. Sharp central devices and glimmering fields add to the appeal. Gem proof Barber halves with original patina are often difficult to locate, even for plentiful issues such as the 1901.  
*From The Property of a Lady, Part II.* NGC ID# 24P5, PCGS# 6548

**3661 1902 PR64 PCGS. CAC.** Each side displays a hint of champagne toning that has its origin in an amber-gold crescent along the left-hand borders. Subtle field-motif contrast is visible on each side at certain angles. The only strike weakness is seen on the eagle's right (facing) wing junction, although it is minor. No distracting contact marks are present. CAC-approved coins are scarce in this and finer grades. CAC: 11 in 64, 20 finer (2/18).  
*From The Property of a Lady, Part II.* NGC ID# 24P6, PCGS# 6549

**1904 Half Dollar, Originally Toned PR67**

**3662 1904 PR67 NGC.** Cobalt-blue and violet borders surround amber-gold interiors on this Superb Gem 1904 proof Barber half dollar. The design elements are fully struck and satiny. A Cameo designation might have been achieved were it not for the rich patina. Superb Gem examples are genuinely rare for the 1904 proof. Census: 14 in 67, 3 finer (2/18). NGC ID# 24P8, PCGS# 6551

## WALKING LIBERTY HALF DOLLARS

### 1916 Half Dollar, MS65+ Remarkably Sharp and Frosty

**3663 1916 MS65+ PCGS Secure. CAC.** A faint trace of iridescence graces the otherwise brilliant, frosty surfaces of this high-end Gem, with only a few unobtrusive luster grazes visible. The strike is full, and is particularly appreciated on the eagle's trailing leg, which is often incompletely defined even on coins with full thumb separation on the obverse. CAC-approved first-year Walkers are scarce in Gem and finer grades. CAC: 43 in 65, 37 finer (2/18). NGC ID# 24PL, PCGS# 6566

**3664 1917-D Obverse MS63 PCGS.** Satiny original mint luster shows warm golden toning on this Select example, with deeper sea-green and lilac hues present at the obverse borders. Liberty's branch hand and the eagle's trailing leg show slight strike softness as usual, but the coin is generally pleasing with only a few light abrasions. NGC ID# 24PR, PCGS# 6570

**3665 1917-D Obverse MS64+ NGC.** A coinage of 765,400 Walking Liberty half dollars was accomplished at the Denver Mint in 1917 before the mintmark was moved to the reverse. This Plus-graded Choice specimen exhibits well-detailed design elements and lustrous surfaces under shades of golden-tan and lavender-gray toning. NGC has graded 56 numerically finer examples (2/18). NGC ID# 24PR, PCGS# 6570

**3666 1917-D Reverse MS62 PCGS.** A well-struck, satiny example with only light handling marks that limit the grade. Deep lavender-gray and light golden toning blankets each side, accenting the design elements. NGC ID# 24PS, PCGS# 6571

**3667 1917-D Reverse MS64 PCGS.** Satiny luster illuminates golden toning on this near-Gem, with deep russet accents in the recesses. The strike is well-executed and abrasions are minimal. The 1917-D Reverse Mintmark half dollar is occasionally available in this grade, but PCGS has seen just 56 numerically finer representatives (2/18). NGC ID# 24PS, PCGS# 6571

**3668 1917-D Reverse MS64 PCGS Secure.** Olive-gold and russet toning appears over each side of this Choice reverse mintmark coin, complementing a lack of bothersome abrasions. The strike is about average for the issue, showing thumb separation on Liberty's branch hand but weak on the head and on the eagle's trailing leg. The reverse mintmark issue is scarcer than the obverse mintmark coin in high grade. NGC ID# 24PS, PCGS# 6571

### 1917-S Half Dollar, AU58 Popular Obverse Mintmark

**3669 1917-S Obverse AU58 PCGS Secure.** Brilliant surfaces are softly textured on this frosty, nearly Uncirculated Walker half dollar with the popular Obverse mintmark placement. The devices are strongly defined and exhibit minimal friction, surrounded by crisp, partly squared-off rims on each side. This is one of the lower-mintage condition rarities in the series. NGC ID# 26G7, PCGS# 6572

**3670 1918-D MS63 PCGS.** Atypically lustrous with above-average sharpness over the central devices. Speckled russet and violet toning gravitates to the borders. Golden patina covers large areas of the reverse. Very few contact marks appear and they are minor in nature. NGC ID# 24PW, PCGS# 6575

**3671 1918-S MS63 PCGS.** More than 10.2 million half dollars were produced at the California mint in 1918. A fair number were saved in MS63 and MS64, but Gems are out of reach for most specialists in this series. Central strike detail is slightly incomplete, while frosted mint luster glistens softly beneath light golden patina. NGC ID# 24PX, PCGS# 6576

### 1919 Half Dollar, MS64 Conditionally Scarce Semikey

**3672 1919 MS64 NGC.** This semikey Walking Liberty half dollar issue boasts one of the few sub-1 million-coin mintages. A small fraction of the surviving population is known in Mint State (most pieces are well-circulated). This near-Gem stands far above the fray, featuring bold strike definition on Liberty's head and hand, and softly frosted mint luster. Dusky silver-gray patina covers well-preserved surfaces. NGC ID# 24PY, PCGS# 6577

**1920 Walking Liberty Half, MS65  
Well-Struck and Frosty**

**3673 1920 MS65 PCGS.** A hint of light golden toning graces each side of this Gem 1920 Walking Liberty half dollar. Liberty's branch hand and head are well-defined, and the eagle's trailing leg shows pleasing feather definition. No bothersome abrasions are present. The 1920 is moderately elusive in this grade and genuinely rare finer, with only 23 coins so graded at PCGS (2/18). NGC ID# 24R3, PCGS# 6580

**3674 1923-S — Cleaned — NGC Details. Unc.** Light caramel-gold and steel-gray toning adorns the borders of this lustrous and virtually bagmark-free example. Evidence of cleaning is difficult to detect. Liberty's cheek and branch hand show blending. Early San Francisco issues are elusive in Mint State. Clashed on the field beneath the B in PLURIBUS. NGC ID# 24R9, PCGS# 6586

**1928-S Walking Liberty Half, MS64  
Attractive Natural Toning**

**3675 1928-S MS64 PCGS.** The 1928-S Walking Liberty half dollar is an elusive issue in grades above MS64. Like most examples seen, this impressive Choice specimen shows a touch of softness on the central devices, but the well-preserved surfaces are visited by attractive shades of greenish-gold and lavender toning. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 24RB, PCGS# 6588

**3676 1929-D MS64 PCGS. CAC.** Scattered tiny flecks of russet appear at the borders, while warm golden toning appears across each side. Thumb separation is visible on Liberty's branch hand, and partial feather detail is seen on the eagle's trailing leg. Just over 1 million half dollars were struck at Denver in 1929. NGC ID# 24RC, PCGS# 6589

**3677 1933-S MS64 PCGS Secure.** Sharply struck surfaces display bits of umber-gray toning with vibrant silver luster shining through. A necessity for date collectors as the only half dollar issue for the year, the 1933-S is always in demand. This example's original eye appeal is worth a strong bid. NGC ID# 24RE, PCGS# 6591

**1934-S Half Dollar, MS66  
Few Pieces Known Finer**

**3678 1934-S MS66 PCGS.** The warmth of a delicate golden hue emerges from the peripheries on this high-end 1934-S half dollar, complementing frosty luster and moderately well-struck devices — some minor softness is seen on Liberty's branch hand and the eagle's trailing leg. The 1934-S is scarce in this grade, and PCGS lists only eight finer representatives (2/18). NGC ID# 24RH, PCGS# 6594

**3679 1935-S MS65 NGC.** An overlay of lilac-gray toning covers the centers with reddish-gold accents for outstanding eye appeal. This Gem Walker is sharply struck for the issue with a few freckles of deep russet patina punctuating the frosty mint luster. While readily obtainable as a date, the 1935-S is challenging in original Gem condition and scarce in finer grades. NGC reports just 50 pieces finer (2/18). NGC ID# 24RL, PCGS# 6597

**3680 1935-S MS65 PCGS.** This Gem is well-struck and brilliant, showing partial thumb separation on Liberty's branch hand. Only a few tiny ticks are visible under magnification. The 1935-S Walker is available in this grade but challenging finer for many collectors. NGC ID# 24RL, PCGS# 6597

**3681 1935-S MS65 PCGS.** The 1935-S is a slightly better date in Gem condition and genuinely scarce finer. This piece displays a hint of light golden toning over satiny mint luster on each side. Minor strike weakness is seen on Liberty's branch hand and the eagle's trailing leg as usual. NGC ID# 24RL, PCGS# 6597

**3682 1935-S MS65 PCGS. CAC.** Liberty's branch hand and the eagle's trailing leg show minor softness, while the remainder of each side is sharp. This Gem 1935-S Walker displays frosty, champagne-tinged luster and excellent preservation. CAC-approved coins are scarce in this grade. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66  
Exemplary Preservation  
Beautiful Border Toning**

**3683 1935-S MS66 PCGS. CAC.** This Premium Gem displays original, luminous satin luster cast in dusky champagne toning that transitions to ribbons of rainbow at the rims. The eye appeal is excellent to the point that slight strike weakness on Liberty's branch hand and the eagle's trailing leg is unnoticed upon an initial gander. CAC-approved coins are scarce in this grade and rare finer. PCGS has seen only three numerically finer 1935-S Walkers. CAC: 42 in 66, 3 finer (1/18). NGC ID# 24RL, PCGS# 6597

**1936-D Half Dollar, MS67**  
**Among the Finest Certified**

**3684 1936-D MS67 PCGS.** 30th Anniversary Green Label Holder. Golden-brown, rose-red, lemon-gold, and sea-green toning enriches the margins of this lustrous and sharply struck Walker. Delicate contact on the obverse field denies perfection. The 1936-D Walker is scarce in this grade and unknown numerically finer. Population: 42 in 67 (3 in 67+), 0 finer (2/18). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

**3685 1936-S MS66+ PCGS. CAC.** There is trivial softness on Liberty's branch hand, but this high-end Premium Gem is otherwise boldly struck. Frost-white surfaces are mostly unabraded and yield strong eye appeal that is worthy of the CAC green label. CAC has endorsed a minority of the high-grade 1936-S half dollars known. PCGS lists 11 finer pieces. CAC: 92 in 66, 4 finer (2/18). NGC ID# 24RP, PCGS# 6600

**3686 1937 MS67 PCGS. CAC.** A lightly toned and essentially immaculate Superb Gem. Bright mint luster sweeps across the sharply struck surfaces. The 1937 is by no means rare in most grades, but PCGS has certified a scant five pieces finer. CAC: 83 in 67, 3 finer (2/18). NGC ID# 256A, PCGS# 6601

**3687 1937-S MS66+ PCGS. CAC.** The sea-green, lilac, and stone-gray surfaces display booming luster and a remarkably smooth appearance. The strike is bold except on the branch hand. This Great Depression issue was saved by collectors, but most Uncirculated examples grade between MS63 and MS65. As of (2/18), PCGS has certified just 40 pieces finer. NGC ID# 24RT, PCGS# 6603

**3688 1940-S MS66+ PCGS Secure. CAC.** Shimmering frost-white luster on each side of this high-end Premium Gem is original, and the only small abrasions seen are on the high points of Liberty's figure and the on the sun, with the right obverse field clean. Liberty's head and branch hand show the usual strike weakness. PCGS lists 14 finer examples of the date (1/18). NGC ID# 24S2, PCGS# 6610

**3689 1940-S MS66+ PCGS Secure. CAC.** Exemplary preservation and original, frosty luster are the hallmarks of this mostly brilliant MS66+ coin. Splashes of amber and olive toning along the right obverse margin mask a few small marks in the right field. Moderate strike weakness affects the centers. NGC ID# 24S2, PCGS# 6610

**3690 1946-S MS67 PCGS. CAC.** The 1946-S Walking Liberty half dollar is scarce in MS67 and unknown numerically finer. This CAC-approved example is highly appealing, showing frosty original luster with a hint of pale champagne toning. Strike softness on Liberty's branch hand and the eagle's trailing leg is normal for the issue. Population: 80 in 67 (4 in 67+), 0 finer. CAC: 33 in 67, 0 finer (1/18). NGC ID# 24SL, PCGS# 6629

## PROOF WALKING LIBERTY HALF DOLLAR

**3691 1936 PR64 PCGS. CAC.** Gleaming mirrored fields and sharp motifs grant this near-Gem proof outstanding eye appeal. No toning is observed, and the preservation is pleasing for type or date purposes. The CAC green label is seen on only a small fraction of proofs in this grade. NGC ID# 27V4, PCGS# 6636

## FRANKLIN HALF DOLLARS

**3692 1949-D MS66 Full Bell Lines PCGS Secure.** Exquisite apple-green and lavender-red toning embraces this lustrous and well-struck Premium Gem. Uncommonly free from marks, and elusive in the present quality. Population: 88 in 66 (9 in 66+) Full Bell Lines, 0 finer (2/18). NGC ID# 5HWE, PCGS# 86654

**3693 1959-D MS66+ Full Bell Lines PCGS. CAC.** Dappled shades of amber-gold, forest-green, ruby-red, and walnut-brown have a foothold on the obverse, surrounding the brilliant silver center. The reverse surrenders fully to the toning, where amber-gold shades predominate. This lustrous and frosted example earns both the PCGS Plus designation and CAC endorsement for its high quality and memorable, highly attractive patina. Just two pieces are numerically finer at PCGS. Population: 14 in 66+ Full Bell Lines, 2 finer. CAC: 25 in 66, 0 finer (2/18). NGC ID# 6L37, PCGS# 86677

**3694 1960 MS66+ Full Bell Lines PCGS Secure.** This sharp, frosty Registry Set candidate shows large arcs of multicolor toning across the right-hand obverse and reverse margins, leaving the remainder of the coin brilliant. Franklin's cheek is clean, and a light field graze on the reverse below UNITED is the only thing that prevents a full Superb Gem designation. PCGS has Plus-graded only five Premium Gem Full Bell Lines coins, and one is finer (2/18). NGC ID# 5H6J, PCGS# 86678

### 1961 Franklin Half Dollar, MS66 Rare Full Bell Lines Example

**3695 1961 MS66 Full Bell Lines PCGS Secure.** This spectacular Premium Gem representative exhibits sharply detailed design elements, with full definition on the bell lines. The virtually pristine surfaces show highlights of sea-green and lavender toning, with most of the color on the obverse. Vibrant mint luster adds to the outstanding eye appeal. Population: 17 in 66 (2 in 66+) Full Bell Lines, 0 finer (2/18). NGC ID# 24TN, PCGS# 86680

## PROOF FRANKLIN HALF DOLLARS

**3696 1950 PR67 PCGS Secure.** The fields glimmer with reflectivity and the devices are softly frosted, but this brilliant Superb Gem proof does not quite have the depth of mirroring necessary for a Cameo designation. Few first-year proof Franklins do in this grade, and the only numerically finer coin at PCGS is a lone PR68 non-Cameo (2/18). This piece is sharp and pristine, showing good eye appeal. NGC ID# 27VA, PCGS# 6691

**3697 1956 Type One PR68 Cameo PCGS. CAC.** Breen (1988) estimated only 5% of proof 1956 half dollars have a Type One Reverse, identified by the low-relief eagle. The darkly reflective fields compare favorably with icy design features. Both sides appear immaculate. CAC: 39 in 68, 0 finer (2/18). NGC ID# 24TV, PCGS# 86686

**3698 1957 PR68+ Cameo PCGS Secure. CAC.** This is a starkly contrasted Registry-grade Cameo proof, complete with a CAC endorsement and showing no toning. The strike is full and eye appeal abounds. PCGS lists a number of Deep Cameo coins in this grade and a few finer, but no Cameos are numerically finer at that service (2/18). NGC ID# 24TX, PCGS# 86698

**3699 1959 PR68 Cameo PCGS. CAC.** A brilliant and immaculate specimen that boasts glassy fields and luminous motifs. A high-mintage issue, but only a tiny percentage of examples merit a Cameo designation. CAC: 29 in 68, 0 finer (2/18). NGC ID# 27VJ, PCGS# 86700

- 3700 1960 PR68 Deep Cameo PCGS.** Occasionally seen in PR68 Deep Cameo, the 1960 proof is a rarity any finer. This piece is brilliant and starkly contrasted with liquidlike mirroring in the fields. Neither side exhibits mentionable toning. PCGS reports 10 finer representatives (2/18). NGC ID# 24TY, PCGS# 96701

## EARLY DOLLARS

### 1795 Draped Bust Dollar, B-14, BB-51 Off-Center Bust, XF Details

- 3701 1795 Draped Bust, Off-Center — Obverse Graffiti — NGC Details.** XF. B-14, BB-51, R.2. Obverse graffiti is noted on the NGC holder, referring to an "X" lightly inscribed in the right field opposite Liberty's neck. A narrow, half-moon punch mark — not noted on the holder — exists beneath the bow on the reverse. Gunmetal gray toning covers smooth surfaces of this early dollar. Nice detail remains on the eagle's breast feathers and Liberty's hair strands show only light wear. A few Mint-caused adjustment marks are seen at the lower rim and near the eagle's talons. Ex: ANA Signature (Heritage, 2/2014), lot 3584.

### 1795 Draped Bust Dollar, VF30 B-15, BB-52, Centered Portrait

- 3702 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF30 NGC.** Bowers Die State IV. The BB-52 variety with its centered portrait of Liberty is slightly less available than BB-51, where Liberty's portrait was entered too far left in the die. This richly toned example is struck from an intermediate die stage between Die State III and IV, with the die break in Liberty's hair in stage IV, but without any die cracks on the reverse legend. Reddish-brown, blue, and charcoal-gray toning lightens to silver-gray shades on high points of the design. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

- 3703 1798 Large Eagle, Pointed 9, 5 Vertical Lines, 10 Arrows, B-17, BB-101, R.5 — Cleaning — PCGS Genuine. VF Details.** Bowers Die State IV, with the reverse crack above I in AMERICA. The left side of the drapery shows some wear, but much interior detail remains on Liberty's hair and the eagle's wing feathers. The pinkish-gray surfaces show the expected number of minor abrasions for the VF grade, but an unnatural sheen indicates a light cleaning in the past.

- 3704 1798 Large Eagle, Pointed 9, Close Date, B-28, BB-118, R.3 — Repaired — PCGS Genuine. XF Details.** Bowers Die State V. BB-118 is an interesting variety in its later die stages, where prominent die cracks on the obverse are accompanied by equally impressive cracks on the reverse and a large retained cud near the eagle's tail. The even, slate-gray surfaces are a bit glossy and overly smooth on this example, with areas of possible repair beneath Liberty's chin and among the central field stars.

### 1798 Large Eagle Silver Dollar, XF45 Pointed 9, B-25, BB-123

- 3705 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, XF45 PCGS.** Bowers-Borckardt Die State II. Dusky copper-gold toning envelops this minimally abraded Choice XF example. The cheek and shoulder show moderate wear, as does the eagle's breast, but much design definition is present that harbors traces of mint luster. The coin is evenly struck with no significant adjustment marks. Ex: Los Angeles Signature (Heritage, 8/2009), lot 1754; Central States Signature (Heritage, 4/2013), lot 2371. NGC ID# 24X6, PCGS# 40040 Base PCGS# 40018

- 3706 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF25 NGC.** Bowers Die State IV. The curious reverse with 15 field stars instead of 13, awkwardly "fixed" with enlarged clouds near each wing to hide two of the stars. BB-141 is the first of three 1799/8 overdates, giving this popular variety two major Mint anomalies — one on the obverse, one on the reverse. Medium silver-gray toning reveals faint golden accents. The fields and devices are sharply defined for the grade, with minimal abrasions. We note a solitary mark above Liberty's highest hair curl, just below the E in LIBERTY. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

- 3707 1799/8 15 Stars Reverse, B-3, BB-141, R.3 — Cleaning — PCGS Genuine. AU Details.** Bowers Die State III. Small die flaws appear below (LIBE)RT(Y), and a die crack passes through ME in AMERICA. This popular variety shows the second 9 in the date over an underlying 8. On the reverse, the engraver tried unsuccessfully to mask the presence of two extra stars by enlarging the clouds, but they still clearly jut out from clouds 1 and 8. The surfaces show signs of an old cleaning that have since retuned in violet-gray and steel-blue patina. Needle-sharp motifs exhibit virtually imperceptible friction. A pleasing, collectible example.

- 3708 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, Fine 12 PCGS.** Bowers Die State II. Reuse of a 1798 reverse die gives this Irregular Date variety claim to the only line star pattern of field stars to appear on a 1799 dollar. Lightly toned in the centers with colorful, deep iridescent shades at the borders, this evenly worn example has the look typical of years in an old coin album. Some light abrasions exist along with a pair of small marks beneath Liberty's ribbon. Housed in a previous generation green label holder. NGC ID# 24X7, PCGS# 6880

- 3709 1799 7x6 Stars, B-7, BB-156, R.4 — Cleaning — PCGS Genuine. VF Details.** Bowers Die State II, with the reverse crack through RICA to the stem. The well-detailed design elements exhibit moderate, even wear, with the drapery worn smooth in places on the left. The pleasing lavender-gray surfaces are lightly abraded, but show the effects of a light cleaning in the past. A minor obverse rim bruise is evident at 9 o'clock.

- 3710 1799 7x6 Stars, B-5, BB-157, R.2, VF20 PCGS.** Bowers Die State I, without a crack through STATES. Light to medium steel-gray, straw-gold, and powder-blue patina. Very sharp for the designated grade, especially on the wings and neck curls. A cluster of faint thin vertical marks is noted on Liberty's neck. Certified in a green label holder. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

**1799 Draped Bust Dollar, XF45  
7x6 Stars, B-12, BB-160**

**3711** 1799 7x6 Stars, B-12, BB-160, R.3, XF45 ANACS. Bowers Die State III, with the die crack extending to the right of the 1 in the date. Star 1 is far from the curl and there are no berries in the wreath, identifying the BB-160 variety. This attractive Choice XF specimen shows only light wear on the well-detailed design elements. The vestiges of a stem are still visible in the wreath, but the berries have been effaced by lapping. The pleasing lavender-gray surfaces are lightly abraded, with a few highlights of golden-tan patina. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

**3712** 1799 7x6 Stars, B-11, BB-161, R.3, VF20 ANACS. Bowers Die State III. Field star 1 on the reverse is overtly smaller and spindly from a defective punch, one of the key diagnostics for BB-161, also known for its No Berries reverse. Satisfying old-silver color combines medium-gray fields with lighter, silver-gray patina on the high points. We note some old squiggles in the right obverse field opposite Liberty's nose and a few perplexing rim irregularities beneath the eagle's tail. Housed in an early generation ANACS holder. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**3713** 1799 7x6 Stars, B-21, BB-169, R.3, VF20 NGC. Die State II. A rising die crack through the 99 in the date helps identify this slightly scarcer Bolender variety. A minutely granular slate-gray Draped Bust dollar with hints of chestnut toning. Wear is apparent on the devices, but most letters in E PLURIBUS UNUM remain legible. Ex: *Dallas Signature (Heritage, 10/2006)*, lot 2237. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**3714** 1800 B-1, BB-181, R.5, Fine 15 PCGS. "Bowers Die State II" with a clashed date near the ES in STATES. A very scarce Bolender variety that is noted for a repunched first T in STATES. The reverse is shared with BB-182, but die lumps near obverse star 11 are diagnostic. This gunmetal-gray example displays a few microgranular charcoal streaks, and shows a couple of minor rim marks beneath the date. NGC ID# 24X9, PCGS# 40067 Base PCGS# 6887

**3715** 1800 B-8, BB-188, R.4 — Cleaned — PCGS Genuine. VF Details. Bowers Die State I. A scarce variety, struck from an early state of the dies (without die cracks) as usual for the BB-188 variety. A diagnostic lump — Bolender's "die dot" — narrows the possible varieties to BB-188 or BB-189, while the reverse with the right three upper field stars away from the clouds confirms the BB-188 die marriage. Silver-gray surfaces are a bit bright from cleaning, leaving both sides virtually untuned. Hairlines are minimal. This is a sharply defined example, which could recover in time if given the opportunity.

**1801 Draped Bust Dollar, VF30  
Richly Toned B-2, BB-212 Variety**

**3716** 1801 B-2, BB-212, R.3, VF30 NGC. Bowers Die State II, clashed. Evenly struck and well-centered with no adjustment marks. Moderate golden-gray patina exhibits deeper ebony overtones, mainly on the left-hand side of the obverse and upper reverse. A well-detailed Heraldic Eagle type coin, scarce as a date in all varieties. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

**1802 Narrow Date Dollar, VF35  
B-6, BB-241, Attractive Silver-Gray Toning**

**3717** 1802 Narrow Date, B-6, BB-241, R.1, VF35 PCGS. Bowers Die State III. Olive-gray toning yields to silver-gray accents with brief mint luster in protected areas of this Choice VF dollar. The BB-241 is readily available (more so than all the other 1802 varieties combined) and it is the most frequently seen die marriage of all Large Eagle Draped Bust dollars, 1798-1803. This example displays attractive surfaces with sharply defined motifs and excellent eye appeal. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**SEATED DOLLARS**

**3718** 1843 AU58 PCGS. OC-2, R.1. Mottled olive, amber, and grayish toning masks scattered abrasions on each side of this nearly Uncirculated 1843 Seated dollar. The strike is sharp, and the fields are lustrous rather than reflective. A pleasing No Motto type coin. NGC ID# 24YD, PCGS# 6929

**1846 Seated Dollar, MS62  
High-Quality Surfaces**

- 3719 1846 MS62 PCGS. OC-1, R.1.** Osburn-Cushing Die State c/c. The smooth, semireflective surfaces are remarkably free of marks. Pearlescent-gray toning reveals soft mint luster with faint iridescence visible in the sheltered areas. The strike is sharp but not full, with minor weakness on the eagle's left (facing) talon. Beautiful, wide rims and sharply defined dentils surround both sides of this attractive dollar, which is scarce in all Mint State grades. The 1 is repunched at its top, helping to confirm the obverse die. Housed in an old green label holder. Population: 25 in 62, 48 finer (2/18). NGC ID# 24YH, PCGS# 6932

**1846-O Dollar, AU58  
First New Orleans Dollar Issue**

- 3720 1846-O AU58 PCGS Secure. CAC. OC-1, R.2.** A Top-30 Variety. Osburn-Cushing Die State b/d. The reverse die is rotated 45° clockwise, a rare characteristic seen only in the latest stage of the dies. Variegated blue, orange, and reddish-gold toning covers reflective fields that retain a measure of mint luster. The strike is sharp except for the right-side stars, which show rounding — either a function of the reverse die rotation, or from die misalignment. This 1846-O is scarce in near-Mint condition, especially with CAC endorsement. Population: 20 in 58, 26 finer. CAC: 7 in 58, 10 finer (2/18). NGC ID# 26GG, PCGS# 6933

**1856 Silver Dollar, AU53  
Better Philadelphia Issue**

- 3721 1856 Mispunched Date AU53 PCGS Secure. OC-1, R.2.** A Top 30 Variety. Osburn-Cushing Die State b/d. An underlying 6 was first punched at a 45° angle, then partially effaced and replaced by the primary 6. Late-state die lapping has removed all but spikelike remnants of the mispunched 6. Numerous die cracks in and around the reverse legends confirm the late die stage of this coin. A single die pair was used for all 1856 circulation strikes. The strike is weak through the centers, perhaps another legacy of the advanced die state. Traces of golden toning add appeal to the partially lustrous, silver-gray surfaces. Population: 12 in 53, 57 finer (2/18). NGC ID# 24YV, PCGS# 6944

**1860 Seated Dollar, MS63  
Toned No Motto Type Coin**

- 3722 1860 MS63 NGC. OC-4, Low R.5.** Save for the New Orleans issues of 1859 and 1860, the 1860 Philadelphia-issued Seated dollar is among the more plentiful dates of this period in Mint State, suitable to represent the No Motto type in a quality dollar collection. This toned example shows deep russet-gold and gray color with few noticeable abrasions. Some strike weakness on Liberty's head and the adjacent stars is noted under a loupe. Census: 20 in 63, 24 finer (2/18). NGC ID# 24Z2, PCGS# 6949

**1872 OC-3 Seated Dollar, MS64  
Misplaced Digits and Doubled Die Reverse**

- 3723 1872 MS64 PCGS Secure. OC-3, R.1.** Osburn-Cushing Die State a/a. A Top-30 Variety, per Dick Osburn and Brian Cushing at [www.seateddollarvarieties.com](http://www.seateddollarvarieties.com). This variety shows multiple misplaced digits in the base of Liberty, and has reverse die doubling that is most evident in the motto. Although a readily available date, this die marriage is highly popular for its unusual characteristics. A Choice Mint State example, the present piece displays brilliant, frost-white silver surfaces and a sharp strike. The wide-open fields are remarkably free of marks and abrasions. Population: 41 in 64 (6 in 64+), 4 finer (1/18). NGC ID# 24ZJ, PCGS# 6968

**1872-CC Dollar, Fine 15  
Only 3,150 Pieces Struck**

- 3724 1872-CC Fine 15 PCGS. OC-1, High R.3.** Golden-brown toning is consistent across this circulated but completely problem-free representative. About three letters in LIBERTY are present. GOD is faint but readable. Among Carson City Seated dollars, the 1872-CC is an intermediate rarity, more available than the 1870-CC but less rare than the 1871-CC and 1873-CC. NGC ID# 24ZK, PCGS# 6969

## PROOF SEATED DOLLAR

### 1859 Seated Dollar, PR63 Well-Struck, Multicolor Toning

- 3725 1859 PR63 PCGS. OC-P1, R.3.** Navy-blue, chestnut-brown, and lilac toning enrich this flashy and well-struck Select specimen. A small field flan flaw is located west of the eagle's beak, but hairlines are minimal for the grade. Osburn and Cushing estimate 350 survivors from the proof production of 800 pieces. NGC ID# 252D, PCGS# 7002

## TRADE DOLLARS

### 1873 Trade Dollar, MS63 Rare CAC-Endorsed Example

- 3726 1873 MS63 PCGS. CAC.** A blush of champagne toning graces the frosty surfaces of this Select first-year Trade dollar. Although no major abrasions are seen, moderate strike weakness affects Liberty's head and torso, as well as the eagle's right (facing) leg. Trade dollars represent a challenging but completable date and mintmark collection, but are most often acquired as type coins. This CAC-approved first-year representative is suitable for either purpose. CAC: 5 in 63, 13 finer (2/18). NGC ID# 252W, PCGS# 7031
- 3727 1875 Type Two Reverse MS61 PCGS Secure.** Most circulation strikes show the Type Two Reverse, with no berry under the eagle's claw. This Mint State coin is lustrous and minimally abraded for the grade. No mentionable strike weakness is seen, and a hint of light golden toning graces each side. NGC ID# 2534, PCGS# 40107 Base PCGS# 7037
- 3728 1875 Type Two Reverse MS61 PCGS.** The Type Two Reverse shows no berry under the eagle's right (facing) claw. Liberty's head and several obverse stars are weak, but the centers of this Mint State Trade dollar are well-defined. Both sides show satiny steel-gray luster. Grade-limiting abrasions are uniformly light and unobtrusive. Housed in a green label holder. NGC ID# 2534, PCGS# 40107 Base PCGS# 7037
- 3729 1875-CC Type One Reverse MS62 NGC.** Period after FINE. The so-called "Narwhale" variety with a lengthy die line from the eagle's beak. This brilliant and lustrous representative exhibits surprisingly few marks, although minor spots are noted near GRAINS. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

- 3730 1876-CC Doubled Die Reverse, FS-801 — Cleaned — NGC Details. Unc.** Type One Obverse and Reverse. Tall CC. No period after FINE. The noted *Guide Book* variety with wide die doubling on the olive-branch, claws, beak, and right (facing) wingtip. Both sides show dusky straw-gold toning, with blushes of orange-red along the obverse periphery. The luster is subdued but there are no distracting marks or hairlines. NGC ID# 253A, PCGS# 145815 Base PCGS# 7042

### 1876-S Trade Dollar, MS64 Smooth and Lightly Toned

- 3731 1876-S Type One Obverse, Type One Reverse, MS64 NGC.** Large S. A highly lustrous near-Gem that displays light almond-gold toning. Even the use of a loupe fails to find remotely mentionable marks. A good strike with only trivial inexactness on Liberty's hair and the eagle's right (facing) leg. The reverse border near 5 o'clock has moderate mint-made roller marks. Ex: *Phoenix ANA Signature (Heritage, 3/2008)*, lot 856, which realized \$3,737.50. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

### 1876-S Trade Dollar, MS64 Lightly Toned and Highly Lustrous

- 3732 1876-S Type One Obverse, Type One Reverse, MS64 PCGS.** Large S. A lightly toned and highly lustrous Choice Trade dollar. Marks are uncommonly few, limited to the field near star 12 and the eagle's beak. The strike is good, though shy of complete on Liberty's curls and the right (facing) claw. This impressive example is certain to elicit bidder interest. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043
- 3733 1877 MS64 PCGS.** Narrow bands of orange, plum-red, and tan-brown toning visit the obverse margin, but the remainder of this lustrous Choice type coin is brilliant. Exceptionally free from abrasions, though the soft impression on the stars and Liberty's hair precludes classification as a full Gem. NGC ID# 253C, PCGS# 7044
- 3734 1877-S MS63 NGC.** Large S. Vibrant cartwheel luster illuminates this boldly struck and refreshingly unabraded Trade dollar type coin. Moderate chestnut-gold and powder-blue patina accompanies the borders. An opportunity for the alert specialist. NGC ID# 253E, PCGS# 7046

## PROOF TRADE DOLLARS

### 1874 Trade Dollar, PR64 Cameo A Surprisingly Scarce Proof Issue

- 3735 1874 PR64 Cameo PCGS.** A hint of light golden toning shows brief areas of warm-gray patina at the base of the portrait. The obverse strike is needle-sharp on Liberty's head as well as each star. The smooth, mirrored fields are undisturbed except for some shallow slide marks in the left obverse field and a small dig below 18 in the date. The reverse is likewise sharp with the exception of the right (facing) talon. Frosted motifs provide nice Cameo contrast. Population: 29 in 64 (2 in 64+) Cameo, 14 finer (2/18). NGC ID# 27YK, PCGS# 87054

- 3736 1875 PR58 PCGS.** Type One Reverse. No period after FINE. A brilliant specimen with substantial field reflectivity. Minor marks are scattered, and a subtle oval spot is noted below Liberty's extended hand. Encapsulated in a first-generation holder. NGC ID# 27YL, PCGS# 7055

### 1880 Trade Dollar, Reflective PR64 Choice Proof-Only Issue

- 3737 1880 PR64 NGC.** There was no great love for Trade dollars among the public, but once the Mint ceased circulation strikes and issued proofs only, interest in the series perked up. Dealers and speculators figured prominently in the resurgence. In response, the Mint struck a record 1,987 proofs in 1880. This is a mostly brilliant representative, with a faint overlay of pale gold that deepens at the rims. The motifs are well-struck except for the right-hand stars, while the fields are glassy-mirrored and deeply reflective. NGC ID# 27YS, PCGS# 7060

## MORGAN DOLLARS

- 3738 1878 8TF Diagonal in 8, VAM-17, MS65 PCGS. CAC.** A lovely Gem Uncirculated example of this popular overdate, with gorgeous violet toning consistent over the obverse while the reverse is a more subtle golden-gray with hints of the blue and rose that combine so well on the front. The 8 Tailfeathers pieces were struck before the 7 Tailfeathers varieties, making them the first issue in the iconic Morgan dollar series. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

- 3739 1878-CC MS65 PCGS.** A remarkably luminous frost-white Gem with sharp design elements and largely unabraded surfaces. The first-year Carson City Morgan is not particularly rare overall, but it draws strong demand in high grade among collectors assembling CC-mint date sets. NGC ID# 253M, PCGS# 7080

- 3740 1878-CC MS65 NGC.** Vivid shades of sea-green and violet toning blanket the obverse of this attractive Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed and the well-preserved, lustrous surfaces add to the outstanding eye appeal. NGC ID# 253M, PCGS# 7080

- 3741 1878-CC MS65 PCGS.** A small mark under Liberty's eye is likely all that prevents this piece from receiving at least a Plus designation if not a full MS66 grade. The frosty, untuned luster is otherwise unabraded, and the strike is sharp aside from on the eagle's talons. First-year Carson City Morgans are in constant demand in Gem of better grades.

*From The Glacier Park Collection.* NGC ID# 253M, PCGS# 7080

- 3742 1878-CC MS65 PCGS.** This sharp, frosty Gem displays untuned cartwheel luster and just a few unobtrusive grazes on Liberty's cheek. The first-year Carson City Morgan dollar is a slightly better date in high grade when compared to the early and mid-1880s issues, popular among specialists of this series. NGC ID# 253M, PCGS# 7080

- 3743 1879 MS66 PCGS Secure.** This Premium Gem is frosty, brilliant, and well-struck. Liberty's cheek is clean, and were it not for a singular graze in the left obverse field and a scuff on the upper-left portion of the eagle's breast an even finer grade might have been achieved. PCGS lists five finer non-Prooflike pieces, plus two MS66 Prooflike coins and two MS66 Deep Mirror Prooflike examples (1/18). NGC ID# 253S, PCGS# 7084

- 3744 1879 MS66 PCGS.** Irregular sea-green, rose-gold, amber, violet, and blue-green toning appears over both sides of this Premium Gem, attesting to the originality of the frosty mint luster. This high-end 1879 Morgan is well-detailed and shows only a few unimportant contact marks. Higher-grade pieces are rare. NGC ID# 253S, PCGS# 7084

- 3745 1879-S MS67+ PCGS. CAC.** Radiant, brilliant cartwheel luster beautifully showcases almost perfect surfaces on this high-end Superb Gem type coin. The 1879-S is available in MS67, but Plus-graded CAC representatives are elusive, and finer pieces are moderately scarce. NGC ID# 253X, PCGS# 7092

- 3746 1879-S MS67 Prooflike PCGS. CAC.** Third Reverse (slanted top arrow feather, convex breast). A brilliant and strongly contrasted example, with silver-mirrored fields and smoothly frosted devices. Vibrant mint luster makes this a visually arresting coin. A few light abrasions opposite the nose are noted, but they are minor indeed. The strike is needle-sharp. Population: 54 in 67 (5 in 67+) Prooflike, 3 finer. CAC: 19 in 67, 2 finer (2/18). NGC ID# 253X, PCGS# 7093

- 3747 1880 MS66 PCGS.** Semireflective fields retain enough mint frost to capture strong cartwheel luster across both sides of this sharply struck, brilliant dollar. More than 12.6 million pieces were struck, yet amazingly neither service has certified an 1880 silver dollar any finer than the Premium Gem level. Marks and abrasions are few, all too minor for individual mention. NGC ID# 253Y, PCGS# 7096

- 3748 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. The strongest overdate of the series, paired with an obsolete reverse subtype. The Carson City mintmark provides further interest. Lustrous and lightly toned with a suitable strike and a few minor facial grazes. Encased in an old green label holder. Ex: *Charlotte ANA National Money Show Signature (Heritage, 3/2007)*, lot 1225; *FUN Signature (Heritage, 1/2015)*, lot 5898, where it brought \$1,527.50. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

- 3749 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS65 PCGS.** A Top 100 Variety. The 79 underdigits are plainly visible within the loops of the 80 in the date. This popular VAM variety is elusive in Gem or better grades. This piece is boldly struck and mostly brilliant, showing a few light obverse marks and a nearly pristine reverse. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**1880/79-CC Silver Dollar, MS66  
VAM-4, Reverse of 1878**

- 3750 1880/79-CC Reverse of 1878, VAM-4, MS66 PCGS.** A Top 100 Variety. The ears, crossbar, and downstroke of the underdigit 7 remains, and portions of the 9 are also apparent. The Second Reverse characteristic is shared with VAM-7. A lustrous, well-struck, and virtually brilliant Premium Gem. Smooth aside from small marks near the second S in STATES. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

- 3751 1880-CC 8/7, Reverse of 1878, VAM-7A, MS64+ PCGS. CAC.** A Hit List 40 Variety. A dash beneath the second 8 in the date and clashing at Liberty's throat are key attributes of this variety. The coin is brilliant, sharp, and shows only a few light marks on Liberty's cheek with clean fields. The Plus designation is well-deserved. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

**1880-CC Morgan Dollar, MS66+  
VAM-9, 8 Over 7**

- 3752 1880-CC Reverse of 1879, 8/7 Dash, VAM-9, MS66+ PCGS. CAC.** Far fewer 1880-CC dollars were distributed by the GSA than the 1882 through 1884 Carson City issues, and only 36 pieces are graded higher than this outstanding example at PCGS (all varieties), plus eight finer at CAC (2/18). Sharply struck, brilliant, and thickly frosted, this Premium Gem maintains nearly unmarked fields and shows faint diagonal roller marks over the centers. NGC ID# 35BS, PCGS# 41145 Base PCGS# 7100

- 3753 1880-O MS64 PCGS.** Oval O. A lustrous and lightly toned Choice New Orleans silver dollar. Well struck, and the fields are exceptionally devoid of contact. Liberty's cheek is also smooth for the MS64 level. The third-party services are reluctant to assign an MS65 grade to high-end examples of the '80-O, due to the wide price gap between MS64 and MS65. NGC ID# 2543, PCGS# 7114

- 3754 1880-O MS64 PCGS.** Small or Micro O. Light golden-brown toning adorns the borders of this lustrous New Orleans near-Gem. The strike is bold, and the obverse field is exceptionally unabraded. Given the five-figure cost of an MS65 example, the MS64 grade provides superior value for the issue. NGC ID# 2543, PCGS# 7114

- 3755 1880-O MS64 PCGS.** Softly frosted and brilliant, this Choice 1880-O Morgan dollar displays only a few light luster grazes on the obverse that limit the grade. Slight strike weakness on the eagle's breast and the hair above Liberty's ear is typical of most 1880-O Morgans that we have seen. Finer examples of this date are conditionally rare. NGC ID# 2543, PCGS# 7114

- 3756 1880-O MS64 PCGS. CAC.** Small or Micro O. A lustrous and lightly toned Choice New Orleans dollar. A good strike and an absence of notable marks confirms the quality. The 1880-O is a costly acquisition any finer.  
*Ex: FUN Signature (Heritage, 7/2010), lot 4089, which realized \$1,955. NGC ID# 2543, PCGS# 7114*

- 3757 1881-CC MS66 PCGS. VAM-2.** Forest-green and golden-brown toning augments the margins, while the fields and motifs are mostly brilliant. A lustrous and lovely low-mintage Carson City Premium Gem. Crisply struck and pleasing with superior preservation. NGC ID# 2549, PCGS# 7126

- 3758 1881-CC MS66 PCGS. VAM-2.** Only a whisper of gold and lime toning visits this lustrous and nicely struck high-grade silver dollar. The cheek displays a few delicate grazes, but the overall preservation is impressive. Among Carson City Morgan issues, only the 1885-CC has a lower mintage. NGC ID# 2549, PCGS# 7126

- 3759 1881-CC MS66 PCGS.** Only 296,000 Morgan dollars were struck at the Carson City Mint in 1881, but many high-quality examples were preserved in Treasury vaults. This delightful Premium Gem exhibits sharply detailed design elements and smooth, lustrous surfaces. NGC ID# 2549, PCGS# 7126

- 3760 1881-CC MS66 PCGS.** This 1881-CC Morgan dollar is boldly struck and shows no significant abrasions. Liberty's cheek is especially clean. Both sides are mainly brilliant but exhibit a few hints of golden toning. Housed in a green label holder. NGC ID# 2549, PCGS# 7126

- 3761 1881-CC MS66+ PCGS. CAC. VAM-2.** The upper loops of the 8s in the date exhibit small die chips on this variety. A nearly brilliant representative of this low-mintage and popular Carson City issue, this 1881-CC Morgan displays lustrous, well-struck surfaces with only minor marks on Liberty's cheek.  
*Ex: ANA Signature (Heritage, 8/2014), lot 4737. NGC ID# 2549, PCGS# 7126*

- 3762 1881-CC MS66+ PCGS. CAC. VAM-2.** The 1881-CC Morgan dollar boasts a low mintage of 296,000 pieces, though the GSA holdings ensure its high-grade availability. On this subtly frosted MS66+ example, the obverse is richly toned gold with arcs of peach and blue at the top, while the reverse is nearly brilliant with a hint of faint, isolated color. The strike is suitably sharp throughout this CAC-endorsed example. A bar in the upper loop of the second 8 and a tilted-left mintmark confirms the VAM-2 variety. NGC ID# 2549, PCGS# 7126

**1881-CC Morgan, MS65+ Deep Mirror Prooflike  
Cameo-Contrasted, Glassy Silver Fields**

- 3763 1881-CC MS65+ Deep Mirror Prooflike PCGS. VAM-2.** The two 8s in the date are doubled on this VAM-2 die marriage. Deep Mirror Prooflike 1881-CC dollars are notably scarce in Gem or better condition. This high-end Gem example displays a bold strike and unquestionable cameo contrast set against flashy mirrored fields. Hints of light golden toning grace otherwise brilliant, original surfaces. Population: 8 in 65+ Deep Mirror Prooflike, 69 finer (2/18). NGC ID# 2547, PCGS# 97127

- 3764 1881-S MS67+ PCGS. CAC.** A spectacular Superb Gem that boasts a full strike, dazzling luster, and smooth, brilliant surfaces. Ideal as a type purchase. It is difficult to believe that such a coin was removed from a sealed, stored, and shipped bag of silver dollars. Perhaps it was the uppermost coin in the uppermost bag in a Treasury vault. NGC ID# 2549, PCGS# 7130

- 3765 1882-CC MS66+ PCGS. CAC.** A delightful Premium Gem Morgan dollar with the well-deserved Plus designation, this coin exhibits sharply detailed design elements and well-preserved lustrous surfaces, with highlights of champagne-gold and lavender toning. NGC ID# 254S, PCGS# 7134
- 3766 1882-CC MS66 Prooflike PCGS.** Complete mint brilliance and a lack of marks heighten the Prooflike reflectivity throughout this fully struck Premium Gem dollar. This CC-mint issue is scarce at this level, and only one Prooflike example is finer at PCGS (2/18). NGC ID# 254B, PCGS# 7135
- 3767 1882-CC MS65 Deep Mirror Prooflike PCGS.** This brilliant Carson City dollar displays the traditional frost-white luster on the devices but has deep, liquidlike mirroring in the fields. Cameo contrast is apparent on each side, and no distracting abrasions are seen. The eagle's breast is a trifle softly struck. NGC ID# 254B, PCGS# 97135

**1882-O Dollar, MS66  
Light Border Toning, Few Finer**

- 3768 1882-O MS66 PCGS.** This New Orleans Morgan dollar issue most often appears on the market in MS63 and MS64 condition, though Gems are also available with regularity. That all changes at the Premium Gem level, where the 1882-O becomes conditionally rare. Brilliant interiors meld with daubs of blue and russet-gold patina at the rims. The extreme centers are incomplete, as always. Seven finer submissions at PCGS (2/18). NGC ID# 254C, PCGS# 7136
- 3769 1883-S MS62 PCGS.** A better date in Uncirculated condition, here offered with brilliant surfaces and slight reflectivity in the fields. The strike is sharp, and a cluster of light abrasions on Liberty's cheek is all that keeps this coin from an MS63 grade. NGC ID# 254K, PCGS# 7148
- 3770 1883-S MS62 PCGS. CAC.** The 1883-S is much scarcer in Mint State than the five preceding San Francisco Morgan dollar issues, though it is more available than the 1884-S. The present lustrous and brilliant example shows slight blending of the design elements in the centers, but marks are minimal for the MS62 level. NGC ID# 254K, PCGS# 7148
- 3771 1883-S MS63 PCGS.** A good strike, strong mint luster, and brilliant surfaces are the primary qualities of this San Francisco silver dollar. The fields are remarkably free from contact, though the portrait displays unimportant grazes. Despite a fairly high mintage, the 1883-S is scarce in Uncirculated grades. NGC ID# 254K, PCGS# 7148
- 3772 1883-S MS63 NGC.** The 1883-S Morgan dollar is a challenging issue in high grade. This attractive Select specimen exhibits sharply detailed design elements and lustrous, brilliant surfaces, with some minor chatter in the fields and on Liberty's cheek. NGC ID# 254K, PCGS# 7148
- 3773 1883-S MS63 PCGS.** To the naked eye, this Select Mint State 1883-S dollar appears at least a grade point finer, although a loupe reveals trivial marks on the cheek beneath the patina. Both sides have champagne-gray and russet-olive toning, with the obverse slightly more mottled than the reverse. NGC ID# 254K, PCGS# 7148

- 3774 1884-CC MS65 Deep Mirror Prooflike PCGS.** This Gem Deep Mirror Prooflike Carson City dollar is brilliant, starkly contrasted, and truly "prooflike," showing a depth of mirroring in the fields that rivals Philadelphia Mint proofs of the same period. The coin shows a few light surface grazes that prevent an even finer grade, but the sharp central devices balance the eye appeal. NGC ID# 254M, PCGS# 97153
- 3775 1884-S AU58 PCGS.** Cartwheel luster is vibrant across both sides, though the centers show a whisper of wear. A loupe reveals only insignificant contact. The 1884-S is notorious for its rarity in Mint State, relative to the number of certified XF and AU examples. NGC ID# 254P, PCGS# 7156
- 3776 1884-S AU58 PCGS. CAC. VAM-3.** The mintmark is repunched within the loops. Dealers have joked that the 1884-S was "struck in AU" due to the rarity of the issue in Mint State. This is a partly lustrous example with only a trace of high-point friction over the central devices. Honey-gold borders surround brilliant interiors. NGC ID# 254P, PCGS# 7156
- 3777 1884-S — Cleaned — NGC Details. Unc.** It is difficult to find an 1884-S dollar without rub on the eagle's breast, or the hair above the ear. But the present semiprooflike example is unworn, and the lightly toned surfaces are only faintly hairlined. Liberty's lower cheek shows unobtrusive abrasions. NGC ID# 254P, PCGS# 7156
- 3778 1885-CC MS66 PCGS. VAM-2.** Dash under second 8. Splendid orange-gold toning dominates the obverse, although ocean-blue fills the margin. The reverse displays only pastel shades of blue and gold. Both sides are lustrous and exceptionally smooth. NGC ID# 254S, PCGS# 7160
- 3779 1885-CC MS66 PCGS. VAM-2A.** Only a whisper of tan toning adorns this lustrous and carefully preserved Carson City dollar. The strike is good except for incompleteness above Liberty's ear. Despite its status as the lowest-mintage Carson City Morgan issue, the 1885-CC is collectible due to its appearances in the 1970s GSA auctions. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66 Prooflike  
Brilliant and Strongly Lustrous**

- 3780 1885-CC MS66 Prooflike PCGS. VAM-3.** Liberty's cheek is smooth and frosted, while the surrounding fields display brilliant, moderately mirrored reflectivity for tremendous eye appeal. A needle-sharp strike adds to the long list of positives for this Premium Gem Prooflike dollar. The only mark of note is a short reeding mark below the left (facing) wing. The mintmark leans left and a pair of hair-thin die lines near the eye confirm the VAM-3 die pair. PCGS reports just two numerically finer Prooflike examples (among all varieties), plus two finer coins in Deep Mirror Prooflike (2/18). NGC ID# 254S, PCGS# 7161
- 3781 1885-CC VAM-3 MS66 PCGS.** Multiple bands of rainbow color on the upper reverse add tremendous eye appeal to this partially reflective Premium Gem 1885-CC. There are no significant marks anywhere on the coin — just some faint grazes in the mint frost, while silver cartwheel luster beams brightly over both sides. Sharply struck, the coin displays light die scratches near the eye that define the VAM-3 variety, as well as a left-tilted mintmark that nearly touches the bow. PCGS reports just 93 numerically finer examples, all varieties combined (2/18). PCGS# 42595 Base PCGS# 7160

**3782 1886 MS66+ Prooflike PCGS Secure.** The 1886 is a high-mintage issue that is plentiful in Mint State, but prooflike pieces are comparatively scarce, and become rare in the present quality. This brilliant Premium Gem offers dazzling field reflectivity along with consequential cameo contrast. The fields appear pristine and the cheek displays only unobtrusive contact. Population: 31 in 66 (4 in 66+) Prooflike, 3 finer (2/18). NGC ID# 254V, PCGS# 7167

**3783 1886-O MS62 PCGS.** This Louisiana issue is a major condition rarity, rarely offered in MS64 and scarcely seen in MS63. This MS62 is a perfect alternative for budget-minded collectors. It offers the total brilliance and satin luster of a higher grade, though the strike is characteristically incomplete and light marks are peppered over each side. NGC ID# 254W, PCGS# 7168

**1886-S Dollar, MS66  
Only Five Coins Finer at PCGS**

**3784 1886-S MS66 PCGS.** From a mintage of just 750,000 pieces, the 1886-S is scarce in Gem condition and rare any finer. A dappling of earth tone colors covers both sides of this Premium Gem example, with shades of blue, lilac, forest-green, and reddish-tan supported by full mint luster. The surfaces are exceptionally smooth and unabraded. The strike lacks sharpness only in small measure above the ear and on the talons. Eye appeal is extraordinary. Population: 49 in 66 (6 in 66+), 5 finer (2/18). NGC ID# 254X, PCGS# 7170

**3785 1886-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. Although undesignated as such by PCGS, this is the well-known variety with repunched mintmark serifs, similar to (but more interesting than) VAM-4. The mintmark was apparently entered tilted right, then corrected. A lustrous and lightly toned Gem. The strike is good, and both sides show only delicate grazes. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170

**3786 1887/6 VAM-2 MS65 PCGS. CAC.** A Top 100 Variety. The telltale curved line above the base of the 7 identifies the *Guide Book* overdate variety. This lustrous stone-white Gem has exemplary surfaces. The centers show only minor incompleteness. CAC: 39 in 65, 9 finer without a Prooflike designation, 8 as 65 Prooflike (2/18). NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

**3787 1887 MS67 PCGS.** Rich sea-green and russet-brown toning accompanies the borders of this lustrous and high-grade Morgan type coin. A mint-made strike-through is beneath the chin, but post-strike imperfections are essentially absent. NGC ID# 27Y3, PCGS# 7172

**1887/6-O Dollar, Toned MS64  
VAM-3, Top 100 Variety**

**3788 1887/6-O VAM-3 MS64 PCGS Secure.** A Top 100 Variety. The outside curve of an underlying 6 right of the primary 7 in the date identifies this popular *Guide Book* variety. The overdate is bold on this near-Gem, unobscured by original shades of silver-gray, yellow, mint-green, ice-blue, and orange patina. Incompletely struck in the centers, but well-defined elsewhere. There is only one finer example at PCGS (2/18). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

**3789 1887-O MS65 PCGS.** Glints of gold dominate the outer areas, where daubs of blue similarly appear. The interiors remain bright silver and show expected incompleteness on the hair strands over the ear and on the eagle's breast. PCGS reports merely 14 finer submissions, though the issue claims a healthy mintage of 11.5 million coins (2/18). NGC ID# 2547, PCGS# 7176

**3790 1887-O MS65 PCGS Secure.** A virtually brilliant New Orleans Gem. Bright cartwheel luster sweeps across the well-preserved surfaces. The centers and claws are softly struck, but the remainder of the strike is good. Despite a generous mintage, the 1887-O is a costly acquisition any finer. NGC ID# 2547, PCGS# 7176

**3791 1887-S MS65+ PCGS Secure. CAC.** The 1887-S Morgan dollar is available in MS65 but scarce finer. PCGS has Plus-graded only 25 Gems and lists 37 finer coins (1/18). This CAC-approved example is sharp and frosty with warm orange-gold and olive toning. Under magnification, a few unobtrusive luster grazes are noted on Liberty's cheek. NGC ID# 2554, PCGS# 7180

**3792 1888-O MS66 PCGS.** Liberty's curls and the eagle's talons are well-struck on this brilliant and satiny representative. The cheek and open fields are beautifully preserved. Collectors have benefited greatly from the distribution of thousands of 1888-O dollars during the early 1960s. However, no coins are graded higher than Premium Gem at PCGS (2/18). NGC ID# 2556, PCGS# 7184

**3793 1888-O MS66 NGC.** Round O. Light gold toning visits the obverse, while the reverse is virtually brilliant. This lustrous New Orleans silver dollar is impressively devoid of marks. The centers exhibit inexactness of strike. Housed in a circa-2000 holder. *Ex: Silver Fox Collection (Heritage, 7/2007), lot 1461, which realized \$1,495.* NGC ID# 2556, PCGS# 7184

**3794 1888-O MS66 ★ NGC.** A delightful Premium Gem representative, with the coveted Star designation, this sharply detailed, lustrous specimen displays highlights of violet and golden-brown toning, with most of the color on the obverse. NGC has graded two numerically finer examples (2/18). NGC ID# 2556, PCGS# 7184

**1888-O Silver Dollar, MS66+  
Semiprooflike Fields**

- 3795 1888-O MS66+ PCGS. CAC.** PCGS has not graded a single 1888-O dollar finer than MS66+, although a small number of Prooflike and Deep Mirror Prooflike pieces are reported in this grade (2/18). The present coin is sharply struck and remarkably free of even minor abrasions. Both sides are brilliant and show nearly prooflike reflectivity in the fields, surrounding frost-white devices. NGC ID# 2556, PCGS# 7184

**1888-O Dollar, MS65 Deep Mirror Prooflike  
Brilliant With Strong Field-Device Contrast**

- 3796 1888-O MS65 Deep Mirror Prooflike PCGS. CAC.** While reasonably available in lesser grades, the 1888-O is scarce in Gem Deep Mirror Prooflike and rare any finer. This CAC-endorsed example is brilliant with deeply mirrored fields and well-frosted devices. The strike is exceptionally sharp for a New Orleans issue. Only a few light field marks are seen on either side. Population: 65 in 65 (2 in 65+) Deep Mirror Prooflike, 6 finer. CAC: 11 in 65, 2 finer (2/18). NGC ID# 462J, PCGS# 97185
- 3797 1888-S MS65 PCGS.** Available in MS65, the 1888-S Morgan dollar is rare finer. This Gem displays glistening mint luster, a clean cheek, and well-struck devices. Champagne-toned interiors cede to deeper amber, olive, and blue border hues. NGC ID# 2557, PCGS# 7186
- 3798 1888-S Gouged Eagle, VAM-13, MS65 PCGS.** Hit List 40 Variety. VAM-13 is a so-called WOW List variety on VAMWorld.com, with die gouges galore on the eagle's neck, left wing, between the legs, and below the left talon in the arrow fletchings. These are perhaps the most distinctive die gouges on a Morgan variety excluding the 1890-CC Tailbar — about 30 die gouges of various sizes in all. This brilliant-white Gem is mostly prooflike with die polish lines in the obverse fields and a few light marks on the cheek, which appear to be Mint-related marks from drawing the planchet. The 1888-S is scarce in high grade regardless of variety, with just 37 pieces certified numerically finer at PCGS (2/18). NGC ID# 2557, PCGS# 412613 Base PCGS# 7186

**1889-O Silver Dollar, Sharp MS65  
Exceptionally Mark-Free and Brilliant**

- 3799 1889-O MS65 PCGS.** Considering the normal 1889-O is notoriously weakly struck and lifeless, this Gem coin is a revelation. True enough, the strike over the ear is slightly soft, but the blazing mint luster and brilliant-white, nearly unmarked surfaces more than compensate for that factor. Only a few pinprick contact marks are visible on this exceptional example. PCGS reports just 13 numerically finer pieces (2/18). NGC ID# 255A, PCGS# 7192

- 3800 1889-S MS65 PCGS.** The surfaces of this attractive 1889-S are partially reflective beneath a subtle dappling of golden-gray toning. Bright silver luster shines through the sparse patina. A sharply struck coin in most areas, we note a bit of softness over the ear that does not detract from the overall eye appeal. NGC ID# 255B, PCGS# 7194

- 3801 1889-S MS63 Deep Mirror Prooflike PCGS.** Exceptionally smooth save for an unobtrusive shallow mark near Liberty's eye. A lustrous and lightly toned representative. Very scarce in Deep Mirror format. Certified in an old green label holder.  
*Ex: Long Beach Signature (Heritage, 6/2004), lot 9822, which realized \$891.25.* NGC ID# 255B, PCGS# 97195

- 3802 1890-CC MS64 PCGS Secure. VAM-5.** Close to VAM-5A, with many delicate cracks on both sides. A well-struck Choice Carson City dollar that boasts booming luster and virtually brilliant surfaces. The fields are remarkably smooth, and the cheek shows only light grazes. NGC ID# 255D, PCGS# 7198

- 3803 1890-CC MS64 PCGS Secure. VAM-5A.** This Choice Carson City dollar exhibits sharply detailed design elements and shows an extensive network of faint die cracks on both sides. The lightly marked surfaces radiate vibrant mint luster, and the overall eye appeal is attractive. NGC ID# 255D, PCGS# 7198

- 3804 1890-CC MS64 PCGS. VAM-3.** *Ex: Carson City Collection.* Light silver-gray and straw-gold toning denies full brilliance, but this lustrous near-Gem has a good strike and exceptionally clean surfaces. The cheek shows faint roller marks, as coined. NGC ID# 255D, PCGS# 7198

- 3805 1890-CC MS65 PCGS.** The strike is sharp and abrasions are few across the Gem surfaces of this well-preserved Carson City dollar. A few hints of almond-gold toning do not diminish the overall brilliant-white sheen of the attractive and lustrous surfaces. The 1890-CC is seldom available in higher grades — PCGS reports just 16 numerically finer examples (2/18). NGC ID# 255D, PCGS# 7198

- 3806 1890-O MS65 PCGS. VAM-31.** The 9 in the date is lightly repunched north. Strong mint luster and exemplary preservation are characteristics of this desirable New Orleans Gem. The strike is good though shy of complete. The 1890-O is readily obtained in MS61 through MS64 grades but emerges as a conditional rarity at the MS65 level. NGC ID# 255E, PCGS# 7200

- 3807 1890-O MS65+ PCGS.** Deep forest-green and cherry-red patina invigorates this coruscating and remarkably clean Gem. The New Orleans Mint has a reputation for indifferent strikes, but on the present coin, even the hair above the ear exhibits pleasing detail. NGC ID# 255E, PCGS# 7200

**3808 1891 MS65 PCGS.** The beauty of this Gem is not so much the preservation — which is indeed excellent — but the vivid border toning that frames each side in rose-gold, cobalt-blue, and violet. The obverse center is orange-gold and the reverse is brilliant across the interior. A few small marks on Liberty's jaw limit the grade. Slight strike weakness is visible on the hair above the ear. NGC ID# 255G, PCGS# 7204

**3809 1891 MS65 PCGS.** The 1891 Morgan dollar is a scarce issue at the MS65 grade level, and finer coins are very rare. This lightly toned Gem exhibits well-detailed design elements and well-preserved surfaces with slightly dimmed mint luster. PCGS has graded three numerically finer examples (2/18). NGC ID# 255G, PCGS# 7204

**3810 1891 MS65 PCGS.** Dappled apple-green, autumn-gold, and slate-gray toning embrace this lustrous Gem. Contact is inconsequential except for an unobtrusive horizontal mark on the eagle's belly. A high-mintage issue, but surprisingly rare any finer. NGC ID# 255G, PCGS# 7204

**3811 1891-CC MS64+ PCGS. CAC.** The 1891-CC becomes scarce any finer than MS64, making this Plus-graded and CAC-endorsed near-Gem of special interest to anyone assembling a high-grade set. The strike is about normal for the issue with slight weakness in the centers, yet the blue and reddish-tan toning adds considerable eye appeal. Liberty's cheek shows only a few slight grazes. NGC ID# 255H, PCGS# 7206

**3812 1891-CC Spitting Eagle, VAM-3, MS64 NGC.** A Top 100 Variety. Blushes of cobalt-blue toning grace the obverse margin, while the remainder of that side is lilac-red and cream-gray. The reverse is brilliant save for a hint of peripheral butter-gold. Lustrous and well-preserved aside from minor contact on the eagle's breast. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**3813 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. The die lump below the eagle's beak confirms status as the "Spitting Eagle" variety, which emerged in quantity from the GSA auctions of the 1970s. A well-struck Gem with vibrant luster and peripheral peach-gold patina. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**3814 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. This variety is fairly plentiful overall, but PCGS has attributed only 21 examples in MS65 (two of which are Plus-graded) and two finer (2/18). Frosty, untuned mint luster encompasses this Gem example, illuminating above-average sharpness on the devices and showing only a few unobtrusive abrasions. An appealing example of the date and an outstanding example of the variety. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**3815 1891-CC Spitting Eagle, VAM-3, MS65 NGC.** A Top 100 Variety. A small die lump in the field near the eagle's beak earns this piece the "Spitting Eagle" moniker. Of further interest is light recutting on the first C in the mintmark. This Gem example is frosty and mostly untuned, showing bold central devices. A few hints of champagne color accent the borders. Only the most insignificant of luster grazes prevent a finer grade. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**3816 1891-S MS65 PCGS. CAC.** Whispers of maroon, electric-blue, and gold visit the highly lustrous surfaces of this sharply struck Gem. A few minor grazes may prevent an even finer grade. The 1891-S Morgan dollar is scarce in finer grades. NGC ID# 255K, PCGS# 7210

## 1891-S Morgan Dollar, MS66 Almost Fully Prooflike

**3817 1891-S MS66 PCGS. CAC.** Brilliant, free of bothersome abrasions, and endorsed by CAC, this high-end 1891-S Morgan dollar combines many attractive attributes in a single example of the date. Additionally, the fields are almost fully prooflike, which is a characteristic that is almost never seen on 1891-S dollars in this numeric grade. PCGS lists eight finer non-Prooflike coins and two MS66 Prooflike pieces (2/18). NGC ID# 255K, PCGS# 7210

**3818 1892 MS64+ PCGS.** This is a lustrous near-Gem that has faint wisps of tan patina. The devices are well-struck but show a few marks on Liberty's cheek. The fields are relatively clean. The obverse rim has a small planchet flaw (as made) at 3 o'clock on the rim. Ex: Santa Clara Signature (Heritage, 11/2002), lot 6636. NGC ID# 255L, PCGS# 7212

## 1892 Silver Dollar, MS65 Rarely Offered Finer

**3819 1892 MS65 PCGS.** In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers writes of the 1892: "Really choice MS-64 and gem MS-65 or finer coins are very hard to find." PCGS lists only eight MS66 coins finer than the present Gem, plus a few Prooflike and Deep Mirror Prooflike pieces in MS65 (2/18). Brilliant surfaces show softly frosted luster and are free of bothersome abrasions. Strike weakness occurs on the central high points, as invariably seen on this issue. NGC ID# 255L, PCGS# 7212

**3820 1892-CC MS63 PCGS Secure.** This brilliant 1892-CC borders on prooflike, with reflective fields that provide moderate contrast against frost-white devices. The strike is sharp including the hair strands above the ear. Only the talons show a bit of weakness. Light field chatter and minor luster grazes prompt the assigned grade, which seems on the conservative side. NGC ID# 255M, PCGS# 7214

**3821 1892-CC MS63 NGC. VAM-4B.** The mintmark is repunched and the N in IN is lightly triple clashed in front of Liberty's neck. A lustrous and brilliant scarcer-date Carson City dollar. The fields are smooth, and the cheek and neck show only moderate grazes. The strike is good aside from blending in the centers. NGC ID# 255M, PCGS# 7214

**3822 1892-CC MS64 NGC.** Incredibly vibrant cartwheel luster illuminates frosty surfaces on this near-Gem 1892-CC dollar. The devices show bold definition, and the light luster grazes that limit the grade are well hidden by the beautiful rose-gold and lavender toning that blankets the obverse interior. The reverse center is brilliant, and both sides show vivid ocean-blue border toning. NGC ID# 255M, PCGS# 7214

- 3823 1892-S AU50 PCGS Secure.** The 1892-S Morgan dollar is reasonably available in circulated grades, but Mint State examples are difficult to locate. This attractive AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster. Low-intensity shades of pink and pale gold toning add to the overall eye appeal. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, Choice AU  
Bold Reflectivity Throughout the Fields**

- 3824 1892-S AU55 PCGS. CAC.** Many will see the present lot as a remarkable opportunity, in part because prooflike (or nearly prooflike) examples of the 1892-S are seldom seen. While light field chatter exists on each side, the fields are luminous and, it can certainly be argued, fully reflective. Liberty's frosted cheek is smooth. Combined with the scarcity of the issue in Choice About Uncirculated condition, this coin gives the astute collector an opportunity to acquire a challenging issue in truly uncommon condition. The coin is sharply struck with brilliant centers that are surrounded by attractive golden toning at the margins. One of the few pieces at this grade level to achieve CAC endorsement. CAC: 16 in 55, 21 finer (2/18).

Ex: *Summer FUN Signature (Heritage, 7/2012)*, lot 4385. NGC ID# 255P, PCGS# 7218

- 3825 1893 MS64 NGC.** A thin veil of dusky patina graces the silvery-white surfaces of this near-Gem 1893 dollar, which has well-struck design elements and remarkably clean fields for the grade. Even Liberty's cheek has only a few faint grazes under magnification. The 1893 is a better date with a mintage of only 378,000 pieces. NGC ID# 255R, PCGS# 7220

- 3826 1893 MS64 PCGS. VAM-3.** The 3 is repunched north, and both sides exhibit minor die doubling. The 1893 Morgan dollar is a low-mintage key from the Philadelphia Mint. This impressive Choice specimen exhibits well-detailed design elements, with just the slightest softness on the hair strands above the ear. The well-preserved pinkish-gray surfaces display slightly muted mint luster. NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS64+  
High-End, Strong Strike**

- 3827 1893 MS64+ PCGS Secure. CAC. VAM-3.** Minor repunching appears at the top of the 3, and slight doubling occurs on Liberty's profile and the left-side wreath leaves. Strike detail is remarkably strong on both sides of this softly frosted, high-end near-Gem, one of only 378,000 Morgan dollars minted in Philadelphia in 1893. Brilliant surfaces are clean for the grade. Much finer than average. NGC ID# 255R, PCGS# 7220

**1893 Dollar, Brilliant Gem  
Few Coins Known Finer**

- 3828 1893 MS65 PCGS Secure. VAM-3.** A financial "panic," as they were called then, was responsible for the repeal of the Sherman Silver Purchase Act and the low Morgan dollar production totals at the four mints in 1893. Specifically, fewer than 390,000 silver dollars were struck at Philadelphia. Gem condition represents the highest collectible grade for the issue, as only a few pieces are known finer. This example is entirely brilliant and well-struck on both sides. Liberty's cheek and the obverse fields are nearly free of marks. PCGS reports six finer coins (2/18). NGC ID# 255R, PCGS# 7220

- 3829 1893-CC XF40 PCGS.** This is a lightly worn, problem-free example of the 1893-CC Morgan, showing smooth pewter-gray surfaces and all major design details. High-end circulated examples of this final Carson City issue are scarce in comparison to heavily worn or Mint State pieces. NGC ID# 255S, PCGS# 7222

**1893-O Silver Dollar, MS61  
In an Old Green Label Holder**

- 3830 1893-O MS61 PCGS.** In a series where multimillion-coin mintages are the norm, the 300,000-piece coinage in New Orleans in 1893 was incredibly small. The 1893-O Morgan dollar is a better date in Uncirculated condition. This piece displays vibrant, frosty luster and brilliant surfaces. The usual strike softness occurs at the centers, but grade-limiting abrasions are scattered and unobtrusive. Housed in an old green label holder. NGC ID# 255T, PCGS# 7224

- 3831 1893-S — Damage — PCGS Genuine. VF Details.** This is a well-detailed, evenly worn pewter-gray example of the key Morgan dollar issue, showing smooth surfaces. The only imperfection is an old cut on the rim at the U in PLURIBUS that overlaps onto the reverse between the LL in DOLLAR. The coin is otherwise problem-free.

- 3832 1894 AU58 NGC.** Substantial, untuned luster engulfs this near-Mint coin. Only some minor slide marks on the portrait of Liberty prevent a full Mint State designation. This 1894 dollar is well-struck and highly appealing for the AU level. NGC ID# 255V, PCGS# 7228

- 3833 1894 AU58 NGC.** The mintage is impressively low at just 110,000 pieces. Since no circulation strikes are known for 1895, few can argue against the 1894 being the key Philadelphia issue of the series except in mint condition, where the 1901 holds sway. This near-Mint example is brilliant with nearly full mint luster. Pinprick marks and field chatter plus a short reeding mark by the eagle's head account for the assigned grade. NGC ID# 255V, PCGS# 7228

- 3834 1894 AU58 PCGS.** The 1894 Morgan dollar boasts the second-lowest business-strike mintage of the series at 110,000 pieces. This attractive near-Mint specimen shows just a trace of wear over the high points of the well-detailed design elements, and the lightly abraded surfaces retain much original mint luster. NGC ID# 255V, PCGS# 7228

**1894 Dollar, Lustrous MS62  
Fewer Marks Than Usual**

- 3835 1894 MS62 PCGS.** The average grade awarded by the leading certification services is fractionally higher than XF45. This low-mintage Philadelphia issue is a challenge to locate in mint condition, and examples are highly desirable at any Uncirculated level. This bright, frosty MS62 dollar shows fewer marks than the typical 1894 with only one on the jawline and another on the rim at 10 o'clock on the obverse. The central strike is trivially incomplete. NGC ID# 255V, PCGS# 7228
- 3836 1894-O MS61 PCGS.** This impressive Mint State Morgan dollar shows a typical strike for a New Orleans issue, with a touch of softness on the hair above the ear. The lightly toned surfaces show the expected number of minor contact marks for the grade. NGC ID# 255W, PCGS# 7230
- 3837 1894-O MS62 PCGS.** Softly frosted luster on each side is original, and the devices exhibit a good strike. The obverse is brilliant in the center with vivid aquamarine, gold, and amber border hues, while the reverse displays light golden peripheral toning around a champagne-tinted interior. Abrasions are of minimal distraction, despite the grade.  
*From The Property of a Lady, Part II.* NGC ID# 255W, PCGS# 7230

**1894-O Morgan Dollar, MS63  
Surprisingly Strong Eye Appeal**

- 3838 1894-O MS63 NGC.** This New Orleans dollar is seldom available with attractive surfaces and lustrous eye appeal, which are two of the most-visible assets of this Select Uncirculated example. As usual, the strike is a bit soft over the ear and on the eagle's talons. A few light scuffs and minor bagmarks exist on the otherwise smooth and brilliant surfaces. Struck from lightly clashed dies, the obverse shows a few brief and pleasing almond-gray overtones NGC ID# 255W, PCGS# 7230

**1894-O Morgan Dollar, Brilliant MS63**

- 3839 1894-O MS63 PCGS.** The 1894-O is a better date in Uncirculated condition despite a mintage in excess of 1.7 million coins. Many circulated examples of this issue are known, indicating that it was distributed into commercial channels in quantity. Likely other, unissued examples were melted under the authority of the Pittman Act of 1918. This Select survivor displays brilliant satin luster and well-struck devices. Several abrasions on Liberty's cheek limit the grade. NGC ID# 255W, PCGS# 7230
- 3840 1894-S MS63 PCGS.** The 1894-S is a better date in Uncirculated condition. This Select example displays brilliant, frosty mint luster and well-struck centers. Some light field marks and a few grazes on Liberty's cheek define the grade. NGC ID# 255X, PCGS# 7232
- 3841 1895-O AU55 PCGS Secure.** Because the 1895-O is the third-rarest Morgan dollar in Uncirculated condition (trailing only the 1892-S and 1893-S), an attractive About Uncirculated example makes a viable alternative to a full Mint State coin. This brightly lustrous '95-O fills the bill with Choice AU surfaces and a sharp strike. The obverse is brilliant, while wisps of pale golden-gray patina enhance the reverse. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58  
Better New Orleans Issue**

- 3842 1895-O AU58 NGC.** This near-Mint coin is virtually brilliant, showing just a hint of light golden color. The strike is above-average for the issue, and no significant wear is present. Friction on Liberty's cheek and scattered abrasions account for the grade. The fields show slight reflectivity. The 1895-O is scarce in mint condition, and this is a highly attractive AU-level coin that will appeal to most collectors of the series. NGC ID# 255Y, PCGS# 7236
- 3843 1895-S AU55 PCGS.** The 1895-S Morgan dollar boasts a low mintage of 400,000 pieces. This impressive Choice AU specimen shows only light wear on the well-detailed design elements and the lightly abraded surfaces retain significant amounts of satiny mint luster. NGC ID# 255Z, PCGS# 7238
- 3844 1896 MS67 PCGS.** The 1896 is readily available through the MS66 grade, and only marginally elusive in MS67, but it is nearly unavailable any finer. This is a lustrous and brilliant Superb Gem with frosted surfaces and a crisp strike. Marks are simply not an issue. PCGS has certified just two numerically finer pieces (2/28). NGC ID# 2562, PCGS# 7240
- 3845 1896-O MS61 PCGS Secure.** The 1896-O Morgan dollar is a difficult issue to locate in high grade and with a sharp strike. This impressive Mint State specimen offers well-detailed design elements, with a touch of the usual softness on the hair above the ear. The surfaces are lightly toned and lightly marked for the grade. NGC ID# 27ZU, PCGS# 7242

**3846 1896-O MS61 NGC. VAM-6.** The date is lightly repunched, most apparent on the base of the 6. This better-date New Orleans silver dollar has a nice strike and good eye appeal. Light to medium caramel-gold toning covers thoroughly lustrous surfaces. Marks are unimportant except east of the eagle's right (facing) wing. NGC ID# 27ZU, PCGS# 7242

**3847 1896-O MS62 PCGS.** Luster and strike are far above average for this conditionally scarce New Orleans issue, leaving a few small marks to account for the assigned grade. An isolated, minor mark beneath the chin is the most visible abrasion. The strike is sharp except in the area above the ear and, to a lesser extent, on the eagle's breast and legs. Overall, the eye appeal is excellent for an 1896-O. NGC ID# 27ZU, PCGS# 7242

**1896-S/S Morgan Dollar, MS63+  
Repunched Mintmark, Scarce S-Mint Issue**

**3848 1896-S/S VAM-5 MS63+ PCGS. CAC.** A Hot 50 Variety. The mintmark was initially entered into the die too high and slightly right, then corrected. Traces of an undermark remain visible in the lower loop and above the outer curve of the primary mintmark. The desirable VAM-5 variety aside, all 1896-S examples are highly sought in Select and finer Mint State grades. This is a near-brilliant example, sharply struck, with semireflective fields and flashy cartwheel luster. Splashes of yellow-gold toning surround the neck truncation. A few high-point scuffs account for the grade but do not limit the vibrant eye appeal. NGC ID# 2564, PCGS# 134022 Base PCGS# 7244

**3849 1897-O MS62 NGC.** The 1897-O is a better date in Uncirculated condition. This MS62 example, although moderately abraded, shows rich satin luster and an above-average strike. The coin is essentially brilliant and uncommonly appealing for the grade. NGC ID# 2565, PCGS# 7248

**3850 1897-S MS66+ PCGS Secure. CAC.** A Plus-graded Premium Gem example, with well-detailed design elements that show just a trace of blending on the hair above the ear. Shades of lavender-gray, violet, and sea-green toning visit the well-preserved, lustrous surfaces. The certified population dwindles at the next finer level. PCGS population: 46 in 66+, 30 finer. CAC: 76 in 66, 5 finer (2/18). NGC ID# 2567, PCGS# 7250

**1899 Silver Dollar, MS66+  
Few Pieces Known Finer**

**3851 1899 MS66+ PCGS. CAC.** The 1899 is always of interest to collectors for its low mintage (just 330,846 pieces). Most of the issue was not released until the mid-to-late part of the 20th century, so few coins were lost to attrition, yet it is a truly scarce in high-end MS66 and finer grades. This example displays the PCGS Plus designation and CAC endorsement. It would be called prooflike by many as well, although a few areas of light mint frost enter the reflective fields. The strike is sharp, while a faint dusting of gold patina overlays the brilliant-silver surfaces. Marks are microscopic and limited to a few tiny ticks. Population: 46 in 66+, 24 finer. CAC (PCGS and NGC combined): 83 in 66, 3 finer (2/18). NGC ID# 256C, PCGS# 7258

**3852 1899-O MS67 PCGS.** An essentially brilliant coin, this Superb Gem 1899-O dollar showcases sharp motifs and remarkably clean surfaces. Frosty silver-white luster spans each side and cartwheels easily beneath a light. PCGS lists a single MS68 non-Prooflike piece finer, plus two MS67 Deep Mirror Prooflike coins (2/18). NGC ID# 256C, PCGS# 7260

**3853 1899-O MS66 Prooflike PCGS.** This near-brilliant Premium Gem is uncommonly sharp for a New Orleans issue of this period, and the surfaces are appreciably free of distracting abrasions. Although numerous non-Prooflike pieces are known finer than MS66, this piece is among the finest Prooflike coins certified, and it is conditionally rare as such. NGC ID# 256C, PCGS# 7261

**1899-S Silver Dollar, MS66  
Rarely Encountered Finer**

**3854 1899-S MS66 PCGS Secure.** Virtually all 1899-S silver dollars remain in Uncirculated condition or nearly so, since few pieces were distributed into commerce. This sparkling Premium Gem avoided nearly all bagmarks from storage, handling, and transport. Splashes of deep-blue and reddish-tan toning accent both sides of the primarily brilliant-silver surfaces, with a sharp strike and exceptional eye appeal. PCGS reports just 11 numerically finer pieces (2/18). NGC ID# 256D, PCGS# 7262

**1900 Dollar, MS65 Prooflike  
Overlooked Prooflike Issue**

**3855 1900 MS65 Prooflike PCGS.** The 1900 dollar with any degree of reflectivity has long been recognized as a rarity by specialists. Its value has risen over the years, but relative to other similarly priced issues it still remains overlooked and undervalued. This is an all-brilliant example with undeniable reflectivity in the fields. The strike is strong in the centers of each side and there are only slight abrasions present. Population: 26 in 65 (3 in 65+) Prooflike, 6 finer (2/18). NGC ID# 256E, PCGS# 7265

**3856 1900-O/CC VAM-8 MS65 PCGS Secure.** A Top 100 Variety. Medium to deep golden-brown toning enriches this highly lustrous and nicely struck Gem. Several years after the Carson City Mint reverted to assay office status, leftover Morgan dollar reverse dies were overmintmarked and shipped to New Orleans as an economy measure. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

**3857 1900-S MS66 PCGS.** The 1900-S Morgan dollar is a scarce issue in MS66 condition and finer coins are virtually unobtainable. This impressive Premium Gem offers well-detailed design elements, with some fine die striations on the hair above the ear that were not fully struck out. The well-preserved surfaces are blanketed in low-intensity shades of pink and pale gold toning. PCGS has graded three numerically finer examples (2/18). NGC ID# 256H, PCGS# 7270

**3858 1901 AU58 PCGS Secure.** Just the slightest trace of high-point wear shows on the well-detailed design elements of this impressive near-Mint example and the lightly abraded surfaces retain much of their original mint luster intact. The overall presentation is most attractive. NGC ID# 256J, PCGS# 7272

**3859 1902-O MS66+ PCGS Secure. CAC.** As the Plus grade and CAC green label suggest, this Premium Gem 1902-O Morgan dollar is a stand-out coin among its peers. Well-struck and radiantly lustrous, the surfaces show a delicate champagne hue that adds to the eye appeal. PCGS lists 49 finer examples, including Prooflike coins in the same numeric grade (1/18). NGC ID# 256N, PCGS# 7280

**3860 1902-O MS66+ PCGS. CAC.** Produced in massive number (more than 8.6 million pieces struck), the 1902-O is seldom found with attractive surfaces. This smooth and lustrous high-end Premium Gem stands above 99+% of all certified examples. Brilliant, frost-white surfaces display a sharp strike with only minor weakness above the ear and on the eagle's right leg. Marks and abrasions are almost entirely absent. NGC ID# 256N, PCGS# 7280

**3861 1902-S MS65 PCGS.** Shades of greenish-gold, lavender-gray, and amber toning visit the well-preserved surfaces of this impressive Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded 58 numerically finer examples (2/18). NGC ID# 256P, PCGS# 7282

**3862 1902-S MS65 PCGS. CAC.** The 1902-S Morgan dollar is available in MS65, but finer examples are scarce and out of reach for many collectors. This piece is frosty and nearly brilliant, showing a hint of pale champagne toning. Slight strike weakness is visible on the eagle's breast and the hair above Liberty's ear. NGC ID# 256P, PCGS# 7282

**3863 1921-D MS66+ PCGS. CAC.** As the only Morgan dollar struck at the Denver Mint, the 1921-D has an allure that is exceeded only by its whopping mintage, which topped 20 million pieces. Despite the huge production, Premium Gem examples are scarce, and the Plus designation by PCGS in addition to the CAC endorsement are important adjuncts. This example is brilliant, frosted, essentially pristine. A finer example will be challenging to find. Population: 69 in 66+, 11 finer (2/18). NGC ID# 256Y, PCGS# 7298

**3864 1921-S MS65+ PCGS Secure.** Silver dollars were struck in great quantity at San Francisco in 1921, to back silver certificates and help fulfill the requirements of the Pittman Act. The 1921-S is thus plentiful in Mint State, but most examples are bagmarked and indifferently struck. The present untoned Gem is exceptional, since it features vibrant luster, an above average strike, and uncommonly unblemished surfaces. NGC ID# 256Z, PCGS# 7300

**3865 1921-S MS66 NGC.** The 1921-S is readily available through near-Gem where the two services report over 9,000 pieces. Even Gems can be located with some patience. Premium Gems such as the present offering are another story. NGC and PCGS have seen 181 so-graded coins and a solitary piece finer (2/18).

Strong luster issues from the silver-gray surfaces that are impeccably preserved. Moreover, the design elements are crisply defined, including all of Liberty's hair and the eagle's neck and wing feathers. The sharp strike is an important attribute as most 1921-S Morgans are weakly struck. NGC ID# 256Z, PCGS# 7300

**PROOF MORGAN DOLLARS**

**1900 Morgan Dollar, PR65  
From the Queller Collection**

**3866 1900 PR65 NGC.** A medley of golden-orange, ice-blue, and lilac toning adorns each side of this Gem proof, and the devices are sharply struck. Both sides exhibit a fair degree of contrast, heightening even more the coin's overall eye appeal. Only a few tiny marks are visible beneath a loupe.  
*Ex: Queller Family Collection (Heritage, 4/2008), lot 2207; FUN Signature (Heritage, 1/2012), lot 7304. NGC ID# 3KYV, PCGS# 7335*

**1902 Morgan Dollar, PR63  
Gold and Blue Tones**

**3867 1902 PR63 PCGS.** This was the first year the Mint switched to an all-brilliant finish for its proof products. Cameo examples are rare with only three coins so-graded at PCGS in all numeric levels (2/18). Gold and blue tones cover the few grade-limiting contact marks throughout this Select non-Cameo proof. The rims are broad and squared-off, and the fields are reflective beneath the toning. NGC ID# 2822, PCGS# 7337

## PEACE DOLLARS

- 3868 1921 MS65 PCGS.** This is a satiny and attractive 1921 High Relief Peace dollar, apparently struck in the later stages of production while the Mint struggled with the extreme pressure needed to properly strike the medallion design. As a result, some of Liberty's hair strands are incompletely brought up and small areas of the eagle's wing edges lack sharp definition. Vibrant, coruscating luster compensates and exceptionally few marks are visible on the smooth, appealing surfaces. Brilliant silver luster illuminates faint traces of champagne-gold and lilac toning near the borders. *From The Glacier Park Collection.* NGC ID# 2U4E, PCGS# 7356
- 3869 1921 MS65 NGC.** A Gem High Relief Peace dollar is on many collectors' want lists, even if the rest of the series is not. The frosty coin offered here displays splashes of gold and russet toning over mostly unmarked surfaces. The centers show typical weakness, and a loupe reveals bold strike doubling on Liberty's profile. NGC ID# 2U4E, PCGS# 7356
- 3870 1921 MS65 NGC.** Faint iridescence combines for a grayish-gold hue over satiny, nearly unmarked surfaces of this Gem High Relief dollar. As usual, the central strike is not fully brought up, yet this piece is remarkably well-preserved and displays softly lustrous, attractive natural patina. NGC ID# 2U4E, PCGS# 7356
- 3871 1921 Matte Proof Dies, VAM-1F, MS65 PCGS.** The PCGS insert describes the VAM simply as "Polishing Lines." They identify the marriage, but what makes VAM-1F special is that the dies produced matte proofs in addition to circulation strikes. This lustrous Gem has light green-gold toning and minimally marked surfaces. A pair of faint parallel gray streaks cross the central obverse. PCGS# 518799 Base PCGS# 7356
- 3872 1924 MS67 NGC.** A faint champagne tint warms the frosty, nearly pristine surfaces of this Superb Gem type coin. Under a loupe, faint metal flowlines in the margins appear as a result of die wear and contribute to the vibrancy of the cartwheel effect. Only two finer coins are reported at NGC and PCGS combined. Census: 92 in 67 (2 in 67+, 1 in 67 ★), 1 finer (1/18). NGC ID# 257J, PCGS# 7363
- 3873 1926-D MS66 PCGS.** The 1926-D is moderately available in MS66, but PCGS lists only eight finer submissions (2/18). This Premium Gem is brilliant, frosty, and untoned, showing excellent eye appeal. IN is weakly defined near the left obverse rim, but the interiors show bold detail. NGC ID# 257P, PCGS# 7368
- 3874 1926-D MS66 PCGS. CAC.** A remarkable Premium Gem that boasts dazzling luster and brilliant unblemished surfaces. The centers have a full strike, though the convex obverse border shows minor inexactness. CAC: 70 in 66, 2 finer (2/18). NGC ID# 257P, PCGS# 7368
- 3875 1927 MS65 PCGS.** Delicate golden-gray toning thinly drapes surfaces that radiate satiny, rather than frosty mint luster and exhibit expectedly few marks for the MS65 assessment. Strike detail is good on Liberty's portrait and the eagle. The legends on each side are somewhat softer. Only 16 better-graded submissions at PCGS (2/18). NGC ID# 257S, PCGS# 7370
- 3876 1928-S MS64 NGC. CAC.** Light orange-gold and powder-blue toning graces the left obverse. Lustrous and impressively unabraded with a sharp strike and pleasing eye appeal. As seen on most Uncirculated 1928-S Peace dollars, WE TR and the designer's monogram are nicely die doubled. NGC ID# 257W, PCGS# 7374
- 3877 1934 MS66 PCGS.** While the 1934 Peace dollar is somewhat available in Premium Gem condition, it is virtually unavailable any finer. This vibrant and attractive MS66 displays blazing silver surfaces and a needle-sharp strike. Liberty's hair definition is outstanding, and the eagle's plumage is well-defined. A speckling of reddish-brown toning makes a brief appearance in the left field of both the obverse and reverse, although the coin is visually brilliant and frosty with compelling silver luster. Marks are simply not a problem, limited to a few nicks on the neck truncation. NGC ID# 257Y, PCGS# 7375
- 3878 1934 MS66 PCGS. CAC.** As one might expect for a CAC-approved Premium Gem, this 1934 Peace dollar shows a clean cheek and field on the obverse and has no bothersome abrasions on the reverse eagle's wing. Varying degrees of golden-gray and olive toning appear on each side, deepening toward the borders. Coins in this grade are moderately elusive, and PCGS lists only three numerically finer pieces (2/18). NGC ID# 257Y, PCGS# 7375
- 3879 1934-D MS65 PCGS.** The 1934-D is much more elusive (and more expensive) in grades above MS65. This lustrous and sharp example seems high-end for its Gem grade, with satin-smooth surfaces and strong silver luster throughout both sides. Marks are limited to a luster graze on the neck and a pair of minor abrasions in the reverse field beneath E PLURIBUS. Bits of reddish-tan toning congregate at the borders and confirm the original, mostly brilliant surfaces. NGC ID# 257Y, PCGS# 7376

## End of Session Two

# SESSION THREE

## PATTERNS

1855 Flying Eagle Cent in Copper or Bronze  
Judd-168, PR53

- 3880** 1855 Flying Eagle Cent, Judd-168, Pollock-193, R.4, PR53 NGC. A Flying Eagle cent pattern featuring a hooked-neck eagle and slanting 5s on the obverse. The diameter is that of a large cent, and the reverse is similar to the issued 1855 cent. It shows ONE CENT at the center surrounded by a circular wreath bound by a ribbon. Struck in copper or bronze with a plain edge. Slight, even wear over the high points indicates this piece probably circulated for a short amount of time. The surfaces are dusky reddish-brown with a slight blue accent of color over the highest portions of the design. NGC ID# 29AG, PCGS# 11720

1863 Two Cent Piece in Bronze  
Judd-312, Iridescent PR65 Red and Brown

- 3881** 1863 Two Cents, Judd-312, Pollock-377, R.4, PR65 Red and Brown PCGS Secure. The designs resemble the issued 1864 Small Motto two cent piece, except for several important differences: The date is 1863, the motto is GOD OUR TRUST, CENTS is strongly curved, and the base of the wreath lacks ribbon ends. Struck in bronze with a plain edge. This is a beautiful coin and the Red and Brown designation does not do it justice. It's not that it is not Red and Brown; that part is accurate, but the surfaces display bright iridescence that is enlivened by the depth of mirroring in the proof fields. NGC ID# 29ER, PCGS# 70467

1865 With Motto Ten Dollar in Copper  
Judd-450, PR64 Brown

- 3882** 1865 Ten Dollar, Judd-450, Pollock-522, High R.6, PR64 Brown NGC. A so-called transitional pattern that pairs the regular 1865 obverse with a Motto reverse not issued for commerce until 1866. Struck in copper with a reeded edge. This fully struck and nicely mirrored near-Gem displays deep golden-brown toning, with hints of aquamarine across the reverse field. We note only one small spot above the upper arrow shaft. NGC ID# 29JV, PCGS# 60637

1882 Liberty Nickel, Struck in Nickel  
Judd-1690, PR64

- 3883** 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR64 PCGS. A popular precursor to the Liberty nickel. Dated 1882 instead of 1883, and the stars are arranged differently relative to the portrait, particularly star 10. The reverse is identical to the issued 1883 No Cents nickel. Struck in nickel with a plain edge. An intricately struck and mark-free cream-gray specimen. A few tiny flecks are noted near star 1 and the date. NGC ID# 2AKC, PCGS# 62095

## GOLD DOLLARS

- 3884** 1849 No L, D-1, Normal Stars, MS63 PCGS. Lustrous and intricately struck with rich orange-red toning. Two widely repunched stars below Liberty's bust are diagnostic for the introductory No L variety. For many years, the No L mintage was regarded as 1,000 pieces, at odds with the number of high-grade survivors. The *Guide Book* no longer reports a separate mintage for the issue. Ex: *Dallas Signature* (Heritage, 10/2006), lot 2402. NGC ID# 25B7, PCGS# 521670 Base PCGS# 7501
- 3885** 1849-O Open Wreath MS63 PCGS. Variety 2. The low mintmark variant of the sole Open Wreath New Orleans issue. A well-struck and coruscating peach-gold example. No marks are noticeable, and the eye appeal is superior for the third-party grade. Population: 39 in 63, 32 finer (2/18). NGC ID# 25BE, PCGS# 7508
- 3886** 1850-O MS61 NGC. Variety 1. The 1850-O has the lowest mintage of any New Orleans gold dollar, about one-fourth that of the higher priced Type Two 1855-O. This crisply struck example retains original wheat-gold toning and exhibits a sharp strike. Small marks are scattered but none distract. NGC ID# 25BJ, PCGS# 7512

**3887 1852-O MS60 NGC. Variety 1.** This 1852-O gold dollar claims a scarce spot among the Mint State survivors of this New Orleans issue. 140,000 pieces were struck, but relatively few examples were saved. We note a long, thin scratch on Liberty's cheek and a tiny indent above the head, but no other major marks. As usual, the strike is a bit weak on the hair surrounding the face. Orange accents surround the raised devices of this honey-gold coin. NGC ID# 25BT, PCGS# 7520

**3888 1853 MS65 PCGS.** This frosted, well-produced Gem represents the ideal type coin for a Type One gold dollar. More than 4 million pieces were struck, and Mint State examples abound. Relatively few pieces achieve the full Gem grade, and fewer still are finer. Flashy mint luster and a pinpoint-sharp strike attend the obverse, while the reverse shows slight weakness at 18 in the date. PCGS reports 77 numerically finer pieces (2/18). NGC ID# 25BU, PCGS# 7521

### 1853 Gold Dollar, MS66 High-End Type Coin

**3889 1853 MS66 NGC.** Coming from a mintage of more than 4 million pieces, the 1853 gold dollar is a popular type coin. Nonetheless, it is conditionally scarce in MS66 and rare in MS67. This frosty Premium Gem displays needle-sharp detail and original orange-gold luster. A luminous cartwheel effect reveals no distractions. Census: 42 in 66 (1 in 66+), 9 finer (2/18). NGC ID# 25BU, PCGS# 7521

**3890 1855 Type Two MS61 PCGS.** The short-lived Type Two gold dollar is a prized possession in Mint State. The present lustrous apricot-gold representative is well-struck except on the 8 in the date, which is opposite Liberty's high-relief cheek. The fields display minor grazes, as expected for the grade. NGC ID# 25C4, PCGS# 7532

**3891 1855 Type Two MS62 NGC. CAC.** Type Two gold dollars are far and away the scarcest type of the series, in part because of the design's short duration. The small portrait of Liberty was of no help extending die life or strike quality, and the extra 1/16" diameter did little to make the tiny coin easier to handle in circulation. The Indian Princess motif was the sole success, although it was soon modified and made larger for the longer-running, low-relief Type Three revision in 1856. This 1855 Type Two is a solid and attractive Mint State example, characteristically weakly struck at the centers but sharper than some. Attractive antique-gold color displays plentiful mint luster and few marks. NGC ID# 25C4, PCGS# 7532

**3892 1855 Type Two MS62 PCGS. CAC.** The Type Two design with its small Indian Princess portrait was larger and thinner than Type One gold dollars, but it was still problematic to produce. This olive-gold example displays yellow-gold highlights with softly lustrous, minimally marked surfaces. LIBERTY is readable (but not bold) as part of an above-average strike for the issue, struck from lightly clashed dies and CAC endorsed. NGC ID# 25C4, PCGS# 7532

### 1855 Gold Dollar, MS63 Appealing Type Two Example

**3893 1855 Type Two MS63 PCGS.** A satiny yellow-gold type coin with a sharp wreath and headdress. The hair curls below LIBERTY and the 8 in the date are weakly struck, as usual on this type. The difficulty of producing full strikes on the Type Two design contributed to its replacement in 1856 with the Large Head (Type Three) design. Only a few light surface grazes appear on this coin, which has strong eye appeal for the grade. NGC ID# 25C4, PCGS# 7532

### 1855 Type Two Gold Dollar, MS63 Shimmering Yellow-Gold Luster

**3894 1855 Type Two MS63 NGC.** This late die state type coin displays frosty yellow-gold luster and a bold strike. Light clash marks are visible on the obverse, while the reverse shows moderate lapping in the recesses of the wreath. Only a few faint surface grazes on each side limit the grade. The 1855 is one of the two most plentiful Type Two gold dollars, ideal for collectors seeking a single example of this design. NGC ID# 25C4, PCGS# 7532

**3895 1856 Upright 5 MS63 PCGS. CAC.** The Upright 5 variant is much scarcer than the Slanted 5 in the date, when the two varieties were part of a highly successful first Philadelphia mintage of the Type Three gold dollar design. This frosted and lustrous Select Uncirculated example shows none of the die clashing and other production problems that characterized the Type One and Type Two designs. The 5 is characteristically weak, as is the O in DOLLAR. Population: 26 in 63 (2 in 63+), 34 finer. CAC: 8 in 63, 16 finer (2/18). NGC ID# 25CB, PCGS# 7541

**3896 1876 MS64+ PCGS. CAC.** The low mintage of just 3,200 pieces suggests the 1876 gold dollar is rare in all grades, which it is, and it is extremely elusive in Select Uncirculated or finer grades. This borderline Gem example displays mostly prooflike fields and lively rich-gold color. The strike is typical for an 1876 — light on the high points, but otherwise sharp. Population: 3 in 64+, 15 finer. CAC: 5 in 64, 8 finer (2/18). NGC ID# 25DE, PCGS# 7577

**3897 1877 MS61 Prooflike NGC.** An early die state example from the 3,900-coin mintage, showing prooflike fields and sharp devices. Original honey-gold coloration encompasses each side, exhibiting scattered small marks that limit the grade. Census: 5 in 61 Prooflike, 23 finer (2/18). NGC ID# 25DF, PCGS# 77578

**3898 1885 MS65 NGC.** This Gem 1885 gold dollar comes from a mintage of only 11,156 pieces. The strike is sharp, and both sides are deeply prooflike with appreciable cameo contrast. Rich orange-gold coloration is original. Housed in a prior generation holder. NGC ID# 25DP, PCGS# 7586

**3899 1887 MS66 PCGS.** Frosty orange-gold mint luster shimmers when rotated beneath a light on this Premium Gem type coin. The devices are sharp, and only a few minute marks on the obverse limit the grade. Just 7,500 gold dollars were struck in 1887, although numerous Mint State coins were preserved for future collectors. NGC ID# 25DS, PCGS# 7588

**3900 1889 MS66 NGC. CAC.** Somehow, gold dollars survived 50 years of complaints about its small size and the Mint's ongoing difficulty striking the diminutive coins. In their later years, most one dollar gold pieces were struck as gifts, ornaments, and for speculating dealers. This exceptional 1889 example defies production problems and is a superb representative of the type. Vibrant, semireflective orange-gold fields surround frosted motifs that display a needle-sharp strike. Only the letters of LIBERTY are incomplete. There are no marks or abrasions of individual note. NGC ID# 25DU, PCGS# 7590

**3901 1889 MS66 NGC. CAC.** Strong die doubling on the lower wreath and bow is seen on all examples. No other gold dollar is more readily available in high Uncirculated grades than the 1889, a boon to both gold specialists and final-year type collectors. This lustrous Premium Gem is CAC-endorsed with a pinpoint-sharp strike. The frosted surfaces are essentially mark-free, with a few light grazes but no significant abrasions. NGC ID# 25DU, PCGS# 7590

## PROOF GOLD DOLLAR

### 1887 Gold Dollar, PR62 Attractive Color, Razor-Sharp Strike

**3902 1887 PR62 PCGS.** This attractive gold dollar is remarkably well-struck for an 1887 proof, with Liberty's portrait and the wreath sharp in all areas. The bow knot is fully brought up. Brassy-gold color displays orange overtones. The fields are suitably reflective for a proof, although the mirrors are slightly diminished by faint hairlines that appear on both sides. Eye appeal remains strong. Population: 6 in 62, 60 finer (1/18). NGC ID# 25EX, PCGS# 7637

## CLASSIC QUARTER EAGLES

**3903 1834 AU55 NGC. Breen-6138, Variety 1, R.1.** The introductory Small Head subtype. The modest dip between the two leftmost curls on Liberty's head confirms the attribution. The pumpkin-gold surfaces exhibit pleasing definition, and show only incidental marks.  
*Ex: Atlanta ANA Signature (Heritage, 2/2014), lot 5164. NGC ID# 25FS, PCGS# 7692*

**3904 1834 AU55 PCGS. CAC. Breen-6138, Variety 1, R.1.** The "Small Head" variety, the first Classic quarter eagle die marriage. A splendid green-gold example that boasts original, unblemished surfaces. As nice as can be found for the designated grade. CAC: 14 in 55, 77 finer (2/18). NGC ID# 25FS, PCGS# 7692

### 1836 Two and a Half, MS61 Block 8, Pleasing Surfaces

**3905 1836 Block 8 MS61 NGC. Breen-6144, Variety 15, R.2.** A charming butter-gold representative without consequential contact. The strike is slightly incomplete in the centers, but the remainder of the coin is well-defined. Block 8 two-and-a-halves were coined only in 1835 and 1836. The *Guide Book* separately lists Script 8 and Block 8 varieties for the 1836 quarter eagle, but ignores the distinction on 1835, 1836, and 1837 half eagles. NGC ID# 25FU, PCGS# 97694

**3906 1838-C PCGS Genuine. Breen-6147, Variety 20, R.3.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. This first-year Charlotte quarter eagle issue is scarce in any grade, as its low mintage of 7,880 pieces might indicate. Careful rotation reveals fine hairlines, but no marks are consequential, and the light golden-brown toning is attractive.  
*Ex: FUN Signature (Heritage, 7/2009), lot 1296.*

### 1839-O Quarter Eagle, XF45 Only New Orleans Issue of the Type

**3907 1839-O XF45 NGC. Breen-6152, Variety 27, R.3.** High Date, Wide Fraction. Cracked and lapped on the reverse, but otherwise well-defined with little wear. This Choice XF O-mint Classic quarter eagle represents the only issue of the design type from the New Orleans Mint. Medium orange-gold surfaces exhibit light marks but are otherwise problem-free. NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

**3908 1840-O AU50 PCGS. Variety 2.** The mintmark is small and positioned lower than on Variety 1. As a date, the 1840-O quarter eagle is scarce in AU condition and rare in Mint State. The present example displays satiny fields and original straw-gold color with peach-orange accents. There is a touch of softness on the eagle's left (facing) leg, but the strike is otherwise sharp, and little wear affects the finer details. A planchet lamination is visible above Liberty's head beneath a loupe. Population: 7 in 50, 44 finer (1/18). NGC ID# 54TU, PCGS# 7720

**1840-O Quarter Eagle, AU58  
First New Orleans Issue in the Set**

**3909 1840-O AU58 NGC. Variety 1.** The Large Mintmark variety is the more available variant, contrary to both Doug Winter and Walter Breen. In 2006, Winter suggested 100 to 125 pieces survived in all grades, including 18-22 pieces in AU. Exactly 202 pieces have been graded by NGC and PCGS combined, so that estimate may be slightly low (although resubmissions undoubtedly exist in the published population). This inaugural O-mint Liberty quarter eagle has bright yellow-gold surfaces and is fairly sharp for the issue. Wispy abrasions appear over each side. Census: 24 in 58, 14 finer (2/18). NGC ID# 54TU, PCGS# 7720

**3910 1842-O XF45 NGC. Variety 1.** The New Orleans Mint produced 19,800 quarter eagles in 1842, survivors of which are scarce in high circulated grades and rare in Mint State. This collectible Choice XF representative displays bright yellow-gold surfaces and moderate chatter. Both sides are weakly struck but show little wear. Ex: *Long Beach Signature* (Heritage, 2/2007), lot 4296; *Long Beach Signature* (Heritage, 9/2007), lot 9614. NGC ID# 25GK, PCGS# 7726

**3911 1843-D Small D VF25 PCGS. Variety 4-H.** A heavy die crack runs from the rim to the first S in STATES, then to the eagle's wing. Another connects the eagle's right (facing) wing tip to the rim. The coin displays original olive-gold and deep orange patina with relatively smooth surfaces save for some ancient diagonal marks on the eagle's neck and wing. Moderate strike weakness in the centers appears to contribute to the appearance of wear, even though this coin is only lightly circulated. NGC ID# 25GP, PCGS# 7730

**3912 1847-O AU55 NGC. CAC. Variety 5.** Heavy clash marks on each side and repunching on the base of the 1 in the date are characteristics of this variety. This is a delightful Choice AU 1847-O quarter eagle with considerable yellow-gold luster in the protected portions of the fields. The obverse has a bisecting die crack from 9 to 3 o'clock. Ex: *FUN Signature* (Heritage, 1/2009), lot 5201. NGC ID# 25H8, PCGS# 7747

**3913 1851-O AU58 NGC. Variety 1.** Among New Orleans issues of this period, the 1851-O is fairly plentiful in circulated grades, although Mint State coins are inherently elusive. A collectible near-Mint example, this piece is lustrous and well-struck, showing bold hair details and only slight weakness on the eagle's left (facing) leg. Bright yellow-gold surfaces exhibit mild surface chatter consistent with the grade. Ex: *FUN Signature* (Heritage, 1/2006), lot 4784. NGC ID# 25HP, PCGS# 7762

**3914 1852 MS64 PCGS Secure.** This softly frosted near-Gem is well-struck and shows only a few small abrasions. The 1852 quarter eagle is scarce in MS64 and rare finer, an underrated date from the Philadelphia Mint. Population: 56 in 64 (3 in 64+), 16 finer (2/18). NGC ID# 25HR, PCGS# 7763

**3915 1853 MS64 NGC.** This delightful Choice example exhibits a bold strike and vibrant mint luster. The well-preserved sun-gold surfaces ensure outstanding eye appeal. Census: 81 in 64 (3 in 64+), 22 finer (2/18). Ex: *Long Beach Signature* (Heritage, 2/2015), lot 4176. NGC ID# 25HV, PCGS# 7767

**3916 1859-S AU58 NGC.** A lovely near-Mint example, this 1859-S quarter eagle has medium yellow luster with splashes of deeper honey-gold patina on each side. The eagle's left (facing) leg shows the only mentionable strike weakness. Just 15,200 pieces were struck and survivors are scarce in most grades. High-end AU coins are particularly elusive, and Mint State pieces are rare. Census: 27 in 58 (1 in 58+), 8 finer (1/18). Ex: *FUN Signature* (Heritage, 1/2009), lot 5232. NGC ID# 25JN, PCGS# 7790

**3917 1861 New Reverse, Type Two, MS64 PCGS Secure.** Struck from the more-available New Reverse hub, the 1861 is a popular issue for a high-grade type piece. This Choice Uncirculated example displays lustrous honey-gold surfaces with deep-lilac overtones. The strike is pinpoint sharp including the eagle's left leg feathers. A tiny tick on the chin is the seen with a lens, but it is of minor importance. Ex: *New York Signature* (Heritage, 6/2005), lot 6171, where it realized \$747.50. NGC ID# 25JX, PCGS# 7794

**3918 1867-S AU55 NGC.** A low mintage of only 28,000 pieces assures the continued popularity of the 1867-S quarter eagle. Few examples are known finer than Choice AU. This is a pleasing piece with the usual softness in the centers, yet the surfaces are minimally abraded and the eye appeal is strong. Census: 24 in 55, 32 finer (2/18). NGC ID# 7JRX, PCGS# 7806

**3919 1867-S AU55 NGC. CAC.** Most San Francisco quarter eagles of this era circulated at their time of issue, making high-grade examples quite rare. This is an attractive example, showing original olive-gold patina that deepens to bronze-gold around the margins and devices. The reverse is softly struck in the center, as often seen on this issue. Limited surface chatter is apparent. Census: 24 in 55, 33 finer. CAC: 5 in 55, 5 finer (1/18). Ex: *FUN Signature* (Heritage, 1/2009), lot 5242. NGC ID# 7JRX, PCGS# 7806

**3920 1868 MS60 NGC.** Gold coins did not circulate on the East Coast for much of the 1860s and 1870s, driven from commerce by unbacked paper money. Thus, the 1868 quarter eagle has a tiny mintage of 3,600 pieces, and was likely struck to prevent speculation on the proofs of that date. This is a semiprooflike lemon-gold example with a sharp strike and scattered small field abrasions. Census: 8 in 60, 16 finer (2/18). NGC ID# 25KB, PCGS# 7807

**3921 1872-S AU58 NGC. CAC.** True to the grade, this CAC-approved near-Mint example shows satiny luster in the fields and only slight high-point friction on the devices. Expected strike weakness occurs on the eagle's left (facing) leg and the hair curls above Liberty's brow, but this is a secondary consideration for the eye appeal. The 1872-S quarter eagle is scarce in this grade and rare finer. Only a handful of near-Mint coins carry CAC endorsements. Census: 50 in 58 (1 in 58+), 17 finer. CAC: 7 in 58, 2 finer (1/18). NGC ID# 25KL, PCGS# 7816

**3922 1899 MS65 NGC.** The 1899 quarter eagle is only moderately elusive in this grade, but finer pieces are scarce. Sharp detail characterizes the devices, and the satiny surfaces display original honey-gold and orange coloration. No distracting abrasions are present. NGC ID# 25LP, PCGS# 7851

**3923 1899 MS65+ NGC. CAC.** A sharp, frosty Gem with original wheat-gold luster and well-preserved surfaces. Suitable for type representation, this CAC-approved 1899 quarter eagle is the only Plus-graded MS65 coin at NGC (2/18). NGC ID# 25LP, PCGS# 7851

**3924 1903 MS67 PCGS.** An available date overall, the 1903 quarter eagle is conditionally scarce in MS67 and a major rarity finer. This piece is frosty and sharp, showing almost pristine orange-gold mint luster that shimmers when rotated beneath a light. Population: 89 in 67 (5 in 67+), 1 finer (2/18). **From The Glacier Park Collection.** NGC ID# 2688, PCGS# 7855

- 3925 1904 MS66 PCGS.** Attractive and lustrous greenish-gold color changes hues when rotated beneath a light, a function of the all-encompassing mint luster that radiates from the centers. The 1904 issue is readily available in most grades, becoming scarce only when finer than the MS66 level. This Premium Gem displays a pinpoint sharp strike and only pinprick marks on its frosted surfaces. We note a small copper alloy dot beneath the eagle's left wing. NGC ID# 25LV, PCGS# 7856

**1904 Quarter Eagle, MS67  
Nearly Flawless**

- 3926 1904 MS67 PCGS Secure.** It is difficult to conceive of a more perfect example of the 1904 Liberty quarter eagle, or any quarter eagle for that matter. Design detail is complete, and each side exhibits radiant mint luster that blends with rich honey-gold color. A loupe reveals one tick on the tip of the chin. Population: 70 in 67 (3 in 67+), 1 finer (2/18). NGC ID# 25LV, PCGS# 7856

**INDIAN QUARTER EAGLES**

- 3927 1908 MS65 PCGS.** Housed in a first generation "rattler" holder, this Gem 1908 quarter eagle is lustrous with attractive greenish-gold color and a good strike for this first-year design. A few tiny marks near the motto are visible with a loupe, but they are minor. Lack of definition on the eagle's shoulder is typical of the 1908 reverse die, which was corrected on later issues. NGC ID# 288Y, PCGS# 7939
- 3928 1909 MS64 PCGS.** Olive-gray accents over medium-gold surfaces give this lustrous near-Gem substantial natural eye appeal. A sharp strike is seen on both sides — characteristic of the 1909, which had the die problems of 1908 resolved, especially on the eagle's wing shoulder. Abrasions are few and marks are minor for the issue, which becomes scarce any finer. NGC ID# 288Z, PCGS# 7940
- 3929 1909 MS64+ PCGS Secure. CAC.** This sharp, high-end type coin shows satiny mint luster that yields no significant abrasions. The 1909 Indian quarter eagle is an available date in MS64, but higher-grade examples quickly become out of reach for budget-conscious collectors. CAC-approved coins in this grade are elusive. NGC ID# 288Z, PCGS# 7940
- 3930 1911 MS64+ PCGS. CAC.** Lovely honey-gold color is present on this high-end near-Gem, while areas of orange toning add eye appeal on both sides. The strike is sharp and the few marks present are minor. Despite production of 704,000 1911 quarter eagles, surviving examples are surprisingly elusive at the upper grade levels, with the number dropping drastically at the Gem level and finer. NGC ID# 7KR6, PCGS# 7942

**1911-D Quarter Eagle, AU50  
Worn but Clear Mintmark**

- 3931 1911-D AU50 PCGS Secure.** Strong D. The mintmark is one of the first design elements to show wear on Indian Head quarter eagles, being completely unprotected on an elevated field near the rim. On this AU-level 1911-D quarter eagle, the mintmark is mostly worn away, but the distinctive silhouette of the D is visible at most angles, suggesting that before circulation this was a Strong D coin, as PCGS notes on the insert. Other areas of this bronze-gold collector coin are smooth and well-detailed. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU55  
Original Color, Bold Detail**

- 3932 1911-D AU55 NGC.** Remnants of original mint luster glow in the recesses of this Choice AU example, and daubs of olive-colored patina appear in the fields. The color is original with only slight high-point wear visible. The mintmark and the diagnostic wire rim on the obverse are bold. Under a loupe, some faint lines appear around the peripheries, mostly on the obverse. An attractive example of this key Denver issue. NGC ID# 7KR7, PCGS# 7943

**1912 Quarter Eagle, MS64+  
On the Verge of an Even Higher Grade**

- 3933 1912 MS64+ PCGS Secure. CAC.** Allan Schein, author of *The Gold Indians of Bela Lyon Pratt* (2016), describes the 1912 quarter eagle as underrated and undervalued for its scarcity in high grades. This piece is on the verge of joining some of the finest certified survivors. It features softly lustrous red-gold surfaces that are devoid of major flaws, and are sharply detailed throughout. NGC ID# 7KR8, PCGS# 7944

**3934 1914 MS63 PCGS.** One of the top three rarities in the Indian Head quarter eagle series, the 1914 Philadelphia issue is challenging to find with few marks and pleasing eye appeal. This Select Uncirculated example fulfills both requirements, and a razor-sharp strike adds to its résumé. The softly lustrous, greenish-gold surfaces harbor orange and lemon-yellow accents in protected areas. NGC ID# 7KRA, PCGS# 7946

**3935 1914 MS63 PCGS.** An attractive Select example from a smallish mintage of 240,000 pieces, this coin exhibits sharply detailed design elements and lustrous orange-gold surfaces throughout. A thin scratch from the back of the eagle's head into the right reverse field is the only mark of note. NGC ID# 7KRA, PCGS# 7946

**3936 1914-D MS64 PCGS.** Lilac and orange accents enliven the straw-gold surfaces of this conditionally scarce and lustrous, near-Gem 1914-D. Contrary to many examples of the issue, the eagle is sharply struck on the wings and leg and on the finer headdress details. A few tiny marks and planchet irregularities on the reverse are visible under magnification. PCGS reports just 52 numerically finer examples (2/18). NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64+  
Bold Mintmark, Wonderful Eye Appeal**

**3937 1914-D MS64+ PCGS. CAC.** In MS65 condition, the 1914-D becomes the second-rarest issue in the series. This CAC-approved MS64+ nearly qualifies for that esteemed and important level. Indeed, the technical difference is virtually indistinguishable. Light coppery gold color and vibrant satiny mint luster provide lovely eye appeal. Die buckling around the borders is typical for the issue, but the mintmark remains exceptionally bold on this piece. NGC ID# 2899, PCGS# 7947

**THREE DOLLAR GOLD PIECES**

**3938 1854 MS61 NGC.** The 1854 is always a top choice for type among three dollar gold pieces, thanks to its series-high mintage of 138,618 pieces. Orange-gold surfaces of this Mint State example suggest original color. Fields and devices are softly lustrous with occasional tiny abrasions. The strike lacks sharp definition only on the high points of the hair and wreath bow. NGC ID# 25M3, PCGS# 7969

**3939 1854-O XF45 PCGS. Variety 2.** The reverse is lapped and a die crack travels through the ribbon ends on this late die state representative. The 1854-O is always popular; it boasts a low mintage of 24,000 coins and is the only New Orleans issue in the series. Red and olive-gold surfaces exhibit wispy abrasions and softness over the high points. NGC ID# 25M5, PCGS# 7971

**3940 1854-O — Improperly Cleaned — NGC Details. AU. Variety 1.** A butter-gold example with a smooth but slightly glossy appearance. The ribbon loops show full definition, unlike their lapped Variety 2 counterparts. The portrait outline is clashed inside the wreath. Variety 1 is scarce, since approximately 90% of '54-O threes are Variety 2. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, AU50  
Single New Orleans Issue**

**3941 1854-O AU50 NGC. Variety 2.** The 1854-O is popular as the only New Orleans issue in the series, although it is also a better date overall with a mintage of only 24,000 pieces, which circulated extensively. This AU example shows medium green-gold surfaces and light high-point wear. The fields are mostly smooth and appealing. Variety 2 is the lapped die state of the only known die pairing and represents most of the coins seen. NGC ID# 25M5, PCGS# 7971

**1854-O Gold Three Dollar, AU53  
Late Die State**

**3942 1854-O AU53 NGC. Variety 2,** the lapped die state of the only known die marriage for this issue. The 1854-O three dollar gold piece is the only issue in the series from this mint, in high demand in all grades. This AU coin is bright yellow-gold with lightly abraded surfaces. Tiny areas of prooflike reflectivity remain tucked close to the edges of the peripheral relief elements. NGC ID# 25M5, PCGS# 7971

**3943 1856 AU58 NGC. CAC.** The 1856 gold three dollar piece claims one of the higher mintages of the series (26,010 pieces), but CAC-approved examples are scarce in AU grades and rare in Mint State. This near-Mint coin remains lustrous in the fields and sharp on the devices, with slight high-point friction evident beneath a loupe. NGC ID# 25M8, PCGS# 7974

**3944 1861 XF45 NGC.** Original olive-gold patina shows tinges of deeper amber color in the protected areas near the devices and legends. Each side is smooth and problem-free, showing bold detail and outstanding eye appeal for the grade. NGC ID# 7K5N, PCGS# 7982

**3945 1871 AU50 NGC.** A paltry total of 1,300 coins made up the entire production of three dollar gold coins in 1871. This lightly circulated orange-gold piece shows wispy abrasions and strong strike detail, including the central reverse and wreath elements. NGC ID# 25MU, PCGS# 7993

**3946 1872 AU55 NGC.** With only 2,000 pieces struck, the 1872 three dollar gold piece is popular in all grades. This Choice AU coin displays semiprooflike fields and bright yellow-gold surfaces. The devices are well-struck, and neither side exhibits distracting abrasions. NGC ID# 25MV, PCGS# 7994

**3947 1874 AU58 PCGS.** Light yellow-gold surfaces display a trace of rub over strongly rendered devices. Semiprooflikeness occurs in the obverse fields. There are wispy, superficial marks of little consequence on each side. A mintage of 41,800 coins ensures the availability of the 1874 relative to nearby dates. NGC ID# 7KDE, PCGS# 7998

- 3948 1878 MS63 NGC. CAC.** The CAC endorsement is well earned on this Select three dollar gold type coin. Each side displays shimmering honey-gold luster with only a few unimportant surface grazes. The strike is sharp save for the wreath bowknot, which is almost always weak. NGC ID# 25MZ, PCGS# 8000

## EARLY HALF EAGLES

### 1803/2 Half Eagle, AU Sharpness BD-4, 'Perfect T' Variety

- 3949 1803/2 BD-4, R.4 — Filed, Cleaned — ANACS. AU Details, Net XF40.** Bass-Dannreuther Die State b/c. A die crack runs through the base of the date. Four varieties are known for the 1803 half eagle, all featuring a 3 over 2 overdate. This is the only variety with a full right foot on the T in LIBERTY. About 125 to 175 BD-4 half eagles are thought to survive, according to John Dannreuther. This coin features AU sharpness, but ANACS has awarded a net grade of XF40 due to cleaning and rim filing. The latter is somewhat difficult to see because of the small-sized holder. The reverse is deep orange-gold in contrast to the slightly lighter obverse. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

### 1812 Half Eagle, BD-1, AU50 Details Wide Denomination, Final-Year Type

- 3950 1812 BD-1, R.3 — Cleaned — ANACS. AU50 Details.** Bass-Dannreuther Die State a/a. Both sides remain unclashed. The reported mintage for this final-year Draped Bust Left half eagle was 58,087 coins, but the actual total may be closer to 75,000 coins, comprising two varieties. This Wide 5D variant is the more available by a significant margin. Yellow-gold surfaces are lightly hairlined from cleaning. The obverse detail is bold, and the reverse shows more pronounced blending on the eagle. A perfect coin for type purposes. Certified in a small-sized holder.

## CLASSIC HALF EAGLES

- 3951 1834 Plain 4 AU58 NGC. Breen-6501, McCloskey 3-B, R.1. First Head.** A well-detailed Classic type coin that has original rose and olive toning atop orange-gold surfaces. Luster shimmers throughout the devices and reverse border. Marks are trivial save for a tick on Liberty's jaw. In 1834, the dollar was devalued in terms of gold, which enabled gold coins to finally circulate in the United States. NGC ID# 25RR, PCGS# 8171

- 3952 1836 AU58 NGC. Breen-6507, McCloskey 1-A, R.4.** Light wear over the high points of the devices also produces some rub in the fields, but the protected peripheral areas show semiprooflike reflectivity. This bright yellow-gold Classic Head type coin is well-detailed and shows mainly light abrasions, although a few more significant marks are noted above the olive leaves in the reverse field. NGC ID# 25RY, PCGS# 8174

- 3953 1838 AU55 PCGS. Breen-6515, McCloskey 2-B, R.1. Small Arrows, Large 5.** A well-defined apricot-gold Choice AU representative. The surfaces are pleasing, and exhibit minimal marks for the designated grade. Luster surrounds the stars and fills the curls, eagle, and legends. NGC ID# 25S4, PCGS# 8176

## LIBERTY HALF EAGLES

- 3954 1839 AU53 NGC.** Considered by many to be a one-year type, the obverse design of the 1839 half eagle is slightly different than those of subsequent years, the most notable difference seen in the curvature of Liberty's neck. This Almost Uncirculated example displays original orange-gold color over both sides, with nearly complete detail. A visually appealing example of this first-year issue. Ex: *Chicago Signature* (Heritage, 4/2014), lot 6327. NGC ID# 25S7, PCGS# 8191

### 1841-D Half Eagle, AU53 Small Mintmark

- 3955 1841-D Small D AU53 NGC. Variety 5-D.** Like the 1840-D half eagles, those of 1841 are also known with a Small D mintmark as on this coin, or a Large D mintmark. The Small D is the more plentiful of the two. This delightful example has some reverse design weakness but retains considerable luster with pleasing light yellow surfaces. Scattered abrasions accompany the grade. Census: 10 in 53, 45 finer (1/18). Ex: *Houston Signature* (Heritage, 12/2008), lot 2002. NGC ID# 25SR, PCGS# 8204

- 3956 1843-C VF25 PCGS. Variety 2.** The 1843-C half eagle is only marginally scarce among Charlotte issues, with 225 to 250 pieces believed known. However, the population begins to thin out in grades finer than VF. This collectible example displays good detail for the grade and bright straw-gold coloration. There is a small planchet flaw on the rim near star 13, and the interiors show light surface chatter. NGC ID# 429H, PCGS# 8214

- 3957 1843-O Small Letters XF45 PCGS. CAC. Variety 2.** Small O mintmark. An early die state with crisp upper stars and no crack through star 12. The Small Letters variant is scarcer than its Large Letters counterpart. Only 80 to 90 pieces are believed extant in all grades. This is an overtly original Choice XF survivor with partial luster and lovely green-gold color. Population: 15 in 45, 20 finer. CAC: 3 in 45, 3 finer (2/18). NGC ID# 25T5, PCGS# 8217

- 3958 1844-O AU55 NGC. Variety 1.** The first 4 in the date is lightly repunched on the crossbar of this variety. As a date, the 1844-O half eagle is elusive in the upper AU grades. This Choice AU coin is impressively sharp with bright yellow-gold color. Moderate surface chatter is typical of New Orleans gold of this period. NGC ID# 25TA, PCGS# 8222

**3959 1847-C AU53 NGC. Variety 1.** This Charlotte Mint type coin has a brush of wear over the eyebrow and hair bun, but luster glimmers from the protected regions of the fields. Strike softness is negligible and is limited to the ER in LIBERTY and the eagle's talons. Other than a few tiny ticks in the reverse fields, there are no mentionable abrasions on this olive-gold, About Uncirculated Charlotte half eagle.

Ex: *Houston Signature* (Heritage, 12/2008), lot 2007. NGC ID# 25TN, PCGS# 8233

**1851-D Five Dollar, AU55  
Elusive in High Grade**

**3960 1851-D AU55 NGC. Variety 31-W.** A Strong D variety. This Choice AU 1851-D half eagle is conditionally scarce, showing bright yellow-gold surfaces that retain some satiny luster in the fields. Scattered abrasions are not unusual for the issue, and moderate strike weakness occurs in the centers. The 1851-D half eagle is relatively scarce. Doug Winter estimates that fewer than 185 pieces are extant. Census: 22 in 55, 29 finer (1/18). NGC ID# 25U8, PCGS# 8248

**3961 1853-D — Cleaned — NGC Details. AU. Variety 34-Y.** Although its surfaces are somewhat bright, this yellow-gold Dahlonega type coin is free from distracting marks and has a fairly sharp strike on the major devices. The left side stars are lightly brought up. Five die marriages are confirmed for the issue, and Variety 34-Y as the most available. The mintmark is above the E in FIVE with the uprights of both letters in alignment. NGC ID# 25UF, PCGS# 8255

**1854-O Half Eagle, AU58  
Smooth, Reflective Fields**

**3962 1854-O AU58 NGC. Variety 1.** The mintmark is almost entirely over the V in FIVE. The New Orleans Mint struck 46,000 half eagles in 1854, but most circulated extensively, as gold typically did in the South prior to the Civil War. Uncirculated examples of this issue are rare, and high-end AU coins are scarce. This near-Mint coin boasts remarkably smooth yellow-gold surfaces with moderate reflectivity in the protected portions of the fields. There is some minor strike softness on the hair curls around Liberty's face, but the coin is otherwise well-defined. Census: 36 in 58, 10 finer (1/18). NGC ID# 25UM, PCGS# 8259

**1859-C Half Eagle, AU53  
Elusive in All Grades**

**3963 1859-C AU53 NGC. Variety 1.** The 1859-C half eagle is scarce, with fewer than 225 pieces believed known in all grades. Two varieties exist, both employing a "fuzzy" reverse eagle from an improperly annealed die. The obverses are differentiated by date placement. This AU coin displays sharp obverse detail but is predictably weak on the reverse eagle. The bright yellow-gold surfaces show moderate abrasions. NGC ID# 25VC, PCGS# 8281

**1863-S Liberty Half Eagle, VF35  
Few Survive, Underrated Series Rarity**

**3964 1863-S VF35 PCGS.** Traces of mint luster cling to the protected areas of this Choice VF 1863-S half eagle. While the 1863 Philadelphia issue is better-known and has a much smaller mintage, the 1863-S is nearly as rare, since all of the 17,000-piece mintage entered circulation on the West Coast, and few coins survived. Fewer than 75 pieces are thought to exist in all grades. This example has even, straw-gold color with smooth wear that minimizes most of the small marks that inhabit its surfaces. Sharp definition remains on both sides. Population: 14 in 35, 38 finer (2/18). NGC ID# 25VT, PCGS# 8295

**1863-S Half Eagle, AU Details  
Estimated 75 Pieces Extant**

**3965 1863-S — Environmental Damage — NGC Details. AU.** The 1863-S is an underrated rarity with a survivorship of 75 or so coins. Even the New Orleans Collection, one of the finest Liberty half eagle sets ever assembled and sold as part of our April 2015 Central States Signature event, lacked an example. Subdued orange-gold surfaces display evidence of moderate porosity that affects the technical grade. An alloy spot appears near AM. Still a well-detailed example to represent the issue. NGC ID# 25VT, PCGS# 8295

**3966 1869-S XF45 PCGS Secure.** This Choice XF 1869-S bucks the trend of weak strikes for the issue, with remarkably sharp definition despite 15 points of circulation. Mint luster remains throughout most of both sides, with reddish-gold accents over gleaming medium-gold coloration. Abrasions are few and unobtrusive on this underrated half eagle. Population: 9 in 45, 19 finer (2/18). NGC ID# 25W8, PCGS# 8318

**3967 1875-CC VG8 NGC. Variety 1-B.** The obverse portrait is well-worn, although the eagle shows moderate central detail. Smooth orange-gold surfaces are free of bothersome marks, and the rims on this Carson City half eagle are full. The 1875-CC is a scarce date with a mintage of only 11,828 pieces. NGC ID# CFHH, PCGS# 8337

**3968 1881/0 FS-301 MS62 PCGS. CAC.** The 188 is repunched south, and a fragment of a 0 is apparent above the right foot of the second 1. An orange-gold example with no more than the expected number of small to moderate marks. Population: 26 in 62 (1 in 62+), 21 finer. CAC: 9 in 62, 3 finer (2/18). NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

**3969 1891-CC MS61 PCGS. Variety 1-A.** A die crack runs from the bust tip through the first two stars. The grade reflects scattered marks over medium yellow-gold surfaces, and soft shimmering luster that is slightly brighter toward the outer areas. This Carson City five dollar presents well-detailed motifs, furthering its utility for type purposes. NGC ID# 25Y5, PCGS# 8378

**1891-CC Five Dollar, MS62  
Carson City Type Coin**

**3970 1891-CC MS62 PCGS Secure. Variety 2-A.** Light repunching is visible on the top of the second 1 in the date on this variety. The reverse appears lapped or weakly hubbed, and the banner of IN GOD WE TRUST is weak in the middle. The 1891-CC half eagle is an available date among Carson City issues, ideal for collectors seeking a single coin from this mint. The present example is well-struck and frosty with original wheat-gold luster. Scattered light abrasions limit the grade. NGC ID# 25Y5, PCGS# 8378

**1891-CC Half Eagle, MS62  
Frosty Wheat-Gold Example**

**3971 1891-CC MS62 NGC. Variety 2-A.** The date is positioned farther left than Variety 1-A, and the second 1 in the date shows repunching on the flag. No other Carson City half eagle presents as good an opportunity for type representation as the 1891-CC. This MS62 example enjoys frosty mint luster and wheat-gold color. Both sides are well-struck with light grazes. NGC ID# 25Y5, PCGS# 8378

**3972 1893 MS65+ NGC.** The 1893 half eagle is only marginally scarce in this grade, but finer pieces are rare. This high-end Gem shows bright, frosty luster and a bold strike. Under a loupe, a few microscopic surface marks are seen, as allowed by the grade. Census: 71 in 65 (7 in 65+), 10 finer (2/18). NGC ID# 25YA, PCGS# 8383

**3973 1894 MS64+ PCGS.** A sharply struck peach-gold near-Gem. The fields are uncommonly smooth, and the portrait displays only delicate contact. The 1894 was among the issues that ended up in quantity in foreign bank holdings, only to return to the U.S. in the decades after World War II. PCGS has certified just seven pieces finer (2/18). NGC ID# 25YE, PCGS# 8387

**3974 1895 MS65 NGC.** A boldly struck Gem with satiny luster and lovely peach-gold color. Although a readily available issue in typical Mint State grades, only a small fraction of survivors can compete with the preservation of the present example. Finer coins are genuinely rare. Census: 80 in 65 (3 in 65+), 12 finer (2/18). Ex: *Long Beach Bullet* (Heritage, 5/2003), lot 908. NGC ID# 25YH, PCGS# 8390

**3975 1896-S MS62 PCGS. CAC.** While a few light bagmarks are seen on the frosted surfaces of this 1896-S half eagle, they are less-prevalent than normal for the issue. Lustrous medium-gold color illuminates a sharp strike and plentiful eye appeal, confirmed by the CAC endorsement. Notably few pieces are known any finer. Population: 27 in 62, 14 finer. CAC: 7 in 62, 2 finer (2/18). NGC ID# 25YL, PCGS# 8393

**3976 1897 MS65 NGC.** This lustrous Liberty type coin is pale peach-gold save for a small spot on the rim above star 6. Crisply struck and refreshingly devoid of contact. Census: 76 in 65 (1 in 65+, 1 in 65★), 9 finer (2/18). NGC ID# 25YM, PCGS# 8394

**1899 Five Dollar, MS66  
Few Coins This Fine at PCGS**

**3977 1899 MS66 PCGS.** A plentiful issue in most grades, the 1899 Liberty half eagle is scarce in MS66 and rare finer. A minority of high-end coins are PCGS-certified. This piece displays sharp motifs and frosty orange-gold luster. Under a loupe, only the most unobtrusive surface grazes prevent an even finer grade. Population: 24 in 66 (2 in 66+), 2 finer (2/18).

From *The Glacier Park Collection*. NGC ID# 25YS, PCGS# 8398

**3978 1901/0-S FS-301 MS64 NGC. CAC.** A beautiful apricot-gold near-Gem with clean fields and a full strike. A faint curved mark near the chin limits the grade. This interesting overdate variety was discovered by Ted Clark in February 1973. Clark's overdate collection was auctioned by Heritage at the Central States convention in 2002.

Ex: *Denver Signature* (Heritage, 8/2006), lot 1915. NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

**3979 1901-S MS65+ PCGS.** The 1901-S is often written off as a common date, but this issue is conditionally scarce in this phenomenal state of preservation. Each side is smooth and frosty with bold strike definition. Rich orange-gold color adds to the eye appeal. The coin is a blatantly high-end Gem, as confirmed by the PCGS Plus designation. Population: 16 in 65+, 78 finer (2/18). NGC ID# 25YX, PCGS# 8404

**1905-S Five Dollar Liberty, MS64  
Few Certified Finer**

- 3980 1905-S MS64 NGC.** A generous mintage of 880,700 Liberty half eagles was achieved in 1905 at the San Francisco Mint, but this issue is surprisingly difficult to locate in high grade today. The present coin is a delightful Choice example, with vibrant mint luster and razor-sharp design elements. Census: 7 in 64, 4 finer (2/18). NGC ID# 25Z7, PCGS# 8412

**INDIAN HALF EAGLES**

**1908-D Indian Head Five, MS64+  
Seldom Offered Finer**

- 3981 1908-D MS64+ PCGS Secure. CAC.** Original honey-gold luster illuminates softly frosted surfaces on this high-end Choice 1908-D half eagle. Slight strike weakness is visible on the lower headdress feathers, but the eagle is well-defined. No major abrasions are visible. The 1908-D is available in MS64, but PCGS lists only 12 numerically finer representatives (2/18). NGC ID# 93KW, PCGS# 8511
- 3982 1909-D MS64+ NGC.** Impressive yellow-orange luster grants this near-Gem half eagle considerable eye appeal. Small, scattered luster breaks are present in the fields, but marks and abrasions are minimal. This high-end, near-Gem coin is ideal for the type collector to consider.  
Ex: Long Beach Signature (Heritage, 9/2010), lot 5410. NGC ID# 28DJ, PCGS# 8514
- 3983 1909-D MS64 PCGS. CAC.** A coruscating and original orange-gold near-Gem. A loupe reveals unimportant contact, mostly near the reverse legends. The 1909-D is often selected for type purposes, and the MS64 grade provides a favorable balance of cost and quality. Certified in a green label holder. NGC ID# 28DJ, PCGS# 8514
- 3984 1909-D MS64 NGC. CAC.** Bright yellow-gold luster illuminates occasional variations into sun-gold and canary-yellow hues. This CAC-endorsed coin is a well-defined 1909-D with an inconsequential, small depression on the portrait's cheek. NGC has graded only 88 numerically finer examples (2/18).  
Ex: Long Beach Signature (Heritage, 9/2010), lot 5395. NGC ID# 28DJ, PCGS# 8514

- 3985 1910 MS64+ NGC.** The 1909 and 1910 Indian half eagles are scarce above the Select Mint State level. This MS64+ 1910 displays sumptuous, mellow orange-gold coloration, with a bold strike and excellent eye appeal. Only a couple of stray abrasions near the focal areas appear to have precluded a Gem grade, and that not by much.

Ex: Long Beach Signature (Heritage, 9/2010), lot 5415. NGC ID# 28DK, PCGS# 8517

- 3986 1910-D MS63 PCGS.** The certified population of 1910-D half eagles at PCGS declines by 76% in higher grades. The average assessment for this relatively low-mintage issue is fractionally shy of MS60. Strongly struck surfaces display mostly light yellow-gold coloration and dispersed orange accents. Satiny and minimally marked. NGC ID# 28DL, PCGS# 8518

**1911-D Half Eagle, AU58  
A Better Denver Issue**

- 3987 1911-D AU58 NGC.** Although not the series key as is the quarter eagle of this date and mint, the 1911-D half eagle is a semikey in all grades. Uncirculated coins are particularly elusive, producing strong demand for high-end AU pieces such as the present. Bronze-gold fields show slight friction and contact marks, while the recessed design elements retain luminous rose-gold luster. NGC ID# 28DR, PCGS# 8521

- 3988 1912 MS64 PCGS.** The 1912 Indian half eagle becomes very scarce in grades above the MS64 level. This sharply detailed Choice specimen offers lustrous orange-gold surfaces, with a small dig near the G in GOD the only mark of note. Housed in a green label holder. PCGS has graded 69 numerically finer examples (2/18). NGC ID# 28DS, PCGS# 8523

- 3989 1913 MS64 NGC.** Remarkably well-preserved for the assigned grade, this near-Gem 1913 five displays colorful sun-gold surfaces with green and lilac highlights and a sharp strike that is especially strong on the reverse. Most examples of the issue have finely granular surfaces, yet this example is smooth and vibrantly lustrous with just a few trivial, minuscule marks. The eye appeal is exceptional. NGC reports just 44 numerically finer examples (2/18). NGC ID# 28DT, PCGS# 8525

- 3990 1913-S MS61 PCGS.** While the mintmark is weak on this 1913-S, it is discernible and the other design elements are reasonably well-struck for the issue and the assigned grade. Marks are limited to a few small abrasions among the stars. The medium-gold surfaces display plentiful mint luster with lime-green overtones. NGC ID# 25ZP, PCGS# 8526

- 3991 1914 MS63 PCGS.** The popular 1914 Indian half eagle was produced on the brink of the First World War, with a mintage of nearly a quarter-million pieces. This impressive Select specimen displays sharply struck design elements and lustrous orange-gold surfaces with a few scattered, minor signs of contact. NGC ID# 28DU, PCGS# 8527

**1914-D Half Eagle, MS64**  
Rarely Offered Finer

- 3992 1914-D MS64 PCGS.** Satiny yellow-gold luster illuminates sharp devices on this Choice 1914-D half eagle, while grade-limiting abrasions are largely restricted to the reverse fields. The 1914-D is a conditionally challenging issue. MS64 coins are occasionally available, but PCGS has seen only 20 finer submissions (2/18). NGC ID# 28DV, PCGS# 8528

**1914-S Half Eagle, MS61**  
Minimally Marked Red-Gold Surfaces

- 3993 1914-S MS61 NGC. CAC.** Softly lustrous, well-defined surfaces display deep shades of reddish-gold color, delivering top-quality eye appeal for this conditionally scarce San Francisco half eagle. Although the grade suggests otherwise, the only apparent flaws are two ticks in front of the chin and through TR in TRUST. CAC: 14 in 61, 42 finer (2/18). NGC ID# 28DW, PCGS# 8529

**1915-S Indian Half Eagle, MS61**  
Rarely Seen in High Grade

- 3994 1915-S MS61 PCGS Secure.** From a modest mintage of 164,000 pieces, the 1915-S Indian half eagle is one of the most challenging issues of the series in high grade. Even lower Mint State coins, like the present example, are quite scarce in today's market. This attractive MS61 example exhibits well-detailed design elements and lustrous yellow and orange-gold surfaces, with the usual number of minor contact marks for the grade. NGC ID# 25ZR, PCGS# 8531

**1916-S Five Dollar, MS63**  
Final San Francisco Coinage

- 3995 1916-S MS63 PCGS.** This frosty orange-gold example displays a sharp strike and light field abrasions that define the grade. The 1916-S is the only Indian half eagle of this date from any mint, and it represents the last coinage of the denomination until 1929. After 1916, gold production at San Francisco was almost entirely focused on double eagles, save for a couple of spurts of ten dollar pieces in 1920 and 1930. NGC ID# 28DY, PCGS# 8532

**1916-S Half Eagle, MS63**  
Brightly Lustrous, Final Collectible Year

- 3996 1916-S MS63 PCGS Secure.** The finest 1916-S five dollar gold coins at PCGS are just three points finer than this minimally marked and brightly lustrous Select Uncirculated example. The motifs display a bold impression despite minor buckling around the lower reverse rims. This is the last readily obtainable Pratt half eagle in the series. NGC ID# 28DY, PCGS# 8532

**LIBERTY EAGLES**

- 3997 1842 Large Date AU53 NGC.** This early No Motto Liberty eagle displays original peach-gold patina with faint olive overtones. Hints of luster remain in the fields, while both sides exhibit moderate surface chatter. A few short, unobtrusive scratches, one below the first S in STATES and another on the eagle's neck, are the only individually significant abrasions. The reverse features a network of interesting die cracks through the eagle's wings and left (facing) leg, dividing the die into thirds. Census: 27 in 53, 57 finer (1/18). Ex: Dallas Signature (Heritage, 10/2008), lot 2209. NGC ID# 262M, PCGS# 8584

- 3998 1843-O AU53 NGC. Variety 2.** This straw-gold New Orleans coin exhibits plentiful glimpses of bright luster, and the devices are well-detailed despite light high-point wear. Thorough evaluation reveals field marks appropriate for the grade. The 1843-O is popular in the AU grade range and rare in Mint State. Ex: Houston Signature (Heritage, 12/2008), lot 2106. NGC ID# 262R, PCGS# 8589

- 3999 1843-O AU55 NGC. Variety 2.** Some luster is present in the protected portions of the fields on this Choice AU piece. Bright yellow-gold surfaces show moderate chatter consistent with the reputation of New Orleans gold from this period. A die crack bisects the reverse from the final A in AMERICA to the tip of the eagle's left (facing) wing, and another runs through the top of STATES. Ex: FUN Signature (Heritage, 1/2008), lot 4391. NGC ID# 262R, PCGS# 8589

**4000 1846-O XF45 NGC. Variety 3.** This plentiful variety was once considered an overdate, and the older NGC holder housing the present coin still shows that now-disproven attribution. The die anomalies within the 6 in the date are the result of a damaged date punch. This Choice XF coin displays bold detail and bright yellow-gold surfaces. Moderate field chatter is as expected for the grade. NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595

**4001 1846-O — Salt Water Damage — PCGS Genuine. AU Details. Variety 3.** Although the PCGS holder calls this variety an 1846/'5', it is not an overdate according to recent research. Rather, an anomaly within the 6 of the date indicates either repunching or possibly some sort of damage to the date punch. The appearance of the 6 is quite similar to an 1846 half dollar (WB-6) illustrated in the recent Bill Bugert register of Philadelphia Mint half dollar varieties (Volume V), and perhaps represents a shared use of the date punch. This yellow-gold eagle displays finely granular, mattelike surfaces typical of seawater recoveries, with a sharp strike and traces of golden luster.

**4002 1846-O/O FS-301 XF40 PCGS. Variety 3.** An original lemon-gold representative with moderate wear and minimal marks. Although undesignated as such on the PCGS holder, this coin is an early die state of Variety 3 with horn-like repunching above the mintmark. Most 1846-O eagles exhibit die defects within the 6 transferred from the date logotype punch, and Heritage no longer recognizes the so-called overdate variety. PCGS# 145724 Base PCGS# 8595

**4003 1847-O AU58 NGC. Variety 1.** The mintmark is centered over the EN in TEN. This well-detailed, partially lustrous yellow-gold example displays moderate field chatter but no individually mentionable abrasions. High-grade AU 1847-O eagles are scarce, and Mint State coins are rarely offered. NGC ID# 2632, PCGS# 8598

**4004 1848-O XF45 NGC. Variety 1.** Surprisingly smooth honey-gold surfaces retain protected areas of semiprooflike reflectivity in the peripheral fields. The strike is somewhat weak, suggesting a lower grade to the untrained eye, but actual wear is at a minimum. A thin line in the field near star 4 is the only imperfection.  
*Ex: Houston Signature (Heritage, 12/2008), lot 2113. NGC ID# 2634, PCGS# 8600*

**4005 1850 Small Date AU55 NGC.** A charming Choice AU green-gold No Motto representative. The strike is good except on the highest portions of the stars, and the small distributed marks are inoffensive. The Small Date is scarcer than its Large Date counterpart, which cannot definitively be said for either the 1842 or 1854-O. Census: 24 in 55, 25 finer (2/18). NGC ID# 2638, PCGS# 8604

**4006 1851-O AU50 NGC. Variety 2.** From a substantial New Orleans mintage of 263,000 pieces, the 1851-O Liberty eagle is surprisingly elusive in high grade. This impressive AU specimen exhibits some light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. NGC ID# 263B, PCGS# 8607

### 1851-O Ten Dollar, AU58 Smooth, Appealing Surfaces

**4007 1851-O AU58 NGC. Variety 1.** This near-Mint coin is sharp in the centers and satiny overall, with remarkably smooth surfaces. Original straw-gold coloration shows hints of luster in the protected portions of the fields. The lower obverse border stars show weakness, as usual for this issue. The 1851-O Liberty eagle is elusive in the upper AU grades and genuinely rare in Mint State. NGC has certified only 18 Uncirculated examples (2/18). NGC ID# 263B, PCGS# 8607

**4008 1852-O XF45 NGC. Variety 1.** The original olive-gold surfaces of this Choice XF 1852-O eagle show deeper amber-gold and bronze hues in the protected portions of the fields. Wear is light, and the only mentionable abrasion is an old, thin line that curves through the left obverse field. An uncommonly appealing example of the issue in this grade. NGC ID# 263D, PCGS# 8609

**4009 1854-O Large Date AU53 NGC. Variety 2.** The subtly luminous olive-gold surfaces of this About Uncirculated 1854-O eagle are remarkably smooth and unabraded, showing bold devices save for the eagle's neck, which is weakly struck. Little wear is present. On this variety, a radial die crack runs from the reverse rim, through the first A in AMERICA, into the eagle's wing, and another connects Liberty's hair bun to the obverse rim between stars 10 and 11. NGC ID# 263J, PCGS# 98614

**4010 1855 AU58+ NGC. CAC.** An impressive Borderline Uncirculated No Motto ten. Apparent abrasions are almost absent, and the well-struck surfaces exhibit original pumpkin-gold toning. A narrow flan imperfection above the eagle's head is as made. CAC: 13 in 58, 4 finer (2/18). NGC ID# 263L, PCGS# 8616

### 1856-O Eagle, AU50 Seldom Seen Reverse

**4011 1856-O AU50 NGC. Variety 2.** The mintmark is centered over the space between the EN in TEN and is slightly closer to the eagle's talon than EN. The obverse is the same as on the other two known 1856-O eagle varieties. This AU coin displays sharp detail and medium orange-gold coloration. Scattered light abrasions appear under a loupe but none are individually distracting. The 1856-O ten is scarce in high grade and rare in Mint State. Census: 12 in 50, 63 finer (1/18). NGC ID# 263R, PCGS# 8620

**4012 1856-S AU55 PCGS Secure.** Large S, scarcer than its Medium S counterpart. Four mintmark positional varieties are known for this issue, two each for the Medium S and Large S, despite a mintage of just 68,000 pieces. An almond-gold Choice AU example with plentiful pockets of luster and one narrow vertical mark in the upper-left obverse field. Population: 25 in 55, 26 finer (2/18). NGC ID# 263S, PCGS# 8621

**4013 1856-S AU55 NGC.** Medium S mintmark. Frequent small abrasions dot the medium-gold surfaces, but bright mint luster remains at the margins. Two tiny obverse rim nicks are noted. The mintage of 68,000 pieces makes this issue more available than many branch mint tens, but few fully Mint State coins exist. The present Choice AU example will suit most collectors with its vibrant eye appeal and sharply struck motifs. Census: 60 in 55, 45 finer (2/18). NGC ID# 263S, PCGS# 8621

**4014 1861 AU55 PCGS Secure.** CAC. Bulging Bun subtype. This is a readily available No Motto ten issue and a popular selection for the type, yet Choice About Uncirculated pieces with a sharp strike and good remaining luster are challenging. CAC endorsement adds to the attributes of this attractive coin, which displays medium-gold color with faint orange accents around the raised elements. Abrasions take the form of pinprick chatter. Population: 61 in 55, 89 finer. CAC: 13 in 55, 24 finer (2/18). NGC ID# 2647, PCGS# 8633

**4015 1861 AU55 PCGS.** CAC. Bulging bun subtype. An original peach-gold and sea-green representative with minor field marks near the chin. The 1861 is scarce in Choice AU condition, something that can also be said about the No Motto type in general. NGC ID# 2647, PCGS# 8633

#### 1861 Ten Dollar, AU58 Significant Luster Remains

**4016 1861 AU58 NGC.** Few Liberty eagle issues prior to 1878 are even remotely available in Uncirculated condition, leaving just a handful of options for type collectors seeking a single high-grade coin. Like its double eagle counterpart, the 1861 ten stands out among its peers with a high mintage (more than 113,000 coins) and is usually available in the upper AU and lower Mint State grades. This near-Mint example is sharp and lustrous, showing lightly abraded straw-gold surfaces and pleasing eye appeal. NGC ID# 2647, PCGS# 8633

#### 1868 Ten Dollar, AU55 Better Date in High Grade

**4017 1868 AU55 NGC.** Production of eagles at Philadelphia in 1868 ceased after 10,630 pieces, making the issue scarce today in most grades. About Uncirculated examples are particularly scarce in the 55 and 58 numeric levels, and MS60 or better coins are major rarities. This Choice AU piece displays partial luster and satiny honey-gold surfaces. Detail is sharp amid scattered abrasions. Census: 25 in 55 (1 in 55+★), 38 finer (2/18). NGC ID# 264N, PCGS# 8653

**4018 1878 MS62 PCGS.** The Philadelphia Mint increased gold coinage production in 1878, in part to support an anticipated redemption of paper money and silver coinage at face value, but that demand never materialized. This is a splendid, lustrous eagle for the assigned grade, with minimal marks and radiant orange-gold color. The strike is razor-sharp. Population: 54 in 62 (3 in 62+), 19 finer (2/18). NGC ID# 265J, PCGS# 8680

**4019 1878-S AU55 PCGS.** The peach-gold surfaces retain some reflective luster and show only the slightest amount of wear. This 1878-S ten is well-struck, though myriad small abrasions — typical for the issue — are noted in the fields and on the cheek. Overall, this is a pleasing representative of an issue that is rare in Mint State. Housed in a green label holder. Population: 14 in 55 (1 in 55+), 10 finer (1/18).

*Ex: Dallas Signature (Heritage, 10/2006), lot 2949; FUN Signature (Heritage, 1/2009), lot 5574.* NGC ID# 265L, PCGS# 8682

**4020 1879 MS62+ PCGS.** The 1879 is the most available pre-1880 issue in mint condition. Nonetheless, it becomes scarce at the MS62+ level. This caramel-gold representative has a bold strike and the expected quantity of small abrasions. Only a tick on the reverse rim at 7:30 merits individual mention. NGC ID# 265M, PCGS# 8683

**4021 1882 MS64 PCGS.** The 1882 eagle is scarce in MS64, and PCGS and NGC each report only a single finer representative (2/18). This near-Gem displays sharp motifs and vibrant rose-gold luster. Light, grade-limiting abrasions are mainly limiting to the obverse. Population: 50 in 64 (2 in 64+), 1 finer (2/18).

*From The Glacier Park Collection.* NGC ID# 2662, PCGS# 8695

#### 1886-S Ten Dollar, MS64+ Just Four Pieces Are Finer

**4022 1886-S MS64+ PCGS.** CAC. Although the 1886-S eagle is somewhat available in circulated and lower Uncirculated grades, it is nearly unobtainable in Gem condition or finer. The frosted surfaces of this high-end, near-Gem example put it within shouting distance of the finest-known examples, receiving both the PCGS Plus and CAC endorsements. Marks are minimal and the strike is razor-sharp. Attractive honey-gold color adds to the strong eye appeal. Population: 46 in 64 (8 in 64+), 4 finer. CAC: 8 in 64, 2 finer (2/18). NGC ID# 554Y, PCGS# 8709

**4023 1888-O MS61 PCGS. Variety 1.** This 1888-O eagle is well-struck and frosty with original yellow-gold mint luster. Some heavy abrasions on Liberty's face account for the grade. An irregular die crack surrounds much of the reverse.

*Ex: Bullet Sale (Heritage, 11/2003), lot 2107; Long Beach Signature (Heritage, 9/2005), lot 9962.*

*From The Glacier Park Collection.* NGC ID# 266L, PCGS# 8713

**4024 1888-O MS61 NGC. Variety 2.** Just 21,335 pieces were struck — a small mintage by most measures, but relatively robust for a ten dollar gold piece struck at the New Orleans Mint. This lightly abraded example retains its original prooflike flash in the protected areas. The strike is sharp across vibrantly lustrous, orange-gold surfaces that show evidence of die clashing on the reverse. NGC ID# 266L, PCGS# 8713

**1889 Ten Dollar, MS61  
Only 4,440 Pieces Struck**

- 4025 1889 MS61 NGC.** This Mint State 1889 Liberty eagle is scarce in its current grade, and finer pieces are rarely encountered. This issue comes from a mintage of only 4,440 pieces, explaining its elusiveness in high grade; the San Francisco Mint struck more than 425,000 eagles the same year. The strike is sharp, and both sides display expected abrasions but with attractive straw-gold color. A hint of reflectivity appears in the fields when tilted gently beneath a light. NGC ID# 266N, PCGS# 8715
- 4026 1891-CC AU55 NGC. Variety 5-D.** The mintmark is closely space and centered over the N in TEN. On this Choice AU example, the olive-gold coloration is original, and small hints of luster remain in the protected portions of the fields. Light surface chatter over each side does not detract. An appealing late Carson City ten. NGC ID# 266U, PCGS# 8720
- 4027 1891-CC AU58 PCGS. Variety 1-A.** The mintmark is further left on this variety than on any other for the 1891-CC ten. This near-Mint example has the eye appeal and luster of a low-end Uncirculated coin, with only a brush of friction on Liberty's eyebrow, nostril, and hair curls that limits the PCGS designation. Light chatter visits original orange-gold coloration on each side. NGC ID# 266U, PCGS# 8720
- 4028 1891-CC MS61 NGC. Variety 1-A.** The diagonal die line in the base of the shield helps attribute the die marriage. From a mintage in excess of 100,000 coins, the 1891-CC is a plentiful ten dollar issue within the reach of most collectors. This piece is overtly original and well-detailed. Frosty mint luster swirls over lightly abraded surfaces. NGC ID# 266U, PCGS# 8720
- 4029 1891-CC/CC FS-501 AU58 NGC. Variety 4-C.** The mintmark is repunched, most apparent west of the base of the second C. This orange-gold Carson City type coin is moderately abraded aside from a line above the RIC in AMERICA. The strike is good and the originally toned surfaces display luster throughout the borders. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720
- 4030 1891-CC/CC FS-501 MS61 NGC. Variety 4-C.** The second C in the mintmark is repunched on this variety. On the obverse, a short spike protrudes from Liberty's jaw near the throat. Satiny mint luster illuminates straw-gold surfaces on this sharp 1891-CC eagle, and grade-limiting abrasions are light and scattered. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720
- 4031 1892-CC Tripled Die Reverse, FS-801, XF45 PCGS Secure.** A lovely Carson City type coin. The lightly marked surfaces are generally lemon-gold in color, though the portrait high points are gunmetal-blue. As is the case with all examples of this low-mintage issue, IN GOD WE TRUST is die tripled, and STATES OF is die doubled. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722
- 4032 1892-O MS61 PCGS. Variety 1,** as always. This later die state coin shows thin cracks at the date and left-hand stars. Mint State 1892-O eagles are elusive finer than this piece. Sharp devices complement frosty orange-gold mint luster, with scattered field abrasions limiting the grade. NGC ID# 266X, PCGS# 8723

- 4033 1894-O MS61 NGC. Variety 6.** The mintmark is slightly lower than on other 1894-O reverse dies. This Mint State coin is conditionally elusive. Sharp design elements complement satiny straw-gold luster, while moderate abrasions on each side dictate the grade. NGC ID# 2676, PCGS# 8730
- 4034 1895 MS64 NGC.** The 1895 is less available than the 1893 or 1894, but it is still an accessible ten dollar issue. Only in MS64 does the date become scarce. Gems are rare with four submissions each at NGC and PCGS (2/18). Swirling luster radiates over each side. The strike is good, and marks are unobtrusive. NGC ID# 2678, PCGS# 8732
- 4035 1895-O MS62 NGC. Variety 2.** The ball of the 9 in the date is centered over a dentil. Many of the 98,000 1895-O tens were exported and repatriated, accounting for the frequency of offerings in the AU55 to MS62 range. Satiny mint luster rolls over this attractive, well-defined New Orleans eagle. The only mentionable ticks occur near Liberty's eye. NGC ID# 2679, PCGS# 8733
- 4036 1897-O MS61 NGC. Variety 3.** Date placement and a diagonal die line between the IB in LIBERTY identify this previously unlisted die pairing. The mintmark placement appears similar to that of the Variety 2 reverse, although there is no die line in the upper-left corner of the shield. This Mint State 1897-O ten dollar is semiprooflike and displays original orange-gold coloration. The strike is sharp and abrasions are minimal. NGC ID# 7LHC, PCGS# 8738
- 4037 1899 MS61 Prooflike NGC.** NGC has designated only 16 examples of this issue as Prooflike, including 12 in MS61 and one finer (2/18). This piece is deeply reflective in the fields and shows sharp, satiny devices. Scattered abrasions on each side limit the grade. NGC ID# 267J, PCGS# 78742
- 4038 1901 MS64 PCGS.** The 1901 ten dollar Liberty is a popular type issue from a mintage of more than 1.7 million pieces. This attractive Choice example exhibits well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 7LHF, PCGS# 8747
- 4039 1901 MS64+ PCGS.** This gorgeous Liberty eagle is clearly on the verge of an even higher grade. A couple of obverse field marks are the only flaws standing in the way of a Gem assessment. The strike is strong on the portrait and eagle. Bright mint frost over luminous apricot-gold surfaces delivers terrific aesthetic appeal. NGC ID# 7LHF, PCGS# 8747
- 4040 1901 MS65 NGC.** A delightful Gem representative of this popular Philadelphia Mint type issue, this coin offers sharply detailed design elements and lustrous peach-gold surfaces that show only insignificant signs of contact. Overall eye appeal is outstanding. Certified in a former generation holder. NGC ID# 7LHF, PCGS# 8747
- 4041 1901 MS65 NGC.** From a mintage of 111,430 pieces, the 1901 Liberty eagle is an elusive issue in higher grades. This impressive Gem displays well-detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces exhibit a couple of darker alloy spots on the obverse. In a prior generation holder. Only a single coin (an MS65+) has been certified finer by NGC (2/18). NGC ID# 7LHF, PCGS# 8747
- 4042 1901-S MS64 PCGS.** From a large mintage of 2.8 million pieces, the 1901-S ten dollar Liberty is an available issue and a popular branch mint type coin. This well-detailed Choice specimen is well-preserved and lustrous. Housed in a first-generation holder. NGC ID# 267S, PCGS# 8749
- 4043 1901-S MS65 PCGS. Breen-7075.** The date was initially entered with an upward slope, then repunched in a level position. The design elements of this spectacular Gem representative are sharply detailed throughout and the vivid orange-gold surfaces are well-preserved, with vibrant mint luster on both sides. Overall eye appeal is terrific. Housed in a green-label holder. NGC ID# 267S, PCGS# 8749

**4044 1903-O MS63 NGC. Variety 1.** Although only marginally elusive in MS63, the 1903-O ten dollar is decidedly rare finer. This collectible Select example displays a sharp strike and frosty, original peach-gold mint luster. Light field chatter on the obverse limits the grade but does not detract. Census: 44 in 63, 8 finer (1/18). NGC ID# 267W, PCGS# 8753

**4045 1904 MS63 PCGS.** The 1904 is scarce in Select Uncirculated condition and scarce-to-rare when finer. This frosted MS63 is razor-sharp with strong mint luster. Rich-gold color displays pleasing orange and reddish-gold accents. Non-distracting, wispy field chatter stops short of the portrait, where a tiny mark beneath the eye is a minor imperfection on Liberty's cheek. PCGS reports just 57 numerically finer pieces (2/18). NGC ID# 267Y, PCGS# 8755

## INDIAN EAGLES

**4046 1907 No Motto MS62 PCGS.** An attractive MS62 example of this popular type issue, the first year of the short-lived No Motto design. This lustrous, lightly marked orange-gold example exhibits well-detailed design elements, with a touch of the usual softness on Liberty's curls and the eagle's shoulder. NGC ID# 28GF, PCGS# 8852

**4047 1907 No Motto MS63 PCGS.** By the time Charles Barber was done modifying the Saint-Gaudens eagle design, the triangular stops after the legends were gone, the rim was modified, as were the headdress feathers and other elements of the design. Aesthetics were compromised for utility, and a mintage of 239,400 pieces was a small success for Barber and his quest for high-speed commercial production. This is a brassy-gold Select Uncirculated example with scattered marks and vibrant mint luster. The feather tips are sharp at the expense of central elements, which show a bit of weakness at Liberty's temple and the eagle's shoulder. NGC ID# 28GF, PCGS# 8852

**4048 1907 No Motto MS63 NGC.** Strike definition tends to plague the first-year No Motto eagle, designed by acclaimed sculptor Augustus Saint-Gaudens. This Select orange and khaki-gold representative is typically struck. Softly frosted mint luster and small abrasions are apparent on each side. NGC ID# 28GF, PCGS# 8852

1907 Indian Ten Dollar, MS64  
No Motto, No Periods

**4049 1907 No Motto MS64 NGC.** A lemon-gold Choice first-year Indian ten. The lustrous surfaces are smooth aside from minor contact on the eagle's front wing. The strike is sharp except for blending on the curls below the TY in LIBERTY. The reverse exhibits a wire rim between 1 and 5 o'clock. Encased in a circa-2000 holder. NGC ID# 28GF, PCGS# 8852

1907 Indian Ten, MS64  
No Periods, No Motto Type Coin

**4050 1907 No Motto MS64 PCGS.** The intricate details of this Choice No Periods ten are strongly struck. Honey-gold surfaces are aglow in vibrant mint luster and free of significant abrasions. Close study with a loupe reveals a few trivial lines on Liberty's cheek that limit a full Gem designation. Eye appeal is exceptional for the grade on this No Motto type coin.  
*Ex: New York Signature (Heritage, 10/2015), lot 5185.* NGC ID# 28GF, PCGS# 8852

**4051 1908-D Motto MS61 NGC.** This piece displays a bold strike and satiny orange-gold luster. Grade-limiting abrasions come in the form of light field chatter with a few slide marks on Liberty's portrait; no individually distracting contact marks are seen. A slightly better date in Uncirculated condition. NGC ID# 28GK, PCGS# 8860

**4052 1909 MS63 NGC.** This Philadelphia issue is moderately available in the MS60 to MS63 range, and becomes conditionally scarce any finer. Gems are rare. This Select example has satiny luster over wheat-gold surfaces, and well-defined motifs. A few small ticks on the eagle's wing are the only abrasions of note. NGC ID# 28GM, PCGS# 8862

**4053 1909-D MS62 PCGS.** The 1909-D Indian eagle is somewhat scarce in grades above MS62. This attractive specimen offers well-detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863

1909-D Ten Dollar, MS63  
Elusive Any Finer

**4054 1909-D MS63 PCGS.** A sharp Select example of this conditionally challenging Denver issue that shows original orange-gold luster with delicate rose and lilac accents throughout. The 1909-D Indian eagle comes from a mintage of 121,540 pieces and is available in the lower Mint State grades. MS63 coins are scarce, and finer examples are seldom offered. PCGS lists 45 representatives finer than the present (2/18). NGC ID# 28GN, PCGS# 8863

**4055 1909-S MS62 PCGS.** This is a scarce Indian Head ten dollar issue in high grades. Populations fall significantly at each level between MS63 and MS66 with prices rising correspondingly. Soft mint frost shines from textured orange-gold surfaces that show small, scattered abrasions. A pleasing example for the grade. NGC ID# 28GP, PCGS# 8864

**4056 1910 MS64 PCGS.** Sixty years after their production, many previously exported 1910 eagles began to return from European bank holdings. Today, the issue is available through MS63, scarce in MS64 and MS65, and rare any finer. Good detail is apparent throughout this frosty near-Gem. Textured fields lack serious flaws. NGC ID# 28GR, PCGS# 8865

**4057 1910-D MS64 PCGS.** Collectors should not encounter much difficulty in trying to locate an Uncirculated 1910-D eagle, that is unless a Gem is sought. This near-Gem exhibits deeper sun-gold tones around peach-gold centers. Well-struck motifs and vibrant satin mint luster appear on each side. NGC ID# 28GS, PCGS# 8866

**4058 1911 MS64 PCGS.** Fine-grained surfaces are characteristic of 1911 eagles, and function as a useful means of capturing and intensifying the mint luster as it encounters the many microscopic facets that occupy the fields. This is a Choice orange-gold example, with sharply struck stars and central motifs. A few light grazes and tiny marks do not inhibit the strong eye appeal. NGC ID# 28GT, PCGS# 8868

**4059 1911 MS64 NGC.** Textured, frosty surfaces and a pinpoint impression are characteristic of both the issue as a whole and this near-Gem in particular. Each side presents peach-gold color and minimal marks with swirling mint luster. This example is significantly finer than the average MS61-MS62 coins registered at the grading services. NGC ID# 28GT, PCGS# 8868

**4060 1911-D AU53 NGC.** The 1911-D is in demand in all grades, as its series-low regular issue mintage of 30,100 pieces suggests. This AU53 example boasts excellent eye appeal, with generous luster emanating from finely granular, orange-gold surfaces accented by a crisp strike. A bit of wear on the eagle's shoulder and leg confirms the About Uncirculated designation. NGC ID# 28GU, PCGS# 8869

**4061 1912 MS64 PCGS.** The 1912 ten dollar is readily available in most grades including lower-level Mint State coins, yet it becomes quite scarce in near-Gem condition and finer. This is a bright and frosted example with finely grained surfaces and attractive, deep yellow-gold color. The Indian is fully struck throughout the hair and headdress, and the stars are pinpoint sharp. Likewise, the eagle is full-feathered. A solitary area of deep toning is noted between the A and M in AMERICA. PCGS reports just 57 numerically finer examples (2/18). NGC ID# 28GW, PCGS# 8871

**4062 1912 MS64 NGC.** Imports from the 1970s onward have contributed to the increasing availability of the 1912 in MS60 to MS64 condition, but finer coins are still extremely scarce. Apricot-gold surfaces, awash in frost mint luster, are finely granular and minimally abraded with lovely rose-gold accents. Only the eagle's shoulder tip is a trifle soft. NGC ID# 28GW, PCGS# 8871

**4063 1915 MS64 NGC.** Butter-gold and lime-green toning blend throughout this lustrous and well-struck Choice Indian ten. Refreshingly free from distracting marks, and a costly acquisition any finer. NGC ID# 28H5, PCGS# 8878

**4064 1915 MS64 PCGS. CAC.** Thick, frosted luster creates a stunning display for the deep green-gold surfaces of this CAC-endorsed 1915 near-Gem eagle. The strike is tack-sharp while any marks or grazes are essentially non-existent. Although the 1915 is well-known for its excellent eye appeal, it will be difficult to exceed the visual appeal of this exceptional example. NGC ID# 28H5, PCGS# 8878

**4065 1915-S AU50 ANACS.** This better-date Indian eagle comes from a mintage of only 59,000 pieces. Mint State coins are scarce, although AU-level examples are elusive in their own right. Luster remains in the fields of this accurately graded About Uncirculated coin, which shows only a brush of high-point wear on the devices. A curving mark in the lower-left obverse field is the only single mentionable abrasion.

**From The Glacier Park Collection.** NGC ID# 28H6, PCGS# 8879

## LIBERTY DOUBLE EAGLES

### 1850 Double Eagle, Choice XF Important Inaugural-Year Issue

**4066 1850 XF45 PCGS.** The 1850 introduction of the double eagle denomination in the wake of the California Gold Rush represents one of the most important milestones in the history of the U.S. Mint. This orange-gold first-year example saw modest circulation and displays areas of localized strike incompleteness, but overall detail is good. Alloy spots on the chin and below RTY identify this particular coin. NGC ID# 268F, PCGS# 8902

### 1850 Double Eagle, AU50 Always in High Demand

**4067 1850 AU50 PCGS.** The first regular year of issue in the double eagle series enjoys a large mintage that exceeds 1.1 million coins. Although the 1850 survives to a great extent, most examples are well-circulated and demand always outpaces supply. The stars are a trifle soft, and blending occurs over Liberty's curls and the eagle's wingtips, but the impression is generally well-defined. Orange-gold surfaces are predictably abraded. NGC ID# 268F, PCGS# 8902

**4068 1851 AU50 PCGS Secure.** A pleasing AU specimen of this always-popular Type One issue, with some light wear on the well-detailed design elements and lightly abraded orange-gold surfaces that retain traces of original mint luster. NGC ID# 268H, PCGS# 8904

### 1851 Double Eagle, Unc Sharpness

**4069 1851 — Obverse Scratched — NGC Details. Unc.** Gold Rush-era Philadelphia double eagles are elusive in Mint State. This piece is sharp and bright yellow-gold with subtle reflectivity evident in the protected portions of the fields. Although both sides show heavy abrasions, as is usually the case for the 1851 twenty, it is a cluster of pinscratches to the left of the date that prevents a numeric grade from NGC.

---

**1851 Double Eagle, MS60**  
**Few Survive This Fine**

- 4070** 1851 MS60 NGC. Light lemon-gold color and peripheral luster brighten this second-year Liberty Head representative. Strike detail is razor-sharp over the centers with the exception of the hair strands behind the ear, which appear to be struck through grease. Full radials occur on the stars. Faint wispy marks explain the grade. More than 2 million pieces were struck for this issue, but few survive in Uncirculated condition. NGC ID# 268H, PCGS# 8904

---

**1852 Liberty Double Eagle, AU53**  
**Popular Type One Twenty**

- 4071** 1852 AU53 PCGS Secure. CAC. More than 2 million Liberty double eagles were struck at the Philadelphia Mint in 1852, but the issue is still elusive in Mint State grades. This impressive AU53 example exhibits some light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 268K, PCGS# 8906

---

**1852 Double Eagle, AU55**  
**Much Luster Remains**

- 4072** 1852 AU55 NGC. A brush of high-point friction is evident, but this Choice AU 1852 double eagle remains highly lustrous and frosty with bright yellow-gold color. Both sides are heavily abraded, including two notable marks below the R in AMERICA. Bright luster and abraded surfaces are the norm for Philadelphia issues of the Gold Rush period, but the luster of the present coin is lacking on many of its peers. NGC ID# 268K, PCGS# 8906

---

**1852 Double Eagle, AU55**  
**Bold Design Detail**

- 4073** 1852 AU55 PCGS. Die cracks are seen through the peripheral elements on each side, namely near the date and lower stars. Bold hair curls, stars, and feathers display minimal evidence of high-point rub, and the only significant abrasions occur below Liberty's eye. This partly lustrous Choice AU No Motto twenty dollar gold piece would make a lovely type coin. NGC ID# 268K, PCGS# 8906

---

**1852 Double Eagle, AU58**  
**Surprisingly Attractive**

- 4074** 1852 AU58 NGC. Frosty original luster remains in the fields of this near-Mint coin, which shows refreshingly smooth green-gold surfaces for a Gold Rush-era double eagle. Only a brush of high-point friction prevents a Mint State grade, and the eye appeal surpasses that of many lower-end Uncirculated coins that we have seen. The 1852 is available in AU condition but is elusive finer. NGC ID# 268K, PCGS# 8906

- 4075** 1853 AU55 NGC. As a moderately available Type One double eagle from the period of the California Gold Rush, the 1853 is popular with type collectors as well as specialists of the date and mintmark series. This is an appealing greenish-gold example with lightly worn and abraded surfaces. Partial mint luster remains around the devices and within Liberty's hair strands. A thin band of Mint grime curves above the rays on the reverse. NGC ID# 268M, PCGS# 8908

- 4076** 1853 AU55 NGC. Much mint luster remains across bright, yellow-gold surfaces of this lightly abraded, sharply struck Choice About Uncirculated twenty. More than 1.2 million pieces were struck, making the 1853 a staple among gold accumulators and type collectors. A few tiny marks exist on the bottom edge of the neck truncation, and a small flat spot on the rim above star 7 is of minor note. NGC ID# 268M, PCGS# 8908

- 4077** 1854 Small Date AU50 NGC. A yellow-gold example with substantial luster for the third-party grade. The portrait shows a few reed impressions, but field marks are minimal except near the R in AMERICA. The dies are moderately rotated, unusual for the series. Encapsulated in a former generation holder. NGC ID# 268R, PCGS# 8911

- 4078** 1854 Small Date AU53 PCGS. Both Large and Small Date Type One Liberty double eagles were struck at the Philadelphia Mint in 1854, with the Small Date type being more available. This lightly worn, lightly abraded AU53 example exhibits orange-gold surfaces that retain significant amounts of original mint luster. NGC ID# 268R, PCGS# 8911

**4079 1855 XF45 PCGS Secure.** Original olive-gold surfaces show hints of orange-gold luster in the protected regions. The coin is well-detailed and relatively smooth, exhibiting no distracting marks. The reverse is rotated a trifle counterclockwise. Some deep coppery color is seen in the crevices of the portrait. NGC ID# 268V, PCGS# 8914

**4080 1855-S — Cleaned — PCGS Genuine. AU Details. Variety 14B.** Medium S. The 1855-S Liberty double eagle is seldom encountered in high grade. This impressive example shows just a trace of actual wear on the sharply detailed design elements, but the lightly abraded lemon-yellow surfaces have an unnatural sheen that indicates a light cleaning.

**4081 1856-S AU53 NGC.** The S.S. *Central America* recoveries explain the accessibility of the 1856-S double eagle, though we are unsure of the origin of this attractive orange-gold representative. Blending occurs over the stars, curls, and feathers, but detail nevertheless remains bold. Hints of glowing luster are seen in the recesses. NGC ID# 2692, PCGS# 8919

**4082 1856-S AU55 NGC.** Luminous luster emerges from the protected portions of the fields on this lightly marked, well-detailed 1856-S twenty. The surfaces are bright yellow-gold and attractive. Under a loupe, die lapping is visible at the designer's initials on the bust truncation, but the eagle's tailfeathers are full. NGC ID# 2692, PCGS# 8919

**4083 1858-S XF45 PCGS Secure.** The well-detailed design elements of this Type One branch mint double eagle show some light wear on the prongs of the coronet and Liberty's curls, but most of the interior detail remains intact. The pleasing orange-gold surfaces retain traces of original mint luster and abrasions are numerous, but minor, outside of a scrape in the left-obverse field. NGC ID# 2699, PCGS# 8925

**4084 1858-S AU53 NGC.** Medium S. Doug Winter calls the 1858-S "very rare issue in higher grades." This is a more affordable, lightly circulated alternative that features good detail on the stars, hair, and feathers. Peripheral luster and deep orange-gold color generate pleasing eye appeal. NGC ID# 2699, PCGS# 8925

#### 1858-S Double Eagle, AU58 Rare Any Finer

**4085 1858-S AU58 NGC.** Uncirculated examples of the 1858-S double eagle are rarely available. High-end AU coins are moderately scarce. This near-Mint example has bright yellow-gold surfaces with hints of peach and lilac visible in the fields beneath a loupe. Abrasions are at a minimum. San Francisco issues of this period were heavily used in commerce. With the exception of a couple of dates found in quantity on shipwrecks, S-mint Type One twenties are scarce in high grade. NGC ID# 2699, PCGS# 8925

#### 1859-S Twenty Dollar, AU55 Lustrous Fields

**4086 1859-S AU55 NGC.** Satiny mint luster remains in the fields of this Choice AU example, while sharp devices show only light high-point wear. There is an old reed mark near star 4, but other abrasions are uniformly light and unobtrusive. The 1859-S double eagle is a rarity in Mint State, and high-end AU coins are always in demand. NGC ID# 269C, PCGS# 8928

**4087 1861 AU50 NGC.** The originality of this double eagle is worthy of note, with dappled olive-gray and orange-gold color bolstered by underlying mint luster that still remains after 10 points of wear. Most bagmarks and marks from circulation are muted by time spent in antebellum commerce. During the war, this piece may have been set aside or hoarded, allowing it to retain its pleasing About Uncirculated qualities. NGC ID# 269G, PCGS# 8932

#### 1861 Type One Twenty, AU55 Collector Favorite for Type

**4088 1861 AU55 NGC.** A Choice AU No Motto type coin from a mintage of almost 3 million pieces, produced during the first year of the Civil War as the public hoarding of gold and silver began. This lovely piece displays attractive yellow and green-silver tones, with a few hints of orange present. The reverse exhibits a die crack at the upper portions of TES of STATES. As expected at this grade level, a number of scattered abrasions appear. NGC ID# 269G, PCGS# 8932

#### 1861 Double Eagle, AU55 Appealing and Partly Lustrous

**4089 1861 AU55 PCGS.** The surfaces of this Choice AU 1861 double eagle are lightly abraded, but not as significantly as we have seen on most other AU-level examples. The devices are also bold with little wear, and some luster remains in the fields. The 1861 is a classic type coin because of its mintage of almost 3 million pieces. It is one of only a few No Motto double eagles that are available in higher grades. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, AU58  
Satin No Motto Type Coin**

- 4090 1861 AU58 NGC.** The 1861 double eagle is a favorite No Motto type coin and among the most plentiful and affordable issues in high grade. This near-Mint coin is satiny with lustrous fields and bright yellow-gold color. Scattered contact marks are expected for the grade, but little evidence of wear can be seen on the devices. NGC ID# 269G, PCGS# 8932

**1861-S Double Eagle, AU55  
Luster Remains in the Fields**

- 4091 1861-S AU55 NGC.** Original honey-gold luster appears in the fields, while the well-struck devices show light high-point wear consistent with the grade. Scattered abrasions are uniformly light and unobtrusive. The 1861-S double eagle is famous for the Paquet Reverse variety, which is rare and highly sought-after. The normal reverse variant, offered here, is conditionally scarce in high grade and an underrated rarity in Mint State. This collectible Choice AU coin is appealing for the grade. NGC ID# 269K, PCGS# 8935

- 4092 1862-S — Improperly Cleaned — NGC Details. XF. Breen-7214.** The date is lightly repunched, evident within the loops of the 8. This lemon-gold double eagle is slightly glossy from a wipe, and displays minor rim knocks at 5:30 on the obverse and 12:30 on the reverse. NGC ID# 269N, PCGS# 8938

**1862-S Liberty Double Eagle, AU55  
Seldom Encountered in High Grade**

- 4093 1862-S AU55 NGC.** The San Francisco Mint produced a substantial mintage of 854,173 Liberty double eagles in 1862. There was little numismatic interest in branch mint issues at the time, and large denomination gold coins were too expensive for the average collector to collect systematically, so few examples were saved by contemporary numismatists. This attractive Choice AU specimen is lightly worn and lightly abraded, with still-lustrous orange-gold surfaces. NGC ID# 269N, PCGS# 8938

**1862-S Double Eagle, AU55  
Lustrous, Original Surfaces**

- 4094 1862-S AU55 NGC.** Luster remains in the fields and light high-point wear is visible on the devices. This Choice AU 1862-S double eagle still displays a sharp strike and has original orange-gold patina with olive accents. Some light surface marks accompany the grade. The 1862-S is rare in Mint State, and most such pieces are heavily abraded. This high-end AU coin is attractive and more easily collectible. NGC ID# 269N, PCGS# 8938

- 4095 1863-S VF30 NGC. Breen-7217. Small S.** An apricot-gold double eagle that shows wear on the eagle's wingtips, but lacks any individually consequential marks. Most certified survivors of the issue are in XF to AU grades, but the present piece participated in many 19th-century West Coast purchases. NGC ID# 269R, PCGS# 8940

- 4096 1863-S VF35 NGC. CAC.** Numerous examples of the 1863-S exist in well-circulated condition, indicating the importance of gold coinage primarily on the West Coast, where gold pieces tended to stay in circulation despite the far-away Civil War. This is a Choice VF example that displays rich olive-gold color with strong orange overtones. Smooth wear gives the piece an attractive look of antique gold. CAC endorsed for quality and eye appeal. **From The Glacier Park Collection.** NGC ID# 269R, PCGS# 8940

- 4097 1863-S XF45 NGC. Medium S.** A total of 289 1863-S double eagles were recovered from the S.S. *Brother Jonathan* and *Republic* shipwrecks, augmenting the number of available survivors. Although considerable evidence of light circulation is evident in the form of field marks and blending over the devices, partial luster glows from the hidden areas. NGC ID# 269R, PCGS# 8940

**1863-S No Motto Twenty, AU55  
Profound Orange-Gold Color**

- 4098 1863-S AU55 PCGS Secure. Breen-7217. Small S.** This partly lustrous Choice AU double eagle from a mintage of nearly 1 million coins features deep orange-gold surfaces and scattered wispy lines and abrasions over each side. A trace of friction appears at the top of the hair bun and over the forecurls, but the stars and feathers remain crisp. Shipwreck recoveries of the 1863-S have greatly improved its high-grade accessibility. However, examples at this level are conditionally scarce. NGC ID# 269R, PCGS# 8940

**1863-S Liberty Twenty, AU55**  
Smooth, Lustrous Fields

- 4099 1863-S AU55 NGC.** Other than a few small marks on Liberty's jaw and neck, the surfaces of this Choice AU 1863-S double eagle are surprisingly smooth and appealing. Lustrous fields complement original honey-gold patina, and the design elements are well-struck. This issue is usually available in AU grades but is scarce in Mint State. On AU and Mint State coins, surface abrasions are usually heavy and unsightly, making the present coin uncommonly appealing. NGC ID# 269R, PCGS# 8940

- 4100 1865 VF30 PCGS.** The 1865 is the final No Motto double eagle struck at the Philadelphia Mint. In addition to the addition to the motto, alterations were also made to the shield, scroll, leaves, and wings in 1866. Coloration is deep reddish-gold on each side. Full radials remain on the stars, and a few deep abrasions occur on each side. Numismatically significant and appealing. NGC ID# 269U, PCGS# 8943

**1865-S Double Eagle, Choice AU**  
Late-Date No Motto Type Coin

- 4101 1865-S AU55 NGC.** Small S. Factors contributing to the availability of the 1865-S No Motto twenty include a mintage of 1 million coins and hundreds of nautical recoveries over the past few decades. This medium yellow-gold twenty shows a couple of marks near stars 1 and 2, and another on the cheek. The fields are fairly clean, though, and strike detail is good despite a hint of friction. NGC ID# 269V, PCGS# 8944

**1865-S Liberty Head Twenty, AU58**  
Lustrous and Appealing

- 4102 1865-S AU58 NGC.** Irregular die cracks encircle the reverse and another runs through the date on the obverse of this piece. The devices show light high-point friction with luster in the fields. Warm orange-gold coloration adds to the eye appeal. Quantities of the 1865-S double eagle were recovered from the S.S. *Brother Jonathan* and S.S. *Republic* shipwrecks, and this is the last available No Motto issue in high grade. NGC ID# 269V, PCGS# 8944

**1866-S Motto Twenty, Bright AU50**

- 4103 1866-S Motto AU50 NGC.** This is the first With Motto issue from the San Francisco Mint, a much more plentiful issue than its No Motto counterpart, ideal for date collectors. Hints of luster remain in the fields, and the bright yellow-gold surfaces are only lightly abraded. Softness of strike on the high points of Liberty's portrait combines with light high-point wear to merge the finer details of Liberty's hair.

Ex: *Long Beach Signature* (Heritage, 2/2005), lot 9025. NGC ID# 26B2, PCGS# 8950

**1867 Liberty Double Eagle, AU55**  
Type Two Philadelphia Issue

- 4104 1867 AU55 PCGS Secure. CAC.** Double eagle production dropped sharply at the Philadelphia Mint in 1867, the second year of the Type Two design. This impressive Choice AU specimen exhibits well-detailed design elements with some incomplete detail on the arrows, due to die lapping. The orange-gold surfaces show numerous minor abrasions, as expected, but retain much of their original mint luster. NGC ID# 269Z, PCGS# 8951

- 4105 1867-S AU53 NGC.** Small squat S. Myriad pockets of luster emerge from the green-gold surfaces. Small abrasions are prevalent, but only a curved line beneath the U in UNITED merits mention. Like most Type Two issues, the 1867-S is rare in Mint State, though collectible in AU grades. NGC ID# 26A2, PCGS# 8952

**1868 Liberty Head Twenty, AU50**  
Better Date in High Grade

- 4106 1868 AU50 PCGS.** The Philadelphia Mint struck only 98,575 double eagles in 1868. Mint State survivors are rare, and AU coins are infrequently available. This piece displays bright honey-gold surfaces and bold details. Light high-point wear and scattered abrasions appear on each side, as usual for the grade. PCGS-graded examples of this issue are in the minority in AU condition. NGC ID# 26A3, PCGS# 8953

---

**1868 Liberty Double Eagle, AU50**  
**Scarcer Low-Mintage Issue**

**4107 1868 AU50 NGC.** A small mintage of 98,500 Liberty double eagles was achieved at the Philadelphia Mint in 1868. The coins were released into circulation and used to settle large accounts in both foreign and domestic trade. Few were saved for numismatic purposes, making the 1868 an elusive issue in high grade today. This lightly worn AU specimen offers moderately abraded orange-gold surfaces that retain much original mint luster. NGC ID# 26A3, PCGS# 8953

**4108 1868-S AU55 NGC.** This Choice AU example displays a sharp strike and significant field luster, with only slight high-point friction over the devices. Scattered surface chatter is consistent with the grade. The 1868-S double eagle is plentiful in AU grades but scarce in Mint State. NGC ID# 26A4, PCGS# 8954

**4109 1868-S AU55 NGC.** While scarce in Mint State, the 1868-S is more available in About Uncirculated grades. This still-lustrous and minimally abraded Choice AU is sure to satisfy most collectors. Sharp definition remains on the devices and attractive rich-gold color flows throughout both sides. NGC ID# 26A4, PCGS# 8954

**4110 1869 XF45 PCGS.** The base of the 1 is repunched north. A caramel-gold Type Two twenty with ample remaining luster, especially on the reverse. Marks are minor aside from a diagonal field line near the forehead. The 1869 is typically encountered in XF to AU grades, and is rarely seen in Mint State. NGC ID# 26A5, PCGS# 8955

---

**1869 Twenty Dollar, AU58**  
**Reflective Fields**

**4111 1869 AU58 PCGS.** Although the Philadelphia Mint produced more than 175,000 double eagles in 1869, this issue is genuinely elusive in the context of the series. Uncirculated examples are rarities in any grade, and high-end AU coins are only slightly more available. This near-Mint example displays bright yellow-gold surfaces and bold design elements, with a few scattered abrasions. A hallmark of the eye appeal is prooflike fields on each side. Population: 29 in 58 (2 in 58+), 35 finer (2/18). NGC ID# 26A5, PCGS# 8955

**4112 1869-S AU53 NGC.** Scarce in Uncirculated condition, the 1869-S is one of the favored Type Two double eagles in About Uncirculated grades. This apricot-gold example shows the expected bagmarks and abrasions, yet mint luster remains in sheltered areas and the original patina provides substantial eye appeal. The coin retains most of its original sharp definition. NGC ID# 26A6, PCGS# 8956

**4113 1869-S AU55 NGC.** The 1869-S is usually seen in XF or AU grades but becomes rare in mint condition. The present apricot-gold Choice AU exhibits luster throughout the legends and Liberty's curls. The upper-left obverse field is moderately abraded, but the remainder of the coin shows only unimportant contact. NGC ID# 26A6, PCGS# 8956

---

**1870 Liberty Twenty, AU53**  
**Lustrous and Appealing**

**4114 1870 AU53 PCGS.** Luminous fields accent bold design elements on this About Uncirculated Type Two double eagle, and the original honey-gold surfaces show relatively light abrasions considering the heavy bagmarks often seen on AU coins. The 1870 is rare in Mint State and almost uncollectible above MS62; appealing AU examples are moderately elusive. NGC ID# 26A7, PCGS# 8957

**4115 1870-S AU55 NGC.** Small Squat S. The mintage for the 1870-S double eagle approaches 1 million coins, but survivors are relatively scarce in high grades. Most star radials are clear and the feathers are well-defined, although Liberty's portrait is soft. Reddish-gold surfaces are original and show myriad tiny abrasions. NGC ID# 26A9, PCGS# 8959

---

**1870-S Double Eagle, AU58**  
**Modestly Reflective Obverse**

**4116 1870-S AU58 NGC.** There is some lightness of strike on the upper-right shield, but this near-Mint 1870-S double eagle is otherwise well-defined. Subtle reflectivity is apparent in the obverse fields, while the reverse is satiny. Both sides exhibit bright yellow-gold color and scattered abrasions, with a touch of high-point friction that defines the grade. This San Francisco issue is elusive in finer condition. NGC ID# 26A9, PCGS# 8959

**1870-S Liberty Twenty, AU58**  
**Reflective Fields, Strong Eye Appeal**

**4117 1870-S AU58 PCGS.** This vibrant, medium-gold 1870-S displays a sharp strike and semiprooflike fields. Only light field chatter reveals its brief stint in circulation. While 1870 is a numismatically significant year with the opening of the Carson City Mint as well as several scarce-to-rare denominations, it was business as usual at the San Francisco Mint for double eagles. Nearly 1 million pieces were struck. This near-Mint example shows a cluster of small marks below star 1 but no major abrasions. NGC ID# 26A9, PCGS# 8959

**1870-S Double Eagle, AU58**  
**Scarce in Finer Condition**

**4118 1870-S AU58 NGC.** This San Francisco issue is scarce in Mint State but usually available in AU grades such as the present. Much luster remains in the fields, and boldly struck design elements show trivial wear. Heavy abrasions scattered over each side are a familiar sight on Type Two double eagles of this grade. NGC ID# 26A9, PCGS# 8959

**1870-S Twenty Dollar, AU58**  
**Glistening Wheat-Gold Example**

**4119 1870-S AU58 PCGS.** Small Squat S. The mintmark nearly touches the tailfeathers on this borderline Mint State survivor. Pale wheat-gold surfaces glisten with remaining peripheral luster and showcase a number of characteristic bagmarks and abrasions. Each side is well-struck. Incompleteness is limited to the upper curls and reverse stars. NGC ID# 26A9, PCGS# 8959

**1870-S Double Eagle, Lustrous AU58**  
**Repunched Date**

**4120 1870-S AU58 PCGS Secure.** While other San Francisco denominations are notably scarce or rare, the 1870-S was struck in normal quantity with nearly 1 million pieces produced. Different date logotype positions exist, and this near-Mint example has one of the more interesting ones with the date initially entered too high. The peak of the 1 was initially embedded in the bust truncation, then the date was repunched slightly lower (but still touching the bust). Traces of the earlier punch remain visible at 187. Lightly abraded fields and small marks exist on the sharply struck devices, with brilliant sun-gold color and plentiful mint luster. NGC ID# 26A9, PCGS# 8959

**4121 1871-S AU58 PCGS.** Micro S. Choice AU and near-Mint condition are the two most frequently seen grades for the 1871-S, though the issue is collectible through MS61. This is a typically struck khaki-gold representative that showcases abundant mint luster, except in the exposed fields. Minimal friction is present, while both sides exhibit numerous abrasions. NGC ID# 26ND, PCGS# 8962

**4122 1871-S AU58 PCGS.** Micro S mintmark. If not for those double eagles sent abroad for foreign trade, the 1871-S would be a major scarcity in full Mint State and much scarcer in near-Mint condition. This attractive AU58 example radiates orange-gold luster and retains most of its sharp strike, although a few of the stars lack central detail. Light chatter from bag storage and a few shallow scrapes do little to disturb the vibrant eye appeal. NGC ID# 26ND, PCGS# 8962

**4123 1871-S AU58 PCGS. CAC.** Micro S. This peach-gold double eagle entered Old West commerce only momentarily. Bagmarks are more extensive on the obverse than the reverse, though we note thin horizontal marks above the left (facing) wing and within the upper shield. CAC: 44 in 58, 26 finer (2/18). NGC ID# 26ND, PCGS# 8962

**4124 1871-S Misplaced Date, FS-301, AU58 NGC.** Micro S. *Cherry-pickers'* calls FS-301 a "magical misplaced date." The circa-2000 holder makes no mention of the variety, but the top of a date digit lurks within the dentils between the 8 and 7. A sun-gold representative with moderate marks on the cheekbone and the obverse field between stars 4 and 5. PCGS# 145735 Base PCGS# 8962

**1872 Liberty Double Eagle, MS60**  
**Attractive Type Two Specimen**

- 4125 1872 MS60 PCGS.** The 1872 Liberty double eagle claims a fairly small Philadelphia Mint production total of 251,850 pieces. Few examples were saved by contemporary collectors, making Mint State examples elusive in today's market. This attractive MS60 specimen is light rose to green-gold in color and imbued with deep, rich luster. An attractive example of the Type Two design. Population: 50 in 60, 67 finer (2/18).  
*Ex: FUN Signature (Heritage, 1/2007), lot 6310. NGC ID# 26AD, PCGS# 8963*

**1872-S Twenty Dollar, MS61**  
**Rare Any Finer**

- 4126 1872-S MS61 NGC.** Micro S. San Francisco double eagles struck in 1872 are more accessible than those from the Carson City and Philadelphia mints. However, limited quantities are available in this grade and just a couple of dozen coins are graded higher at NGC and PCGS combined. Typically struck devices and abraded wheat-gold surfaces display an overlay of frosted mint luster. The star centers are complete, and few serious distractions are present on the reverse. NGC reports 14 finer submissions (2/18). NGC ID# 26AF, PCGS# 8965

- 4127 1873 Open 3 MS61 PCGS Secure. CAC.** Most Type Two Liberty double eagles struck at the Philadelphia Mint in 1873 show an Open 3 in the date, and the issue is particularly popular with type collectors. This well-detailed Select specimen displays lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. NGC ID# 26AL, PCGS# 8967

- 4128 1873 Open 3 MS62 PCGS.** The 1873 Liberty double eagle with an Open 3 in the date is more available than its Closed 3 counterpart. The lustrous orange-gold surfaces of this attractive MS62 specimen show a minimal number of minor contact marks for the grade and the design elements are sharply detailed throughout. NGC ID# 26AL, PCGS# 8967

- 4129 1873 Open 3 MS62 PCGS Secure. CAC.** This Open 3 coin displays a bold strike and frosty yellow-gold mint luster with scattered light abrasions. The Open 3 variety is significantly more plentiful than its Closed 3 counterpart, particularly in Mint State. However, CAC-approved examples are rarely offered finer than the present. NGC ID# 26AL, PCGS# 8967

- 4130 1873-S Closed 3 MS60 NGC.** Small S. The Type Two twenty is conditionally scarce, since it was struck after the shipwreck hoards yet before the large-scale export of gold coin to foreign banks. This lustrous butter-gold representative displays the expected number of abrasions, although none require singular mention. NGC ID# 26AL, PCGS# 8969

**1873-S Double Eagle, AU58**  
**More Elusive Open 3 Variety**

- 4131 1873-S Open 3 AU58 NGC.** The Open 3 variety is less available than the Closed 3 variant, and Mint State examples are scarce. This near-Mint coin is an attractive, more easily accessible alternative. Enough luster remains in the fields for a Mint State designation, but a brush of friction over the high points of Liberty's portrait prevents a grade above AU58. Moderate abrasions on the obverse are typical of Type Two double eagles in this grade.  
*Ex: FUN Signature (Heritage, 1/2009), lot 5740. NGC ID# 26AM, PCGS# 8979*

**1873-S Double Eagle, Semiprooflike AU58**  
**Scarcer Open 3 Variant**

- 4132 1873-S Open 3 AU58 NGC.** Small squat S. The 1873-S Open 3 double eagle is the rarer of two variants for the year, as the Western branch mint only received corrected dies late in the year. This fully struck, nearly Uncirculated representative is on the cusp of a Mint State assessment. Lightly scattered abrasions fail to obscure overt semiprooflikeness in the fields. NGC ID# 26AM, PCGS# 8979

**1874 Double Eagle, Frosty MS61**  
**Elusive in Mint Condition**

- 4133 1874 MS61 PCGS Secure.** Philadelphia Mint officials coined 366,780 double eagles in 1874. Examples of their work scarcely survive in Uncirculated condition. Any 1874 twenty finer than this well-struck and lightly frosted MS61 representative is conditionally rare. Myriad abrasions are peppered over the obverse. The other side is comparatively clean. Pleasing orange-gold coloration. NGC ID# 26AN, PCGS# 8970

**1874 Liberty Double Eagle, MS61  
Challenging Issue in Finer Grades**

**4134 1874 MS61 PCGS Secure.** According to Mint records, 366,780 Type Two double eagles were struck at the Philadelphia Mint in 1874, a modest production total compared to the 1.2 million-piece output at the San Francisco facility that year, but about average by P-mint standards. The issue is not especially elusive in circulated grades, and lower Mint State examples, like the present coin, can only be considered scarce, but finer examples are condition rarities. This well-detailed MS61 specimen exhibits lustrous orange-gold surfaces with the usual number of minor contact marks for the grade. PCGS has graded 51 numerically finer examples (2/18). NGC ID# 26AN, PCGS# 8970

**4135 1874-CC — Cleaned — NGC Details. XF. Variety 1-A.** The sun-gold surfaces are moderately bright and show glimpses of rose-red toning in protected regions. This Carson City type coin displays scattered small marks but none are individually consequential. NGC ID# 26AP, PCGS# 8971

**1874-CC Liberty Twenty, AU Details  
Lightly Worn, Still-Lustrous Example**

**4136 1874-CC — Reverse Scratched — NGC Details. AU. Variety 2-A.** Double eagle production increased dramatically at the Carson City Mint in 1874, when a substantial mintage of 115,085 pieces was accomplished. A V-shaped scratch in the right reverse field constitutes the noted damage, but this still-attractive specimen is lightly worn and moderately abraded otherwise. The orange-gold surfaces retain much of their original mint luster. NGC ID# 26AP, PCGS# 8971

**4137 1874-S MS61 PCGS Secure.** Block S. The well-detailed design elements of this impressive Mint State specimen show a touch of softness on the reverse stars and motto, and a die crack travels through the top of the letters in TED STATES. The lustrous orange-gold surfaces exhibit grade-consistent contact marks on both sides. NGC ID# 26AR, PCGS# 8972

**4138 1874-S MS61 PCGS Secure.** Small squat S. The 1874-S Liberty double eagle claims a large mintage of 1.2 million pieces but the coins circulated widely and the issue is somewhat scarce in grades above the MS61 level. This well-detailed Mint State example exhibits lustrous orange-gold surfaces with the normal amount of chatter in the fields and some scattered, minor contact marks on the devices. NGC ID# 26AR, PCGS# 8972

**4139 1874-S MS61 PCGS Secure. CAC.** Block S. A semiprooflike peach-gold Type Two representative. The obverse displays no more than the expected number of moderate marks, and the reverse is minimally abraded. The strike shows softness on TRUST, but the obverse elements are well-impressed. CAC: 58 in 61, 13 finer (2/18). NGC ID# 26AR, PCGS# 8972

**1874-S Double Eagle, MS62  
Lustrous and Moderately Marked**

**4140 1874-S MS62 PCGS Secure.** Block S, one of three mintmark styles known for the issue. A lustrous pumpkin-gold example of the conditionally elusive Type Two design. The obverse exhibits a smattering of small abrasions, while the reverse shows only unimportant contact. The 1874-S is available in XF and AU grades, but PCGS has graded only a handful of examples above the MS62 level. NGC ID# 26AR, PCGS# 8972

**4141 1875 MS60 PCGS Secure.** A sharply struck, frosty example with original greenish-gold luster. Scattered abrasions limit the grade, including a scuff on Liberty's lower neck. Uncirculated Type Two double eagles are constantly in demand. NGC ID# 2547, PCGS# 8973

**1875-CC Double Eagle, Choice XF**

**4142 1875-CC XF45 PCGS. Variety 4-A.** At least 10 obverse dies were used for double eagle coinage in Carson City in 1875. This variety is distinguished primarily by date placement, although a small die line between the legs of the R in LIBERTY serves to confirm the attribution. Green-gold surfaces show moderate abrasions but retain hints of luster in the protected regions. NGC ID# 26AT, PCGS# 8974

**1875-CC Liberty Double Eagle, AU50  
Most Available Type Two CC-Mint Issue**

**4143 1875-CC AU50 NGC. Variety 2-B.** The right side of the second C in the mintmark aligns with the left side of the crossbar of the T in TWENTY and the date is placed right of center, identifying Variety 2-B. This lightly worn AU specimen displays pleasing yellow and rose-gold surfaces with the expected number of minor contact marks for the grade. The 1875-CC is the most available Type Two double eagle from the Carson City Mint and a favorite choice of branch mint type collectors. NGC ID# 26AT, PCGS# 8974

**1875-CC Liberty Twenty, AU50  
Popular Type Two Issue**

- 4144 1875-CC AU50 PCGS. Variety 9-A.** A substantial mintage of 111,151 Liberty double eagles was accomplished at the Carson City Mint in 1875. Although the production total was slightly smaller than those of surrounding years, the 1875-CC is still the most available Type Two twenty from the Carson City Mint today. This impressive AU specimen shows some light wear on the well-detailed design elements and the slightly abraded yellow-gold surfaces retain much of their original mint luster. NGC ID# 26AT, PCGS# 8974

- 4145 1875-S MS61 NGC. CAC.** Hints of aquamarine accompany the fields, but this lustrous and well-struck Type Two twenty dollar is primarily peach-gold. The obverse field shows the expected number of minor abrasions, while the reverse is only lightly marked. NGC ID# 26AU, PCGS# 8975

**1876-CC Double Eagle, XF45  
Attractive for the Grade**

- 4146 1876-CC XF45 PCGS. Variety 3-D.** The distinct Wide CC reverse was used for only one known die marriage in 1876. This Choice XF example is boldly detailed and displays attractive green-gold patina with some luster remaining in the protected portions of the fields. Only a few light abrasions appear on each side, setting this coin apart from many of its peers. NGC ID# 26AW, PCGS# 8977

**1876-CC Liberty Twenty, AU50  
Popular Branch Mint Type Issue**

- 4147 1876-CC AU50 PCGS. Variety 3-A.** Despite a substantial mintage of 138,441 pieces, the 1876-CC Liberty double eagle is surprisingly elusive in high grade. This impressive AU example displays only light wear on the well-detailed design elements and the pleasing orange-gold surfaces show the usual number of minor abrasions for the grade. Open spaces in the fields show some minor chatter, but traces of prooflike reflectivity are evident in sheltered areas. NGC ID# 26AW, PCGS# 8977

- 4148 1876-S MS61 PCGS Secure.** Better-defined than usual, this radiant MS61 twenty dollar gold piece features typical frosty luster and original reddish-gold color. The Type Two design drew to a close in 1876, with the San Francisco Mint striking 1.6 million double eagles that year. NGC ID# 26AX, PCGS# 8978

- 4149 1876-S MS62 PCGS.** Any Mint State Type Two twenty with minor abrasions is worth owning, and this attractive 1876-S fits the description. A few light field marks exist, as well as a few grade-defining marks on the cheek, but none are heavy or distracting. Radiant sun-gold color displays attractive orange highlights. Housed in a previous generation green label holder. NGC ID# 26AX, PCGS# 8978

**1876-S Double Eagle, MS62+  
Final Year of the Type Two Design**

- 4150 1876-S MS62+ PCGS.** From the final year of Type Two production, this 1876-S double eagle claims a mintage of nearly 1.6 million coins. Most examples are either circulated or in lower Mint State grades, while anything finer than this high-end MS62+ is scarce. Frosty mint luster over warm peach-gold surfaces delivers pleasing eye appeal unaffected by small marks and a tiny grease spot on the left wingtip. The devices are well-detailed with faint die clashing at Liberty's ear. NGC ID# 26AX, PCGS# 8978

- 4151 1877 MS60 NGC.** The 1877 marks the beginning of the Type Three double eagle design. The primary design modification was the change in the reverse denomination from TWENTY D. to TWENTY DOLLARS. Additionally, the obverse portrait of Liberty was shifted slightly left compared to the earlier types. This Mint State coin displays a bold strike and original orange-gold and peach luster. Abrasions blanket both sides. NGC ID# 2547, PCGS# 8982

- 4152 1877-S MS61 PCGS.** Lively medium-gold surfaces display rose and and lemon-gold overtones for substantial eye appeal, while abrasions are little more than pinprick-chatter that does not diminish the visual effect. This is a sharply struck Type Three example, by all appearances high-end for the assigned grade. NGC ID# 254B, PCGS# 8984

- 4153 1878 MS61 PCGS Secure.** This Uncirculated early Type Three coin is boldly struck and especially luminous, yielding vibrant straw-gold cartwheel luster. Light, scattered abrasions are mostly on the obverse but pose limited distraction for the grade. NGC ID# 26B3, PCGS# 8985

- 4154 1878 Doubled Die Obverse and Reverse, MS62 PCGS. Breen-7269 Obverse, Breen 7270 (Variety Two) Reverse.** Die doubling is visible on both sides of this lustrous, minimally marked 1878 twenty. The second 8 in the date shows repunching on the lower loop, and both inside the loop and the outside of the upper-left curve. As usual, this obverse is paired with the Variety Two reverse, with doubling on the Motto and surrounding stars, and on STATES OF AMERICA. PCGS shows just 56 numerically finer examples, all varieties combined (2/18). NGC ID# 26B3, PCGS# 8985

- 4155 1878-S MS61 PCGS Secure.** The yellow-gold surfaces of this impressive Mint State double eagle display the expected number of minor contact marks and hairlines in the fields, with much prooflike reflectivity in the sheltered areas. The design elements are sharply detailed throughout. NGC ID# 338K, PCGS# 8987

- 4156 1879-S MS60 PCGS Secure.** An especially sharp, vibrantly lustrous Mint State example, that shows bright rose-gold mint luster. Heavy abrasions on the obverse limit the grade. This piece is struck from an early die state, showing semiprooflike fields but without evidence of die lapping. NGC ID# 26B9, PCGS# 8991

**1879-S Double Eagle, MS61  
Rich Mint Frost**

- 4157 1879-S MS61 PCGS Secure.** Small S. A substantial mintage of 1.2 million coins, far and away the highest production of the year, makes the 1879-S the most accessible issue to represent the date. This vibrant example is characteristically rich in mint frost, which sweeps across lightly abraded yellow-gold surfaces. Strike definition is bold throughout. NGC ID# 26B9, PCGS# 8991

- 4158 1880 AU55 PCGS.** As the mintage of just 51,456 pieces suggests, 1880 double eagles are at least moderately scarce in all grades. Many examples have returned from foreign holdings to augment the number of coins available to collectors. This Choice straw-gold example is attractive and minimally abraded for the grade. Considerable mint luster remains throughout both sides, while a sharp strike retains much of its original definition. NGC ID# 26BA, PCGS# 8992

- 4159 1881-S MS61 PCGS Secure.** This sharp Mint State Type Three double eagle displays original orange-gold luster with light, scattered abrasions. A planchet flaw is seen in the obverse field to the right of the lowest hair curls. The surfaces are satiny but the fields have a hint of reflectivity seen at certain angles. NGC ID# 26BD, PCGS# 8995

**1882-CC Double Eagle, XF45  
Newly Discovered Obverse**

- 4160 1882-CC XF45 PCGS. Variety 2-B.** A new discovery. This previously unknown obverse features the date further left. The left foot of the 1 aligns with the left edge of the dentil and the left foot of the 2 is centered between two dentils. The issue was struck to the lowly extent of 39,140 coins, making the existence of the second obverse somewhat curious, especially in light of how many pieces we have examined in recent years. Several deep marks appear across Liberty's portrait, but the remaining orange-gold surfaces are well-preserved and minimally abraded. Strongly struck devices show limited friction. NGC ID# 26BF, PCGS# 8997

**1882-S Twenty Dollar, MS62  
Rare Any Finer**

- 4161 1882-S MS62 PCGS. Breen-7283.** Small Squat S. The 1882-S is rare in grades higher than MS62, and it is scarce at that level. This piece shows surprisingly few marks for the grade. Orange-gold surfaces radiate frosty mint luster, and the strike is nearly full. Housed in a green label holder. There are 49 higher grading events at PCGS (2/18). NGC ID# 26BG, PCGS# 8998

**1882-S Liberty Twenty, MS62+  
Elusive Issue in Higher Grades**

- 4162 1882-S MS62+ PCGS Secure. CAC.** From a substantial mintage of more than 1.1 million pieces, the 1882-S Liberty double eagle can be found in MS62 condition with a little patience, but finer examples are rare. This Plus-graded MS62 example displays sharply detailed design elements and lustrous apricot-gold surfaces with a few grade-consistent contact marks. PCGS has graded 49 numerically finer examples (2/18). NGC ID# 26BG, PCGS# 8998

- 4163 1883-S MS61 NGC.** Small Squat S. Glimpses of lime-green blend across the lustrous pale peach surfaces. Moderate contact is seen near Liberty's chin and above the eagle's head, but the surfaces are smooth overall. A bold strike contributes further to the eye appeal. Ex: *Internet Coin Auction #131240 (Heritage, 10/2012)*, lot 26637, where it realized \$1,938.75. NGC ID# 26BJ, PCGS# 9000

**1884-CC Liberty Double Eagle, AU53  
Excellent Branch Mint Type Coin**

- 4164 1884-CC AU53 PCGS. Variety 1-A.** The 1884-CC Liberty double eagle claims a mintage of 81,139 pieces, a small production total in absolute terms, but just about average in the context of the series. The strongly impressed design elements of this impressive AU53 example show just a touch of wear and the pleasing orange-gold surfaces are lightly abraded, with traces of original mint luster on both sides. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty Dollar, AU53**  
Smooth for the Grade

**4165 1884-CC AU53 NGC. Variety 1-A.** This AU53 1884-CC double eagle has everything one would hope to find in a lightly circulated twenty dollar gold piece from the Carson City Mint. That includes rich orange-gold surfaces partly aglow in remaining mint frost and well-struck devices that show minimal high-point rub. Relatively smooth for the grade. NGC ID# 26BK, PCGS# 9001

**4166 1885-S MS62 PCGS.** This orange-gold San Francisco double eagle is strongly lustrous with a touch of satin. The sharply struck devices show few marks, though the fields display a number of tiny abrasions.  
Ex: FUN Signature (Heritage, 1/2008), lot 4842. NGC ID# 26BP, PCGS# 9005

**1885-S Double Eagle, MS63**  
Seldom Available Finer

**4167 1885-S MS63 PCGS.** A few Mint State examples of this issue were discovered in the Saddle Ridge Hoard, although coins grading finer than the present Select representative remain rare. This piece displays sharp devices and original peach-gold luster with greenish border hues. A smattering of small abrasions on Liberty's cheek accounts for the grade. PCGS lists 40 finer submissions (2/18). NGC ID# 26BP, PCGS# 9005

**4168 1887-S MS61 NGC.** The 1887-S Liberty double eagle claims a relatively modest San Francisco mintage of 283,000 pieces. This impressive Mint State example displays well-detailed design elements and lustrous orange-gold surfaces that are lightly marked for the grade. NGC ID# 26BS, PCGS# 9007

**4169 1888-S MS62+ PCGS.** This Uncirculated twenty dollar gold piece delivers swirling mint frost and warm golden-orange coloration over smooth surfaces and sharply struck devices. The Plus designation reflects the minimal number of abrasions for the assigned grade. Scarce any finer. NGC ID# 26BU, PCGS# 9009

**1888-S Liberty Twenty, MS63**  
Clean, Lustrous Fields

**4170 1888-S MS63 PCGS.** Peach-gold surfaces are softly frosted and original, illuminating sharp design elements and yielding only a few scattered abrasions. The fields on both sides are remarkably clean for the grade. The 1888-S double eagle is available in MS63, but PCGS lists only 60 finer submissions (2/18). NGC ID# 26BU, PCGS# 9009

**1889 Double Eagle, MS62**  
Low Mintage

**4171 1889 MS62 PCGS Secure.** Collectors love this P-mint issue's low production of 44,070 double eagles. Thankfully, enough survive that they should be able to obtain a lower Mint State example without too much difficulty, although anything finer than this MS62 proves rare. Sharply struck motifs, vibrant mint frost, and eye-catching peach-gold color appear over minimally abraded surfaces. The reverse is lightly clashed. PCGS reports 31 finer submissions (2/18). NGC ID# 2695, PCGS# 9010

**1889-CC Liberty Double Eagle, XF45**  
Type Three Branch Mint Issue

**4172 1889-CC XF45 NGC. Variety 1-A.** After a three-year hiatus, the Carson City Mint struck a modest total of 30,945 Liberty double eagles in 1889. Fortunately, the 1889-CC enjoyed a better-than-average survival rate, and the issue is not as difficult to locate as the relatively small mintage would suggest. This lightly worn Choice XF specimen is sharply struck in the centers, but stars 6-10 show some of the typical softness on the radials. The orange-gold surfaces exhibit the expected number of minor abrasions for the grade. NGC ID# 26BV, PCGS# 9011

**4173 1889-S MS63 PCGS.** The 1889-S double eagle is usually available in MS63, but finer pieces are scarce. This Select example displays honey-gold luster and frosty surfaces. Under a loupe, a few olive and rose tinges accent the recesses. A few small abrasions on Liberty's cheek are all that limit the grade. NGC ID# 26BW, PCGS# 9012

**1890-CC Double Eagle, Choice XF  
Impressively Smooth With Partial Luster**

**4174 1890-CC XF45 PCGS. Variety 1-A.** This medium yellow-gold Carson City twenty dollar coin is a shade lighter on the reverse, while both sides maintain elements of original luster within devices recesses. The motifs are clearly well-struck but show signs of grade-consistent blending. The fields and exposed areas are impressively smooth. From a mintage of 91,209 coins. NGC ID# 26BY, PCGS# 9014

**4175 1891-S MS63 PCGS.** Medium S. E PLURIBUS UNUM is nicely die doubled, an unlisted but collectible variety. This lustrous orange-gold double eagle has a couple of russet alloy spots within the shield, but it exhibits minimal marks for the MS63 level. The strike is sharp and the eye appeal is attractive. NGC ID# 26C4, PCGS# 9018

**4176 1891-S MS63+ PCGS.** Medium S. Vibrant cartwheel sheen sweeps blended wheat-gold and lime-green surfaces. Minor grazes are scattered, but the sole mentionable mark is a line on the cheek. The 1891-S is readily available in lower Mint State grades, but becomes scarce at the MS63+ level. NGC ID# 26C4, PCGS# 9018

**4177 1893 MS63 PCGS.** The 1893 Liberty double eagle is a lower-mintage Philadelphia issue that becomes scarce in grades above the MS63 level. This well-detailed Select specimen offers vivid orange-gold surfaces with vibrant mint luster throughout. Eye appeal is outstanding. NGC ID# 26C8, PCGS# 9022

**4178 1893 MS63 PCGS.** The strike is sharp, and this frosty orange-gold double eagle is remarkably free of major abrasions. Only some light marks on the cheek limit the grade. The 1893 double eagle is available in MS63 but elusive finer. NGC ID# 26C8, PCGS# 9022

**4179 1893-S MS63 PCGS.** The Saddle Ridge Hoard added 18 examples of the 1893-S to the PCGS population reports, but the finest certified did not exceed the MS62 level. This Select Uncirculated example is a notch above those coins, with gleaming greenish-gold color and brief rose highlights. Frosted surfaces show a few light marks and luster grazes, while bold cartwheel luster illuminates a notably sharp strike. Together, PCGS and NGC have seen fewer than 100 finer examples (2/18). NGC ID# 26CA, PCGS# 9024

**4180 1893-S MS63+ PCGS Secure.** The scarcity of finer 1893-S double eagles makes this Plus-graded Select example highly appealing. The strike is sharp, and each side displays shimmering prairie-gold luster with only light, unobtrusive field marks that limit the grade. NGC ID# 26CA, PCGS# 9024

**4181 1894-S MS63 PCGS Secure.** The lightly marked peach-gold surfaces of this attractive Type Three double eagle retain much of their original mint luster intact and the design elements are sharply detailed throughout. The 1894-S claims a substantial mintage of more than 1 million pieces, but the issue is scarce in finer grades. NGC ID# 26CC, PCGS# 9026

**4182 1895 MS64 NGC.** This frosty near-Gem shows impressive design sharpness and was struck from unlapped dies. The radiant orange-gold surfaces show only minute marks, and the eye appeal is outstanding. Although plentiful in this grade, the 1895 double eagle is rare finer; NGC lists only 10 higher-grade representatives (2/18). NGC ID# 26CD, PCGS# 9027

**1897-S Twenty Dollar, MS64  
Excellent Production Quality**

**4183 1897-S MS64 NGC. CAC.** The final years of the 19th century produced some of the highest-quality Liberty Head double eagles. This fully struck near-Gem presents thickly frosted cartwheel mint luster over warm sun-gold surfaces. Abrasions are scant, and eye appeal is tremendous. NGC reports 25 finer submissions, while CAC has stickered just two better examples (2/18). NGC ID# 26CJ, PCGS# 9032

**4184 1899 MS64+ PCGS. CAC.** Rich green-gold toning encompasses lustrous and crisply struck surfaces. One small spot is centered beneath the TE in STATES, but the reverse is exceptionally devoid of marks, and the obverse shows only delicate grazes. An available issue in Mint State, but rare any finer than the present piece. NGC ID# 26CM, PCGS# 9035

**1899 Double Eagle, MS62 ★ Prooflike  
Rare With Contrast and Reflectivity**

**4185 1899 MS62 ★ Prooflike NGC.** Prooflike 1899 double eagles account for just 18 of the more than 25,000 submissions at NGC. This is the only such coin with a Star designation at any Prooflike grade level. The motifs show a full strike, and the minimally abraded fields display pronounced reflectivity. Great eye appeal for this rich orange-gold double eagle. Census: 8 in 62 Prooflike (1 in 62 ★ Prooflike), 3 finer (2/18). NGC ID# 26CM, PCGS# 79035

**4186 1899-S MS63 PCGS.** Bagmarks and copper alloy spots are often problematic for the 1899-S, but this Select Uncirculated example has none of those concerns. Vibrant sun-gold surfaces are frosted and lustrous, with only a few scattered light marks across the sharply struck brilliant surfaces. Housed in a previous generation green label holder. NGC ID# 26CN, PCGS# 9036

**1902 Double Eagle, MS62  
Lowest 20th Century Production**

**4187 1902 MS62 PCGS.** A low mintage of 31,140 coins for the 1902 double eagle — the lowest mintage for any 20th century Liberty twenty — makes this a popular issue. This is the highest grade most collectors can hope to obtain for their sets. Shallow, grade-consistent marks appear over warm yellow-gold surfaces. Lively luster, strongly struck motifs, and a few small copper alloy spots occur. Housed in a green label holder. NGC ID# 26CU, PCGS# 9041

**4188 1902-S MS63 PCGS.** The vivid orange-gold surfaces of this attractive Select double eagle show a few highlights of lilac and radiate vibrant mint luster on both sides. The design elements are sharply rendered and eye appeal is terrific. PCGS has graded 88 numerically finer examples (2/18). NGC ID# 26CV, PCGS# 9042

**4189 1902-S MS63 PCGS.** The 1902-S double eagle is plentiful in MS63 but scarce finer. This example displays sharp design elements and original, frosty mint luster in shades of peach and orange-gold. A field mark between stars 4 and 5 on the obverse and a couple of abrasions to the left of the mintmark on the reverse are the only mentionable surface flaws. NGC ID# 26CV, PCGS# 9042

**4190 1903 MS64 PCGS.** Fully struck with shimmering mint luster and deep orange-gold color. The obverse shows a few grade-limiting abrasions, but they are not excessive. The 1903 double eagle is an available date for type purposes.

*Ex: PNG Invitational Signature (Heritage, 10/2014), lot 4472. NGC ID# 26CW, PCGS# 9043*

**1903 Double Eagle, MS65  
Rare in Finer Grades**

**4191 1903 MS65 PCGS.** The 1903 double eagle is plentiful in MS65, but PCGS has seen only four numerically finer examples (2/18). This piece displays sharp definition and frosty, original orange-gold mint luster. The reverse is nearly pristine, although a few unimportant luster grazes are visible on the obverse beneath a loupe.  
**From The Glacier Park Collection.** NGC ID# 26CW, PCGS# 9043

**4192 1903-S MS63 NGC.** A sharp 1903-S double eagle with vibrant orange-gold luster and no distracting abrasions. The dies are unlapped, showing bold relief on the eagle's tailfeathers and the lower edge of the Liberty portrait, which are the usual pick-up points for excessive die polishing. NGC ID# 26CX, PCGS# 9044

**4193 1904 MS63+ PCGS.** Vibrant yellow-gold luster rolls across well-preserved surfaces on this high-end Select example. Some lightness of strike is seen on the finer details of the portrait and eagle, but the eye appeal is generally pleasing on this Liberty Head type coin. NGC ID# 26CY, PCGS# 9045

**4194 1904 MS64 NGC.** An attractive Choice specimen of this popular Type Three issue, from a large mintage of 6.2 million pieces. This coin exhibits sharply detailed design elements and well-preserved peach-gold surfaces with vibrant mint luster on both sides. Eye appeal is outstanding. Housed in a prior generation holder. NGC ID# 26CY, PCGS# 9045

**4195 1904 MS65 PCGS.** Gem 1904 double eagles are numerous between PCGS and NGC, while numerically finer coins are quite scarce. As a result, MS65 is the go-to grade for type collectors. This is an colorful and sharp example, with predominantly orange-gold color and pleasing lilac accents. Traces of prooflikeness cling to the central devices. Remarkably few marks exist on the high-luster surfaces. NGC ID# 26CY, PCGS# 9045

**4196 1904 MS65 PCGS Secure.** Shimmering straw-gold luster illuminates frosty, unabraded surfaces on this Gem Liberty double eagle. The 1904 is an available date, popular for type representation. Gem examples such as the present are also sought-after for the generally strong eye appeal that they offer. NGC ID# 26CY, PCGS# 9045

**4197 1904 MS65 PCGS Secure.** Wheat-gold and peach hues adorn softly frosted, vibrant surfaces on this Gem 1904 double eagle. A few faint slide marks on Liberty's cheek are all that prevent an even finer grade. This piece is sharp and attractive. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS65+  
Exceptional Type Coin**

**4198 1904 MS65+ NGC.** An exceptionally attractive specimen of this popular Type Three issue, from a large mintage of 6.2 million pieces. This Plus-graded Gem exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster on both sides. Overall eye appeal is terrific. NGC ID# 26CY, PCGS# 9045

**4199 1905 MS62 PCGS.** A mintage of just 58,919 pieces contributes to the scarcity of Select Mint State or finer 1905 twenties. This wheat-gold representative is on the cusp of a finer grade, with only a touch of softness at the lower hair curls and a few widely distributed, light marks. Housed in a previous generation green label holder. PCGS reports just 71 numerically finer certifications (2/18). NGC ID# 26D2, PCGS# 9047

**1905-S Double Eagle, MS64  
Conditionally Rare Any Finer**

- 4200 1905-S MS64 PCGS.** The P-mint counterpart to this San Francisco double eagle is much scarcer, making this the go-to issue among date collectors for the year 1905. Well-struck devices, gleaming mint frost, and orange-gold coloration are seen throughout. The PCGS holder is cracked over the bust tip. That service reports 12 finer submissions (2/18). NGC ID# 26D3, PCGS# 9048

**1906-D Twenty Dollar, MS63  
Inaugural Denver Issue**

- 4201 1906-D MS63 PCGS.** Shimmering yellow-gold mint luster illuminates well-struck design elements on this first-year Denver issue, one of only two D-mint coins in the Liberty double eagle series. Some light abrasions on Liberty's cheek and in the adjacent field limit the grade but none are individually significant. A pleasing mintmarked type coin. NGC ID# 26D5, PCGS# 9050

- 4202 1906-S MS62 PCGS.** An available late-series San Francisco issue, suitable for type purposes or for date representation, as this issue is more plentiful than its Philadelphia and Denver counterparts. More than 2 million examples of this issue were struck. NGC ID# 26F6, PCGS# 9051

- 4203 1906-S MS63 PCGS.** The 1906-S is usually lustrous and attractive, and this Select Uncirculated example is no exception. Smoothly frosted surfaces generate bright cartwheel luster. Marks are limited to a few light field ticks and a small abrasion near Liberty's mouth. Sharp hair detail, stars, and crisp definition on the reverse motifs suggest an even finer grade. The 1905-S is the recognized scarcity among late-series Liberty Head double eagles, but the 1906-S is even scarcer in high grades. NGC ID# 26F6, PCGS# 9051

- 4204 1906-S MS63 PCGS.** This Select example shows light field marks on each side with orange-golden coloration and well-struck devices. Considerable reflectivity appears in the fields, indicative of an early die state as no evidence of lapping is visible.  
*Ex: Long Beach Signature (Heritage, 2/2002), lot 7094.* NGC ID# 26F6, PCGS# 9051

- 4205 1907 MS64+ PCGS.** Radiant straw-gold luster illuminates the frosty surfaces of this sharp final-year Liberty double eagle. A few light marks prevent a Gem classification, but the eye appeal is outstanding. An early die state with no lapping or cracks visible on either side. PCGS lists 22 finer representatives (2/18). NGC ID# 26D7, PCGS# 9052

**1907-D Liberty Double Eagle, MS64  
Transitional Year**

- 4206 1907-D MS64 NGC.** The year 1907 was a transitional one, with the Mint replacing the staid Liberty design with the new revolutionary Saint-Gaudens coin in the autumn months. This 1907-D double eagle offers a crisp impression and luminous yellow-gold color. Satiny mint luster shines from well-preserved surfaces. A great early Denver Mint representative. NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS64  
Final Year of Liberty Head Production**

- 4207 1907-D MS64 NGC.** Demand for the 1907-D double eagle never seems to wane. After all, this is the second of only two Denver issues in the series and the final year of production for the Liberty Head twenty dollar gold piece. On the obverse, the stars are fully brought-up and the hair strands crisply detailed. The reverse stars and feathers are similarly strong. Medium yellow-gold surfaces showcase eye-appealing satin mint luster and a single tick on the chin. NGC ID# 26D8, PCGS# 9053

- 4208 1907-S MS63 PCGS.** With a mintage of more than 2.1 million pieces, the 1907-S Liberty double eagle is an available issue and a popular choice with branch mint type collectors. This sharply detailed Select specimen offers lustrous orange-gold surfaces with only minor signs of contact. NGC ID# 26D9, PCGS# 9054

- 4209 1907-S MS63 PCGS.** An attractive Select double eagle from the final year of the Liberty design, this coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 26D9, PCGS# 9054

**SAINT-GAUDENS DOUBLE EAGLES**

- 4210 1907 Arabic Numerals MS63 PCGS.** This is an attractive piece with original satin luster and orange-gold color. Hints of green-gold and rose appear around the margins. As the grade suggests, scattered abrasions are present, but none are individually bothersome. NGC ID# 26F5, PCGS# 9141

- 4211 1908 No Motto MS64 NGC.** Long Rays Obverse. A high-end near-Gem with dynamic luster and refreshingly few marks. The strike is crisp except on Liberty's nose and the eagle's leg plumage. A briefly coined subtype. Housed in a circa-2000 holder. NGC ID# 26F6, PCGS# 9142

- 4212 1908 No Motto MS66 PCGS.** The strike is a little soft on the top of the torch and the Capitol but strong on Liberty's fingers. This frosty orange-gold Premium Gem shows only a few unobtrusive abrasions under a loupe and is highly appealing to the unaided eye. An outstanding No Motto type coin. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Double Eagle, MS66+  
Spectacular Quality**

- 4213 1908 No Motto MS66+ PCGS Secure.** Short Rays Obverse. This spectacular, nearly unmarked Premium Gem with coruscating mint luster likely derives from the famous Wells Fargo Hoard, though there is no mention on the holder. Strike detail is pinpoint-sharp, showing only a trace of softness around the obverse border. The Capitol and torch fingers are fully formed. Varying shades of rose and honey-gold color adorn each side. NGC ID# 26F6, PCGS# 9142
- 4214 1908-D No Motto MS64 PCGS.** Short Rays Obverse. Beautiful orange-gold toning ensures the eye appeal of this lustrous and well-struck double eagle. Uncommonly smooth except for unobtrusive contact on the rays beneath the eagle's breast. The sole Denver No Motto issue, and scarcer than its Philadelphia counterpart. NGC ID# 26F7, PCGS# 9143
- 4215 1908-D No Motto MS64+ PCGS.** Short Rays Obverse. Smooth surfaces, dynamic luster, a good strike, and light peach-gold patina confirm the quality of this early Denver Mint near-Gem. The optimal grade for the issue, since full Gems trade for about three times the cost of an MS64. NGC ID# 26F7, PCGS# 9143
- 4216 1908 Motto MS63 PCGS.** Long Rays Obverse, showing the sun rays in the right obverse field nearly touching the tip of the olive branch stem. This Select example is well-struck and satiny with original orange-gold luster. Light abrasions do not detract. NGC ID# BNAK, PCGS# 9147
- 4217 1909 MS62 NGC.** Vibrant honey-gold luster illuminates satiny surfaces on this Mint State 1909 double eagle. The strike is bold, and grade-limiting abrasions are light and uniformly scattered across each side. The 1909 is a slightly better date in Uncirculated condition, coming from a moderately low mintage of little more than 161,000 pieces. NGC ID# 26FC, PCGS# 9150
- 4218 1909-S MS63 NGC.** Well-struck and lustrous, this Select 1909-S double eagle displays original straw-gold color with scattered light abrasions that define the grade. An available San Francisco issue, although often overlooked as a type coin. NGC ID# 26FE, PCGS# 9153
- 4219 1909-S MS64 NGC.** This issue is available in MS64, but the population begins to thin just one grade point finer. The present example is well-struck and softly frosted, showing original prairie-gold luster with only light, scattered abrasions. NGC ID# 26FE, PCGS# 9153
- 4220 1909-S/S FS-501 MS62 PCGS.** *Cherry-pickers'* refers to FS-501 as "a very interesting RPM." The mintmark is repunched southeast. The variety is undesignated on the holder. This dusky caramel-gold double eagle exhibits vibrant luster and a bold strike. Distributed small marks are fewer than anticipated for the grade. NGC ID# 26FE, PCGS# 145741 Base PCGS# 9153

- 4221 1910 MS64 NGC.** Available in this grade and scarce finer. This Choice 1910 double eagle displays sharp design elements and vibrant greenish-gold luster with a few light, scattered abrasions. Eye appeal is pleasing for the grade. NGC ID# 26FF, PCGS# 9154

- 4222 1910-D MS65 NGC.** Original, softly frosted surfaces yield warm rose-gold luster on this Gem 1910-D Saint-Gaudens double eagle. Only a few wispy marks are seen on each side. This issue is available in the current grade but elusive finer. NGC ID# 26FG, PCGS# 9155

- 4223 1910-D MS65 NGC.** Frosty and well-struck, this rose-gold Gem 1910-D Saint-Gaudens double eagle displays a vibrant cartwheel effect and has only a few small abrasions. A mark on the eagle's neck is the only individually significant imperfection. NGC lists 47 finer submissions (2/18). NGC ID# 26FG, PCGS# 9155

- 4224 1910-S MS64 NGC.** Radiantly lustrous, this Choice 1910-S double eagle displays lovely rose-gold luster with occasional hints of greenish color. A few light abrasions do not overly detract. Higher-grade coins are scarce. NGC ID# 26FH, PCGS# 9156

- 4225 1910-S MS64+ NGC.** Sharp and frosty, this olive-gold near-Gem displays warmer rose and peach hues in the fields. Grade-limiting abrasions are light and disappear from view at certain angles. The 1910-S is available in this grade but is scarce finer. NGC ID# 26FH, PCGS# 9156

**1910-S Double Eagle, MS65  
Rarely Offered Finer**

- 4226 1910-S MS65 PCGS.** Frosty prairie-gold luster illuminates well-struck devices and excellent surface preservation on this Gem 1910-S double eagle. Surprisingly, Liberty's figure is free of notable high-point contact marks, although a few faint field grazes limit the grade. The 1910-S is available in this grade but PCGS and NGC each list only 10 finer representatives (2/18). NGC ID# 26FH, PCGS# 9156

- 4227 1911 MS62 PCGS.** A Mint State example of this popular Philadelphia issue that show bright greenish-gold luster and well-struck devices. There are moderate abrasions on each side, although they are light and scattered, producing little distraction. NGC ID# 26FK, PCGS# 9157

**1911 Double Eagle, MS64  
Original Mint Luster**

- 4228 1911 MS64 PCGS.** Original satin luster gives this near-Gem a wheat-gold appearance without distracting abrasions. The devices are well-detailed, and eye appeal is pleasing. The 1911 Saint-Gaudens double eagle is a better date in high grade, scarce in Gem condition and rare finer. This Choice example is a more collectible alternative. NGC ID# 26FK, PCGS# 9157

**4229 1911-D MS63 NGC.** Gold production in Denver was focused on double eagles in 1911, with 846,500 pieces struck. This Select example is well-defined and satiny with straw-gold and orange mint luster. A few light abrasions do not overly detract. NGC ID# 26FK, PCGS# 9158

**4230 1911-S MS64 NGC.** Well-struck motifs rise above lustrous and lightly marked honey-gold surfaces. This Saint-Gaudens type issue provides optimal value in the MS64 grade, since full Gems typically cost twice as much. Certified in a prior generation holder.  
*Ex: Internet Coin Auction #131225 (Heritage, 6/2012), lot 27143, which realized \$1,955. NGC ID# 26FL, PCGS# 9159*

**4231 1912 AU58 NGC.** This well-struck 1912 double eagle is bright yellow-gold with small splashes of coppery-red color on each side. Heavy abrasions overall are typical of double eagles in the AU grade range. Only 149,750 coins were struck at Philadelphia in 1912, and none at the branch mints. NGC ID# 26FM, PCGS# 9160

**4232 1913 MS63 PCGS.** Frosty original luster includes shades of tangerine-orange, lilac, and green-gold. A few scattered abrasions determine the grade. A small dark spot on the O in OF is the only distraction on an otherwise appealing and well-struck 1913 double eagle. NGC ID# 26FN, PCGS# 9161

**4233 1913-D MS63 PCGS.** This boldly struck Select example displays incredibly vibrant mint luster that distracts the viewer from a few scattered abrasions that determine the grade. The color is bright yellow-gold save for glimpses of deeper peach-orange at the rims and on the high points of the devices. NGC ID# 26FP, PCGS# 9162

**4234 1914 MS62 NGC.** Warm rose-gold hues emerge in the fields amid otherwise greenish-gold surfaces on this Mint State 1914 double eagle. The strike is bold. Scattered abrasions define the grade. The 1914 is a slightly better date with a mintage of only 95,250 coins. NGC ID# 26FS, PCGS# 9164

#### 1914 Saint-Gaudens Double Eagle, MS64 Elusive Issue in Finer Grades

**4235 1914 MS64 PCGS Secure.** The 1914 Saint-Gaudens double eagle boasts a small mintage of 95,250 pieces. The issue can be located in MS64 condition with a little patience, but finer examples are seldom encountered. This attractive Choice specimen offers well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. PCGS has graded 44 numerically finer examples (2/18). NGC ID# 26FS, PCGS# 9164

#### 1914 Saint-Gaudens Double Eagle, MS64 Low-Mintage Philadelphia Mint Issue

**4236 1914 MS64 PCGS Secure. CAC.** A modest mintage of 95,250 Saint-Gaudens double eagles was accomplished at the Philadelphia Mint in 1914, making the issue quite challenging in high grade today. This attractive Choice example offers sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 44 numerically finer examples (2/18). NGC ID# 26FS, PCGS# 9164

**4237 1914-D MS64 PCGS.** This Choice 1914-D Saint-Gaudens double eagle is boldly struck and satiny with lovely orange-gold color. Light, scattered grazes limit the grade but pose little distraction. This is an attractive example of the issue. NGC ID# 26FT, PCGS# 9165

**4238 1914-D MS65 PCGS.** This 1914-D double eagle is boldly struck, with carefully preserved mattelike surfaces. The satiny luster is bright and attractive, illuminating greenish-gold patina. There are just a handful of small, unobtrusive contact marks on each side. Higher-grade coins are scarce.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 5279. NGC ID# 26FT, PCGS# 9165*

**4239 1914-S MS65 PCGS.** This luminous Gem displays a bold strike and rich tangerine-gold mint luster. Only a few light marks are seen under a loupe. The 1914-S is available in this grade, but finer pieces are elusive and costly for many collectors to acquire. NGC ID# 82KA, PCGS# 9166

**4240 1915 MS61 NGC.** Scattered light abrasions and slight marks limit the grade on this piece, although no severe abrasions are present. Satiny straw-gold luster illuminates well-struck design elements, offering good eye appeal for the grade. NGC ID# 26FV, PCGS# 9167

#### 1915 Twenty Dollar, MS64 Clean and Well-Struck

**4241 1915 MS64 PCGS.** Given the conditional rarity of the 1915 in Gem condition, this near-Gem offering presents a more affordable opportunity to acquire a well-preserved example. The torch bands, stars, and Capitol columns are fully defined on this lustrous yellow-gold double eagle. The sole mentionable tick occurs in the field below the O in DOLLAR. NGC ID# 26FV, PCGS# 9167

**4242 1915-S MS64 PCGS. CAC.** Vibrant, frosty orange-gold luster rolls across well-preserved surfaces on this CAC-approved near-Gem. The devices show bold definition, and only a few light abrasions are present. CAC-approved coins are in a distinct minority among high-grade 1915-S double eagles. NGC ID# 26FW, PCGS# 9168

**4243 1915-S MS65 NGC.** As expected for a Gem, this 1915-S double eagle displays radiant cartwheel luster with no significant abrasions. The devices show bold definition, and the rich honey-gold color complements the luster. Finer 1915-S twenties are slightly elusive. NGC ID# 26FW, PCGS# 9168

**4244 1916-S MS64 NGC.** In 1916, the San Francisco Mint was the sole producer of gold coinage. The 1916-S double eagle is an available and popular issue. Softly frosted wheat-gold luster warms this near-Gem example, complementing well-rendered design elements. NGC ID# 34NJ, PCGS# 9169

---

**1916-S Saint-Gaudens Twenty, MS65  
Vivid Color, Vibrant Mint Luster**

**4245 1916-S MS65 NGC.** From a mintage of 796,000 pieces, the 1916-S Saint-Gaudens double eagle was an elusive issue until a large hoard of Mint State examples surfaced in Central America in 1983. This attractive Gem exhibits well-detailed design elements and vibrant mint luster throughout. Some minor chatter in the obverse fields prevents a finer grade. NGC ID# 34NJ, PCGS# 9169

**4246 1920 MS63 PCGS.** Frosty mint luster on this piece is bright yellow-gold in the centers and deepens to peach and apricot hues at the borders. The coin is well-struck with a few high-point abrasions that limit the grade. NGC ID# 26FY, PCGS# 9170

**4247 1922 MS64 NGC.** This Choice example is boldly defined and luminous, showing frosty orange-gold surfaces that have only a few light abrasions. The Philadelphia coins are by far the more available of the two 1922 double eagle issues, ideal for date collectors. NGC ID# 26G3, PCGS# 9173

**4248 1922-S AU58+ PCGS. CAC.** This Plus-graded near-Mint coin, with a CAC green label, is as near to Uncirculated as possible without achieving at least an MS61 or MS62 grade. Light surface chatter on each side and well-struck design elements give this lustrous, orange-gold coin the eye appeal and general appearance of a low-end Uncirculated piece. However, the faintest trace of high-point friction prevents such a designation from PCGS. NGC ID# 26G4, PCGS# 9174

**4249 1922-S — Cleaned — PCGS Genuine. Unc Details.** The mintage for the 1922-S was almost twice its Philadelphia cousin, but the latter was saved in bag quantity, while most of the '22-S production never left Treasury vaults, and was melted after the 1933 gold recall. The present piece was among the few thousand that escaped the furnaces. It is a lustrous and typically struck caramel-gold example with few marks and no obvious hairlines.

---

**1922-S Double Eagle, MS63+  
Affordable Mintmarked Issue From the 1920s**

**4250 1922-S MS63+ PCGS. CAC.** The Saint-Gaudens double eagles from 1922 through 1928 are all plentiful if they were struck in Philadelphia, and rare if they were struck in Denver or San Francisco. The only exception to that rule is the scarce 1922-S and the 1923-D. This is a lovely Select Mint State representative with frosty yellow-gold luster and considerable eye appeal. The reverse is rotated a few degrees clockwise. NGC ID# 26G4, PCGS# 9174

**4251 1923 MS62 PCGS.** A plentiful date, suitable for type purposes. This Mint State 1923 double eagle offers bold design elements and frosty orange-gold mint luster. Scattered light abrasions account for the grade, but none are singularly obtrusive. NGC ID# 26G5, PCGS# 9175

**4252 1923 MS64+ NGC.** Thousands of 1923 double eagles were shipped overseas, only to be repatriated decades later. This MS64+ bridges the gap between the issue's availability in MS64 and its conditional scarcity in MS65. Glowing mint frost over warm orange-gold surfaces and sharp strike detail define this high-end twenty. NGC ID# 26G5, PCGS# 9175

**4253 1923-D MS65+ PCGS Secure.** A Plus-graded Gem example of one of the favorite type coin issues in the Saint-Gaudens double eagle series. This frosty 1923-D displays bold design elements and original peach-gold luster with greenish-gold hues near the borders. A highly appealing example of the type. NGC ID# 26G6, PCGS# 9176

**4254 1923-D MS66 PCGS.** Known for outstanding luster and eye appeal, the 1923-D Saint-Gaudens double eagle is a popular type coin. This Premium Gem displays bold design elements and frosty orange-gold luster with no distracting abrasions. Finer examples of this date are conditionally scarce. NGC ID# 26G6, PCGS# 9176

---

**1923-D Saint-Gaudens Double Eagle, MS66  
Popular Branch Mint Type Issue**

**4255 1923-D MS66 NGC.** The 1923-D Saint-Gaudens double eagle is an available issue in grades up to the MS66 level, making it one of the most popular type issues in the series. The 1923-D becomes elusive in higher grades, however. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved yellow-gold surfaces, with vibrant mint luster on both sides. NGC has graded 51 numerically finer examples (2/18). NGC ID# 26G6, PCGS# 9176

**4256 1924 MS64 NGC. CAC.** This frosty rose-gold and peach coin displays well-struck devices and minimal abrasions for the grade. Along with the CAC endorsement, it is a highly appealing example of the date and grade, suitable for type representation. NGC ID# 26G7, PCGS# 9177

**4257 1924 MS66 PCGS.** The 1924 is the single most plentiful and popular type coin in the Saint-Gaudens double eagle series. The Premium Gem offered here is frosty and well-preserved, showing original wheat-gold luster and well-struck design elements. NGC ID# 26G7, PCGS# 9177

**4258 1924 MS66 NGC.** The 1924 is one of the few Saint-Gaudens double eagles that can be acquired in MS66 without breaking the bank. This Premium Gem is sharp and frosty, showing well-preserved orange-gold mint luster that lightens toward the centers. NGC ID# 26G7, PCGS# 9177

**4259 1925 MS64 PCGS.** This vibrantly lustrous, frosty Choice example displays bold design elements and glowing orange-gold surfaces. Abrasions are surprisingly few for the grade, making this among the most appealing 1925 double eagles that we have seen below MS65. NGC ID# 26GA, PCGS# 9180

**4260 1925 MS65 NGC.** The strike is sharp over each side and marks or abrasions are exceptionally few and far between on this well-produced Gem twenty. Frosted mint luster glows from the frosted and smooth wheat-gold surfaces for tremendous eye appeal. NGC ID# 26GA, PCGS# 9180

**4261 1926 MS64 PCGS.** A sharp, luminous example of this available Philadelphia issue that shows minimal abrasions and strong eye appeal. Deep orange-gold coloration adorns much of each side, but the centers are brighter yellow-gold. NGC ID# 26GD, PCGS# 9183

**4262 1927 MS65 PCGS.** This frosty Gem showcases tremendous eye appeal and is ideal for type representation. A few faint grazes are hardly noticed. Sharp design elements complement shades of peach and yellow-gold over each side. NGC ID# 26GG, PCGS# 9186

**4263 1927 MS66 PCGS.** The 1927 double eagle is plentiful in this grade, but PCGS lists only 24 finer representatives (2/18). The coin offered here is well-struck and satiny with original orange-gold mint luster. A few unobtrusive grazes are limited to the eagle's feathers and the high points of Liberty's figure. NGC ID# 26GG, PCGS# 9186

**4264 1927 MS66+ NGC.** A Plus-graded Premium Gem specimen of this popular type issue, with sharply detailed design elements and well-preserved orange-gold surfaces that feature radiant mint luster on both sides. NGC has graded 59 numerically finer examples (2/18). NGC ID# 26GG, PCGS# 9186

**4265 1928 MS64 NGC.** The last of the common dates in the Saint-Gaudens double eagle series, the 1928 is popular as a type coin. This Choice example is frosty and appealing, showcasing orange-gold luster that has only minimal signs of surface contact. NGC ID# 34VK, PCGS# 9189

**4266 1928 MS66 NGC.** The 1928 is the last available date in the Saint-Gaudens double eagle series, popular in Gem and finer grades as a type coin. This Premium Gem displays frosty yellow-gold mint luster and sharp devices. The fields are mostly clean, with only a few light high-point contact marks on the devices that prevent an even finer grade from NGC. NGC ID# 34VK, PCGS# 9189

### 1928 Saint-Gaudens Twenty, MS66+ Impressive Quality

**4267 1928 MS66+ PCGS.** The availability of the 1928 is a reflection of its substantial mintage and widespread export and subsequent repatriation. Glowing, unmarked surfaces radiate coruscating luster on this marvelous, high-end Premium Gem. Razor-sharp strike characteristics and blended hues of orange and peach-gold adorn each side. NGC ID# 34VK, PCGS# 9189

## TERRITORIAL GOLD

**4268 1853 Assay Office Twenty Dollar, 900 Thous. — Tooled, Re-Engraved, Cleaned — ANACS. VF30 Details. K-18, R.2.** This late-era Assay Office piece appears to be sharper than the designated grade, but the obverse field is smoothed and tooled, as is the reverse periphery. A collectible representative of the interim facility, soon to be replaced by the first San Francisco Mint. Listed on page 399 of the 2018 *Guide Book*.

## CALIFORNIA FRACTIONAL GOLD

**4269 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS67 Prooflike NGC.** Breen-Gillio Die State II, the "drastically repolished obverse" considered "scarcer than State I." The field beneath the hairbun has a rippled appearance caused by gas bubbles beneath the gold plate, as made. A flashy and pristine canary-gold Superb Gem. Tied with one other as finest certified. Census: 2 in 67 Prooflike, 0 finer (2/18). NGC ID# 2BGP, PCGS# 710374

### 1853 Octagonal Liberty Half Dollar, MS62 BG-302, 'Peacock' Reverse

**4270 1853 Octagonal Liberty, "Peacock" Reverse, 50 Cents, BG-302, Low R.4, MS62 PCGS.** Breen-Gillio Die State IV with an obverse cud at 3:30. A lovely and problem-free orange-gold example. BG-302 is more artistically executed than most California small denomination gold varieties. The Liberty Head is comely instead of crude, and the bird on the reverse is graceful. The glory of rays on the upper reverse explain the Peacock nickname, despite the presence of a tail beneath the arrow. Among the best-known types of the series. NGC ID# 2BJ7, PCGS# 10422

**1859 Liberty Round Quarter, MS67 Prooflike  
BG-801, Finest Certified Example**

- 4271** 1859 Liberty Round 25 Cents, BG-801, R.3, MS67 Prooflike NGC. The 1859 Liberty Round BG-801 quarter was struck by Frontier, Deviercy & Co. and consisted of a baser gold core with a higher-fineness gold plating. The issue is seldom seen with this degree of prooflike reflectivity. The design elements are well-detailed and the well-preserved yellow-gold surfaces show a few microscopic flecks in the gold plating when closely inspected with a loupe. Census: 1 in 67 Prooflike, 0 finer (2/18). PCGS# 710662

- 4272** 1871 Liberty Round 25 Cents, BG-862, High R.6, MS64 PCGS. Prooflike fields surround sharply struck devices of this scarce Liberty Round quarter. Federal seizures in August, 1871 assured the rarity of all surviving 1871 H issues, with the H above date. Struck by the large St. Louis and San Francisco jewelry firm Hershfield & Mitchell, the H pieces were quickly suppressed by federal authorities — although the issuers (at great expense) were never brought to trial. Population: 4 in 64, 2 finer (2/18). NGC ID# 2BUT, PCGS# 10723

- 4273** 1875 Indian Round 50 Cents, BG-1056, High R.4, MS65 Deep Prooflike NGC. A gorgeous honey-gold Gem that boasts glassy fields and frosty devices. Evenly struck throughout. Slightly wavy, as removed from the dies. Struck from widely rotated dies. Census: 3 in 65 Prooflike, 0 finer (2/18). PCGS# 910885

**1860 Liberty Dollar, Reflective MS65  
BG-1102, Octagonal**

- 4274** 1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS65 NGC. Die State II with a bisecting obverse crack. The surfaces are reflective and of exemplary quality for this Liberty octagonal dollar. Pale yellow-gold color covers each side with fleeting orange highlights, while the strike is remarkably sharp for this Frontier, Deviercy & Co. issue. Tied for finest at NGC, while PCGS reports just two finer examples. NGC Census: 4 in 65, 0 finer (2/18). NGC ID# 2C2Z, PCGS# 10913

**COMMEMORATIVE SILVER**

- 4275** 1893 Isabella Quarter MS65 PCGS. CAC. Gem or finer Isabella quarters almost always display attractive toning and impressive eye appeal. This coin is no exception, with exceptional iridescent toning that imbues both sides with shades of aquamarine, pale-rose, and pearlescent lilac. The strike is surprisingly sharp for the dies, which show numerous peripheral cracks on the reverse. CAC endorsed for its quality at the assigned grade. NGC ID# BYJ9, PCGS# 9220

**1893 Isabella Quarter, MS66  
Attractively Toned With Bright Luster**

- 4276** 1893 Isabella Quarter MS66 PCGS. CAC. A gorgeously toned Premium Gem that displays shades of sea-green patina over each side. This is accented with subtle reddish-golden hues. The mint luster is particularly strong, and fully evident beneath the toning. Well struck, as usually seen on this issue. The obverse is particular is well-preserved and nearly flawless. Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 8033. NGC ID# BYJ9, PCGS# 9220

**1900 Lafayette Dollar, MS65  
Satiny and Nearly Brilliant**

- 4277** 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. Traces of light golden toning appear throughout each side of this Gem Lafayette dollar, complementing satiny luster and sharp devices. Well-preserved overall, this piece shows only a few light abrasions on Washington's cheek and in the field beneath the horse. In MS65, the Lafayette dollar is usually obtainable for a price, but higher-grade coins are elusive. From *The Glacier Park Collection*. NGC ID# BYKW, PCGS# 9222

- 4278** 1921 Alabama MS65+ PCGS. CAC. This satiny, high-end Gem displays golden interiors surrounded by lavender, amber, and aquamarine border toning. A trace of strike weakness is minor and normal for the issue, while a lack of abrasions and intense mint luster heightens the eye appeal. NGC ID# BYF2, PCGS# 9224

- 4279** 1921 Alabama 2x2 MS65 PCGS. CAC. Full design detail complements brilliant-silver surfaces with hints of pale gold on the obverse, while nearly unmarked, satin-smooth surfaces throughout both sides hallmark this Gem Alabama 2x2 commemorative. The strike is far sharper than usual, with full feathering on the eagle's forward leg. Only a few tiny ticks exist on Governor Kilby's cheek. Ex: *Central States Signature* (Heritage, 5/2004), lot 10688. From *The Glacier Park Collection*. NGC ID# BYEZ, PCGS# 9225

**1935-S Arkansas Half Dollar, MS67+  
Tied for Finest Certified, CAC Endorsed**

**4280 1935-S Arkansas MS67+ PCGS. CAC.** Abrasions are always problematic for Arkansas Centennial halves, yet this high-end Superb Gem very nearly avoids marks altogether. Pearlescent silver centers sit within a frame of lightly iridescent colors, with lemon-yellow and amber-orange toning the most prevalent shades. Only a handful of MS67+ pieces exist at PCGS, with none finer at either service (2/18). NGC ID# BYF7, PCGS# 9235

**4281 1937-S Boone MS66 PCGS. Gold CAC.** Housed in a green label holder with ice-blue, champagne, and lavender toning, this high-end 1937-S Boone half dollar is beautifully preserved and satiny. Undergraded in the opinion of CAC, this is the only 1937-S Boone half to receive a Gold CAC sticker. The strike is sharp, and eye appeal is outstanding. Only 52 numerically finer coins are reported at PCGS (2/18). NGC ID# BYG5, PCGS# 9272

**4282 1937-S Boone MS67 PCGS.** The Daniel Boone Bicentennial half dollar was struck from 1934 through 1938. Most issues are elusive in Superb Gem condition, including the 1937-S, offered here. This satiny, untuned example displays a sharp strike and exemplary preservation. Only a few finer pieces are known. Population: 49 in 67 (5 in 67+), 3 finer (2/18).  
*From The Glacier Park Collection.* NGC ID# BYG5, PCGS# 9272

**4283 1938-S Boone MS67 PCGS Secure. CAC.** This CAC-approved Superb Gem is seemingly pristine, showing satiny luster cast in delicate champagne and iridescent hues. The strike is sharp throughout. The 1938-S is scarce in this grade and a major condition rarity finer. Population: 48 in 67 (3 in 67+), 3 finer. CAC: 17 in 67, 0 finer (1/18). NGC ID# BYG8, PCGS# 9276

**4284 1938 Boone PDS Set MS66 PCGS.** A mere 2,100 sets were issued. Separately housed in holders bearing consecutive certification numbers. The set includes: **1938 MS66**, immaculate aside from minor obverse rim contact; **1938-D MS66**, brilliant except for a small spot west of the date; and a **1938-S MS66**, lightly toned and lustrous with the intricate strike customary for the type.  
*From The Property of a Lady, Part II.* (Total: 3 coins) NGC ID# BYG6, PCGS# 9277

**4285 1936-S Cincinnati MS66 PCGS. CAC.** "America's Troubadour" — Stephen Foster — became Cincinnati's own for this commemorative half. Most of the 5,006 pieces distributed were sold to investors and collectors, yet few pieces have achieved the Premium Gem grade. Silver luster shines through well-struck pearlescent-gray surfaces, with faint iridescence and russet accents at the borders. Population: 75 in 66 (6 in 66+), 5 finer. CAC: 12 in 66, 2 finer (2/18). NGC ID# BYCL, PCGS# 9285

**4286 1936 Cincinnati PDS Set MS65 to MS66 PCGS.** One of the lowest mintage silver commemorative types, equally divided into PDS issues. Separately housed in holders from the same grading submission. The set includes: **1936 MS66**, lightly toned and lustrous with exemplary surfaces; **1936-D MS66**, delicate olive-gold toning; and a **1936-S MS65**, glimpses of pale peach and butter-gold patina.  
*From The Property of a Lady, Part II.* (Total: 3 coins) NGC ID# BYCJ, PCGS# 9286

**4287 1893 Columbian MS65+ Prooflike NGC.** An early strike, this high-end Gem displays a sharp impression and fully prooflike fields. A faint trace of light golden toning warms otherwise brilliant surfaces, and no distracting abrasions are present. NGC has graded a number of 1893 Columbian half dollars as Prooflike, but few are this fine. Census: 27 in 65 (1 in 65+) Prooflike, 3 finer (1/18). NGC ID# BYGG, PCGS# 89297

**4288 1936 Gettysburg MS67 PCGS.** Intermittent almond-gold and tan-brown toning dapples the lilac-silver surfaces of this 1936 Gettysburg Anniversary half. The soldiers' cheekbones and the top of the Union shield are particularly well-defined. Soft luster glows beneath attractive, light toning, while carefully preserved fields and devices show only two or three tiny marks of any kind — none of which detract from the Superb Gem surface quality. PCGS reports just three finer pieces (2/18).  
*From The Glacier Park Collection.* NGC ID# BYGM, PCGS# 9305

**1936 Gettysburg Half Dollar, MS67+  
Light Champagne-Gold Patina**

**4289 1936 Gettysburg MS67+ NGC.** A light champagne-gold cast covers the whole of this softly lustrous Plus-graded Superb Gem Gettysburg half dollar. The Union and Confederate soldiers, as well as their respective shields, are boldly rendered. No marks are seen. The net distribution for this historically significant issue was 26,928 pieces. Census: 67 in 67 (4 in 67+, 6 in 67★, 1 in 67+★), 3 finer (2/18). NGC ID# BYGM, PCGS# 9305

**1922 Grant Half Dollar, MS67  
No Star, Attractive Patina**

**4290 1922 Grant No Star Half Dollar — Minor Planchet Flaw at 8:00 — MS67 PCGS.** A small rim flaw is apparent near the N in IN and the H in HALF. This unimportant mint-made feature has no effect on the eye appeal or the technical grade of this outstanding Superb Gem. Pastel olive-gold, chestnut-tan, slate-gray, and plum patina graces unmarked fields and strong devices. Population: 67 in 67 (4 in 67+), 0 finer (2/18).

**4291 1922 Grant With Star MS64 PCGS.** This is a lustrous near-Gem survivor from a net With Star mintage of just 4,256 pieces. As always, the top of Grant's hair shows slight weakness, yet the strike is sharp in other areas. The cabin and tree foliage are especially well-defined. Bits of reddish-brown toning accent the Choice satin-silver surfaces, which have a few minuscule marks but no real distractions. NGC ID# BYPP, PCGS# 9307

**1922 With Star Grant Half Dollar**  
**Satiny Gem**

- 4292 1922 Grant With Star MS65 PCGS.** This satiny Gem displays faint hints of champagne and lilac across otherwise brilliant surfaces, with no distracting abrasions visible. Moderate strike weakness on Grant's hair and the central cabin is present on many With Star examples of this popular commemorative. The With Star Grant Memorial half dollar is the scarcer of the two types, with PCGS having certified only 52 pieces finer than the present (2/18). *From The Glacier Park Collection.* NGC ID# BYPP, PCGS# 9307

**1928 Hawaiian Half Dollar, MS65**  
**Sesquicentennial of Discovery**

- 4293 1928 Hawaiian MS65 NGC.** The obverse of this classic commemorative portrays Captain James Cook, "Discoverer of Hawaii." Cook landed on the Hawaiian Islands in 1778, and the Hawaiian Sesquicentennial half dollar celebrates the 150th anniversary of that event. Only 10,008 pieces were struck (including assay coins and proofs), and this issue is considered a key issue in the classic commemorative series. This Gem is sharp and satiny with original greenish-gold toning. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65**  
**Key to the Series**

- 4294 1928 Hawaiian MS65 PCGS.** Blushes of yellow-gold patina adorn bright surfaces with satin mint luster. The figures of Captain Cook and the indigenous chieftain exhibit crisp strike detail, and the overall preservation is well above-average for this key issue. A small total of 10,008 commemorative half dollars were distributed. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65**  
**Particularly Nice for the Grade**

- 4295 1928 Hawaiian MS65 PCGS. CAC.** Particularly vibrant mint luster rolls around Gem-quality surfaces on this CAC-approved Hawaiian Sesquicentennial half dollar. Delicate iridescent toning graces surfaces that appear brilliant at first glance. The strike is sharp and eye appeal is outstanding. The Hawaiian half dollar is a key issue in the classic commemorative series with a distribution of only 10,008 coins. *From The Glacier Park Collection.* NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Commemorative Half Dollar**  
**Merely 10,008 Coins Minted, MS65**

- 4296 1928 Hawaiian MS65 PCGS. CAC.** The year 1928 marked the bicentennial of the Captain Cook's birth, although that is not what this commemorative issue celebrates. Only 9,950 of these circulation strikes were sold. Another 50 sandblast proofs were distributed. Eight additional coins were melted for assay purposes. This well-struck and highly lustrous Gem retains largely bright silver surfaces. Glints of gold accent each side. Overtly original. NGC ID# BYGR, PCGS# 9309

- 4297 1936 Long Island MS67 NGC.** A deeply toned Superb Gem with mottled tan, gold, magenta, and violet throughout the periphery. The central devices have a vivid mix of silver-gray and medium-brown coloration. Splendid luster radiates beneath the patina and complements the bold design elements. A few wispy abrasions keep this attractive piece from being absolutely flawless. Census: 81 in 67 (8 in 67+, 18 in 67 ★, 2 in 67+★), 6 finer (2/18). *Ex: Los Angeles Signature (Heritage, 8/2009), lot 2133; FUN Signature (Heritage, 1/2015), lot 6443; Central States Signature (Heritage, 4/2015), lot 6683; New York Signature (Heritage, 10/2015), lot 4393; Dallas Signature (Heritage, 11/2017), lot 17625.* NGC ID# BYGX, PCGS# 9322

- 4298 1934 Maryland MS67 PCGS. CAC.** Rich satin luster emanates from both sides of this Superb Gem. Scattered areas of light toning in a variety of appealing hues appear throughout; however, a concentrated area of dark russet and orange along with small flecks of green appears at the bottom rim of the obverse. The Maryland Tercentenary half dollar is scarce in this grade and unknown finer at PCGS. Population: 80 in 67 (9 in 67+), 0 finer. CAC: 48 in 67, 0 finer (2/18). *Ex: Long Beach Signature (Heritage, 2/2013), lot 4581.* NGC ID# BYGZ, PCGS# 9328

**4299 1921 Missouri MS65 PCGS. CAC.** Gem Missouri Centennial half dollars represent the finest examples of this classic commemorative that most collectors seek to acquire, as finer coins are scarce and pricey. This piece displays a bold strike and original, frosty luster. Champagne-tinted surfaces feature areas of deep russet, olive, and gunmetal-blue toning in the peripheral fields. CAC: 58 in 65, 10 finer (2/18). NGC ID# BYH2, PCGS# 9330

**4300 1921 Missouri 2x4 MS65 PCGS.** The 2★4 variety of the Missouri Centennial half dollar is elusive at the Gem level of preservation and scarce finer. This coin displays frosty originality with delicate toning in shades of copper-gold around the obverse border; no other toning is present. The strike is slightly soft on the highest points of the devices, an almost inescapable characteristic of the type. PCGS lists 43 finer submissions (2/18).

Ex: *Central States Signature* (Heritage, 5/2004), lot 10981.

**From The Glacier Park Collection.** NGC ID# 2FE9, PCGS# 9331

**4301 1921 Missouri 2x4 MS65 PCGS. CAC.** Sedalia, Missouri was a springboard for western expansion, which themed its 1921 centennial exposition half dollar. This is an attractively toned Gem, one of an estimated 9,400 pieces distributed with the 2★4 imprint in the left obverse field. The strike is sharp and the eye appeal is considerable for this CAC-endorsed example. Just 43 pieces are certified in a numerically finer grade at PCGS (2/18). NGC ID# 2FE9, PCGS# 9331

**4302 1939 Oregon PDS Set MS65 to MS66 PCGS.** Just 3,000 sets were issued, along with a few stray pieces destined for assay. All three coins are from the same grading submission. The set includes: **1939 MS66**, faint green-gold toning, an exemplary strike; **1939-D MS66**, white and lustrous, minor softness of strike on the back of the wagon; and a **1939-S MS65**, lightly toned and exceptional for the grade.

**From The Property of a Lady, Part II.** (Total: 3 coins) NGC ID# BYHL, PCGS# 9355

**4303 1939 Oregon PDS Set MS66 PCGS.** The lowest mintage trio of the Oregon Trail series. The trio are separately holdered but from the same grading submission. The set includes: **1939 MS66**, pastel straw-gold and powder-blue patina, fully struck; **1939-D MS66**, a lustrous butter-gold Premium Gem; and a **1939-S MS66**, beautiful iridescent lilac, olive-gold, and orange toning.

**From The Property of a Lady, Part II.** (Total: 3 coins) NGC ID# BYHL, PCGS# 9355

#### 1915-S Pan-Pac Half, MS66 Satin With Rich Peripheral Toning

**4304 1915-S Panama-Pacific MS66 PCGS. CAC.** The reverse is untuned in the center with mostly complete orange-russet peripheral shadings. Similar colors are seen around the border of the obverse, but the center of that side is not brilliant, but rather golden toned. The satiny features are free of even the most trivial handling marks. An uncommonly well-preserved coin for the type.

Ex: *Central States Signature* (Heritage, 4/2002), lot 8149. NGC ID# BYHP, PCGS# 9357

**4305 1915-S/S Panama-Pacific, FS-502, MS65 PCGS Secure. CAC.** The mintmark is lightly but widely repunched north. The variety is unlisted on the PCGS insert. This sea-green, butter-gold, and dove-gray Gem has a semiprooflike obverse and a lustrous reverse. The well-struck surfaces reveal minor thin obverse marks once examined beneath a loupe. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

**4306 1926 Sesquicentennial MS65 PCGS.** Bright lemon-gold toning forms about the margins, leaving the well-struck centers bathed in more subtle lilac-gray shades. This issue's shallow relief and broad distribution (many thousands were sold to the general public) combine to make it a challenging issue in Gem or finer grades. PCGS reports just 11 numerically finer examples (2/18).

Ex: *Long Beach Signature* (Heritage, 9/2003), lot 9432. NGC ID# BYJ4, PCGS# 9374

**4307 1935 Spanish Trail MS66 PCGS.** On the reverse map, El Paso, Texas, is incompletely struck, but the remainder of this Spanish Trail half dollar is boldly rendered. Warm golden toning blankets the satiny surfaces, and no distracting abrasions are seen. This is a popular commemorative with a distribution of only 10,008 coins (including assay pieces). Examples grading finer than the present are elusive. NGC ID# BYJ5, PCGS# 9376

**4308 1935 Spanish Trail MS67 NGC.** The typical Old Spanish Trail half dollar displays satiny, gray color — not brilliant and deeply frosted surfaces with flashy luster such as this needle-sharp Superb Gem example. The wide-open fields are remarkably unblemished and the yucca tree is fully struck. We seldom offer a Spanish Trail so vibrant and well-preserved. NGC reports just seven numerically finer examples (2/18).

**From The Glacier Park Collection.** NGC ID# BYJ5, PCGS# 9376

**4309 1935-S Texas MS67+ PCGS. CAC.** A Plus-graded Superb Gem, from a small distribution of 10,000 pieces, this coin exhibits well-detailed design elements and virtually pristine surfaces, with satiny mint luster and a few highlights of lime-green toning. PCGS has graded two numerically finer examples (2/18). NGC ID# BYJD, PCGS# 9384

#### 1936-D Texas Half Dollar, Splendid MS68 Among the Finest Certified

**4310 1936-D Texas MS68 NGC.** A perched eagle with a large Texas star in the background on the obverse seems refreshingly simple compared to the reverse, which includes virtually every Texas icon possible. This immaculate MS68 is tied for the finest-known 1936-D, with fleeting iridescent toning over satiny pearlescent silver surfaces and a remarkably sharp strike. Just 10,000 pieces were distributed as part of the Texas Memorial Museum Centennial Coin Campaign. Census: 14 in 68 (1 in 68★), 0 finer (2/18). NGC ID# BYJF, PCGS# 9387

**4311 1938 Texas PDS Set MS65 to MS66 PCGS.** Lowest mintage set of the five-year series. All three coins are from the same grading submission. The set includes: **1938 MS65**, well struck, unabraded and impressive; **1938-D MS66**, sharply struck, essentially pristine; and a **1938-S MS66**, a bold strike, light olive-green toning, lustrous and smooth.

**From The Property of a Lady, Part II.** (Total: 3 coins) NGC ID# BYJL, PCGS# 9397

**1947-D Booker T. Washington Half Dollar, MS67  
Among the Finest at Both Services**

- 4312 1947-D Booker T. Washington MS67 NGC.** Eye-appealing Booker T. Washington halves are difficult to come by, although this bright Superb Gem is of exceptional visual merit. Traces of light golden color accent the frosty, vibrant luster that radiates from each side. Boldly struck with only the lightest evidence of contact on Washington's cheek. Census: 14 in 67 (2 in 67+, 2 in 67★), 0 finer (2/18).  
Ex: *Long Beach Signature* (Heritage, 6/2015), lot 5616. NGC ID# BYJW, PCGS# 9409

**1951-S Booker T. Washington Half Dollar  
Scarce, Brilliant MS67 Prooflike**

- 4313 1951-S Booker T. Washington MS67 Prooflike NGC.** Brilliant silver surfaces show glassy reflectivity throughout the undulating fields. A few tiny marks exist among delicate die polish lines, while chromelike silver flash radiates from both sides. NGC recognizes a small group of 1951-S Booker T. Washington halves as having prooflike surfaces, the finest of which are a half dozen MS67 Prooflike examples. This well-preserved coin is among them. Census: 6 in 67 Prooflike, 0 finer (2/18). NGC ID# BYKB, PCGS# 89426
- 4314 1952-S Washington-Carver MS67 NGC.** The 1952-S Washington-Carver half dollar is rarely offered in Superb Gem condition, and only one coin is reported finer than the present. Satiny mint luster is mostly brilliant save for a dusting of russet toning along the lower-obverse border. The devices are well-struck. Census: 19 in 67 (2 in 67+, 3 in 67 ★), 1 finer (2/18). NGC ID# BYL5, PCGS# 9436

**COMMEMORATIVE GOLD**

- 4315 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS.** Razor-sharp detail and satiny orange-gold luster deliver exceptional visual appeal on this Premium Gem example, and no abrasions are visible under a loupe. Louisiana Purchase Exposition gold dollars with the Jefferson obverse are elusive in grades finer than MS66. NGC ID# BYLD, PCGS# 7443
- 4316 1905 Lewis and Clark Gold Dollar MS64+ PCGS. CAC.** A wonderful Choice Mint State piece, this lustrous Lewis and Clark gold dollar has brilliant yellow-gold surfaces and bold design motifs with outstanding eye appeal. NGC ID# BYLG, PCGS# 7448

- 4317 1915-S Panama-Pacific Gold Dollar MS66 NGC.** A sharp Premium Gem, showing satiny rose-gold luster and unmarked surfaces. The smallest of the Panama-Pacific gold commemoratives, the dollar is also the most plentiful overall. Just 15,000 pieces were distributed, but many high-grade examples were preserved. Nonetheless, the issue is conditionally scarce finer than the present representative. NGC ID# BYLH, PCGS# 7449

**1915-S Panama-Pacific Quarter Eagle, MS64  
Original, Fully Struck Surfaces**

- 4318 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. CAC.** Ex: Hansen-Lewis. All 1915 Panama-Pacific coins stand out as part of a highly collectible subset in the classic commemorative series. This is the first of merely two commemorative quarter eagle issues and it claims a small distribution of 6,749 coins, heightening its broad appeal. Original, fully struck surfaces feature rich orange-gold color and vibrant mint luster. NGC ID# BYLP, PCGS# 7450
- 4319 1916 McKinley Gold Dollar MS66 PCGS.** Bright, satiny mint luster yields hints of reflectivity in the fields on this Premium Gem example, showing no distracting abrasions or coppery discolorations that often appear on this type. The strike is sharp and eye appeal excels.  
Ex: *Long Beach Signature* (Heritage, 5/2003), lot 5379. NGC ID# BYLK, PCGS# 7454
- 4320 1916 McKinley Gold Dollar MS66 NGC.** Sea-green and peach-gold toning encompasses this fully struck and lustrous Premium Gem. No marks are apparent, and the eye appeal is considerable. Struck from moderately rotated dies. The obverse design was the last for U.S. coinage by Charles E. Barber, who died in February 1917. Housed in a circa-2000 holder. NGC ID# BYLK, PCGS# 7454
- 4321 1922 Grant Gold Dollar, No Star, MS67 NGC.** Although readily available in most grades, the No Star Grant gold dollar is a scarce issue at the Superb Gem level. This piece is spectacular, showcasing rich yellow-gold luster and virtually perfect surfaces. The tree trunk left of the cottage door is diagnostically weak, but the remaining design elements exhibit far better definition than is typical. NGC reports five numerically finer specimens (2/18), although the present piece is among the best examples available to the majority of collectors. NGC ID# BYLN, PCGS# 7458
- 4322 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A lovely, frosty Gem example of the final gold issue in the classic commemorative series. This luminous Sesquicentennial quarter eagle, struck to commemorate the 150th anniversary of the signing of the Declaration of Independence, shows no major abrasions and has great eye appeal. A few tiny coppery discolorations appear on each side under a loupe. NGC ID# 2FE9, PCGS# 7466

## MODERN ISSUES

### 1995 and 1996 Atlanta Olympic Commemoratives Complete 32-Piece Set in Wooden Case

- 4323 Complete 32-Piece 1995-1996 Atlanta Olympics Commemorative Set in Wooden Case.** Every design, every metal, every coin from half dollars to half eagles: the complete 32-coin Uncirculated and Proof set of Atlanta Olympic commemoratives. All coins are housed in their original Mint plastic capsules, and placed within two trays stacked in a mahogany wooden box. A certificate of authenticity is included, but no key is present. (Total: 32 coins)

- 4324 2000-W Library of Congress Bimetallic Ten Dollar MS70 NGC.** Ex: U.S. Vault Collection L/M. A pristine representative of this low-mintage issue. A minuscule flan flaw is noted after the Y in LIBERTY. The sole commemorative program issued in bimetallic gold and platinum format. NGC ID# 26U9, PCGS# 9784

## MODERN BULLION COINS

- 4325 1986 Half-Ounce Gold Eagle MS70 NGC.** Coinage of half-ounce Gold Eagles in 1986, the first year of issue, neared 600,000 pieces, by far the highest mintage of the series and making it an outstanding type coin issue. This flawlessly preserved example displays satiny yellow-gold luster and well-struck design elements. The eye appeal is pleasing. NGC ID# 28Y8, PCGS# 9805
- 4326 1986 Half-Ounce Gold Eagle MS70 PCGS.** The first year of issue for the Gold Eagle series produced nearly 600,000 half-ounce coins. This issue was produced only in circulation-strike format, not as proofs. The present coin is flawlessly preserved and fully struck. PCGS has seen only 69 coins this fine (2/18). NGC ID# 28Y8, PCGS# 9805
- 4327 1986 One-Ounce Gold Eagle MS70 NGC.** Anticipation of heavy public demand for gold bullion caused the Mint to strike more than 1.3 million one-ounce Gold Eagles in the first year of the series, a total that would not be surpassed until 1998. This top-grade 1986 coin displays a full strike and satiny, unmarked yellow-gold mint luster. An exceptional Registry Set contender. NGC ID# 26PA, PCGS# 9806
- 4328 1987 Quarter-Ounce Gold Eagle MS70 NGC.** Although more than 269,000 quarter-ounce Gold Eagles were struck in 1987, few are certified in perfect MS70 condition. This piece is sharp and luminous, showing satiny yellow-gold mint luster and pristine surfaces. NGC ID# 26M3, PCGS# 9811

### 1988 Silver Eagle, MS70 Elusive So Fine at PCGS

- 4329 1988 Silver Eagle MS70 PCGS.** Silver Eagles are in high demand in MS70, particularly among Registry Set collectors and investors in the modern bullion market. As is almost a rule for the entire series, the 1988 is significantly scarcer in MS70 PCGS holders than in the NGC equivalent. This frosty, brilliant example is one of only 54 coins graded so fine at PCGS (2/18). It is fully struck and blemish-free. NGC ID# 26J8, PCGS# 9816

- 4330 1988 Quarter-Ounce Gold Eagle MS70 NGC.** The 1988 quarter-ounce Gold Eagle is scarce in MS70, with only 92 pieces so graded at NGC and just seven others at PCGS (2/18). This coin is flawless, brilliant, and sharp — an outstanding Registry Set candidate. NGC ID# 26M4, PCGS# 9820

- 4331 1988 Half-Ounce Gold Eagle MS70 NGC.** Coinage of half-ounce Gold Eagles in 1988 dipped to only 45,000 pieces, down from more than 131,000 coins in 1987. This date carries a premium in the top grade, where certified examples are scarce. This piece displays luminous satin luster and yellow-gold coloration. The strike is full. NGC ID# 26N9, PCGS# 9822

- 4332 1989 Quarter-Ounce Gold Eagle MS70 NGC.** Only 81,789 quarter-ounce Gold Eagles were struck in 1989, and top-grade examples are elusive today. This Registry Set candidate displays a full strike and satiny golden mint luster. The outstanding preservation of the surfaces captivates the eye when viewed beneath a loupe. NGC ID# 26M5, PCGS# 9830

### 1990 Silver Eagle, MS70 Elusive This Fine

- 4333 1990 Silver Eagle MS70 NGC.** NGC has certified most of the 1990 Silver Eagles known in perfect MS70 condition, these being highly sought-after among Registry Set collectors and modern bullion series specialists. Even so, coins this fine are scarce. The present example displays sharp motifs and frosty, shimmering mint luster with no discernible toning. NGC ID# 26JC, PCGS# 9836

- 4334 1990 Four-Piece Gold Eagle Proof Set, PR70 Ultra Cameo NGC.** The set includes: 1990-P \$5 tenth-ounce; 1990-P \$10 quarter-ounce; 1990-P \$25 half-ounce; and a 1990-W \$50 one-ounce proof Gold Eagles, individually certified with a common grade of PR70 Ultra Cameo. Proof one-ounce Gold Eagles in 1990 were struck at the West Point Mint. (Total: 4 coins)

**1990 Quarter-Ounce Gold Eagle, MS70  
Elusive So Fine**

**4335 1990 Quarter-Ounce Gold Eagle MS70 NGC.** A small mintage of 41,000 coins makes the 1990 quarter-ounce Gold Eagle both a highly sought-after and elusive issue in all grades, especially so in MS70. Glints of rose and straw-gold color this pristine key date offering. As one would expect, a full strike characterizes the motifs on each side. Satiny with a hint of reflectivity in the fields. Census: 41 in 70 (2/18). NGC ID# 28XN, PCGS# 9840

**4336 1990-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC.** The West Point Mint did not take over proof half-ounce Gold Eagle production until 1994. In 1990, the Philadelphia Mint coined 51,636 proofs, surpassing the 31,000-coin mintage of the business strikes at the same facility. These coins are distinctive for their Roman numeral dates. The piece offered here displays stark contrast and flawless preservation. NGC ID# 28YC, PCGS# 9843

**4337 1991 Silver Eagle MS70 NGC.** Brilliant and satiny, this 1991 Silver Eagle is conditionally elusive in the top Mint State grade. The coin offered here is fully struck and flawlessly preserved, an essential Registry Set acquisition. Slightly more than 7 million Silver Eagles were struck in 1991. NGC ID# 26JE, PCGS# 9846

**4338 1991 Quarter-Ounce Gold Eagle MS70 NGC.** The 1991 is the latest quarter-ounce Gold Eagle issue showing a Roman numeral date. Only 36,100 pieces were struck, which is less than the number of proofs produced for this date. Top-grade examples are elusive in NGC or PCGS holders. This piece displays sharp definition and flawlessly preserved, satiny mint luster. NGC ID# 26M7, PCGS# 9850

**1991 One-Ounce Gold Eagle, MS70  
Seldom Offered This Fine**

**4339 1991 One-Ounce Gold Eagle MS70 NGC.** The Roman numeral date was employed for the Gold Eagle series from 1986 through 1991, after which Arabic numerals were used. The early, Roman numeral dates make up a short subset in the one-ounce Gold Eagle series that can be collected apart from the rest. The 1991 is scarce in MS70, with only 62 pieces so graded at NGC and just 38 more at PCGS (2/18). This example is sharp and pristine, showing satiny yellow-gold mint luster. NGC ID# 26PF, PCGS# 9854

**4340 1992 Quarter-Ounce Gold Eagle MS70 NGC.** Fewer than 100 1992 quarter-ounce Gold Eagles are certified MS70 at NGC and PCGS combined, although NGC coins are in the majority. This Registry-grade example is sharp and pristine, showing satiny mint luster and outstanding eye appeal. Census: 74 in 70 (2/18). NGC ID# 26M8, PCGS# 9860

**4341 1992 Half-Ounce Gold Eagle MS70 NGC.** This is a conditionally scarce issue in MS70. The 1992 half-ounce Gold Eagle comes from a mintage of 54,404 coins, and top-grade examples are in demand among Registry Set collectors. This piece is pristine and fully struck, showcasing exceptional visual appeal. NGC ID# 26ND, PCGS# 9862

**1993 Silver Eagle, MS70  
Better Date in Top Condition**

**4342 1993 Silver Eagle MS70 NGC.** The number of 1993 Silver Eagles certified in perfect MS70 condition is small compared to many other issues in this series, and examples are scarce. An ideal Registry coin, this piece displays brilliant, frosty mint luster and sharp design elements. A beautiful piece for a high-end Silver Eagle collection. NGC ID# 26JJ, PCGS# 9866

**4343 1993 Four-Piece Gold Eagle Proof Set, PR70 Ultra Cameo NGC.** The set includes: 1993-P \$5 tenth-ounce; 1993-P \$10 quarter-ounce; 1993-P \$25 half-ounce; and a 1993-W \$50 one-ounce proof Gold Eagles, individually certified with the common grade of PR70 Ultra Cameo. Proof one-ounce Gold Eagles were struck at the West Point Mint, with a coinage of 34,369 pieces in 1993. (Total: 4 coins)

**4344 1993 Quarter-Ounce Gold Eagle MS70 NGC.** This beautifully preserved, needle-sharp quarter-ounce Gold Eagle displays luminous satin luster and bright yellow-gold color. Coinage of this denomination was the highest in 1993 than it had been since 1989, with 71,864 pieces struck. However, pieces certified as MS70 today are elusive. NGC ID# 26M9, PCGS# 9870

**4345 1993 Half-Ounce Gold Eagle MS70 NGC.** A fully struck, perfectly preserved example in the finest-possible state of preservation. Relatively few examples of this issue are certified so fine, considering the mintage of more than 73,000 coins. This is an ideal Registry coin with satiny yellow-gold mint luster. NGC ID# 26NE, PCGS# 9872

**4346 1993 Half-Ounce Gold Eagle MS70 NGC.** Most Gold Eagle production in 1993 was devoted to the tenth-ounce and one-ounce denominations; only 73,324 half-ounce coins were produced, and MS70 examples are in demand from Registry collectors. This piece is fully struck and perfectly preserved, showing satiny yellow-gold mint luster. NGC ID# 26NE, PCGS# 9872

**4347 1993 One-Ounce Gold Eagle MS70 NGC.** The 1993 one-ounce Gold Eagle is surprisingly scarce in MS70 and highly sought-after among Registry Set collectors at this grade level. NGC reports only 75 submissions in the top grade, and PCGS has seen even fewer (2/18). This piece is frosty, pristine, and sharp, showing warm peach-gold luster. NGC ID# 28Z4, PCGS# 9874

**4348 1994 Silver Eagle MS70 NGC.** The MS70 population of the 1994 Silver Eagle is relatively small in comparison to the number of collectors who pursue this popular series. The piece offered here is untuned and flawlessly preserved, showing a full strike. NGC ID# 26JL, PCGS# 9876

**4349 1994 Quarter-Ounce Gold Eagle MS70 NGC.** A flawlessly preserved, fully struck example of this conditionally challenging quarter-ounce issue. The 1994 comes from a mintage of 72,650 pieces and is infrequently available in the top grade, where Registry Set collectors represent a significant portion of the demand. NGC ID# 26MA, PCGS# 9880

- 4350 1994 Half-Ounce Gold Eagle MS70 NGC.** The 1994 half-ounce Gold Eagle is scarce in MS70. Coinage of this issue amounted to only 62,400 pieces, compared to more than 221,000 examples of the its one-ounce counterpart, which was more popular at the time with buyers of bulk bullion. This flawlessly preserved, fully struck half-ounce coin displays shimmering golden mint luster. NGC ID# 26NF, PCGS# 9882

**1995-W Silver Eagle, PR69 Ultra Cameo**

- 4351 1995-W Silver Eagle PR69 Ultra Cameo NGC. EX: Anniversary Set.** This is a virtually flawless Ultra Cameo example of this key Silver Eagle proof issue, showing stark white-on-black contrast and no toning. The 1995-W proof was only issued in 10th anniversary bullion program proof sets, of which just 30,125 examples were distributed. The Silver Eagle from this set is the single most important issue in the series. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR69 Ultra Cameo  
Unrivalled Key to the Set**

- 4352 1995-W Silver Eagle PR69 Ultra Cameo NGC.** In 1995, the only way to acquire one of these now key-date Silver Eagles was to purchase the five-coin anniversary set for \$999. Merely 30,125 sets were sold, reflecting the relatively high price. This example is essentially flawless. Its deep, watery mirrors contrast starkly against fully struck motifs covered in a thick layer of silvery mint frost. NGC ID# CFWX, PCGS# 9887

**1995 Half-Ounce Gold Eagle, MS70  
Scarce in This Finest Grade**

- 4353 1995 Half-Ounce Gold Eagle MS70 NGC.** Among modern bullion issues, a population of less than 200 coins in MS70 can create significant demand among Registry Set collectors. In the case of the half-ounce 1995 Gold Eagle, NGC lists only 108 pieces, with just 20 more at PCGS (2/18). Full detail on the devices and a hint of reflectivity in the satiny fields give this piece tremendous visual appeal. NGC ID# 26NG, PCGS# 9892

**1995 One-Ounce Gold Eagle, MS70  
Semiprooflike Reverse**

- 4354 1995 One-Ounce Gold Eagle MS70 NGC.** The 1995 one-ounce Gold Eagle is scarce in MS70 and highly sought-after as a Registry coin. NGC has designated three examples of this issue as Prooflike, but none of those as fine as MS70. This piece is frosty on the obverse and reflective on the reverse, being flawlessly preserved on both sides. The strike is sharp, and eye appeal is outstanding. NGC ID# 26PJ, PCGS# 9894

- 4355 1996 Silver Eagle MS70 NGC.** The Philadelphia Mint struck little more than 3.6 million Silver Eagles in 1996. Examples preserved and certified in perfect MS70 condition are elusive. This piece displays a full strike and frosty, mostly untoned surfaces. A hint of light golden color appears around the outer peripheries. NGC ID# 26JR, PCGS# 9900

**1996 Silver Eagle, MS70  
Unimprovable Key Silver Eagle**

- 4356 1996 Silver Eagle MS70 NGC.** Although a seemingly generous 3.6 million pieces were struck, that mintage was the lowest production of circulation-strike American Silver Eagles in the 1990s. Remarkably few of those coins reach the ultimate MS70 grade. This is a frosted, white example with flawless surfaces and immense eye appeal. NGC ID# 26JR, PCGS# 9900

**1996 Silver Eagle, MS70  
Key Early Series Date**

- 4357 1996 Silver Eagle MS70 NGC.** Among the nonmintmarked early issues, the 1996 ranks as a key date, along with a few other low-population issues. This flawless MS70 representative is quite challenging to find at the unimprovable grade level. Immaculate satin luster glistens from every angle of view. NGC ID# 26JR, PCGS# 9900

**4358 1996 Half-Ounce Gold Eagle MS70 NGC.** Production of Gold Eagles declined in 1996. The half-ounce issue saw a coinage of only 39,287 pieces, and those graded MS70 are elusive. This representative displays a full strike and satiny yellow-gold mint luster, ideal for Registry purposes. NGC ID# 26NH, PCGS# 9906

**4359 1996 One-Ounce Gold Eagle MS70 NGC.** The 1996 one-ounce Gold Eagle is genuinely rare in MS70, despite a mintage in excess of 189,000 coins. NGC has seen only 44 pieces this fine, and PCGS 16 (2/18). This coin displays full detail and satiny yellow-gold luster with flawless preservation. NGC ID# 26PK, PCGS# 9908

**4360 1997 One-Ounce Gold Eagle MS70 NGC.** In MS70, the 1997 one-ounce Gold Eagle is genuinely scarce, even at NGC where most such pieces are certified. This coin is fully struck and perfectly preserved, showing satiny golden luster and a modest cartwheel effect. NGC ID# 26PL, PCGS# 9927

#### 1997 Quarter-Ounce Gold Eagle, MS70 Few Examples Known This Fine

**4361 1997 Quarter-Ounce Gold Eagle MS70 NGC.** The 1997 quarter-ounce Gold Eagle is a rarity in MS70. Only 46 pieces are reported this fine at NGC, and PCGS lists only 21 more (2/18). This example is fully struck and perfectly preserved, showing satiny golden luster that shimmers when rotated beneath a light. NGC ID# 26MD, PCGS# 9916

**4362 1998 Quarter-Ounce Gold Eagle MS70 PCGS.** The 1998 quarter-ounce Gold Eagle is scarce in MS70. Barely more than 100 coins are so graded at PCGS and NGC combined, and the PCGS population is in the minority with only 38 coins (2/18). This piece is fully struck and beautifully preserved, showing golden luster with a faintly mattelike texture when viewed with a loupe. NGC ID# 26ME, PCGS# 9933

**4363 1998 Quarter-Ounce Gold Eagle MS70 PCGS.** Fewer than 100 1998 quarter-ounce Gold Eagles are certified MS70 at PCGS and NGC combined, and only 38 of these are at PCGS (2/18). This piece is fully struck and satiny with pristine surfaces. Eye appeal is outstanding on this top-of-the-line Registry candidate. NGC ID# 26ME, PCGS# 9933

#### 1999-W Tenth-Ounce Gold Eagle, MS70 Unfinished Proof Dies

**4364 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, MS70 PCGS.** It is believed 14,500 circulation-strike tenth-ounce Gold Eagles were mistakenly struck from unfinished proof dies in 1999, representing the only major variety in the series. This pristine example enjoys brilliant lemon-gold surfaces and satiny mint luster. Strike detail is unsurprisingly full. Only 51 coins are reported in this ultimate grade at PCGS (2/18). NGC ID# 26LB, PCGS# 99940

**4365 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC.** A pair of unpolished proofs dies produced this popular *Guide Book* variety, which shows a West Point mintmark on a business-strike tenth-ounce Gold Eagle. The coin is fully struck and flawlessly preserved, showing satiny golden luster. NGC ID# 26LB, PCGS# 511606 Base PCGS# 99940

**4366 1999 Half-Ounce Gold Eagle MS70 NGC.** Although more than 263,000 half-ounce Gold Eagles were struck in 1999, this is a scarce issue in MS70. NGC lists just 68 such pieces, and there are only 12 additional coins at PCGS (2/18). This example is sharp, satiny, and flawlessly preserved, showing bright golden mint luster. NGC ID# 292W, PCGS# 9943

#### 2000 Silver Eagle, MS70 A Registry-Grade Example

**4367 2000 Silver Eagle MS70 NGC.** Frosty, brilliant luster is especially luminous on this piece, and the outstanding preservation passes inspection even under a 10x loupe. This fully struck, beautiful Silver Eagle is ideal for Registry Set purposes. The issue is often challenging to acquire in MS70, and it has added appeal due to the 2000 "rollover" date. NGC ID# 26JZ, PCGS# 9949

**4368 2001 Half-Ounce Gold Eagle MS70 NGC.** Satiny, perfect mint luster casts this Registry-grade 2001 half-ounce Gold Eagle in shimmering yellow-gold hues. Only 48,047 half-ounce coins were struck in 2001, down from more than 79,000 pieces in the year 2000. NGC ID# 26SV, PCGS# 9957

**4369 2001 Half-Ounce Gold Eagle MS70 NGC.** The Philadelphia Mint only struck 48,047 half-ounce Gold Eagles in 2001, slightly more than twice the number of proofs issued by West Point that year. Top-grade survivors are sought-after as Registry coins. This piece is fully struck and pristine, showing satiny golden surfaces. NGC ID# 26SV, PCGS# 9957

**4370 2006-W Three-Piece One-Ounce Gold Eagle 20th Anniversary, MS70-PR70 Ultra Cameo NGC.** This trio of one-ounce West Point Mint issues includes a **reverse proof PR70**, a **regular proof PR70 Ultra Cameo**, and a **burnished finish MS70**, certified individually by NGC. The reverse proof is the highlight of this set, as only 9,996 pieces were issued. (Total: 3 coins)

**4371 2008-W Four-Piece Gold Buffalo Set, .9999 Fine, MS70 NGC.** The set includes: \$5 tenth-ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce gold Buffalos, individually certified with a common numeric grade of MS70. The three lower denominations were only issued in 2008, and they are known with proof and burnished finishes. (Total: 4 coins)

**4372 2008-W Four-Piece Gold Buffalo Proof Set, .9999 Fine, PR70 Ultra Cameo NGC.** The set includes: \$5 tenth-ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Buffalos, certified individually with a common grade of PR70 Ultra Cameo. The three lower denominations were only issued in 2008, making this a highly popular year set in the gold Buffalo series. (Total: 4 coins)

**4373 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC.** This hefty 2.5 ounce pure gold medal does not derive from S.S. *Central America* gold bars, although the bullion does derive from a California source, per the NGC insert. Similar in appearance to the Kagitumba 1852 Humbert fifty, but the denomination and fineness are modified, and the reverse has a verbose legend asserting a 2008 mintage.

## GSA DOLLARS

### 1882-CC GSA Morgan Dollar, MS66+ Frosty and Brilliant

**4374 1882-CC GSA MS66+ NGC.** Most high-grade coins distributed through the GSA sales of the 1970s were later cracked out of their original GSA holders to be submitted to the grading services. High-end coins such as this Plus-graded Premium Gem that remain in their GSA hard plastic cases are elusive and sought-after. The coin is brilliant, frosty, and well-struck. A couple of faint grazes on Liberty's jaw are all that prevent a full MS67 grade. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

**4375 1882-S GSA MS66 NGC.** Best known for the vast quantities of Carson City dollars distributed in the 1970s, the GSA hoard also released a few dollars from other mints including this Premium Gem 1882-S. Scarce in its original black GSA holder with accompanying numbered certificate and its nearly pristine black box, the coin is brilliant and frosted with blazing cartwheel silver luster. The strike is full throughout both sides. Band certified by NGC. Census: 12 in 66 (1 in 66+), 2 finer (1/18). NGC ID# 254F, PCGS# 407140 Base PCGS# 7140

## REDFIELD DOLLAR

**4376 1883-S Paramount MS62 NGC.** Ex: Redfield Collection. Surprisingly attractive for the MS62 grade level, this 1883-S Morgan dollar displays radiant cartwheel luster and near-brilliant surfaces that are accented by hints of gold at the borders. The devices are sharp, and grade-limiting abrasions are light and scattered on the obverse. NGC ID# 254K, PCGS# 7148

## ERRORS

### 1985-P Nickel, MS66 Red Struck on a Cent Planchet

**4377 1985-P Jefferson Nickel — Struck on a Cent Planchet — MS66 Red NGC.** 2.5 gm. Struck aligned with the collar at 4 o'clock. Design details (including the rim) are complete near 4 o'clock, but show an increasing degree of distortion as distance increases from 4 o'clock, since planchet spreading was unrestrained by the collar die. The date and mintmark are sharp, and most of Monticello and the portrait are on the flan. WE TRUST is absent, as is most of UNITED STATES. A beautiful fire-red example of a popular wrong-planchet combination.

### 1945 Dime, MS65 Full Bands Broadstruck, Heralded Strike Rarity

**4378 1945 Mercury Dime — Broadstruck — MS65 Full Bands NGC.** The 1945 dime is a famous strike rarity. Mint State examples with lightly impressed centers are common, but Full Bands Gems presently command a CDN value of \$12,500. This example has a sharp central strike due to the absence of a collar die, which allowed the obverse and reverse dies to more closely approach. The rim is nearly normal on the obverse between 6 and 12 o'clock, while the remainder of the rims are very broad and flat, characteristic of a centered broadstrike. Lustrous and well-preserved with medium dove-gray and wheat-gold toning.

**Denver Mint Eisenhower Dollar**  
**Struck on a Half Dollar Planchet, MS61**  
**Type Two Reverse (1971-1974)**

- 4379** (Undated) Denver Mint Eisenhower Dollar — Struck on a Half Dollar Planchet — MS61 NGC. 11.2 gm. Type Two Reverse, which indicates the coin might be any of the Denver issues from the early 1970s (1971 to 1974). Nicely centered left-to-right on the reverse and nearly so on the obverse. The Denver mintmark is visible, but none of the date. E PLURIBUS UNUM is fully present, as are the eagle, Earth, and ONE DOLLAR. Eisenhower's portrait is fully visible, while the other obverse legends are partial. A hint of tan toning and glimpses of mint luster enhance the pleasing, grayish-silver surfaces.

## MINT SET

- 4380** Sealed 1953 Double Mint Set. 30 coins total, two each of the five denominations from the Philadelphia, Denver, and San Francisco Mints. Housed in the cardboard holders of issue. The outer mailing envelope is absent, but the inner manila envelope is still sealed. (Total: 30 coins)

## CERTIFIED MODERN PROOF SET

- 4381** 1942 Six-Piece Proof Set PR64 to PR67 PCGS. The coins are individually certified in holders bearing consecutive certification numbers. The set includes:

**Cent PR64 Red.** A well-struck pumpkin-orange near-Gem with some scattered tiny flecks.

**Type One nickel PR65.** Delicate powder-blue and straw-gold toning graces this razor-sharp Gem. A lens locates a few minute spots.

**Type Two nickel PR66.** Rich lemon-gold and ice-blue patina adorns lustrous and unabraded surfaces. One field fleck near the chin.

**Dime PR67.** Brilliant save for a blush of golden-brown and forest-green toning across the lower obverse margin.

**Quarter PR67.** Stone-white except for ruby-red, orange-gold, and apple-green toning near the date.

**Half Dollar PR67.** Contrast is substantial between the frosty motifs and the glassy fields, although no Cameo designation is present. *From The Property of a Lady, Part II.* (Total: 6 coins)

## SO-CALLED DOLLAR

**1901 Leshner Dollar, HK-791**  
**Imprint Type, #1002**  
**AU Details**

- 4382** 1901 Leshner Dollar, Imprint Type, Serial #1002 — Damage — PCGS Genuine. AU Details. Z-5, HK-791, R.6. Silver mine owner Joseph Leshner issued several varieties of silver octagonal “dollars.” They were popularized among collectors by Farran Zerbe, who cataloged them for a 1917 A.N.S. article. The very scarce Imprint Type lacks a merchant counterstamp on the lower obverse field. Adna Wilde’s February 1978 *Numismatist* roster describes #1002 as Uncirculated, and lists R. Mitchell under Known Location. This is a sharp example with light golden-brown and ice-blue toning. The obverse field appears whizzed above the serial number, and the reverse is moderately hairlined.

## CONFEDERATE STATES OF AMERICA

- 4383** Two (1961) Bashlow Restrike Confederate Cent Hub Impressions. 32 mm. The lot includes one obverse hub impression in silver, Bertram-B861-208a, and one reverse hub impression in bronze, Bertram-B861-206a. In 1961, Robert Bashlow purchased the original defaced dies for the Confederate cent from John J. Ford, Jr., and made transfers of them. This lot includes two hub impressions on oversize discs. 50 obverse and reverse hub impression sets were struck for both silver and bronze. Extremely rare 32mm hub impressions are also known in gold and platinum. (Total: 2 coins)

## WESTERN SOUVENIR GOLD

- 4384** 1904 Louisiana Purchase Exposition, 1/4 Louisiana Gold, 10 Stars, MS65 Deep Prooflike NGC. LFRQ-3, R.3. Die State 1.0. This influential private issue was sold by Farran Zerbe alongside gold commemorative dollars. This is a flashy canary-gold representative with mirrored mark-free surfaces. A shallow strike-through (as struck) is near star 5, and a narrow diagonal lamination passes through the 0 in the date. Die varieties are listed at MEHartGold.com.
- 4385** 1904 Louisiana Purchase Exposition, 1/4 Louisiana Gold, 10 Stars, MS66 Deep Prooflike NGC. LFRQ-3, R.3. Die State 1.0. A pristine caramel-gold representative. No flan detractions are present, and the fields are decidedly reflective. The strike is bold except on the S in LOUISIANA. The fleur-de-lis is partially lapped, as usual for this die pairing. Varieties are listed at MEHartGold.com.

## End of Session Three

## SESSION FOUR

### COLONIALS

- 7001** 1722 Rosa Americana Penny, UTILE, AU53 PCGS. PCGS Population: (4/37). NGC Census: (1/9). NGC ID# 2ASP, PCGS# 113

- 8073** 1910 Liberty Nickel — Struck 15% Off Center, Obverse Scratched — NGC Details. Unc.
- 8074** 1917-D Buffalo Nickel — Reverse Struck Thru — MS63 NGC.
- 8075** Undated Jefferson Nickel — Double Struck, First Strike 10% Off-Center, Second Strike 90% Off-Center — MS66 PCGS. Designated by PCGS as 1999-P, although no date or mintmark is present.
- 8076** 1964-D Washington Quarter — Struck on a Five Cent Planchet — MS66 PCGS.
- 8077** 1966 Half Dollar — Struck on a Quarter Planchet — AU55 NGC. 5.6 g.
- 8078** 1973-D Kennedy Half Dollar — Double Struck Indent — MS63 ANACS.

## LINCOLN

- 8079** 1865-Dated Broken Column MS66 Brown Deep Mirror Prooflike NGC. King-247, Cunningham-9-460C. Bronzed copper, 51 mm.

## SO-CALLED DOLLARS

- 8080** 1878 Wyoming Battle & Massacre Centennial MS64 PCGS. HK-120c, R.7. Gilt copper, 36 mm.
- 8081** 1893 World's Columbian Exposition, Globe Dollar, MS65 NGC. HK-174, Eglit-9, R.3. Aluminum, 44 mm.

- 8082** 1892 World's Columbian Exposition PR67 Deep Cameo PCGS Secure. HK-222a, R.5. Aluminum, 36 mm.

- 8083** 1893 World's Columbian Exposition, Official Medal, C. Emmerich & Co. Reverse, MS63 Brown NGC. HK-223, Eglit-19, R.5. Copper, 38 mm.

## CONFEDERATE STATES OF AMERICA

- 8084** (1961) Bashlow Restrike Confederate Cent Obverse Hub Impression. Bertram-B861-206a. Bronze, 32 mm. Robert Bashlow made 50 sets of obverse and reverse hub impressions in bronze. These are much rarer than his bronze cent restrikes.

## MEDALS AND TOKENS

- 8085** 1976 Bicentennial 1/3oz Gold PR67 Deep Cameo PCGS. PCGS Population: (9/19). NGC Census: (0/0). *From The Property of a Lady, Part II.* PCGS# 417392
- 8086** 1976 Bicentennial 1oz Gold PR69 Deep Cameo PCGS. PCGS Population: (3/0). NGC Census: (0/0). *From The Property of a Lady, Part II.* PCGS# 509552

## MINT SETS

- 8087** Uncertified 1947 Double Mint Set. The set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1947 (San Francisco did not strike half dollars that year). The coins are in original cardboard holders. The outer kraft envelope is present. The mailing envelope is present but the shipping address has been cut out. (Total: 28 coins)
- 8088** Uncertified 1948 Double Mint Set. The set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1948 (San Francisco did not strike half dollars that year). The coins are in original cardboard holders. The outer envelope is not original to the set. (Total: 28 coins)
- 8089** Uncertified 1949 Double Mint Set. The set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1949 (San Francisco did not strike quarters that year). The coins are in original cardboard holders. The outer kraft envelope is present but the mailing envelope is absent. (Total: 28 coins)
- 8090** Uncertified 1949 Double Mint Set. The set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1949 (San Francisco did not strike quarters that year). The coins are in original cardboard holders. The outer kraft envelope is not original to the set. (Total: 28 coins)

- 8091** Uncertified 1951 Double Mint Set. The set includes 30 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1951. The coins are in original cardboard holders. The mailing envelope is present but the outer kraft envelope is absent. (Total: 30 coins)

- 8092** Uncertified 1952 Double Mint Set. The set includes 30 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1952. The coins are in their original cardboard holders. The outer envelopes are not original to the set. (Total: 30 coins)

- 8093** Uncertified 1952 Double Mint Set. The set includes 30 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1952. The coins are in original cardboard holders. The outer kraft envelope is present but the mailing envelope is absent. (Total: 30 coins)

- 8094** Uncertified 1949 Double Mint Set. The set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1949 (San Francisco did not strike quarters that year). The coins are in original cardboard holders. The outer kraft envelope and mailing envelope (to Fort Wayne IN) are present. (Total: 28 coins)

## CERTIFIED MODERN PROOF SETS

- 8095** Five-Piece 1938 Proof Set PCGS. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR64 Red; nickel PR65; dime PR65; quarter — Scratch — PCGS Genuine, Unc Detail; half dollar PR65. (Total: 5 coins)
- 8096** Five-Piece 1939 Proof Set PCGS PR64 to PR66. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR64 Red; Reverse of 1938 nickel PR66; dime PR65; quarter PR64; half dollar PR64. (Total: 5 coins)
- 8097** Five-Piece 1940 Proof Set PCGS PR63 to PR66. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR66 Red and Brown; Reverse of 1940 nickel PR65; dime PR66; quarter PR63; half dollar PR64. (Total: 5 coins)
- 8098** Five-Piece 1940 Proof Set PCGS PR65 to PR67. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR65 Red; nickel PR66; dime PR66; quarter PR67; half dollar PR66. (Total: 5 coins)

**8099** 1940 Five-Piece Proof Set, PR65 to PR66 PCGS. The coins are housed in modern two-toned holders with consecutive certification numbers. Included are: cent PR65 Red; nickel PR66; dime PR66; quarter PR66; half dollar PR66. (Total: 5 coins)

**8100** 1940 Five-Piece Proof Set, PR65 to PR66 PCGS. The coins are housed in modern two-toned holders with consecutive certification numbers. Included are: cent PR65 Red; nickel PR65; dime PR66; quarter PR66; half dollar PR65. (Total: 5 coins)

**8101** Five-Piece 1941 Proof Set PCGS PR64 to PR65. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR64 Red; nickel PR65; dime PR65; quarter PR64; half dollar PR64. (Total: 5 coins) NGC ID# 3H34, PCGS# 3350

**8102** Five-Piece 1941 Proof Set PCGS PR62 to PR65. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR64 Red; nickel PR65; dime PR65; quarter PR64; No AW half dollar PR62. (Total: 5 coins)

**8103** Six-Piece 1942 Proof Set PCGS PR63 to PR67. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR63 Red and Brown; Type One nickel PR66; Type Two nickel PR66; dime PR67; quarter PR65; half dollar PR64. (Total: 6 coins)

**8104** Five-Piece 1942 Proof Set, PR64 to PR67 NGC. The set includes: cent PR64 Red and Brown, nickel — Type One — PR67, dime PR66, quarter PR65, and half dollar PR66. (Total: 5 coins)

**8105** Five-Piece 1942 Proof Set PCGS PR62 to PR65. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR62 Red; Type One nickel PR65; dime PR63; quarter PR63; half dollar PR63. (Total: 5 coins)

**8106** Five-Piece 1942 Proof Set PCGS. The coins are housed in separate holders bearing consecutive certification numbers. The set includes: cent PR65 Red; nickel PR65; dime PR65; quarter PR66; half dollar PR66. (Total: 5 coins)

**8107** 1942 Six-Piece Proof Set, PR63 to PR67 PCGS. The coins are housed in modern two-toned holders with consecutive certification numbers. Included are: cent PR65 Red; nickel — Type One — PR66; nickel — Type Two — PR67; dime PR64; quarter PR63; half dollar PR63. (Total: 6 coins)

*End of Auction*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
  - Nineteen and one-half percent (19.5%) on Comic and Movie Poster Auction lots;
  - Twenty percent (20%) on Currency, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
  - Twenty-two percent (22%) on Wine Auction lots;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
  - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999.....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999.....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999.....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999.....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999.....	\$20,000
\$500 - \$999.....	\$50	\$500,000 - \$999,999.....	\$25,000
\$1,000 - \$1,999.....	\$100	\$1,000,000 - \$1,999,999.....	\$50,000
\$2,000 - \$4,999.....	\$200	\$2,000,000 - \$9,999,999.....	\$100,000
\$5,000 - \$9,999.....	\$500	>= \$10,000,000.....	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by

any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due

# Terms and Conditions of Auction

- Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.
- Delivery; Shipping; and Handling Charges:**
32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
  - Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
  - Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.
- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:
- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
  - Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.
- Cataloging, Warranties and Disclaimers:**
38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.
- Release:**
43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.
- Dispute Resolution and Arbitration Provision:**
45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.
- Miscellaneous:**
52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.
- State Notices:**
- Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.
- Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.
- Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

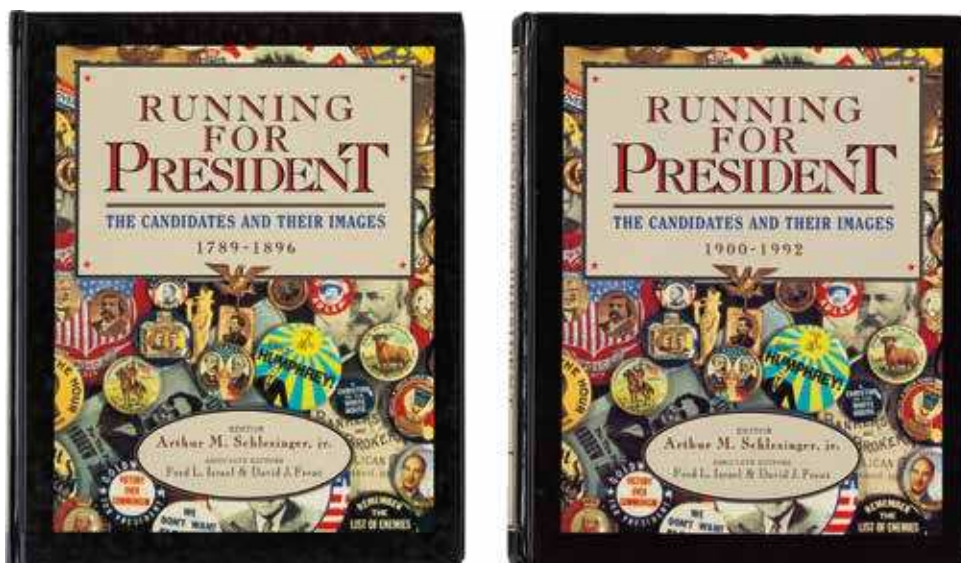

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

# *RUNNING FOR PRESIDENT:* *The Candidates and Their Images*

This landmark set of two volumes, published by Simon & Schuster in 1994, is perhaps the finest available introduction to American politics and the wide range of items used to promote candidates over the years. Edited by renowned historian Arthur M. Schlesinger, Jr. with the assistance of political history professor Fred L. Israel and Collector David Frent, these massive, coffee table-type books include essays on each presidential election campaign by various respected scholars. They're profusely illustrated with dazzling color images of items from the **David and Janice Frent Collection**.

Heritage has been able to secure a limited number of sets to offer to our clients. The original issue price was \$200, but we are able to offer these at just

**\$125 postpaid.**

These beautiful volumes are a must for aspiring and seasoned collectors alike. The supply is very limited, so order yours today!

Go to [HA.com](http://HA.com) and click the "Order our Auction Catalogs" link. Then go to **Special Books, hard bound editions and more**. Select *Running for President: The Candidates and Their Images* from the menu. You may also email [catalogorders@HA.com](mailto:catalogorders@HA.com) or call Customer Service at 866-835-3243 to order.
